Forward-Looking Statements

Certain statements contained in this report, including, but not limited to, statements regarding the development, growth and expansion of our business, our intent, belief or current expectations, primarily with respect to our future operating performance and the products we expect to offer and other statements contained herein regarding matters that are not historical facts, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are subject to the safe harbor created by those sections. Future filings with the Securities and Exchange Commission, or SEC, future press releases and future oral or written statements made by us or with our approval, which are not statements of historical fact, may also contain forward-looking statements. Because such statements include risks and uncertainties, many of which are beyond our control, actual results may differ materially from those expressed or implied by such forward-looking statements. Some of the factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements are set forth in the section entitled Risk Factors and in the section entitled Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere throughout this Annual Report on Form 10-K.

Readers are cautioned not to place undue reliance on these forward-looking statements. The forward-looking statements speak only as of the date on which they are made, and, except as required by applicable law, we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events.

PART I

Item 1. Business

We are a provider of storage systems for organizations requiring high reliability, high performance networked storage and data management solutions in an open systems architecture. Our storage solutions consist of integrated hardware and software products employing a modular system that allows end-users to add capacity as needed. Our broad range of products, from medium capacity stand-alone storage units to complete multi-terabyte storage area networks, provides end-users with a cost-effective means of addressing increasing storage demands without sacrificing performance. Our RIO Xtreme™ products provide high performance and large capacities for a broad variety of environments. Our SANnet® products have been distinguished by certification as Network Equipment Building System, or NEBS, Level 3 and are MIL-STD-810F (a military standard created by the U.S. government) compliant based on their ruggedness and reliability.

Our products and services are sold worldwide to end-users primarily through our channel partners, including original equipment manufacturers, or OEMs, systems integrators, or SIs, and value added resellers, or VARs. In May 2002, we entered into a three-year OEM agreement with Sun Microsystems, or Sun, to provide our storage hardware and software products for private label sales by Sun, and that agreement was recently extended until January 2011. The OEM agreement now provides for automatic renewals for additional one-year periods, unless either party notifies the other of its intent not to renew within the specified time period. We have been shipping our products to Sun for resale to Sun's customers since October 2002. We continue to develop new products for resale by Sun and other channel partners and expect to begin shipping several new products in 2006.

In February 2004, we acquired all the outstanding shares of Chaparral Network Storage, Inc., or Chaparral, a privately held storage system provider. As a result of the acquisition, we have designated our Colorado facility as a research and development hub and continue to use Chaparral's team of engineers and facility support personnel.

In July 2005, we entered into a Development and OEM Supply Agreement with Network Appliance, Inc. and Network Appliance B.V., collectively, NetApp. Under the agreement, we are designing and developing general purpose disk arrays for a variety of products to be developed for sale to NetApp. We believe that once

Table of Contents

sales under this agreement increase, which is expected to occur over the next several quarters, our revenue dependence upon Sun will be significantly reduced.

In January 2006, we entered into a Master Purchase Agreement with Fujitsu Siemens Computers GmbH and Fujitsu Siemens Computers (Holding) B.V., collectively, Fujitsu. Under the agreement, Dot Hill and Fujitsu will jointly develop storage solutions utilizing key components and patented technologies from Dot Hill. The agreement does not contain any minimum purchase commitments by Fujitsu. The initial agreement term is five years.

As part of our focus on indirect sales channels, we have outsourced substantially all of our manufacturing operations to Solectron Corporation, or Solectron. Our agreement with Solectron allows us to reduce sales cycle times and manufacturing infrastructure, enhance working capital and improve margins by taking advantage of Solectron's manufacturing and procurement economies of scale.

We were formed in 1999 by the combination of Box Hill Systems Corp., or Box Hill, and Artecon, Inc., or Artecon. We reincorporated in Delaware in 2001. Our website address is <http://www.dothill.com>. Information contained on our website does not constitute a part of this Annual Report on Form 10-K. Our Annual Reports on Form 10-K, our Quarterly Reports on Form 10-Q, our Current Reports on Form 8-K and all amendments to those reports that we file with the SEC are currently available free of charge to the general public through our website. These reports are accessible on our website promptly after being filed with the SEC and are also accessible through the SEC's website which may be found at <http://www.sec.gov>. In addition, you may read and copy the materials we file with the SEC at the SEC's Public Reference Room at 100F Street, N.E., Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

Industry Background

Growth of Data Storage

The efficient generation, storage and retrieval of digital data and content has become increasingly strategic and mission-critical to organizations. The volume of this data continues to grow rapidly, driven by several factors including:

- the proliferation of different types of data, including graphics, video, text and audio;

- the emergence of Internet-based communication protocols which enable users to rapidly duplicate, change and re-communicate data;

- new regulations and corporate policies requiring additional storage, such as compliance with the Sarbanes-Oxley Act of 2002, requirements imposed on healthcare companies and evolving regulatory requirements for financial services companies;

- the implementation of enterprise-wide databases containing business management information;

- gains in network bandwidth and the technology for managing and classifying large volumes of data; and

- the development of the information lifecycle management, or ILM, and the expansion of the disk-to-disk backup market, due to new applications of technologies that offer improved alternatives in the trade-off between performance and cost of ownership.

According to International Data Corporation, or IDC, the total storage capacity of all worldwide external, disk storage systems shipped will grow by 60.3% on a compounded annual basis between 2004 and 2009, reaching 8.3 million terabytes, or TB, in 2009.

Traditionally, storage vendors have designed products for markets differentiated by capacity, performance, price and feature set. These storage markets are typically identified as:

- Entry-level.* Entry-level storage products are designed for relatively low capacity, simple, stand-alone data storage needs for which price and simplicity are the main purchasing considerations. Vendors address this

Table of Contents

market primarily through an indirect sales channel approach employing retailers and VARs that assist information technology, or IT, managers in identifying, purchasing and installing the product.

Midrange. Midrange or departmental/workgroup storage products are designed for higher capacity and performance than entry-level products, but still feature ease of use and manageability, and are attached to a local server tailored to the needs of the local users. In this market, storage providers primarily sell their products to local IT managers through VARs and regional or small SIs.

High-end. High-end or data center storage products are designed for use by larger organizations where data storage and management is critical. These organizations require large capacity, high performance, automation, extreme reliability, continuous availability, systems interoperability and global service and support. In this market, storage providers sell their products with a combination of a direct sales force and indirect channels, including OEMs, large SIs and managed services providers.

In addition to dramatic increases in the overall volume of data, the storage market has been influenced by the following major trends:

Migration to Network Computing. Computing processes and architectures have evolved from mainframe computing systems toward a centrally managed network computing environment characterized by multiple operating systems and server platforms that must share information. Organizations require large-scale data storage solutions offering:

increased connectivity capabilities;

greater capacity;

higher performance;

the ability to share data among different platforms;

greater reliability; and

greater protection.

Organizations have responded by implementing tailored networks, optimized for data storage functions that facilitate data access and protection.

Increasing Focus on Total Cost of Ownership and Return on Investment. IT managers are increasingly focused on lowering the total cost of ownership and increasing their return on investment on each technology purchase. IT managers evaluate total cost of ownership and return on investment based upon several metrics, including initial purchase price, ease of provisioning, scalability, reliability and redundancy, ease of management, IT staff productivity, operating costs and after-sale service and support.

Storage Area Networks

Customers require storage systems that enable them to capture, protect, manage and archive data across a variety of storage platforms and applications without sacrificing performance. Historically, the Small Computer Systems Interface, or SCSI, was the primary method of connecting storage to servers. Subsequently, the Fibre Channel protocol was developed, which enables storage devices to connect to servers over a networked architecture, allowing end-users to connect multiple storage devices with high bandwidth throughput over long distances and centrally manage their storage environment. Centrally managed network storage systems are designed to provide connectivity across multiple operating systems and devices and may be based on either open or proprietary technology standards. IDC estimates that by 2009, worldwide storage systems hardware, software and services revenue will total \$79.6 billion, with disk storage systems representing 33% of this total, or \$26.3 billion.

IDC also estimates that worldwide storage systems hardware, software and services revenue will grow at a 5.4% compound annual growth rate, or CAGR, from \$61.1 billion in 2004 to \$79.6 billion in 2009, and that disk storage systems will grow at a 3.1% CAGR from \$22.6 billion in 2004 to \$26.3 billion in 2009.

Table of Contents

Storage area networks, or SANs, apply the benefits of a networked approach to data storage applications, allowing large blocks of data to move efficiently and reliably between multiple storage devices and servers without interrupting normal network traffic. SANs provide high scalability, connectivity and fault-tolerance, which permit IT managers to create and manage centralized pools of storage and backup devices with redundant data paths. With the addition of file-sharing software, SANs also allow multiple hosts to share consolidated data, dramatically reducing the need to duplicate, move and manage multiple files in a wide variety of data-intensive applications. SANs primarily employ Fibre Channel technology.

Demand for High Performance, Affordable Network Storage Solutions

Customers increasingly demand higher performing, affordable solutions to address expanding storage requirements, interoperability across disparate systems, the need for improved connectivity and rising data management costs. Customers are also demanding open standards architecture and modular systems that allow them to add capacity as needed. These demands have created significant opportunities for network storage system solutions that are affordable and provide high performance.

Reliability

Perhaps one of the most important requirements for many customers is that their stored data is available, and that the systems upon which they are stored be reliable. For example, internet-related customers can lose significant revenue for every minute their sites are inoperable and users can not access data from the web site. Similarly, the operations of corporate customers can grind to a halt if precious data is lost or unavailable. For these reasons, a storage system's reliability is often the critical factor in making a choice among storage systems.

Our Solutions

We offer a broad line of networked data storage solutions composed of standards-based hardware and software for open systems environments. Many of the performance attributes demanded by high-end/data center end-users are incorporated into our products, at prices that are suitable for the entry-level or midrange markets. Our end-users consist of entry-level, midrange and high-end/data center users, requiring cost-effective, easily managed, high performance, reliable storage systems. Our product lines range from approximately 146 gigabyte, or GB, to complete 32 TB storage systems. These offerings allow our products to be integrated in a modular building block fashion or configured into a complete storage solution, increasing OEM flexibility in creating differentiated products. Modular products also allow our indirect channel partners to customize solutions, bundling our products with value-added hardware, software and services.

Our products and services are intended to provide users with the following benefits:

Low Total Cost of Ownership and High Return on Investment. Our products combine reliability, flexibility, scalability and manageability into one of the smallest form factors in today's market. Our product set provides end-users with a low total cost of ownership due to our products' extreme reliability, the simplicity of our plug-and-play technology, decreased service and support costs and modular system approach that allow end-users to add capacity as needed. The modular nature of our products addresses our end-users' desire for a storage solution that does not require a large, upfront investment in a monolithic structure with unused capacity. In addition, we believe that our SANnet II storage systems are among the most space-efficient in the storage industry, maximizing our customers' limited space and significantly reducing their costs. By extending and leveraging our customers' installed storage system and architecture, we are able to provide solutions that offer both a lower total cost of ownership and a higher return on investment.

Modular Scalability. Our products are designed using a single cohesive modular architecture that allows customers to size and configure storage systems to meet their specific requirements. This modular architecture also allows customers to easily expand and, in some cases, reconfigure a system as their needs change, permitting them to extend the useful life of and better utilize their existing systems.

Table of Contents

Reliability. We believe that high reliability is essential to our customers due to the critical nature of the data being stored. We offer enterprise-class reliability in our product lines and integrate the latest in technological advances to meet expanding market opportunities. We design redundancy, high reliability, high performance and ruggedness into our SANnet II storage systems. Redundant components have the ability to be replaced while the system is online without interrupting network activity. All of our SANnet II disk array products currently offered are certified to operate under extreme climatic and other harsh operating conditions without degradation in reliability or performance, as attested to with the NEBS Level 3 and MIL-STD-810F certifications.

Open Systems, Multi-Platform Support. As an independent provider of storage products, we are well positioned to provide storage solutions on a variety of platforms and operating systems, including Linux, Unix and Windows. Our SANnet II line of systems supports multiple servers using different operating systems simultaneously. This multi-platform compatibility allows customers to standardize on a single storage system that can readily be reconfigured and redeployed at minimal cost as the customer's storage architecture changes.

Manageability. The ability to manage storage systems, particularly through software, is a key differentiator among storage vendors. SANscape®, our storage management software, enables customers to more easily manage and configure their storage systems and respond to their changing system requirements. In addition, SANpath®, our storage area networking software, further enhances performance and reliability.

Following the acquisition of Chaparral in February 2004, we began integrating the technology purchased into our products. We continue to offer customers existing Chaparral products and to integrate Chaparral's storage controller technology into new products and product lines.

Our Strategy

Our objective is to focus on profitable growth and capture an increasing share of the open systems storage solution market.

Focus on Profitable Growth. We have focused our business strategy in several ways to enhance our margins and increase profits.

Utilize indirect sales channels. We have adopted an indirect sales model to access end-user markets primarily through our OEM, SI, distributor and VAR channel partners. This allows us to benefit from our channel partners extensive direct and indirect distribution networks, installed customer base and greater sales, marketing and global service and support infrastructures.

Outsource manufacturing and service operations. We outsource substantially all of our manufacturing operations, which allow us to reduce manufacturing infrastructure, enhance working capital and improve margins. In addition, we encourage our channel partners to provide support and service directly to end-users.

Develop and Expand OEM Relationships. In May 2002, we entered into an OEM agreement with Sun under which Sun resells our SANnet II and SANscape products to its customers under Sun's private label. Our agreement with Sun was expanded in January and March 2004 to extend the term by three years and include additional products under the agreement. In September 2005, the agreement was extended to January 2011 and now provides for automatic renewals for additional one-year periods, unless either party notifies the other of its intent not to renew within the specified time period. In addition to Sun, we have other OEM partners, including Motorola, Inc., or Motorola, NEC Corp, or NEC, Fujitsu Siemens Computers and NetApp. We intend to continue seeking additional OEM relationships with other industry leaders to sell current and future products and expand the number of products offered to existing OEM partners to enable them to address new markets.

Grow and Extend Technology Leadership. We view our core competencies as the research, design and engineering of modular open storage systems. We believe that focused research and development on advanced, cost effective storage technologies is critical to our ongoing success. We intend to accelerate our expenditures on technology development and integration in order to offer more complete storage solutions and enhance our

Table of Contents

existing products to benefit our channel partners efforts to increase sales. We introduced our SANnet II Serial Advanced Technology Attachment, or SATA, during the second quarter of 2004. We introduced products integrating the Chaparral storage controller technology in 2005.

Pursue Strategic Alliances, Partnerships and Acquisitions. We will continue to evaluate and selectively pursue strategic acquisitions, alliances and partnerships that are complementary to our business. We believe that growth of the network storage market will create additional opportunities to expand our business. In addition, we believe the most efficient pursuit of these opportunities will be through strategic alliances and relationships, which allow us to leverage our existing design and marketing infrastructure while capitalizing on products, technologies and channels that may be available through potential strategic partners.

Our Products

We design our family of open systems storage hardware and software products with the reliability, flexibility and performance necessary to meet IT managers needs for easily scalable cost effective solutions. We currently offer storage systems in Fibre Channel, SCSI and SATA configurations. Our software offerings consist of storage management applications, which can manage any one or all of our storage system configurations, and performance enhancing software that we sell bundled with our storage systems or license separately to OEM customers.

All of our current SANnet II products are NEBS Level 3 certified and MIL-STD-810F compliant. NEBS guidelines were originally developed by Bellcore, now Telcordia, as ultra-high reliability standards for telecommunications equipment, including storage products. There are three levels of NEBS specifications. The most rugged and reliable equipment is rated carrier-class NEBS Level 3. The NEBS standards mandate a battery of tests designed to simulate the extreme conditions resulting from natural or man-made disasters and cover a range of product requirements for operational continuity. MIL-STD-810F is a military standard created by the U.S. Government. It involves a range of tests used to measure the reliability of equipment in extreme conditions, including physical impact, moisture, vibration and high and low temperatures. These standards address system ruggedness and reliability, which are important requirements for end-users.

Table of Contents

Our primary products include the following:

Product Line	Description	General Availability	Capacity	Target Market	Features
<i>Hardware</i>					
SANnet II SCSI	2 unit high, 12 to 36 drives, Ultra160 SCSI DAS storage	4Q02	146 GB to 10 TB using 300 GB SCSI drives	Entry-level and Midrange	Compact 3.5 inch high enclosures, fully redundant arrays of independent disks, or RAID, using SCSI connections, expandable storage capacity
SANnet II FC	2 unit high, 12 to 108 drives, 2 Gigabit Fibre Channel DAS and SAN storage	1Q03	146 GB to 32 TB using 300 GB FC drives	Entry-level and Midrange	Complete SAN solution in a single enclosure, scalable performance and capacity without interruptions
SANnet II Blade	1 unit high, drives, Ultra320 SCSI DAS	1Q04	146 GB to 1.2 TB using 300 GB SCSI drives	Entry-level	Highly rack-optimized design, connects to low-cost server SCSI ports
SANnet II SATA	2 unit high, 12 to 72 drives, 2 Gigabit Fibre Channel DAS and SAN storage	2Q04	800GB to 28 TB using 400 GB SATA drives	Entry-level and Midrange	Complete SAN solution in a single enclosure, scalable performance and capacity without interruptions
RIO Xtreme	5 unit high, 24 to 108 drives, 2 Gigabit Fibre Channel DAS and SAN storage	3Q04	1.75 TB to 32 TB using 300 GB FC drives	Midrange	Complete SAN solution, scalable performance and capacity without interruptions, optimized for high bandwidth applications
<i>Software</i>					
SANpath	Storage area networking software	1Q00	N/A	Entry-level and Midrange	Load balancing, multipathing, path fail over,

SANscape	Storage management software	1Q00	N/A	Entry-level and Midrange	path fail back and LUN masking Graphical and command line consoles with diagnostics, monitoring and reporting
----------	-----------------------------	------	-----	--------------------------	--

SANnet II Family of Storage Solutions. We began the introduction of our SANnet II family, during the fourth quarter of 2002. SANnet II provides enterprise class functionality to the entry-level and midrange storage markets at attractive prices. Through our SANnet II family of networked storage solutions, we offer compact, rugged RAID arrays that support SAN and direct attached storage, or DAS, configurations. The SANnet II products provide excellent up-time and are tested to operate in extreme environmental conditions. In addition, our SANnet II products share a common modular architecture and unified management system that integrates our SANpath and SANscape management software.

Table of Contents

SANnet II SATA. We launched our SANnet II SATA storage product in the second quarter of 2004. It is an entry-level storage product for IT managers requiring a compact near line storage solution.

SANnet II Blade. We launched our SANnet II Blade product during the first quarter of 2004. It is an entry-level ultra-compact storage solution for DAS architectures.

SANnet II FC. We launched our SANnet II FC storage product in the first quarter of 2003. It is a Fibre Channel-based online storage product for IT managers that require a SAN solution.

SANnet II SCSI. We launched our SANnet II SCSI product during the fourth quarter of 2002. It is an entry-level ultra-compact storage solution for DAS architectures.

RIO Xtreme Family of Storage Solutions. We introduced our newest generation of open systems storage products, our RIO Xtreme family, during the third quarter of 2004. RIO Xtreme provides high performance to the midrange storage markets at attractive prices. Through our RIO Xtreme family of networked storage solutions, we offer compact, fast arrays that support SAN and DAS configurations.

We acquired the controller technology used in RIO Xtreme in our acquisition of Chaparral.

Software. We develop application software technologies and products that are complementary to our overall storage solutions. Our host-based software is delivered as two primary application suites: SANpath and SANscape. Our software supports widely used open systems platforms, including Linux, Unix and Windows.

SANpath. SANpath is our storage area networking software that improves system performance and enables storage multipathing to ensure comprehensive reliability, availability and serviceability. Originally released during the first quarter of 2000, SANpath functions with SCSI or Fibre Channel host connections and storage hardware, including our SANnet II storage solutions deployed within either DAS or SAN architectures. All SANpath managed environments may be re-configured without interruptions to operating systems or applications. SANpath provides a number of features, such as: path failover, load balancing, dynamic volume management, the reassignment of storage volume without server restarts and secure storage volume assignment via access control lists.

SANscape. SANscape is our storage management software that facilitates the monitoring, configuration and maintenance of our SANnet II storage solutions using a Java-based graphical user interface and a variety of tools. Originally released during the first quarter of 2000, SANscape also creates an optional consolidated interface for the administration of SANpath. SANscape can be used to manage various storage solutions deployed throughout an organization. Its event tools monitor the storage solutions under management and report status changes to administrators by email, pager and other means.

Sales and Marketing

We market and distribute our products globally through our channel partners. Our channel partners consist of OEMs, SIs and VARs, which we use to cost-effectively pursue a wide range of potential end-users. We rely on multiple channels to reach end-user customers that range in size from small businesses to government agencies and large multinational corporations. We have established a channel partner program consisting of tiers that distinguishes and rewards our channel partners for their levels of commitment and performance. We maintain a sales and marketing organization operating out of our headquarters in Carlsbad, California, with regional offices in Germany, Japan, The Netherlands, Singapore and the United Kingdom as well as several smaller localized field sales offices throughout North America. Our products are sold under the Dot Hill brand name and under the names of our OEM customers. Generally, our customers have no minimum purchase requirements and have certain rights to extend, delay or cancel shipment of their orders without penalty. One of our customers has the right to return a percentage of product within 90 days of purchase, subject to certain terms and conditions.

OEMs

Our primary distribution channel is through OEMs. We have several OEM relationships and are actively developing new ones. Currently OEM partners include Motorola, NEC, NetApp, Fujitsu and Sun. OEMs

Table of Contents

generally resell our products under their own brand name and typically assume responsibility for marketing, sales, service and support. Our OEM relationships allow us to sell into geographic or vertical markets where each OEM has significant presence. For the years ended December 31, 2003, 2004 and 2005, OEM sales represented 85.9%, 89.6% and 91.3% of our net revenue, respectively. Sales to Sun accounted for 83.4%, 86.3% and 86.2% of our net revenue for the years ended December 31, 2003, 2004 and 2005, respectively.

Indirect Channels

Most of our non-OEM products are sold in conjunction with SIs, distributors and VARs who work closely with our sales force to sell our products to end-users. Our indirect channel partners generally resell our products under the Dot Hill brand name and share responsibility with us for marketing, sales, service and support. We believe indirect channel sales represent an attractive growth opportunity and intend to expand the scope of our indirect channel sales efforts by continuing to actively pursue additional indirect channel partners, both domestically and internationally.

Marketing

We support our OEM and other indirect channels with a broad array of marketing programs designed to build our brand name, attract additional channel partners and generate end-user demand. Our product marketing team, located in Carlsbad, California, focuses on product strategy, product development roadmaps, the new production introduction process, product lifecycle management, demand assessment and competitive analysis. The product marketing team also ensures that product development activities, product launches, channel marketing program activities and ongoing demand and supply planning occur on a well-managed, timely basis in coordination with our development, manufacturing and sales groups, as well as our sales channel partners. The groups work closely with our sales and research and development groups to align our product development roadmap to meet key channel technology requirements.

Our Relationship with Sun

In May 2002, we entered into a three-year OEM agreement with an annual renewal to provide our SANnet II and SANscape products for private label sales by Sun. This agreement was recently extended until January 2011 and now provides for automatic renewals for additional one-year periods, unless either party notifies the other of its intent not to renew within the specified time period. During October 2002, we began shipping to Sun the first product in our SANnet II family of systems, SANnet II SCSI, for resale to Sun's customers. We began shipping our SANnet II FC to Sun in March 2003, our SANnet II SATA to Sun in June 2004, and our SANnet II Blade to Sun in March 2004. We are developing new products targeted for sale by Sun and expect our relationship to continue to expand. There are no minimum purchase agreements or guarantees in our agreement with Sun, and the agreement does not obligate Sun to purchase its storage solutions exclusively from us.

As of December 31, 2005, Sun held warrants to acquire 1,394,269 shares or 3.1% of our common stock outstanding for prices ranging between \$2.97 and \$3.25 per share. Under the terms of the warrants, we are obligated to file a registration statement with respect to the resale of all of the shares of our common stock issuable upon exercise of the warrants.

We believe that our relationships with market leaders like Sun strengthen our credibility in the marketplace, validate our technology and enable us to sell our products to a much broader customer base. In addition to expanding and enhancing our relationships with current OEM customers and other types of channel partners, we intend to add additional OEM customers as a part of our overall strategy.

Because of our relationship with Sun, we are subject to seasonality related to Sun's historical sales patterns. Generally, sales for the second quarter of our fiscal year reflect the positive impact attributed to Sun's historically strong sales in the last quarter of its fiscal year. Conversely, sales for the third quarter of our fiscal year typically reflect the impact of decreased sales to Sun for the first quarter of its fiscal year.

Table of Contents

In July 2005, we entered into a Development and OEM Supply Agreement with Net App. Under the agreement, we are designing and developing general purpose disk arrays for a variety of products to be developed for sale to NetApp. We believe that once sales under this agreement increase, which is expected to occur over the next several quarters, our revenue dependence upon Sun will be significantly reduced.

In January 2006, we entered into a Master Purchase Agreement with Fujitsu. Under the agreement, Dot Hill and Fujitsu will jointly develop storage solutions utilizing key components and patented technologies from Dot Hill. The agreement does not contain any minimum purchase commitments by Fujitsu. The initial agreement term is five years.

Customer Service and Support

We recognize that providing comprehensive, proactive and responsive support is essential to establishing new customer accounts and securing repeat business. We provide comprehensive, 24 hours a day, seven days a week, 365 days a year, global customer service and support, either directly or through third party service providers, aimed at simplifying installation, reducing field failures, minimizing system downtime and streamlining administration. Through direct and third party service providers, we maintain a global network of professional engineers and technicians who provide telephonic technical support in various languages from strategically located global response centers on a 24 hour, seven day basis. In addition, we provide four hour on site service response on a global basis. We also offer all of our customers access to SANsolve, our web-hosted interactive support knowledge base that gives our customers the ability to find answers to technical questions as well as initiate and track all support issues.

We have also taken steps to better align our service and support structure with our indirect sales model. We have:

encouraged our channel partners to provide support and service directly to end-users. For example, Sun, our primary channel partner, provides all but the fifth and final level of support and service to its end-users; we provide that final level of support and service;

focused on providing the higher levels of support for a fee and the establishment of authorized service providers; and

engaged Anacomp, Inc., or Anacomp, to be the exclusive provider of on-site maintenance, warranty and non-warranty services for customers who purchase new maintenance agreements for our prior generation SANnet product family and other legacy products. Anacomp also manages our non-warranty customers and is the exclusive distributor of spare parts for our legacy products. In addition, Anacomp provides first and second level technical support for all of our product lines.

We plan to continue to maintain our current service offerings, including onsite support contracts. These services will be performed either directly by us, or through the increased use of third party service providers.

Research and Development

Our research and development team has been focused on developing innovative storage and networking products, storage management software for the open systems market and the integration of our recently acquired storage controller technology into Dot Hill designed storage systems. We have a history of industry firsts, including the first successfully commercialized hot-swappable SCSI disk array and RAID storage system for the Unix environment, and the first NEBS Level 3 certified and MIL-STD-810F tested line of storage systems. We believe that our success depends on our ability to continuously develop products that meet changing customer needs and to anticipate and proactively respond to highly evolving technology in a timely and cost-effective manner. We also generally design and develop our products to have a modular architecture that can be scaled to meet customer needs and modified to respond to technological developments in the open systems computing environment across product lines.

Table of Contents

Our areas of expertise include Linux, Unix and Windows driver and system software design, SAN storage resource management software design, storage system design and integration, controller and router design and technology and high-speed data interface design. We are currently focusing development efforts on our next-generation family of storage systems and on our software products. Projects include the launch of additional members of the SANnet II family of systems, improvements to our storage software offerings and next generation high-speed solutions that will take advantage of the latest transports and technologies.

Our research and development activities are directed by individuals with significant expertise and industry experience. Our total research and development expenses were \$12.0 million, \$18.0 million and \$23.6 million for the years ended December 31, 2003, 2004 and 2005, respectively.

Manufacturing and Suppliers

Since 2002, we have outsourced substantially all of the manufacturing operations for our SANnet I and SANnet II systems and RAID controllers to third party manufacturing companies. By outsourcing manufacturing we have been able to reduce expenses related to our internal manufacturing operations and focus on our research and development activities. Under our OEM agreement with Sun, Sun has the right to require that we use a third party to manufacture our products. This external manufacturer must meet Sun's engineering, qualification and logistics requirements.

Intellectual Property

Our success depends significantly upon our proprietary technology. We have received registered trademark protection for the marks SANnet®, SANpath®, SANscape®, Stratis®, Dot Hill®, Dot Hill Systems® and the Dot Hill logo. We have attempted to protect our intellectual property rights primarily through copyrights, trade secrets, employee and third party nondisclosure agreements and other measures. We have registered trademarks and will continue to evaluate the registration of additional trademarks as appropriate. We claim common law protection for, and may seek to register, other trademarks. In addition, we generally enter into confidentiality agreements with our employees and with key vendors and suppliers.

As of December 31, 2005, we had been awarded a total of 14 U.S. patents, two of which were awarded in 2005. Six patents generally cover RAID controller and SAN technology, which we believe could provide us with a competitive advantage. In addition, as of December 31, 2005, we had one allowed U.S. patent, and 38 filed U.S. patent applications. If we are unable to protect our intellectual property or infringe intellectual property of a third party, our operating results could be harmed.

In December 2005, we entered into a Patent Cross License with International Business Machines Corporation, or IBM. Pursuant to the Patent Cross License, each party acquired a nonexclusive worldwide license under certain of the other party's patents related to information handling systems. The license term extends for the remaining life of the patents and any new patents that are granted to either party through December 31, 2008. In connection with the Patent Cross License, we paid IBM a one-time licensing fee of \$2.5 million.

Competition

The storage market is intensely competitive and is characterized by rapidly changing technology. We compete primarily against independent storage system suppliers, including EMC Corp., or EMC, Hitachi Data Systems Corp., or Hitachi, Engenio Information Technologies, Inc., a subsidiary of LSI Logic Corp., or Engenio, and Xyratex Ltd., or Xyratex. We also compete with traditional suppliers of computer systems, including Dell Inc., Hewlett-Packard Company and IBM, which market storage systems as well as other computer products.

Many of our existing and potential competitors have longer operating histories, greater name recognition and substantially greater financial, technical, sales, marketing and other resources. As a result, they may have more advanced technology, larger distribution channels, stronger brand names, better customer service and access to more customers than we do. Other large companies with significant resources could become direct

Table of Contents

competitors, either through acquiring a competitor or through internal efforts. Additionally, a number of new, privately held companies are currently attempting to enter the storage market, some of which may become significant competitors in the future.

We believe the principal competitive factors in the storage systems market are:

product performance, features, scalability and reliability;

price;

product breadth;

timeliness of new product introductions; and

interoperability and ease of management.

We believe that we compete favorably in each of these categories. To remain competitive, we believe we must invest significant resources in developing new products, enhancing our current products and maintaining high quality standards and customer satisfaction.

Employees

As of December 31, 2005, we had 275 full-time employees, of whom 65 were engaged in sales and marketing, 106 in research and development, 55 in manufacturing, 34 in general management and administration and 15 in customer service and support. We have not had a work stoppage among our employees and none of our employees are represented under collective bargaining agreements. We consider our relations with our employees to be good.

Executive Officers of the Registrant at December 31, 2005

Name	Age	Position	Officer Since
James L. Lambert	52	Chief Executive Officer and Vice Chairman	August 1984*
Dana W. Kammersgard	50	President	August 1984*
Preston S. Romm	52	Chief Financial Officer, Vice President, Finance, Treasurer and Secretary	November 1999

* Note: In 1999, Artecon and Box Hill merged to form Dot Hill Systems Corp. Artecon was founded in 1984 by James Lambert and Dana Kammersgard. Both Mr. Lambert and Mr. Kammersgard were officers of Artecon from its inception until the merger, and have been officers of Dot Hill since that date. Effective March 1, 2006, Mr. Lambert retired as our Vice Chairman and Chief Executive Officer and Mr. Kammersgard was appointed as our Chief Executive Officer and President.

All officers are elected by our board of directors and serve at the pleasure of our board of directors as provided in our bylaws.

James L. Lambert has served as our Vice Chairman and Chief Executive Officer since August 2004. In March 2006, Mr. Lambert retired as our Vice Chairman and Chief Executive Officer. From August 2000 to August 2004 Mr. Lambert served as Director and our President, Chief Operating Officer and sole Chief Executive Officer. Since August 1999, he has also served as President, Chief Operating Officer and Co-Chief Executive Officer. A founder of Artecon, Mr. Lambert served as President, Chief Executive Officer and director of Artecon from its inception in 1984 until the merger of Box Hill and Artecon in August 1999. Mr. Lambert currently serves as a director of the Nordic Group of Companies, a group of privately held companies. He is also a member of World Presidents Organization. Mr. Lambert holds a B.S. and an M.S. in Civil and Environmental Engineering from University of Wisconsin,

Madison.

Table of Contents

Dana W. Kammersgard has served as our President since August 2004. In March 2006, Mr. Kammersgard was appointed as our Chief Executive Officer and President. From August 1999 to August 2004, Mr. Kammersgard served as our Chief Technical Officer. Mr. Kammersgard was a founder of Artecon and served as a director from its inception in 1984 until the merger of Box Hill and Artecon in August 1999. At Artecon, Mr. Kammersgard served in various positions since 1984, including Secretary and Senior Vice President of Engineering from March 1998 until August 1999 and as Vice President of Sales and Marketing from March 1997 until March 1998. Prior to co-founding Artecon, Mr. Kammersgard was the director of software development at CALMA, a division of General Electric Company. Mr. Kammersgard holds a B.A. in Chemistry from the University of California, San Diego.

Preston S. Romm has served as our Chief Financial Officer, Vice President, Finance and Treasurer since November 1999. Mr. Romm has also served as our Secretary since April 2001. From January 1997 to November 1999, Mr. Romm was Vice President of Finance, Chief Financial Officer and Secretary of Verteq, Inc., a privately-held semiconductor equipment manufacturer. From November 1994 to January 1997, Mr. Romm was Vice President of Finance and Chief Financial Officer of STM Wireless, Inc., a wireless data and voice equipment manufacturer. From July 1990 to November 1994, Mr. Romm was Vice President and Controller of MTI Technology Corporation, a provider of data storage systems. Since March 2004, Mr. Romm has served as a director of Netlist, Inc., a developer of high-density memory subsystems that use proprietary printed circuit board designs. Mr. Romm holds a B.S. in Accounting from the University of Maryland and a M.B.A. from American University.

Item 1A. Risk Factors

Our business, results of operations and financial condition may be materially and adversely affected due to any of the following risks. The risks described below are not the only ones we face. Additional risks we are not presently aware of or that we currently believe are immaterial may also impair our business operations. The trading price of our common stock could decline due to any of these risks. In assessing these risks, you should also refer to the other information contained or incorporated by reference in this Annual Report on Form 10-K, including our financial statements and related notes.

Under our OEM agreements with Sun, NetApp and others, our customers are not required to make minimum purchases or purchase exclusively from us, and we cannot assure you that our relationship with these key customers will not be terminated or will generate significant sales.

Our business is highly dependent on our relationship with Sun, and we believe will be dependent, in the future, on our relationship with NetApp, once sales to that customer begin to increase. Sales to Sun accounted for 86.3% and 86.2% of our net revenue for the years ended December 31, 2004 and 2005 respectively. Our OEM agreement with Sun had an initial term of three years and was extended in September 2005 for an additional five years through January 2011. Our OEM agreement with NetApp has a term of three years from the first commercial product shipments by NetApp, which is currently scheduled for the second half of 2006. There are no minimum purchase requirements or guarantees in our agreement with Sun or NetApp, the agreements do not obligate those customers to purchase storage solutions exclusively from us on a continual basis and either customer may cancel purchase orders submitted under the agreement at any time. Further, either customer may terminate the entire contract prior to the contract expiration date upon the occurrence of certain events that are not remedied within a specified cure period. The decision by these customers to terminate their respective contracts, to cease making purchases or to cancel purchase orders would cause our revenues to decline substantially. We cannot be certain if, when or to what extent any customer might cancel purchase orders, cease making purchases or elect not to renew the applicable contract upon the expiration of the current term. We expect to receive a substantial majority of our projected net revenue for the year ended December 31, 2006 from sales of our products to Sun and NetApp. We cannot assure you that we will achieve these expected sales levels. If we do not achieve the sales levels we expect to receive from these customers, our business and result of operations will be significantly harmed.

Table of Contents***Any decline in Sun's or NetApp's sales could harm our business.***

A substantial majority of our revenues are generated by sales to Sun, and we expect a substantial majority of our future revenues to be generated by a combination of sales to Sun and NetApp. If Sun's or NetApp's storage-related sales decline, our revenues will also decline and our business could be materially harmed. In addition, Sun's quarterly operating results typically fluctuate downward in the first quarter of their fiscal year when compared with the immediately preceding fourth quarter. Further, in June 2005, Sun acquired StorageTek, which is a fellow provider of storage systems. Additionally, Sun purchases products from Engenio. During October 2004, Engenio announced that it had broadened its OEM agreement with Sun. Under terms of the expanded agreement, Engenio will provide Sun with new modular storage technology and will co-develop future Sun storage products. While we do not currently believe that Engenio's relationship with Sun or Sun's acquisition of StorageTek will impact our sales or our relationship with Sun, we cannot predict with certainty the impact that these circumstances will have, if any, on our future sales to Sun.

In addition, it is likely that NetApp's sales of any storage products supplied to it by us will fluctuate on a quarterly or seasonal basis, which fluctuations will affect our financial results. Due to the infancy of the relationship, we can not be certain of what affect these fluctuations will have on our quarterly results, if any.

Lower than anticipated sales to NetApp could harm our business and render our expectations inaccurate, which could lead to a decrease in our stock price.

During the third quarter of 2005, we entered into a Development and OEM Supply Agreement with NetApp pursuant to which we will design and develop general purpose disk arrays for a variety of products to be developed for sale to NetApp. We expect that sales to NetApp will increase, and have predicted that in the future, sales to NetApp will reduce our dependence upon Sun significantly and increase our revenue substantially. There are no guarantees that our relationship with NetApp will be successful, or that we will achieve the expected volume of sales to NetApp. Our agreement with NetApp does not provide for minimum purchase quantities, and allows for NetApp to terminate the contract or stop purchasing from us upon the occurrence of certain events. If our sales to NetApp fall substantially short of our predictions and, to the extent that our current stock price reflects anticipated increases in our revenue or profits based on sales to NetApp, our stock price likely will fall.

We are dependent on sales to a relatively small number of customers.

While we intend to expand sales to channel partners, we expect to experience continued concentration in our customer base. As a result, if our relationship with any of our customers were disrupted, we would lose a significant portion of our anticipated net revenue. We cannot guarantee that our relationship with Sun, NetApp or other channel partners will expand or not otherwise be disrupted. Factors that could influence our relationship with significant channel partners, including Sun and NetApp, include:

our ability to maintain our products at prices that are competitive with those of other storage system suppliers;

our ability to maintain quality standards for our products sufficient to meet the expectations of our channel partners; and

our ability to produce, ship and deliver a sufficient quantity of our products in a timely manner to meet the needs of our channel partners.

None of our contracts with our existing channel partners, including Sun and NetApp, contain any minimum purchasing commitments. Further, we do not expect that future contracts with channel partners, if any, will include any minimum purchasing commitments. Changes in the timing or volume of purchases by our major customers could result in lower revenue. In addition, our existing contracts do not require our channel partners to purchase our products exclusively or on a preferential basis over the products of any of our competitors. Consequently, our channel partners may sell the products of our competitors.

Table of Contents

Our business and operating results may suffer if we encounter significant product defects due to the introduction of our new, integrated systems.

We completed the integration of RAID controller technology we obtained in our acquisition of Chaparral into certain of our storage systems resulting in the introduction of new, integrated systems.

Our new, integrated systems, as well as our legacy products, may contain undetected errors or failures, which may be discovered after shipment, resulting in a loss of revenue or a loss or delay in market acceptance, which could harm our business. Even if the errors are detected before shipment, such errors could result in the halting of production, the delay of shipments, loss of goodwill, tarnishment of reputation or a substantial decrease in revenue. Our standard warranty provides that if our systems do not function to published specifications, we will repair or replace the defective component or system without charge. Significant warranty costs, particularly those that exceed reserves, could adversely impact our business. In addition, defects in our products could result in our customers claiming property damages, consequential damages, personal injury or even death, which could also result in our loss of customers and goodwill. Any such claim could distract management's attention from operating our business and, if successful, result in damage claims against us that might not be covered by our insurance.

The loss of one or more suppliers could slow or interrupt the production and sales of our products.

Solectron, our third party manufacturer, relies on third parties to supply key components of our storage products. Many of these components are available only from limited sources in the quantities and quality we require. Solectron purchases the majority of our RAID controllers from Infortrend Technology, Inc., or Infortrend. Solectron may not be able to purchase the type or quantity of components from third party suppliers as needed in the future.

From time to time there is significant market demand for disk drives, RAID controllers and other components, and we may experience component shortages, selective supply allocations and increased prices of such components. In such event, we may be required to purchase our components from alternative suppliers. Even if alternative sources of supply for critical components such as disk drives and controllers become available, incorporating substitute components into our products could delay our ability to deliver our products in a timely manner. For example, we estimate that replacing Infortrend's RAID controllers with those of another supplier would involve several months of hardware and software modification, which could significantly harm our ability to meet our customers' orders for our products, damage our customer relationships and result in a loss of sales.

Manufacturing disruptions could harm our business.

We rely on Solectron to manufacture substantially all of our products. If our agreement with Solectron is terminated or if Solectron does not perform its obligations under our agreement, it could take several months to establish alternative manufacturing for our products and we may not be able to fulfill our customers' orders in a timely manner. Under our OEM agreement with Sun, Sun has the right to require that we use a third party to manufacture our products. Such an external manufacturer must meet Sun's engineering, qualification and logistics requirements. If our agreement with Solectron terminates, we may be unable to find another external manufacturer that meets Sun's requirements. With our increased use of third-party manufacturers, our ability to control the timing of shipments has continued and will continue to decrease. Delayed shipment could result in the deferral or cancellation of purchases of our products. Any significant deferral or cancellation of these sales would harm our results of operations in any particular quarter. Net revenue for a period may be lower than predicted if large orders forecasted for that period are delayed or are not realized, which could result in cash flow problems or a decline in our stock price.

Any shortage of disk drives or other components could increase our costs or harm our ability to manufacture and deliver our storage products to our customers in a timely manner.

Demand for disk drives recently surpassed supply, forcing drive manufacturers, including those who supply the disk drives integrated into many of our storage products, to manage allocation of their inventory. If

Table of Contents

this shortage is prolonged, we may be forced to pay higher prices for disk drives or may be unable to purchase sufficient quantities of disk drives to meet our customers' demand for our storage products in a timely manner or at all. Similar circumstances could occur with respect to other necessary components.

We may experience losses in the future.

For the years ended December 31, 2005, 2004 and 2003 we recorded net income of \$26.6 million, \$11.6 million and \$12.1 million, respectively; however, for the years ended December 31, 2002 and 2001, we incurred net losses of \$34.3 million and \$43.4 million, respectively. Further, our latest forecast predicts that we will incur a loss during our first quarter of 2006, fueled, in part, by an increased investment in research and development and the implementation of a new enterprise resource planning, or ERP, software package. We cannot assure you that we will be profitable in any future period. Our future capital requirements will depend on, and could increase substantially as a result of, many factors, including:

our plans to maintain and enhance our engineering, research, development and product testing programs;

the success of our manufacturing strategy;

the success of our sales and marketing efforts;

the extent and terms of any development, marketing or other arrangements;

changes in economic, regulatory or competitive conditions; and

costs of filing, prosecuting, defending and enforcing intellectual property rights.

Our available cash, cash equivalents and short-term investments as of December 31, 2005 totaled \$122.2 million. We presently expect cash, cash equivalents, short-term investments and cash generated from operations to be sufficient to meet our operating and capital requirements through at least the next twelve months. However, unanticipated events, such as Sun's or NetApp's failure to meet its product purchase forecast or extraordinary expenses or operating expenses in excess of our projections, may require us to raise additional funds. We may not be able to raise additional funds on commercially reasonable terms or at all. Any sales of our debt or equity securities in the future may have a substantial dilutive effect on our existing stockholders. If we are able to borrow funds, we may be required to grant liens on our assets to the provider of any source of financing or enter into operating, debt service or working capital covenants with any provider of financing that could hinder our ability to operate our business in accordance with our plans. As a result, our ability to borrow money on a secured basis may be impaired, and we may not be able to issue secured debt on commercially reasonable terms or at all.

Table of Contents

Our quarterly operating results have fluctuated significantly in the past and are not a good indicator of future performance.

Our quarterly operating results have fluctuated significantly in the past as shown in the following table and are not a good indicator of future performance (in millions).

Quarter	Net Revenue	Net Income (Loss)
First Quarter 2002	\$ 10.9	\$ (6.2)
Second Quarter 2002	11.2	(8.9)
Third Quarter 2002	8.6	(7.3)
Fourth Quarter 2002	16.3	(11.9)
First Quarter 2003	30.5	(1.5)
Second Quarter 2003	48.4	2.6
Third Quarter 2003	51.0	4.3
Fourth Quarter 2003	57.5	6.6
First Quarter 2004	47.9	(2.6)
Second Quarter 2004	69.0	6.7
Third Quarter 2004	57.0	3.5
Fourth Quarter 2004	65.5	4.0
First Quarter 2005	58.0	2.1
Second Quarter 2005	65.9	3.3
Third Quarter 2005	53.6	(1.3)
Fourth Quarter 2005*	56.3	22.5

* Includes deferred tax benefit from reversal of valuation allowance of \$25.3 million.

In addition, the announcement of financial results that fall short of the results anticipated by the public markets could have an immediate and significant negative effect on the trading price of our common stock in any given period.

We may have difficulty predicting future operating results due to both internal and external factors affecting our business and operations, which could cause our stock price to decline.

Our operating results may vary significantly in the future depending on a number of factors, many of which are out of our control, including:

the size, timing, cancellation or rescheduling of significant orders;

the cost of litigation and settlements involving intellectual property and other issues;

product configuration, mix and quality issues;

market acceptance of our new products and product enhancements and new product announcements or introductions by our competitors;

manufacturing costs;

deferrals of customer orders in anticipation of new products or product enhancements;

changes in pricing by us or our competitors;

our ability to develop, introduce and market new products and product enhancements on a timely basis;

hardware component costs and availability, particularly with respect to hardware components obtained from Infortrend, a sole-source provider;

our success in creating brand awareness and in expanding our sales and marketing programs;

Table of Contents

the level of competition;

potential reductions in inventories held by channel partners;

slowing sales of the products of our channel partners;

technological changes in the open systems storage market;

levels of expenditures on research, engineering and product development;

changes in our business strategies;

personnel changes; and

general economic trends and other factors.

If our customers delay or cancel orders or return products, our results of operations could be harmed.

We generally do not enter into long-term purchase contracts with customers, and customers usually have the right to extend or delay shipment of their orders, return products and cancel orders. As a result, sales in any period are generally dependent on orders booked and shipped in that period. Delays in shipment orders, product returns and order cancellations in excess of the levels we expect would harm our results of operations.

Our sales cycle varies substantially and future net revenue in any period may be lower than our historical revenues or forecasts.

Our sales are difficult to forecast because the open systems storage market is rapidly evolving and our sales cycle varies substantially from customer to customer. Customer orders for our products can range in value from a few thousand dollars to over a million dollars. The length of time between initial contact with a potential customer and the sale of our product may last from six to 24 months. This is particularly true during times of economic slowdown, for sales to channel partners and for the sale and installation of complex solutions. We have shifted our business strategy to focus primarily on channel partners, with whom sales cycles are generally lengthier, more costly and less certain than direct sales to end-users.

Additional factors that may extend our sales cycle, particularly orders for new products, include:

customers the amount of time needed for technical evaluations by customers;

customers budget constraints and changes to customers budgets during the course of the sales cycle;

customers internal review and testing procedures; and

our engineering work necessary to integrate a storage solution with a customer s system.

Our net revenue is difficult for us to predict since it is directly affected by the timing of large orders. Due to the unpredictable timing of customer orders, we may ship products representing a significant portion of our net sales for a quarter during the last month of that quarter. In addition, our expense levels are based, in part, on our expectations as to future sales. As a result, if sales levels are below expectations, our operating results may be disproportionately affected. We cannot assure you that we will experience sales growth in future periods.

The market for our products is subject to substantial pricing pressure that may decrease our margins.

Pricing pressures exist in the data storage market and have harmed and may, in the future, continue to harm our net revenue and earnings. These pricing pressures are due, in part, to continuing decreases in component prices, such as those of disks and RAID controllers. Decreases in component prices are customarily passed on to customers by storage companies through a continuing decrease in price of storage hardware systems. In addition, because we expect to continue to make most of our sales to a small number of customers, we are subject to continued pricing pressures from our customers, particularly our OEM customers. Pricing pressures are also due, in part, to the current difficult

economic conditions, which have led many companies in our industry to pursue a strategy of decreasing prices in order to win sales, the narrowing of

Table of Contents

functional differences among competitors, which forces companies to compete on price as opposed to features of products, and the introduction of new technologies, which leaves older technology more vulnerable to pricing pressures. To the extent we are unable to offset those pressures with commensurate cost reductions from our suppliers or by providing new products and features, our margins will be harmed.

Our success depends significantly upon our ability to protect our intellectual property and to avoid infringing the intellectual property of third parties, which has already resulted in costly, time-consuming litigation and could result in the inability to offer certain products.

We rely primarily on patents, copyrights, trademarks, trade secrets, nondisclosure agreements and common law to protect our intellectual property. For example, we have registered trademarks for SANnet, SANpath, SANscape, Stratis, Dot Hill, Dot Hill Systems and the Dot Hill logo. Despite our efforts to protect our intellectual property, unauthorized parties may attempt to copy aspects of our products or obtain and use information that we regard as proprietary. In addition, the laws of foreign countries may not adequately protect our intellectual property rights. Our efforts to protect our intellectual property from third party discovery and infringement may be insufficient and third parties may independently develop technologies similar to ours, duplicate our products or design around our patents.

On October 17, 2003, Crossroads Systems, or Crossroads, filed a lawsuit against us in the United States District Court in Austin, Texas alleging that our products infringe two United States patents assigned to Crossroads, Patent Numbers 5,941,972 and 6,425,035. We were served with the lawsuit on October 27, 2003. In March 2004, Chaparral was added as a party to the lawsuit. The patents involve storage routers and methods for providing virtual local storage. Patent Number 5,941,972 involves the interface of SCSI storage devices and the Fibre Channel protocol and Patent Number 6,425,035 involves the interface of any one-transport medium and a second transport medium. We believe that we have meritorious defenses to Crossroads' claims and intend to vigorously defend against them. We have already incurred, and expect to continue to incur, significant legal expenses in connection with this litigation. These defense costs, and other expenses related to this litigation, will be expensed as incurred and will negatively affect our future operating results. If we are not successful in our defense of Crossroads' claims, we may be required to pay significant amounts in the form of damages for past infringement. We also could be required to pay significant amounts in the form of licensing fees to allow us to continue to market certain products in the future, or Crossroads may deny us a license, which could lead to our inability to market certain products at all. Further, other third parties may assert additional infringement claims against us in the future, which would similarly require us to incur substantial license fees, legal fees and other expenses, and distract management from the operations of our business.

We expect that providers of storage products will increasingly be subject to infringement claims as the number of products and competitors increases. In addition to the formal claims brought against us by Crossroads, we receive, from time to time, letters from third parties suggesting that we may require a license from such third parties to manufacture or sell our products. We evaluate all such communications to assess whether to seek a license from the patent owner. We may be required to purchase licenses that could have a material impact on our business, or, we may not be able to obtain the necessary license from a third party on commercially reasonable terms, or at all.

Consequently, we could be prohibited from marketing products that incorporate the protected technology or incur substantial costs to redesign our products in a manner to avoid infringement of third party intellectual property rights.

The market for storage systems is intensely competitive and our results of operations, pricing and business could be harmed if we fail to maintain or expand our market position.

The storage market is intensely competitive and is characterized by rapidly changing technology. We compete primarily against independent storage system suppliers, including EMC, Hitachi, Engenio, and Xyratex.

Table of Contents

Many of our existing and potential competitors have longer operating histories, greater name recognition and substantially greater financial, technical, sales, marketing and other resources than us. As a result, they may have more advanced technology, larger distribution channels, stronger brand names, better customer service and access to more customers than we do. Other large companies with significant resources could become direct competitors, either through acquiring a competitor or through internal efforts. Additionally, a number of new, privately held companies are currently attempting to enter the storage market, some of which may become significant competitors in the future. Any of these existing or potential competitors may be able to respond more quickly to new or emerging technologies and changes in customer requirements, devote greater resources to the development, promotion and sale of products or deliver competitive products at lower prices than us.

We could also lose current or future business to any of our suppliers or manufacturers, some of which directly and indirectly compete with us. Currently, we leverage our supply and manufacturing relationships to provide a significant share of our products. Our suppliers and manufacturers are very familiar with the specific attributes of our products and may be able to provide our customers with similar products. We also expect that competition will increase as a result of industry consolidation and the creation of companies with new, innovative product offerings. For example, on June 2, 2005, Sun purchased StorageTek. Current and potential competitors have established or may establish cooperative relationships among themselves or with third parties to increase the ability of their products to address the needs of our prospective customers. Accordingly, it is possible that new competitors or alliances among competitors may emerge and rapidly acquire significant market share. Increased competition is likely to result in price reductions, reduced operating margins and potential loss of market share, any of which could harm our business. We believe that the principal competitive factors affecting the storage systems market include:

product performance, features, scalability and reliability;

price;

product breadth;

timeliness of new product introductions; and

interoperability and ease of management.

We cannot assure you that we will be able to successfully incorporate these factors into our products and compete against current or future competitors or that competitive pressures we face will not harm our business. If we are unable to develop and market products to compete with the products of competitors, our business will be materially and adversely affected. In addition, if major channel partners who are also competitors cease purchasing our products in order to concentrate on sales of their own products, our business will be harmed.

The open systems storage market is rapidly changing and we may be unable to keep pace with or properly prepare for the effects of those changes.

The open systems data storage market in which we operate is characterized by rapid technological change, frequent new product introductions, evolving industry standards and consolidation among our competitors, suppliers and customers. Customer preferences in this market are difficult to predict and changes in those preferences and the introduction of new products by our competitors or us could render our existing products obsolete. Our success will depend upon our ability to address the increasingly sophisticated needs of customers, to enhance existing products, and to develop and introduce on a timely basis, new competitive products, including new software and hardware, and enhancements to existing software and hardware that keep pace with technological developments and emerging industry standards. If we cannot successfully identify, manage, develop, manufacture or market product enhancements or new products, our business will be harmed. In addition, consolidation among our competitors, suppliers and customers may harm our business by increasing the resources of our competitors, reducing the number of suppliers available to us for our product components and increasing competition for customers by reducing customer-purchasing decisions.

Table of Contents

A significant percentage of our expenses are fixed, and if we fail to generate revenues in associated periods, our operating results will be harmed.

Although we have taken a number of steps to reduce operating costs, we may have to take further measures to reduce expenses if we experience operating losses or do not achieve a stable net income. A number of factors could preclude us from successfully bringing costs and expenses in line with our net revenue, such as the fact that our expense levels are based in part on our expectations as to future sales, and that a significant percentage of our expenses are fixed, which limits our ability to reduce expenses quickly in response to any shortfalls in net revenue. As a result, if net revenue does not meet our projections, operating results may be negatively affected. We may experience shortfalls in net revenue for various reasons, including:

significant pricing pressures that occur because of declines in selling prices over the life of a product or because of increased competition;

sudden shortages of raw materials or fabrication, test or assembly capacity constraints that lead our suppliers and manufacturers to allocate available supplies or capacity to other customers, which, in turn, may harm our ability to meet our sales obligations; and

the reduction, rescheduling or cancellation of customer orders.

In addition, we typically plan our production and inventory levels based on internal forecasts of customer demand, which is highly unpredictable and can fluctuate substantially. From time to time, in response to anticipated long lead times to obtain inventory and materials from our outside suppliers, we may order materials in advance of anticipated customer demand. This advance ordering has continued and may result in excess inventory levels or unanticipated inventory write-downs due to expected orders that fail to materialize.

Our success depends on our ability to attract and retain key personnel.

Our performance depends in significant part on our ability to attract and retain talented senior management and other key personnel. Our key personnel include Dana Kammersgard, our Chief Executive Officer and President, Patrick Collins, our Chief Operating Officer, and Preston Romm, our Chief Financial Officer. If any of these individuals were to terminate his employment with us, we would be required to locate and hire a suitable replacement. For example, James Lambert retired as our Vice Chairman and Chief Executive Officer in March 2006 and Mr. Kammersgard was appointed as our Chief Executive Officer to replace Mr. Lambert. Competition for attracting talented employees in the technology industry is intense. We may be unable to identify suitable replacements for any employees that we lose. In addition, even if we are successful in locating suitable replacements, the time and cost involved in recruiting, hiring, training and integrating new employees, particularly key employees responsible for significant portions of our operations, could harm our business by delaying our production schedule, our research and development efforts, our ability to execute on our business strategy and our client development and marketing efforts.

Many of our customer relationships are based on personal relationships between the customer and our sales representatives. If these representatives terminate their employment with us, we may be forced to expend substantial resources to attempt to retain the customers that the sales representatives serviced. Ultimately, if we were unsuccessful in retaining these customers, our net revenue would decline.

Our executive officers and directors and their affiliates own a significant percentage of our outstanding shares, which could prevent us from being acquired and adversely affect our stock price.

As of December 31, 2005, our executive officers, directors and their affiliates beneficially owned approximately 11.2% of our outstanding shares of common stock. These individual stockholders may be able to influence matters requiring approval by our stockholders, including the election of a majority of our directors. The voting power of these stockholders under certain circumstances could have the effect of delaying or preventing a change in control of us. This concentration of ownership may also make it more difficult or expensive for us to obtain financing. Further, any substantial sale of shares by these individuals could depress the market price of our common stock and impair our ability to raise capital in the future through the sale of our equity securities.

Table of Contents***Protective provisions in our charter and bylaws and the existence of our stockholder rights plan could prevent a takeover which could harm our stockholders.***

Our certificate of incorporation and bylaws contain a number of provisions that could impede a takeover or prevent us from being acquired, including, but not limited to, a classified board of directors, the elimination of our stockholders' ability to take action by written consent and limitations on the ability of our stockholders to remove a director from office without cause. Our board of directors may issue additional shares of common stock or establish one or more classes or series of preferred stock with such designations, relative voting rights, dividend rates, liquidation and other rights, preferences and limitations as determined by our board of directors without stockholder approval. In addition, we adopted a stockholder rights plan in May 2003 that is designed to impede takeover transactions that are not supported by our board of directors. Each of these charter and bylaw provisions and the stockholder rights plan gives our board of directors, acting without stockholder approval, the ability to prevent, or render more difficult or costly, the completion of a takeover transaction that our stockholders might view as being in their best interests.

The exercise of outstanding warrants may result in dilution to our stockholders.

Dilution of the per share value of our common stock could result from the exercise of outstanding warrants. As of December 31, 2005 there were outstanding warrants to purchase 1,720,696 shares of our common stock. The warrants have exercise prices ranging from \$2.97 to \$4.50 per share and expire at various dates through March 14, 2008. When the exercise price of the warrants is less than the trading price of our common stock, exercise of the warrants would have a dilutive effect on our stockholders. The possibility of the issuance of shares of our common stock upon exercise of the warrants could cause the trading price of our common stock to decline.

Our stock price may be highly volatile and could decline substantially and unexpectedly.

The trading price of our shares of common stock has been affected by the factors disclosed in this section as well as prevailing economic and financial trends and conditions in the public securities markets. Share prices of companies in technology-related industries, such as ours, tend to exhibit a high degree of volatility. The announcement of financial results that fall short of the results anticipated by the public markets could have an immediate and significant negative effect on the trading price of our shares in any given period. Such shortfalls may result from events that are beyond our immediate control, can be unpredictable and, since a significant proportion of our sales during each fiscal quarter tend to occur in the latter stages of the quarter, may not be discernible until the end of a financial reporting period. These factors may contribute to the volatility of the trading value of our shares regardless of our long-term prospects. The trading price of our shares may also be affected by developments, including reported financial results and fluctuations in trading prices of the shares of other publicly held companies, in our industry generally and our business segment in particular, which may not have any direct relationship with our business or prospects.

In the past, securities class action litigation has often been brought against a company following periods of volatility in the market price of its securities. For example, in late January and early February 2006, numerous complaints against us purporting to be class actions were filed in the United States District Court for the Southern District of California. The complaints allege violations of federal securities laws related to alleged inflation in our stock price in connection with various statements and alleged omissions to the public and to the securities markets and declines in our stock price in connection with the restatement of certain of our quarterly financial statements for fiscal year 2004, and seeking damages therefore. In addition, two complaints purporting to be derivative actions have been filed in California state court against certain of our directors and executive officers. These complaints are based on the same facts and circumstances described in the federal class action complaints and generally allege that the named directors and officers breached their fiduciary duties by failing to oversee adequately our financial reporting. Each of the complaints generally seek an unspecified amount of damages. The cases are in the very preliminary stages. We believe the allegations against us and certain of our directors and executive officers in this action are without merit and we intend to vigorously defend against these claims. Securities litigation could result in the expenditure of substantial

Table of Contents

funds, divert management's attention and resources, harm our reputation in the industry and the securities markets and reduce our profitability.

Future sales of our common stock may hurt our market price.

A substantial number of shares of our common stock may become available for resale. If our stockholders sell substantial amounts of our common stock in the public market, the market price of our common stock could decline. These sales might also make it more difficult for us to sell equity securities in the future at times and prices that we deem appropriate. In addition, we are obligated to file a registration statement with respect to the resale of up to 1,394,269 shares of our common stock issuable upon exercise of warrants held by Sun.

Geopolitical military conditions, including terrorist attacks and other acts of war, may materially and adversely affect the markets on which our common stock trades, the markets in which we operate, our operations and our profitability.

Terrorist attacks and other acts of war, and any response to them, may lead to armed hostilities and such developments would likely cause instability in financial markets. Armed hostilities and terrorism may directly impact our facilities, personnel and operations that are located in the United States and internationally, as well as those of our channel partners, suppliers, third party manufacturer and customers. Furthermore, severe terrorist attacks or acts of war may result in temporary halts of commercial activity in the affected regions, and may result in reduced demand for our products. These developments could have a material adverse effect on our business and the trading price of our common stock.

Compliance with Sarbanes-Oxley Act of 2002.

We are exposed to significant costs and risks associated with complying with increasingly stringent and complex regulation of corporate governance and disclosure standards. Changing laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, new SEC regulations and Nasdaq Stock Market rules require growing expenditure of management time and external resources. In particular, Section 404 of the Sarbanes-Oxley Act of 2002 requires management's annual review and evaluation of our internal controls, and attestations of the effectiveness of our internal controls by our independent auditors. This process has required us to hire additional personnel and outside advisory services and has resulted in significant accounting and legal expenses. We expect to continue to incur significant expense in future periods to comply with regulations pertaining to corporate governance as described above. In addition, we are in the process of implementing an ERP system. This process is extremely complicated, time consuming and expensive, and while we believe the implementation will be successful, it may not be sufficient to address all of our accounting system management needs.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. *Properties*

Our headquarters and principal research and marketing facility currently occupies approximately 67,200 square feet in Carlsbad, California, under a lease that expires in April 2006. In addition, we lease six international offices in five countries: Germany, Japan, the Netherlands, Singapore and the United Kingdom. With the acquisition of Chaparral, we added a research and development facility that occupies approximately 26,930 square feet in Longmont, Colorado, under a lease that expires in July 2007. We also have a lease for a facility in Corona, California for 7,160 square feet. In September 2005, we entered into an agreement to lease approximately 58,500 square feet of office space in Carlsbad, California. We will use this office space as our new corporate headquarters and principal research and marketing facility. Solectron manufactures substantially all of our products. We believe that with our existing facilities and Solectron's manufacturing capabilities, we have the capacity to meet any potential increases to our forecasted production requirements and therefore believe our facilities are adequate to meet our needs in the foreseeable future.

Table of Contents**Item 3. Legal Proceedings**

Crossroads Systems On October 17, 2003, Crossroads filed a lawsuit against us in the United States District Court in Austin, Texas, alleging that our products infringe two United States patents assigned to Crossroads, Patent Numbers 5,941,972 and 6,425,035. We were served with the lawsuit on October 27, 2003. Chaparral was added as a party to the lawsuit in March 2004. The patents involve storage routers and methods for providing virtual local storage. Patent Number 5,941,972 involves the interface of SCSI storage devices and the Fibre Channel protocol and Patent Number 6,425,035 involves the interface of any one-transport medium and a second transport medium. We believe that we have meritorious defenses to Crossroads' claims and are in the process of vigorously defending against them. However, we expect to incur significant legal expenses in connection with this litigation. These defense costs, and other expenses related to this litigation, will be expensed as incurred and will negatively affect our operating results.

Chaparral Securities Class Action In August 2004, a class action lawsuit was filed against, among others, Chaparral and a number of its former officers and directors in the United States District Court for the Central District of California. The lawsuit, among other things, alleges violations of federal and state securities laws and purports to seek damages on behalf of a class of shareholders who held interests in limited liability companies that had purchased, among other securities, Chaparral stock during a defined period prior to our acquisition of Chaparral. In May 2005, the Second Amended Complaint was dismissed with leave to amend. Plaintiffs filed a Third Amended Complaint, which the Court again dismissed with leave to amend in November of 2005 as to Chaparral and certain other defendants. Plaintiffs declined to amend within the proscribed period, and final judgment was entered in February 2006.

Plaintiffs filed a related action in the Superior Court of the State of California, Orange County, in December of 2005, alleging many of the same claims. The demurrer in that matter is due March 30, 2006. We believe that the claims against Chaparral and its former officers and directors are without merit and are in the process of vigorously defending against them. The outcome is uncertain and no amounts have been accrued as of December 31, 2005.

Dot Hill Securities Class Action In late January and early February 2006, numerous complaints against us purporting to be class actions were filed in the United States District Court for the Southern District of California. The complaints allege violations of federal securities laws related to alleged inflation in our stock price in connection with various statements and alleged omissions to the public and to the securities markets and declines in our stock price in connection with the restatement of certain of our quarterly financial statements for fiscal year 2004, and seeking damages therefore. In addition, two complaints purporting to be derivative actions have been filed in California state court against certain of our directors and executive officers. These complaints are based on the same facts and circumstances described in the federal class action complaints and generally allege that the named directors and officers breached their fiduciary duties by failing to oversee adequately our financial reporting. Each of the complaints generally seek an unspecified amount of damages. The cases are in the very preliminary stages. We believe the allegations against us and certain of our directors and executive officers in this action are without merit and we intend to vigorously defend against these claims.

In addition to the action discussed above, we are subject to various legal proceedings and claims, asserted or unasserted, which arise in the ordinary course of business. The outcome of the claims against us cannot be predicted with certainty. We believe that such litigation and claims will not have a material adverse effect on our financial condition or operating results.

Table of Contents**Item 4. Submission of Matters to a Vote of Security Holders**

None.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock is currently included for quotation on the Nasdaq National Market and is currently traded under the symbol HILL .

The following table sets forth for the periods indicated the per share range of the high and low closing sales prices or closing bid prices, of our common stock as reported on the Nasdaq National Market.

	Low	High
Year Ended December 31, 2004		
First Quarter	\$ 10.04	\$ 17.14
Second Quarter	7.24	11.36
Third Quarter	7.18	10.98
Fourth Quarter	6.25	8.89
Year Ended December 31, 2005		
First Quarter	5.57	7.62
Second Quarter	4.64	5.90
Third Quarter	5.25	6.73
Fourth Quarter	6.46	7.40

On March 8, 2006 the last reported sale price for our common stock on the Nasdaq National Market was \$6.86 per share. As of March 8, 2006, there were 44,565,084 shares of our common stock outstanding held by approximately 8,074 holders of record. We have never paid any cash dividends on our common stock, and currently intend to retain future earnings, if any, to the extent possible to fund the development and growth of our business. We do not anticipate paying any cash dividends on our common stock in the foreseeable future.

The information required to be disclosed by item 201(d) of Regulation S-K, *Securities Authorized for Issuance Under Equity Compensation Plans*, is included under Item 12 of Part III of this Annual Report on Form 10-K.

Table of Contents**Item 6. Selected Financial Data**

We derived the selected consolidated financial data presented below from our consolidated financial statements. You should read the selected consolidated financial data together with our consolidated financial statements and related notes thereto and with Management's Discussion and Analysis of Financial Condition and Results of Operations included elsewhere in this Annual Report on Form 10-K.

Statement of operations data for the years ended December 31, 2003, 2004 and 2005, and the balance sheet data as of December 31, 2004 and 2005, have been derived from our audited consolidated financial statements which are included elsewhere in this Annual Report on Form 10-K. Statement of operations data for the years ended December 31, 2001 and 2002 and balance sheet data as of December 31, 2001, 2002 and 2003 have been derived from our audited consolidated financial statements not included herein. All data in thousands except per share data.

	2001	2002	2003	2004(1)	2005
Statement of Operations Data:

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations
Cautionary Statement for Forward-Looking Information

Certain statements contained in this report, including, statements regarding the development, growth and expansion of our business, our intent, belief or current expectations, primarily with respect to our future operating performance and the products we expect to offer, and other statements regarding matters that are not historical facts, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are subject to the "safe harbor" created by these sections. Because such forward-looking statements are subject to risks and uncertainties, many of which are beyond our control, actual results may differ materially from those expressed or implied by such forward-looking statements. Some of the factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements can be found in Item 1A "Risk Factors" and elsewhere in this Annual Report on Form 10-K. Readers are cautioned not to place undue reliance on forward-looking statements. The forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update such statements to reflect events that occur or circumstances that exist after the date on which they are made.

The following discussion of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and notes thereto included elsewhere in this Annual Report on Form 10-K.

Overview

We are a provider of storage systems for organizations requiring high reliability, high performance networked storage and data management solutions in an open systems architecture. Our storage solutions consist of integrated hardware and software products employing a modular system that allows end-users to add capacity as needed. Our broad range of products, from medium capacity stand-alone storage units to complete turn-key, multi-terabyte storage area networks, provides end-users with a cost-effective means of addressing increasing storage demands without sacrificing performance.

Our products and services are sold worldwide to end-users primarily through our channel partners, including OEMs, SIs, and VARs. In May 2002, we entered into a three-year OEM agreement with Sun to provide our storage hardware and software products for private label sales by Sun. We have been shipping our products to Sun for resale to Sun's customers since October 2002. We have continued to develop new products primarily for resale by Sun, such as our SANnet II FC, which began shipping to Sun in March 2003 and our SANnet II SATA product which began shipping in June 2004. We are discussing with Sun the extent and timing of additional new product shipments. In September 2005, our existing OEM partner agreement with Sun, first announced in May 2002, was extended until January 2011 and now provides for automatic renewal for additional one-year periods unless either party notifies the

other of its intent not to renew within a certain

Table of Contents

period of time. We intend to continue expanding our non-OEM sales channels through SIs and VARs in order to decrease our revenue concentration with OEMs.

In July 2005, we entered into a Development and OEM Supply Agreement with NetApp. Under the agreement, we are designing and developing general purpose disk arrays for a variety of products to be developed for sale to NetApp. We believe that once sales under this agreement increase, which is expected to occur over the next several quarters, our revenue dependence upon Sun will be significantly reduced.

In January 2006, we entered into a Master Purchase Agreement with Fujitsu. Under the agreement, Dot Hill and Fujitsu will jointly develop storage solutions utilizing key components and patented technologies from .Dot Hill. The agreement does not contain any minimum purchase commitments by Fujitsu. The initial agreement term is five years.

As part of our focus on indirect sales channels, we have outsourced substantially all of our manufacturing operations to Solectron, a leading electronics manufacturing services company. Our agreement with Solectron allows us to reduce sales cycle times and manufacturing infrastructure, increase working capital and improve margins by taking advantage of Solectron's manufacturing and procurement economies of scale.

We derive revenue primarily from sales of our SANnet II family of products. In prior periods, we derived a significant portion of our revenue from sales of our legacy products and SANnet I family of products. Except for one OEM customer to whom we continue to sell our SANnet I products, we have transitioned all customers to our SANnet II products.

We derive a portion of our revenue from services associated with the maintenance service we provide for our installed products. In May 2003, we entered into a services agreement with Anacomp to provide all maintenance, warranty and non-warranty services for our SANnet I and certain legacy products.

Cost of goods sold includes costs of materials, subcontractor costs, salary and related benefits for the production and service departments, depreciation and amortization of equipment used in the production and service departments, production facility rent and allocation of overhead.

Sales and marketing expenses consist primarily of salaries and commissions, advertising and promotional costs and travel expenses. Research and development expenses consist primarily of project-related expenses and salaries for employees directly engaged in research and development. General and administrative expenses consist primarily of compensation to officers and employees performing administrative functions and expenditures for administrative facilities. Restructuring expenses consist primarily of employee severance, lease termination costs and other office closure expenses related to the consolidation of excess facilities.

Other income is comprised primarily of interest income earned on our cash, cash equivalents, short-term investments and other miscellaneous income and expense items. In 2004 our interest expense primarily relates to a \$6.0 million note payable that we assumed in connection with our acquisition of Chaparral. During August 2004, we made a payment of approximately \$7.2 million representing both principle and interest to the holder of the promissory note assumed in connection with our acquisition of Chaparral in February 2004. There are no further amounts due.

In August 1999, we merged with Artecon and we changed our name from Box Hill Systems Corp. to Dot Hill Systems Corp. We reincorporated in Delaware in 2001. Our headquarters is located in Carlsbad, California, and we maintain international offices in Germany, Japan, the Netherlands, Singapore and the United Kingdom.

On February 23, 2004, we completed the acquisition of Chaparral, a privately held developer of specialized storage appliances as well as high-performance, mid-range RAID controllers and data routers. The total transaction cost of approximately \$67.6 million consisted of a payment of approximately \$62 million in cash, the assumption of approximately \$4.1 million related to obligations due certain employee covered by change in control agreements, approximately \$0.8 million of direct transaction costs and approximately \$0.7 million of accrued integration costs. We believe the acquisition of Chaparral has enabled us to increase

Table of Contents

the amount of proprietary technology within our storage systems, broaden our product line and diversify our customer base.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and use judgment that may impact the reported amounts of assets, liabilities, revenues, expenses and related disclosure of contingent assets and liabilities. As a part of our on-going internal processes, we evaluate our estimates, including those related to inventory write-downs, warranty cost accruals, revenue recognition, bad debt allowances, long-lived assets valuation, goodwill and intangible assets valuation, income taxes, including deferred income tax asset valuation, litigation and contingencies. We base these estimates upon both historical information and other assumptions that we believe are valid and reasonable under the circumstances. These assumptions form the basis for making judgments and determining the carrying values of assets and liabilities that are not apparent from other sources. Actual results could vary from those estimates under different assumptions and conditions.

We believe that the policies set forth below may involve a higher degree of judgment and complexity in their application than our other accounting policies and represent the critical accounting policies used in the preparation of our financial statements.

Revenue Recognition

Revenues are recognized pursuant to applicable accounting standards, including Securities and Exchange Commission Staff Accounting Bulletin No. 104, *Revenue Recognition* and Statement of Position No. 97-2, *Software Revenue Recognition* (SOP 97-2).

We recognize revenue for non-software product sales upon transfer of title to the customer. Reductions to revenue for estimated sales returns are also recorded at that time. These estimates are based on historical sales returns, changes in customer demand and other factors. If actual future returns and allowances differ from past experience, additional allowances may be required. Certain of our sales arrangements include multiple elements. Generally, these arrangements include delivery of the product, installation, training and product maintenance. Maintenance related to product sales entitles the customer to basic product support and significantly greater response time in resolving warranty related issues. We allocate revenue to each element of the arrangement based on its relative fair value. For maintenance contracts this is typically the price charged when such contracts are sold separately or renewed. Because professional services related to installation and training can be provided by other third party organizations, we allocate revenue related to professional services based on rates that are consistent with other like companies providing similar services, i.e., the market rate for such services. Revenue from product maintenance contracts is deferred and recognized ratably over the contract term, generally twelve months. Revenue from installation, training and consulting is recognized as the services are performed.

For software sales, we apply SOP 97-2, whereby revenue is recognized from software licenses at the time the product is delivered, provided there are no significant obligations related to the sale, the resulting receivable is deemed collectible and there is vendor-specific objective evidence supporting the value of the separate contract elements. For arrangements with multiple elements, we allocate revenue to each element using the residual method based on vendor specific objective evidence of the undelivered items. A portion of the arrangement fee equal to the fair value of the undelivered elements, typically software maintenance contracts, is deferred and recognized ratably over the contract term, generally twelve months. Vendor specific objective evidence is based on the price charged when the element is sold separately. A typical arrangement includes a software-licensing fee and maintenance agreement.

The cost of maintenance contracts entered into with third parties is deferred and recognized as expense over the contract term. The balance of deferred costs for maintenance contracts is included in prepaid expenses, other current assets and other long-term assets.

Table of Contents***Valuation of Inventories***

Inventories are comprised of purchased parts and assemblies, which include direct labor and overhead. We record inventories at the lower of cost or market value, with cost generally determined on a first-in, first-out basis. We perform periodic valuation assessments based on projected sales forecasts and analyzing upcoming changes in future configurations of our products and record inventory write-downs for excess and obsolete inventory. Although we strive to ensure the accuracy of our forecasts, we periodically are faced with uncertainties. The outcomes of these uncertainties are not within our control, and may not be known for prolonged periods of time. Any significant unanticipated changes in demand or technological developments could have a significant impact on the value of our inventories and commitments, and consequently, on our operating results. If actual market conditions become less favorable than those forecasted, additional inventory write-downs might be required, adversely affecting operating results.

Valuation of Goodwill

We review goodwill for impairment annually and whenever events or changes in circumstances indicate the carrying value of an asset may not be recoverable in accordance with Statement of Financial Accounting Standards, or SFAS, No. 142, *Goodwill and Other Intangible Assets*. The provisions of SFAS No. 142 require that a two-step impairment test be performed on goodwill. In the first step, we compare the fair value of each reporting unit to its carrying value. Our reporting units are consistent with the reportable segments identified in the notes to our consolidated financial statements. We determine the fair value of our reporting units using the income approach. Under the income approach, we calculate the fair value of a reporting unit based on the present value of estimated future cash flows. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not impaired and we are not required to perform further testing. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value of the reporting unit, then we must perform the second step in order to determine the implied fair value of the reporting unit's goodwill and compare it to the carrying value of the reporting unit's goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, then we must record an impairment loss equal to the difference.

The income approach is dependent on a number of factors including estimates of future market growth and trends, forecasted revenue and costs, expected periods the assets will be utilized, appropriate discount rates and other variables. We base our fair value estimates on assumptions we believe to be reasonable, but which are unpredictable and inherently uncertain. Actual future results may differ from those estimates.

Deferred Income Taxes

We account for income taxes under the asset and liability method, under which deferred tax assets, including net operating loss carryforwards, and liabilities are determined based on temporary differences between the book and tax basis of assets and liabilities. We periodically evaluate the likelihood of the realization of deferred tax assets, and adjust the carrying amount of the deferred tax assets by the valuation allowance to the extent we believe a portion will be realized. We consider many factors when assessing the likelihood of future realization of our deferred tax assets, including our recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income, the carryforward periods available to us for tax reporting purposes, and other relevant factors.

Due to our equity transactions, an ownership change, within the meaning of Internal Revenue Code, or IRC, Section 382, occurred on September 18, 2003. As a result, annual use of our federal net operating loss and credit carry forwards is limited to (i) the aggregate fair market value of Dot Hill Systems Corp. immediately before the ownership change multiplied by (ii) the long-term tax-exempt rate (within the meaning of IRC Section 382 (f)) in effect at that time. The annual limitation is cumulative and, therefore, if not fully utilized in a year, can be utilized in future years in addition to the Section 382 limitation for those years.

As a result of our acquisition of Chaparral, a second ownership change, within the meaning of Internal Revenue Code Section 382, occurred on February 23, 2004. As a result, annual use of the acquired

Table of Contents

Chaparral's federal net operating loss and credit carry forwards may be limited. The annual limitation is cumulative and, therefore, if not fully utilized in a year, can be utilized in future years in addition to the Section 382 limitation for those years.

At December 31, 2005, based on the weight of available evidence, including cumulative profitability in recent years, we determined that it was more likely than not that a portion of our U.S. deferred tax assets would be realized and, at December 31, 2005, eliminated \$47.1 million of valuation allowance associated with our U.S. deferred tax assets. The elimination of valuation allowance resulted in a \$16.4 million decrease to goodwill to the extent of our acquired net deferred tax assets, a \$5.4 million increase to equity for net operating losses arising from stock option deductions, with the remaining \$25.3 million recognized as a one-time non-cash increase in earnings for the year ended December 31, 2005. As a result of our elimination of valuation allowance associated with U.S. deferred tax assets, our effective tax rate in subsequent periods is likely to more closely resemble the applicable federal and state statutory tax rates.

Stock-Based Compensation

Through December 31, 2005, we accounted for stock-based compensation under the intrinsic method in accordance with Accounting Principles Board, or APB, Opinion No. 25, *Accounting for Stock Issued to Employees*. Under the intrinsic method, we did not record any expenses as the exercise price of stock options granted equalled the fair market value of our stock at the date of grant.

On December 1, 2005, the Company accelerated vesting of certain unvested and out-of-the-money stock options with exercise prices equal to or greater than \$6.74 per share that were previously awarded under the Company's equity compensation plans to its employees. These options were accelerated to avoid recording future compensation expense with respect to such options following adoption of SFAS No. 123(R) as discussed below. The Company's management believes that because such options had exercise prices in excess of the current market value of the Company's stock, the options were not achieving their original objective. The acceleration of vesting was effective for stock options outstanding as of December 1, 2005. Options to purchase 0.6 million shares of common stock were subject to the acceleration and the weighted average exercise price of the options subject to the acceleration was \$11.71. Due to this acceleration, an additional \$2.8 million is included in the pro forma stock-based compensation expense for the year ended December 31, 2005.

Commencing January 1, 2006, we will adopt SFAS No. 123(R), *Stock-Based Compensation*, which requires us to record stock compensation expense for equity based awards granted, including stock options, for which expense will be recognized over the service period of the equity based award based on the fair value of the award at the date of grant. The actual effects of adopting SFAS No. 123(R) will be dependent on numerous factors including, but not limited to, the valuation model chosen by us to value stock-based awards; the assumed award forfeiture rate; the accounting policies adopted concerning the method of recognizing the fair value of awards over the requisite service period; and the transition method chosen for adopting SFAS No. 123(R). See the Recent Accounting Pronouncements section below for further information.

Contingencies

We are subject to various legal proceedings and claims and tax matters, the outcomes of which are subject to significant uncertainty. SFAS No. 5, *Accounting for Contingencies*, requires that an estimated loss from a loss contingency should be accrued by a charge to income if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. Disclosure of a contingency is required if there is at least a reasonable possibility that a loss has been incurred. We evaluate, among other factors, the degree of probability of an unfavorable outcome and the ability to make a reasonable estimate of the amount of loss. Changes in these factors could materially impact our financial position or our results of operations. See Note 17 to our Consolidated Financial Statements for further information regarding contingencies.

Table of Contents**Results of Operations**

The following table sets forth certain items from our statements of operations as a percentage of net revenue for the periods indicated:

	Year Ended December 31		
	2003	2004	2005
Net revenue	100.0%	100.0%	100.0%
Cost of goods sold	76.0	75.1	77.1
Gross profit	24.0	24.9	22.9
Operating expenses:			
Sales and marketing	7.5	7.0	8.2
Research and development	6.4	7.5	10.1
General and administrative	4.0	4.2	5.5
In process research and development		2.0	
Restructuring expenses		(0.2)	
Operating income (loss)	6.1	4.4	(0.9)
Other income, net	0.4	0.6	1.5
Income tax expense (benefit)		0.1	(10.8)
Net income	6.5%	4.8%	11.4%

(percentages may not aggregate due to rounding)

Year Ended December 31, 2005 Compared to Year Ended December 31, 2004***Net Revenue***

Net revenue decreased \$5.6 million, or 2.3%, to \$233.8 million for the year ended December 31, 2005 compared to \$239.4 million for the year ended December 31, 2004. The decrease in net revenue was primarily attributable to a decrease in revenue from our channel partner, Sun, as a result of a change in product mix. Our sales to Sun accounted for 86.2% or \$201.5 million of our net revenue for the year ended December 31, 2005 compared to 86.3% or \$206.6 million for the year ended December 31, 2004. Total Fibre Channel units shipped were 10,343 for the year ended December 31, 2005 compared to 10,994 fibre channel units shipped for the year ended December 31, 2004. 13,563 SCSI units were shipped during the year ended December 31, 2005 compared to 14,200 SCSI units for the year ended December 31, 2004. 5,325 Blade units were shipped during the year ended December 31, 2005 compared to 2,202 Blade units shipped for the year ended December 31, 2004. 2,780 SATA units were shipped during the year ended December 31, 2005 compared to 1,403 SATA units shipped for the year ended December 31, 2004. In March 2004, we announced that our existing OEM partner agreement with Sun was expanded to include new advanced technology storage products to be designed and engineered by us to Sun's specifications. Our SATA product began shipping in the second quarter of 2004 while our Blade product began shipping in the first quarter of 2004. We recorded revenue of approximately \$35.7 million and \$15.7 million related to SATA and Blade products during the years ended December 31, 2005 and 2004, respectively. Non-Sun revenue was \$32.3 million for the year ended December 31, 2005 compared to \$32.8 million for the year ended December 31, 2004.

Cost of Goods Sold

Cost of goods sold increased \$0.3 million, or 0.2%, to \$180.2 million for the year ended December 31, 2005 compared to \$179.9 million for the year ended December 31, 2004. As a percentage of net revenue, cost of goods sold increased to 77.1% for the year ended December 31, 2005 from 75.1% for the year ended December 31, 2004. The increase in the dollar amount of cost of goods sold was primarily attributable to

Table of Contents

greater volume of product sales during the year ended December 31, 2005 compared to the year ended December 31, 2004.

The increase in cost of goods sold, as a percentage of our net revenue was primarily attributable to an increase of salaries from an increase in staffing, an increase of depreciation expense resulting from increased equipment purchases related to ramp up activities at an Asian location of our contract manufacturer, the disposal of certain production related fixed assets and the failure to obtain the usual disk drive price reductions due to the industry-wide shortage of disk drives.

Gross Profit

Gross profit decreased \$5.9 million, or 9.9%, to \$53.6 million for the year ended December 31, 2005 compared to \$59.5 million for the year ended December 31, 2004. As a percentage of net revenue, gross profit decreased to 22.9% for the year ended December 31, 2005 from 24.9% for the year ended December 31, 2004. The decrease in the dollar amount of gross profit is attributable to increased spending related to the items discussed above.

The decrease in gross profit as a percentage of our net revenue for year ended December 31, 2005 when compared to the year ended December 31, 2004 can be attributed, in part, to continued pricing pressures on our mature products, to changes in customer and product mix, to lower than anticipated sales volume and the failure to obtain the usual disk drive price reductions due to the industry-wide shortage of disk drives. Our gross profit margin was also negatively impacted for the year ended December 31, 2005 by sales of our SATA product that presently have a significantly lower gross profit margin than either our Fibre Channel or SCSI products. Gross profit margin was also negatively impacted by a full twelve months of amortization of finite lived intangible assets acquired in the Chaparral transaction for the year ended December 31, 2005 as compared to 10 months of amortization for the year ended December 31, 2004. Amortization of finite lived intangible assets acquired in the Chaparral transaction was \$2.2 million for the year ended December 31, 2005 compared to \$1.9 million for the year ended December 31, 2004. The year of 2004 reflects only ten months of amortization due as a result of the Chaparral acquisition in late February 2004.

Sales and Marketing Expenses

Sales and marketing expenses increased \$2.3 million, or 13.7%, to \$19.1 million for the year ended December 31, 2005 compared to \$16.8 million for the year ended December 31, 2004. As a percentage of net revenue, sales and marketing expenses increased to 8.2% for the year ended December 31, 2005 from 7.0% for the year ended December 31, 2004. The increase in sales and marketing expenses is partially attributable to a full year of salaries and related expenses for those employees added in connection with our acquisition of Chaparral in late February 2004 compared to ten months for the year ended December 31, 2004. We also incurred additional advertising and other related marketing expenses of \$1.0 million related to additional sales activities incurred by our European subsidiary as we continue to pursue an increased market share in Europe and our continue in our effort to grow our non-OEM commercial sales. We expect sales and marketing expenses for the year ending December 31, 2006 will exceed spending levels incurred during 2005 due to our continued efforts to increase our market share and expand both our non-OEM commercial sales and channel partners.

Research and Development Expenses

Research and development expenses increased \$5.6 million, or 31.1%, to \$23.6 million for the year ended December 31, 2005 from \$18.0 million for the year ended December 31, 2004. As a percentage of net revenue, research and development expenses increased to 10.1% for the year ended December 31, 2005 from 7.5% for the year ended December 31, 2004. The increase in research and development expenses is partially attributable to an increase in salaries, facility related expenses and all other expenses associated with our acquisition of Chaparral in late February 2004. Additionally, costs associated with the research and development of new product offerings increased by \$3.9 million and was partially offset by a reduction in costs of \$1.1 million related to our SATA product which was released for sale early in the second quarter of 2004.

Table of Contents

We also incurred additional expenses of \$0.9 million related to test equipment and a loss on the disposal of fixed assets. We expect research and development expenses for the year ending December 31, 2006 will exceed spending levels incurred during 2005 due to activities related to future product offerings.

General and Administrative Expenses

General and administrative expenses increased \$2.9 million, or 29.0%, to \$12.9 million for the year ended December 31, 2005 compared to \$10.0 million for the year ended December 31, 2004. As a percentage of net revenue, general and administrative expenses were 5.5% for the year ended December 31, 2005 compared to 4.2% for the year ended December 31, 2004. The increase is partially attributable to an increase in bad debt expense of \$0.6 million which relates to our subsidiaries in Europe, an increase of \$0.4 million related to the cost of compliance with the Sarbanes-Oxley Act of 2002, an increase of \$0.4 million related to contract labor, and an increase of \$0.2 million in legal fees. Additionally, the year ended December 31, 2005 included a full year of compensation paid to our president, formerly our chief technology officer, that had been classified as research and development expense for the first nine months of the year ended December 31, 2004. We also incurred expenses of \$0.3 million related to severance and retirement expenses in our subsidiary in Japan and \$0.3 million related to the implementation of a new ERP software package which became operational in January 2006. We expect general and administrative expenses for the year ending December 31, 2006 will exceed spending levels incurred during 2005 due to additional planned employees and post implementation expenses related to our new ERP software package.

Restructuring expenses

In June 2004, we negotiated an exit from our lease of the 10th floor of our former New York City office, which eliminated our related rent exposure. Accordingly, during the year ended December 31, 2004, we recorded a reduction of approximately \$0.5 million to our restructuring reserve previously established in connection with the closure of our New York City office. Additionally, we have evaluated certain factors pertaining to our remaining sublease tenant; accordingly, during the three months ended June 30, 2004, we recorded an additional restructuring accrual of approximately \$0.1 million. We are not aware of any further unresolved issues or additional liabilities that may result in a significant adjustment to restructuring expenses accrued as of December 31, 2005.

In-Process Research and Development Charges

Projects that qualify as in-process research and development represent those that have not yet reached technological feasibility and for which no future alternative uses exist. Technological feasibility is defined as being equivalent to a beta-phase working prototype in which there is no remaining risk relating to the development. For the year ended December 31, 2004 we recorded an IPR&D charge of \$4.7 million, in connection with the acquisition of Chaparral. There were no similar charges for the year ended December 31, 2005.

Other Income

Other income increased by \$2.0 million, or 133.3% to \$3.5 million for the year ended December 31, 2005 from \$1.5 million for the year ended December 31, 2004. The increase was primarily attributable to an increase in interest income of \$1.6 million due to rising interest rates and a decrease in interest expense of approximately \$0.3 million as a result of the payoff in August 2004 of a \$6 million note payable that was assumed in connection with the acquisition of Chaparral and the repayment and termination of our Japanese credit facilities in the fourth quarter of 2004.

Income Taxes

We recognized an income tax benefit of \$25.2 million for the year ended December 31, 2005. The benefit was comprised of \$25.3 million attributed to a one-time non-cash elimination of valuation allowances

Table of Contents

associated with our US deferred tax assets offset by a \$0.1 million expense related to earnings for the year ended December 31, 2005. The income tax expense for the year ended December 31, 2005 was attributed to federal and state minimum tax liabilities as well as local and foreign taxes.

We recognized an income tax expense of \$0.3 million for the year ended December 31, 2004. The income tax expense for the year ended December 31, 2004 was attributed to federal and state minimum tax liabilities as well as local and foreign taxes.

As of December 31, 2005, we reversed a valuation allowance on its U.S. deferred tax assets totaling \$47.1 million. Based on the nature of the underlying deferred tax assets, the reversal of the valuation allowance resulted in an increase to additional paid-in capital of \$5.4 million, a reduction of goodwill in the amount of \$16.4 million, and a net income tax benefit of \$25.3 million. This reversal is the result of our recent sustained history of operating profitability and the determination by management that the future realization of the net deferred tax assets was judged to be more likely than not. We exercise significant judgment relating to the projection of future taxable income to determine the recoverability of any tax assets recorded on the balance sheet. If judgments regarding recoverability of deferred tax assets are not accurate, we could be required to record additional reserves against deferred tax assets in future periods.

As of December 31, 2005, a valuation allowance of \$3.6 million has been provided for the foreign deferred tax assets based upon our assessment of the future realizability of certain foreign deferred tax assets, as it is more likely than not that sufficient taxable income will not be generated to realize these temporary differences.

As of December 31, 2005, we have federal and state net operating losses of approximately \$113.1 million and \$49.0 million, which begin to expire in the tax years ending 2009 and 2006, respectively. In addition, we have federal tax credit carryforwards of \$2.9 million, of which approximately \$0.5 million can be carried forward indefinitely to offset future taxable income, and the remaining \$2.4 million will begin to expire in the tax year ending 2008. We also have state tax credit carryforwards of \$3.1 million, of which \$2.9 million can be carried forward indefinitely to offset future taxable income, and the remaining \$0.2 million will begin to expire in the tax year ending 2006.

As a result of our equity transactions, an ownership change, within the meaning of Internal Revenue Code Section 382, occurred on September 18, 2003. As a result, annual use of our federal net operating loss and credit carry forwards is limited to (i) the aggregate fair market value of Artecon immediately before the ownership change multiplied by (ii) the long-term tax-exempt rate (within the meaning of Section 382 (f) of the Internal Revenue Code) in effect at that time. The annual limitation is cumulative and, therefore, if not fully utilized in a year, can be utilized in future years in addition to the Section 382 limitation for those years.

We have not provided for any residual U.S. income taxes on the earnings from our foreign subsidiaries because such earnings are intended to be indefinitely reinvested. Such residual U.S. income taxes, if any, would be insignificant.

Year Ended December 31, 2004 Compared to Year Ended December 31, 2003***Net Revenue***

Net revenue increased \$52.0 million, or 27.7%, to \$239.4 million for the year ended December 31, 2004 compared to \$187.4 million for the year ended December 31, 2003. The increase in net revenue was primarily attributable to increased orders for our product from our channel partner, Sun, which accounted for 86.3% or \$206.6 million of our net revenue for the year ended December 31, 2004. Total Fibre Channel units shipped were 10,994 for the year ended December 31, 2004 compared to 8,064 Fibre Channel units shipped for the year ended December 31, 2003. 14,200 SCSI units were shipped during the year ended December 31, 2004 compared to 11,382 SCSI units for the year ended December 31, 2003. In March 2004, we announced that our existing OEM partner agreement with Sun was expanded to include new advanced technology storage products to be designed and engineered by us to Sun's specifications. Our SATA product began shipping in the second quarter of 2004 while our Blade product began shipping in the first quarter of 2004. We recorded revenue of approximately \$15.7 million related to such products during the year ended December 31, 2004.

Table of Contents

Non-Sun revenue was \$32.8 million for the year ended December 31, 2004 compared to \$31.2 million for the year ended December 31, 2003.

Cost of Goods Sold

Cost of goods sold increased \$37.3 million, or 26.2%, to \$179.9 million for the year ended December 31, 2004 compared to \$142.6 million for the year ended December 31, 2003. As a percentage of net revenue, cost of goods sold decreased to 75.1% for the year ended December 31, 2004 from 76.0% for the year ended December 31, 2003. The increase in the dollar amount of cost of goods sold was attributable to greater volume of product sales during the year ended December 31, 2004 compared to the year ended December 31, 2003 including the incremental cost of goods sold attributable to the introduction of our SATA and Blade products. Additionally, cost of goods sold increased approximately \$1.9 million due to the impact of amortization expense related to intangible assets acquired in connection with the acquisition of Chaparral. The decrease in cost of goods sold, as a percentage of our net revenue was primarily attributable to cost reductions related to production materials achieved during the year ended December 31, 2004. Such cost reductions resulted mainly from the decreasing price of component parts due to competitive market factors; predetermined contractual cost reductions and the transition from soft to hard tooling as compared to the year ended December 31, 2003.

Gross Profit

Gross profit increased \$14.6 million, or 32.5%, to \$59.5 million for the year ended December 31, 2004 compared to \$44.9 million for the year ended December 31, 2003. As a percentage of net revenue, gross profit increased to 24.9% for the year ended December 31, 2004 from 24.0% for the year ended December 31, 2003. The increase in the dollar amount of gross profit was attributable to greater volume of product sales during the year ended December 31, 2004 compared to the year ended December 31, 2003. The increase in gross profit as a percentage of our net revenue for the year ended December 31, 2004 compared to the year ended December 31, 2003 primarily reflect cost reductions achieved during 2004. Such cost reductions resulted mainly from the decreasing price of component parts due to competitive market factors; predetermined contractual cost reductions and the transition from soft to hard tooling. These cost reductions were partially offset by the introduction in June 2004 of our SATA and Blade products that presently have significantly lower gross profit margins than either our fibre channel or SCSI products. Gross profit for the year ended December 31, 2004 was also negatively impacted by \$1.9 million of amortization expense related to intangible assets acquired in connection with the acquisition of Chaparral in February 2004.

Sales and Marketing Expenses

Sales and marketing expenses increased \$2.7 million, or 19.1%, to \$16.8 million for the year ended December 31, 2004 compared to \$14.1 million for the year ended December 31, 2003. As a percentage of net revenue, sales and marketing expenses decreased to 7.0% for the year ended December 31, 2004 from 7.5% for the year ended December 31, 2003. The increase in the dollar amount of sales and marketing related expenses is primarily attributable to increased salaries and related expenses of approximately \$1.2 million, an increase in travel and lodging expense of \$0.9 million, \$0.2 million related to small equipment and fixtures and \$0.2 million related to tradeshows. The increase in sales and marketing expenses also reflects \$0.6 million from the amortization of the customer relationship intangible asset acquired in connection with the acquisition of Chaparral. These increases were partially off-set by a decrease in professional services of approximately \$0.6 million compared to the prior year. There are other increases in sales and marketing expenses relating to a variety of activities none of which are significant on an individual basis. The decrease in sales and marketing expenses as a percentage of net revenue primarily reflects the impact of increased 2004 revenue.

Research and Development Expenses

Research and development expenses increased \$6.0 million, or 50.0%, to \$18.0 million for the year ended December 31, 2004 from \$12.0 million for the year ended December 31, 2003. As a percentage of net revenue, research and development expenses increased to 7.5% for the year ended December 31, 2004 from 6.4% for

Table of Contents

the year ended December 31, 2003. The dollar increase in research and development expenses primarily reflects an increase in salary and related expenses of approximately \$3.8 million attributable to an increase in the number of our full-time direct engineering team members compared to the year ended December 31, 2003. During the year ended December 31, 2004, we averaged approximately 101 full-time direct engineering employees compared to an average of approximately 55 full-time direct engineering employees for the year ended December 31, 2003. The increase includes the addition of approximately 20 engineering employees to our corporate headquarters in Carlsbad, California resulting in an increase in salary and related expenses of approximately \$0.9 million compared to the year ended December 31, 2003. The establishment of our Longmont Technology Center in connection with the acquisition of Chaparral resulted in the addition of approximately 30 new direct engineering employees. Salary and related expenses for such employees was \$2.9 million for the year ended December 31, 2004. There were no comparable expenses for the year ended December 31, 2003. The remaining increase in research and development expenses not directly related to headcount primarily reflect additional costs of \$1.2 million attributable to our Longmont facility and its related activities for which there is no comparable expense for the year ended December 31, 2003. Project related expenses at our Carlsbad location exceeded the prior year by approximately \$0.2 million primarily related to our new SATA and Blade products and the integration of the technology acquired from Chaparral into new and existing products. The percentage increase in research and development expenses reflects all of the items discussed above, partially offset by the increase in revenue for the year ended December 31, 2004 and the reclassification of costs discussed above.

General and Administrative Expenses

General and administrative expenses increased \$2.6 million, or 35.1%, to \$10.0 million for the year ended December 31, 2004 compared to \$7.4 million for the year ended December 31, 2003. As a percentage of net revenue, general and administrative expenses were 4.2% for the year ended December 31, 2004 compared to 4.0% for the year ended December 31, 2003. The increase in the dollar amount of general and administrative expense during the year ended December 31, 2004 reflects an increase of \$2.1 million of legal and professional services expenses compared to the year ended December 31, 2003. The increase in legal expenses primarily reflects the legal matters described elsewhere in this document while the increase in professional services reflect the cost of our compliance with the Sarbanes-Oxley Act of 2002. We also incurred an increase of \$0.4 million in bad debt expense compared to the year ended December 31, 2003. The remaining increase in general and administrative expenses relates to an increase in a variety of general and administrative expenses none of which are significant on an individual basis. The percentage increase in general and administrative expenses reflect all of the items discussed above, partially offset by the increase in revenue for the year ended December 31, 2004.

Restructuring expenses

In June 2004, we negotiated an exit from our lease of the 10th floor of our former New York City office thereby eliminating our related rent exposure. Accordingly, during the year ended December 31, 2004, we recorded a reduction of approximately \$0.5 million to our restructuring reserve previously established in connection with the closure of our New York City office. Additionally, we have evaluated certain factors pertaining to our remaining sublease tenant; accordingly, during the year ended December 31, 2004, we recorded an additional restructuring accrual of approximately \$0.1 million. We are not aware of any further unresolved issues or additional liabilities that may result in a significant adjustment to restructuring expenses accrued as of December 31, 2004.

In-Process Research and Development Charges

Projects that qualify as in-process research and development represent those that have not yet reached technological feasibility and for which no future alternative uses exist. Technological feasibility is defined as being equivalent to a beta-phase working prototype in which there is no remaining risk relating to the development. For the year ended December 31, 2004 we recorded an IPR&D charge of \$4.7 million, in connection with the acquisition of Chaparral.

Table of Contents*Other Income*

Other income increased by \$0.7 million, or 87.5%, to \$1.5 million for the year ended December 31, 2004 from \$0.8 million for the year ended December 31, 2003. The increase is primarily attributable to an increase in interest income. Although we had significantly more cash at December 31, 2003 compared to December 31, 2004, the proceeds from our secondary offering of our common stock were received in late September 2003. Such proceeds therefore did not earn significant interest income during the year ended December 31, 2003. The increase in interest income was partially off-set by approximately \$0.3 million in interest expense primarily related to the a \$6 million note payable assumed in connection with our acquisition of Chaparral in February 2004. The note payable and all related accrued interest was paid off in August 2004. There were no amounts outstanding related to \$6 million note payable at December 31, 2004.

Income Taxes

Our effective income tax rate for the year ended December 31, 2004 and 2003 of 2.3% and 0.7% is primarily attributable to federal and state minimum tax liabilities as well as local and foreign taxes. Our effective income tax rate for both the year ended December 31, 2004 and 2003 was significantly reduced through the use of net operating loss carryforwards for which a valuation allowance had previously been recorded.

As of December 31, 2004, a valuation allowance of \$50.9 million was provided based upon our assessment of the future realizability of our deferred income tax assets, as it was considered more likely than not that sufficient taxable income would not be generated to realize these temporary differences.

Additionally, at December 31, 2004, approximately \$4.6 million of the valuation allowance is attributable to the potential tax benefit of stock option transactions that will be credited directly to common stock, if realized.

As of December 31, 2004, we have federal and state net operating loss carryforwards of approximately \$119.1 million and \$79.9 million, which begin to expire in 2009 and 2005, respectively. In addition, we have federal tax credit carryforwards of approximately \$3.1 million, of which \$0.4 million can be carried forward indefinitely to offset future taxable income, and the remaining \$2.7 million will begin to expire in the tax year 2008. We also have state tax credit carryforwards of \$2.9 million, of which \$2.7 million can be carried forward indefinitely to offset future taxable income, and the remaining \$0.2 million will begin to expire in 2006.

As a result of the Company's equity transactions, an ownership change, within the meaning of Internal Revenue Code Section 382, occurred on September 18, 2003. As a result, annual use of the Company's federal net operating loss and credit carry forwards is limited to (i) the aggregate fair market value of Artecon immediately before the ownership change multiplied by (ii) the long-term tax-exempt rate (within the meaning of Section 382 (f) of the Internal Revenue Code) in effect at that time. The annual limitation is cumulative and, therefore, if not fully utilized in a year, can be utilized in future years in addition to the Section 382 limitation for those years.

We have not provided for any residual U.S. income taxes on the earnings from our foreign subsidiaries because such earnings are intended to be indefinitely reinvested. Such residual U.S. income taxes, if any, would be insignificant.

Liquidity and Capital Resources

As of December 31, 2005, we had \$122.2 million of cash, cash equivalents and short-term investments and working capital of \$135.3 million.

For the year ended December 31, 2005, cash provided by operating activities was \$0.7 million compared to cash provided by operating activities of \$11.3 million for the year ended December 31, 2004. The net cash provided by operating activities is primarily attributable to net income of \$26.6 million increased by the add back of depreciation and amortization of \$7.5 million and \$0.9 million loss on disposition of property and equipment, offset by a non-cash benefit of \$25.3 million related to the reversal of valuation allowances

Table of Contents

previously established for U.S. deferred income tax assets. Cash flow from operations reflects the negative impact of approximately \$14.4 million related to the management of certain payments to vendors and a \$1.6 million increase in prepaid and other current assets, due primarily to a \$1.0 million increase in vendor rebate receivables and \$0.5 million increase in receivables related to tenant improvement allowances. Cash provided from operations was positively impacted by the decrease in accounts receivable of approximately \$6.4 million, due to decreased revenue in 2005 and a \$0.8 million decrease in inventory due to our efforts to better manage our materials portion of our business.

Cash provided by investing activities for the year ended December 31, 2005 was \$38.1 million compared to cash used in investing activities of \$43.4 million for the year ended December 31, 2004. The cash provided during 2005 is primarily attributable to proceeds of \$71.9 million received from the sales of short-term investments offset by purchases of \$26.5 million in short-term investments. We made capital expenditures of \$4.7 million during the year ended December 31, 2005 primarily associated with our new ERP software package and leasehold improvements to our new corporate headquarters. Additionally, we also purchased a patent license portfolio for \$2.5 million. We expect to make capital expenditures of approximately \$9 to \$11 million in 2006.

Cash provided by financing activities for the year ended December 31, 2005 was \$2.8 million compared to cash used in financing activities of \$6.1 million for the year ended December 31, 2004. During the year ended December 31, 2005, we received \$1.0 million in proceeds from the exercise of stock options under our 2000 Stock Incentive Plan, \$0.8 million in proceeds from the exercise of warrants, and \$1.0 million in proceeds from the sale of stock under our 2000 Employee Stock Purchase Plan.

Effective July 1, 2004, we entered into a credit agreement with Wells Fargo Bank, National Association, or Wells Fargo, which allows us to borrow up to \$30.0 million under a revolving line of credit that expires July 1, 2006. Amounts loaned under the credit agreement bear interest at our option at a fluctuating rate per annum equal to the Prime Rate in effect from time to time, or at a fixed rate per annum determined by Wells Fargo to be 0.65% above LIBOR in effect on the first day of the applicable fixed rate term. In connection with the credit agreement, to the extent we have outstanding borrowings, we have granted Wells Fargo a security interest in our investment management account maintained with Wells Capital Management Incorporated. As of December 31, 2005, there was no balance outstanding under this line of credit. The credit agreement limits any new borrowings, loans or advances outside of the credit agreement to an amount less than \$1.0 million.

Our Japanese subsidiary previously had two lines of credit with Tokyo Mitsubishi Bank and one line of credit with National Life Finance Corporation in Japan secured by its inventories. As of November 2004, all of the lines of credit relating to our Japanese subsidiary described above were repaid and closed. We intend to fund our Japanese operations from cash on hand and working capital.

We presently expect cash, cash equivalents, short-term investments and cash generated from operations to be sufficient to meet our operating and capital requirements for at least the next twelve months and to enable us to pursue acquisitions or significant capital improvements. The actual amount and timing of working capital and capital expenditures that we may incur in future periods may vary significantly and will depend upon numerous factors, including the amount and timing of the receipt of revenues from continued operations, our ability to manage our relationships with third party manufacturers, the status of our relationships with key customers, partners and suppliers, the timing and extent of the introduction of new products and services and growth in personnel and operations.

The following table summarizes our contractual obligations as of December 31, 2005 (in thousands).

Payments Due by Period

Contractual Obligations	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Operating Lease Obligations	\$8,541	\$ 1,477	\$ 2,462	\$ 2,100	\$ 2,502

At December 31, 2005, we did not have any relationship with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance variable interest, or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or

Table of Contents

other contractually narrow or limited purposes. In addition, we did not engage in trading activities involving non-exchange traded contracts. As a result, we are not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships. We do not have relationships and transactions with persons and entities that derive benefits from their non-independent relationship with us or our related parties except as disclosed herein.

Recent Accounting Pronouncements

As of December 31, 2005, we account for stock-based compensation awards using the intrinsic value measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*. Accordingly, we record no compensation expense for stock options granted with exercise prices greater than or equal to the fair value of the underlying common stock at the date of grant. On December 16, 2004, the Financial Accounting Standards Board, or FASB, issued SFAS No. 123 (revised 2004), *Share-Based Payment*, or SFAS No. 123(R), and in March 2005, the SEC issued Staff Accounting Bulletin No. 107, *Share-Based Payment*, or SAB No. 107, relating to the adoption of SFAS No. 123(R). SFAS No. 123(R) eliminates the alternative of applying the intrinsic value measurement provisions of APB Opinion No. 25 to stock compensation awards. Rather, SFAS No. 123(R) requires enterprises to measure the cost of services received in exchange for an award of equity instruments based on the fair value of the award at the date of grant.

We will adopt SFAS 123(R) effective January 1, 2006, using the Modified Prospective Application Method. Under this method, SFAS 123(R) is applied to new awards and to awards modified, repurchased, or cancelled after the effective date. Additionally, compensation cost for the portion of awards for which the requisite service has not been rendered (such as unvested options) that are outstanding as of the date of adoption shall be recognized as the remaining requisite services are rendered. The compensation cost relating to unvested awards at the date of adoption shall be based on the fair value at the date of grant of those awards as calculated for pro forma disclosures under the original SFAS 123 as adjusted for estimated forfeitures.

We expect that the adoption of SFAS No. 123(R) will impact our financial results in the future, as it is expected to significantly reduce our net income as we have not had significant stock-based compensation expense in the recent past. As of December 31, 2005, we had unamortized stock-based compensation expense of \$4.8 million, of which, \$1.8 million is expected to be expensed in 2006. However, this amount does not reflect the expense associated with equity awards that are expected to be granted to employees in 2006. Management is currently reviewing its alternatives for granting equity based awards and, while we expect to continue granting equity based awards to our employees, the type and amount of award is still under consideration. Accordingly, the overall effect of adopting this new standard on the financial results for 2006 has not yet been quantified.

The pro forma effects on net income and earnings per share if we had applied the fair value recognition provisions of original SFAS No. 123 on stock compensation awards (rather than applying the intrinsic value measurement provisions of APB Opinion No. 25) are disclosed elsewhere in this filing. Although such pro forma effects of applying the original SFAS No. 123 may be indicative of the effects of adopting SFAS No. 123(R), the provisions of these two statements differ in important respects. The actual effects of adopting SFAS No. 123(R) will be dependent on numerous factors including, but not limited to, the valuation model chosen by us to value stock-based awards, the assumed award forfeiture rate, the accounting policies adopted concerning the method of recognizing the fair value of awards over the requisite service period, and the transition method chosen for adopting SFAS No. 123(R).

On November 24, 2004, the FASB issued SFAS No. 151, *Inventory Costs, and Amendment of ARB No. 43, Chapter 4*, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material. This Statement is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. We have not completed the process of evaluating the impact that the adoption of Statement 151 will have on our financial position or results of operations.

In December 2004, the FASB issued SFAS No. 153, *Exchanges of Nonmonetary Assets*, which eliminates the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. SFAS No. 153 will be

Table of Contents

effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. We do not believe the adoption of SFAS No. 153 will have material impact on our results of operations or financial condition.

In March 2005, the FASB issued interpretation number 47, *Accounting for Conditional Asset Retirement Obligations* an interpretation of FASB SFAS No. 143, *Accounting for Asset Retirement Obligation* which refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and/or method of settlement. Thus, the timing and/or method of settlement may be conditional on a future event. Accordingly, an entity is required to be reasonably estimated. The fair value of a liability for the conditional asset retirement obligation should be recognized when incurred generally upon acquisition, construction, or development and/or through the normal operation of the asset. Uncertainty about the timing and/or method of settlement of a conditional asset retirement obligation should be factored into the measurement of the liability when sufficient information exists. SFAS No. 143 acknowledges that in some cases, sufficient information may not be available to reasonably estimate the fair value of asset retirement obligation. There was no effect of adoption of the statement on our results of operations or financial condition.

In May 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections*, which requires retrospective application to prior periods financial statements of a voluntary change in accounting principle and that a change in method of depreciation, amortization, or depletion for long-lived, nonfinancial assets be accounted for as a change in accounting estimate that is effected by a change in accounting principle. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005.

In June 2005, the FASB issued Staff Position No. 143-1, *Accounting for Electronic Equipment Waste Obligations*, or FSP 143-1, which provides guidance on the accounting for obligations associated with the Directive on Waste Electrical and Electronic Equipment, or the WEEE Directive, which was adopted by the European Union. FSP 143-1 provides guidance on accounting for the effects of the WEEE Directive with respect to historical waste and waste associated with products on the market on or before August 13, 2005. FSP 143-1 requires commercial users to account for their WEEE obligation as an asset retirement liability in accordance with FASB Statement No. 143, *Accounting for Asset Retirement Obligations*. FSP 143-1 was required to be applied to the later of the first reporting period ending after June 8, 2005 or the date of the adoption of the WEEE Directive into law by the applicable European Union member country. The WEEE Directive has been adopted into law by the majority of European Union member countries in which the Company has significant operations. The Company adopted the provisions of FSP 143-1 as it relates to these countries with no material impact on its financial statements. The Company will apply the guidance of FSP 143-1 as it relates to the remaining European Union member countries in which it operates when those countries have adopted the WEEE Directive into law. The effect of applying FSP 143-1 in the remaining countries in future periods is not expected to have a material effect on our results of operations or financial condition.

In November 2005, the FASB issued Staff Position No. FAS 115-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, or FSP No. 115-1. FSP No. 115-1 provides accounting guidance for identifying and recognizing other-than-temporary impairments of debt and equity securities, as well as cost method investments in addition to disclosure requirements. FSP No. 115-1 is effective for periods beginning in 2006. We do not believe adoption of FSP No. 115-1 will have a material effect on our results of operations or financial condition.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk**Interest Rate and Credit Risk**

Our exposure to market rate risk for changes in interest rates relates to our investment portfolio. Our primary investment strategy is to preserve the principal amounts invested, maximize investment yields and maintain liquidity to meet projected cash requirements. Accordingly, we invest in instruments such as money

Table of Contents

market funds, certificates of deposit, U.S. Government/ Agencies bonds, notes, bills and municipal bonds that meet high credit quality standards, as specified in our investment policy guidelines. Our investment policy also limits the amount of credit exposure to any one issue, issuer and type of instrument. We do not currently use derivative financial instruments in our investment portfolio and we do not enter into market risk sensitive instruments for trading purposes. We currently do not hedge against interest rate exposure. Due to the short duration of our investment portfolio, a hypothetical, reasonably possible, near-term change of 100 basis points in interest rates along the entire interest rate yield curve would not materially impact the fair values of our interest-sensitive financial instruments. Declines in interest rates over time will, however, reduce our interest income, while increases in interest rates over time will increase our interest expense. Due to the nature of our short-term investments, we believe that we are not subject to any material market risk exposure.

The following table provides information about our investment portfolio at December 31, 2004 and 2005. For investment securities, the table presents related weighted average interest rates by expected maturity dates and carrying values (in thousands) at December 31.

	2004	2005
Cash equivalents	\$ 43,438	\$ 99,899
Average interest rate	2.3%	4.3%
Short-term investments	\$ 58,690	\$ 13,431
Average interest rate	2.2%	3.2%
Total portfolio	\$ 102,128	\$ 113,330
Average interest rate	2.2%	4.2%

We have a line of credit agreement, which accrues interest at a variable rate. As of December 31, 2005, we had no balance under this line. If we incur a balance under this line, we will be exposed to interest rate risk on such debt.

Foreign Currency Exchange Rate Risk

A portion of our international business is presently conducted in currencies other than the U.S. dollar. Foreign currency transaction gains and losses arising from normal business operations are credited to or charged against earnings in the period incurred. As a result, fluctuations in the value of the currencies in which we conduct our business relative to the U.S. dollar will cause currency transaction gains and losses, which we have experienced in the past and continue to experience. Due to the substantial volatility of currency exchange rates, among other factors, we cannot predict the effect of exchange rate fluctuations upon future operating results. There can be no assurances that we will not experience currency losses in the future. We have not undertaken hedging transactions to cover currency exposure and we do not intend to engage in hedging activities in the future.

Item 8. *Financial Statements and Supplementary Data*

The information required by this Item is incorporated by reference from the financial statements beginning on page F-1 of this Annual Report on Form 10-K.

Item 9. *Changes In and Disagreements With Accountants On Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Our chief executive officer and chief financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Securities Exchange Act of 1934, as amended, Rule 13a-15(e)) as of the end of the period covered by this Annual Report on Form 10-K, have concluded that as of the end of such period, our disclosure controls and procedures are adequate and sufficient to ensure that information required to be disclosed by us in the reports that we file under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time period specified in the SEC's rules and forms.

Table of Contents

During the three months ended December 31, 2005, we improved our internal controls related to accounting and financial reporting, fixed assets and inventory. Specifically, we hired two certified public accountants with relevant experience to lead the finance department and communicated to accounting personnel formal policies and procedures. Our fixed asset internal control improvements during the fourth quarter consisted of a physical observation of substantially all of our fixed assets, improvements in our policies and procedures surrounding asset identification, asset tracking, and the procurement of fixed assets. Improvements in inventory internal controls were attributed to the hiring of a cost accountant with relevant experience and improvements in policies and procedures related to inventory costing, valuation and recording.

Dot Hill Systems Corp. s Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining effective internal control over financial reporting. Our internal control system was designed to provide reasonable assurance to the company s management and board of directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

An internal control material weakness is a significant deficiency, or combination of significant deficiencies, that results in a more than remote likelihood that a material misstatement of the financial statements will not be prevented or detected on a timely basis by employees in the normal course of their work. A control deficiency, or combination of control deficiencies, that adversely affects the company s ability to initiate, authorize, record, process, or report external financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the company s annual or interim financial statements that is more than inconsequential will not be prevented or detected.

Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that the company s internal control over financial reporting was effective as of December 31, 2005. Deloitte & Touche LLP has audited this assessment of our internal control over financial reporting; their report is included herein.

In order to address the material weaknesses previously identified by management s assessment of the effectiveness of the company s internal control over financial reporting as of December 31, 2004, management completed the following corrective measures which it believes have remediated the material weaknesses.

In 2004, a material weakness was identified related to entity-level controls resulting from (i) an inadequate number of accounting and finance personnel with sufficient technical expertise in the area of U.S. GAAP and financial reporting at both our corporate headquarters and foreign subsidiaries, (ii) failure to document with sufficient support the prior application of our accounting policies, practices and procedures, and (iii) lack of effective deterrent controls and detective controls to properly apply U.S. GAAP to our financial reporting process. We have strengthened our accounting and financial reporting function by adding two certified public accountants with recent relevant experience, one of which is a senior management position. At our subsidiaries, we have hired a senior finance director for our subsidiary in Japan and added additional accounting resources to our subsidiary in the Netherlands. We have also hired additional staff in various areas of the company including, but not limited to, general accounting, order entry and materials management. The addition of these individuals has allowed us to perform and review the necessary internal control activities pertaining to our financial close and reporting process on a timely basis. Additionally, accounting policies and procedures were formally documented and communicated.

In 2004, a material weakness was identified related to internal controls over fixed assets resulting from (i) inadequate documentation within our fixed asset accounting system to assist in the identification and location of certain fixed assets, (ii) failure to apply identification tags to fixed assets located outside of our corporate headquarters and, (iii) failure to document with sufficient support the prior application of our accounting policies, practices and procedures pertaining to the classification of certain expenditures as fixed

Table of Contents

assets. We have improved our controls over the processing of fixed assets. Such improvements consist of revised documentation and additional review of the authorization and accounting treatment related to the acquisition of fixed assets. We have also improved our ability to better identify and track our fixed assets by implementing controls over self constructed assets and we have assigned asset identification tags to all of our assets located outside of our corporate headquarters. Additionally, we performed a physical count of substantially all of our fixed assets during the second half of 2005.

In 2004, a material weakness was identified related to internal controls over inventory resulting from inadequate understanding and documentation of a reconciling item between our general ledger and perpetual inventory listing, the use of our general ledger to process customer support transactions that should not impact our financial statements and limitations present in our historical enterprise resource planning software requiring a significant number of manual processing steps. Improvements in inventory internal controls were attributed to the hiring of a cost accountant with relevant experience and improvements in policies and procedures related to inventory costing, valuation and recording.

Item 9B. Other Information

None.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Dot Hill Systems Corp.

We have audited management's assessment, included in the accompanying Dot Hill Systems Corp. Report on Internal Control Over Financial Reporting, that Dot Hill Systems Corp. and subsidiaries (the Company) maintained effective internal control over financial reporting as of December 31, 2005, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2005, is fairly stated, in all material respects, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2005, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and the financial statement schedule as of and for the year ended December 31, 2005 of the Company and our report dated March 15, 2006 expressed an unqualified opinion on those financial statements and the financial statement schedule.

DELOITTE & TOUCHE LLP
San Diego, California
March 15, 2006

Table of Contents**PART III****Item 10. Directors and Executive Officers of the Registrant**

Some of the information required by this item is incorporated by reference to our Definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A in connection with our 2006 annual meeting under the headings Election of Directors and Section 16(a) Beneficial Ownership Reporting Compliance. Other information required by this item is incorporated by reference to Item 1 of Part I of this Annual Report on Form 10-K under the heading Executive Officers of the Registrant at December 31, 2005.

The company has adopted a code of ethics that applies to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. This code of ethics is incorporated in our code of business conduct and ethics that applies to all of our officers, directors and employees. A copy of our code of business conduct and ethics is available on our web site at www.dothill.com. We intend to satisfy the SEC's disclosure requirements regarding amendments to, or waivers of, the code of business conduct and ethics by posting such information on our web site. A paper copy of our code of business conduct and ethics may be obtained free of charge by writing to the company care of its Investor Relations Department at our principal executive office.

Item 11. Executive Compensation

The information required by this item is incorporated by reference to our Definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A in connection with our 2006 annual meeting under the heading Compensation of Executive Officers.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information under the heading Security Ownership of Certain Beneficial Owners and Management in our Definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A in connection with our 2006 annual meeting is incorporated herein by this reference.

The following table sets forth our equity securities authorized for issuance under equity compensation plans as of December 31, 2005.

Stock Plan	Number of Securities to be Issued Upon Exercise of Outstanding Options and Rights	Weighted Average Exercise Price of Outstanding Options and Rights	Number of Securities Remaining Available for Future Issuance
2000 Equity Incentive Plan(1)	4,505,894	\$ 6.47	980,262
Employee Stock Purchase Plan(2)	Not Applicable	Not Applicable	1,900,608
2000 Non-Employee Directors Stock Option Plan	324,917	\$ 7.24	102,499
Total	4,830,811	\$ 6.52	2,983,369

- (1) The 2000 Amended and Restated Equity Incentive Plan provides for an annual increase to the share reserve, to be added on the date of each annual stockholder's meeting, equal to the lesser of (i) 1 million shares; (ii) 2% of our outstanding shares on such date, calculated on a fully diluted basis and assuming the conversion of all

outstanding convertible securities and the exercise of all outstanding options and warrants; or (iii) an amount to be determined by our board of directors.

- (2) The Employee Stock Purchase Plan provides for an annual increase to the share reserve, to be added on the date of each annual stockholders meeting, equal to the lesser of: (i) 100,000 shares; or (ii) an amount to be determined by our board of directors.

All of our equity compensation plans have been approved by our stockholders.

Table of Contents**Item 13. *Certain Relationships and Related Transactions***

The information required by this item is incorporated by reference to our Definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A in connection with our 2006 annual meeting under the heading Certain Transactions.

Item 14. *Principal Accounting Fees and Services*

The information required by this item is incorporated by reference to our Definitive Proxy Statement to be filed with the SEC pursuant to Regulation 14A in connection with our 2006 annual meeting under the heading Ratification of Selection of Independent Auditors.

PART IV**Item 15. *Exhibits and Financial Statement Schedules***

(a) The following documents are filed as part of this report:

(1) Financial statements:

The consolidated balance sheets as of December 31, 2004 and 2005, and the consolidated statements of income and comprehensive income, stockholders' equity and cash flows for the years ended December 31, 2003, 2004 and 2005, together with notes thereto.

(2) Financial statement schedules required to be filed by Item 8 and Item 15(b) of this Form:

Schedule II Valuation and Qualifying Accounts.

All other schedules have been omitted from this annual report because they are not applicable or because the information required by any applicable schedule is included in the consolidated financial statements or the notes thereto.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Dot Hill Systems Corp.

We have audited the accompanying consolidated balance sheets of Dot Hill Systems Corp. and subsidiaries (the Company) as of December 31, 2004 and 2005, and the related consolidated statements of income and comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2005. Our audits also included the financial statement schedule listed in the Index at Items 15(a)(2). These financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and the financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2004 and 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2005, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2005, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 15, 2006 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

**DOT HILL SYSTEMS CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2003, 2004 and 2005**

1. Background and Summary of Significant Accounting Policies

Background

Dot Hill Systems Corp. and subsidiaries (we, our or us) is a provider of enterprise storage for organizations requiring high reliability, high performance networked storage and data management solutions in an open systems architecture.

Historically, we relied mainly on direct sales to customers in an array of markets, including the government and telecommunications. Beginning in 2001, we shifted our sales and marketing efforts away from direct sales toward indirect sales through channel partners. These channel partners either incorporate our products into their own, private-label products or sell our products off the shelf. During 2002, we began outsourcing the manufacturing of our next-generation family of disk systems SANnet II. Our headquarters is located in Carlsbad, California and we also we also have sales offices in the United States, Germany, Japan, the Netherlands, Singapore and the United Kingdom.

Basis of Presentation

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America.

Principles of Consolidation

The accompanying consolidated financial statements include our accounts and the accounts of our wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

Use of Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include highly liquid investments purchased with an original maturity of three months or less. Cash equivalents consist principally of money market funds, commercial paper and repurchase agreements.

Short-term Investments

We account for investments in accordance with Statement of Financial Accounting Standards, or SFAS, No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. Our short-term investments have been categorized as available for sale, including market auction rate securities. Unrealized gains and losses on available-for-sale securities are included as a separate component of stockholders' equity.

Accounts Receivable

The allowance for doubtful accounts receivable represents management's estimate of losses on the accounts receivable balance. The estimate for accounts receivable is based on estimated losses for specific accounts and an amount calculated using a percentage based on historical write-offs and recoveries.

Table of Contents

DOT HILL SYSTEMS CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Valuation of Inventories

Inventories are comprised of purchased parts and assemblies, which include direct labor and overhead, and are valued at the lower of cost (first-in, first-out) or market value. We perform periodic valuation assessments based on projected sales forecasts and analyzing upcoming changes in future configurations of our products and record inventory reserves for excess and obsolete inventory. Excess and obsolete reserves are not reversed until the products are sold or disposed of. We use certain of our inventory items internally and also provide select customers with the use of certain inventory items on a temporary test basis. The carrying value of these items is reduced to market through a monthly charge to expense until they are returned to inventory, which is generally within twelve months.

Property and Equipment

Property and equipment are recorded at cost. Depreciation is computed using the straight-line method over the estimated useful lives of the assets from three to seven years. Leasehold improvements are amortized on a straight-line basis over the lesser of the remaining term of the lease or the estimated useful life of the asset. Significant improvements are capitalized and expenditures for maintenance and repairs are charged to expense as incurred.

Deferred Compensation

Deferred compensation represents the unearned value of a common stock bonus given to an employee. In accordance with Accounting Principles Board, or APB, Opinion No. 25, we recorded deferred compensation for the value of the common stock at the date of issuance and are amortizing the balance over the vesting period of the award, which is three years.

Fair Value of Financial Instruments

We are required to estimate the fair value of all financial instruments included on our balance sheets. We believe the carrying value of our financial instruments, including cash and cash equivalents, short-term investments, accounts receivable, and accounts payable to approximate their fair value due to the relatively short period of time between origination of the instruments and their expected realization.

Valuation of Goodwill

We review goodwill for impairment annually and whenever events or changes in circumstances indicate the carrying value of an asset may not be recoverable in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. The provisions of SFAS No. 142 require that a two-step impairment test be performed on goodwill. In the first step, we compare the fair value of each reporting unit to its carrying value. Our reporting units are consistent with the operating and reportable segments identified in the notes to our consolidated financial statements. We determine the fair value of our reporting units using the income approach. Under the income approach, we calculate the fair value of a reporting unit based on the present value of estimated future cash flows. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not impaired and we are not required to perform further testing. If the carrying value of the net assets assigned to the reporting unit exceeds the fair value of the reporting unit, then we must perform the second step in order to determine the implied fair value of the reporting unit's goodwill and compare it to the carrying value of the reporting unit's goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, then we must record an impairment loss equal to the difference.

Table of Contents

DOT HILL SYSTEMS CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Long-Lived Assets

We account for the impairment and disposition of long-lived assets which consist primarily of intangible assets with finite lives and property and equipment in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. We periodically review the recoverability of the carrying value of long-lived assets for impairment whenever events or changes in circumstances indicate that their carrying value may not be recoverable. Recoverability of these assets is determined by analysis of the assets' fair value by comparing the forecasted future undiscounted net cash flows from operations to which the assets relate, based on our best estimates using the appropriate assumptions and projections at the time, to the carrying amount of the assets. If the carrying value is determined not to be recoverable from future operating cash flows, the assets are deemed impaired and an impairment loss is recognized equal to the amount by which the carrying amount exceeds the estimated fair value of the assets. We did not record any impairment in 2003, 2004 or 2005. Based on our most recent analysis, we believe that no additional impairment exists at December 31, 2005.

Revenue Recognition

Revenues are recognized pursuant to applicable accounting standards, including Securities and Exchange Commission Staff Accounting Bulletin No. 104, *Revenue Recognition* and Statement of Position No. 97-2, *Software Revenue Recognition*, or SOP 97-2.

We recognize revenue for non-software product sales upon transfer of title to the customer. Reductions to revenue for estimated sales returns are also recorded at that time. These estimates are based on historical sales returns, changes in customer demand and other factors. If actual future returns and allowances differ from past experience, additional allowances may be required. Certain of our sales arrangements include multiple elements. Generally, these arrangements include delivery of the product, installation, training and product maintenance. Maintenance related to product sales entitles the customer to basic product support and significantly greater response time in resolving warranty related issues. We allocate revenue to each element of the arrangement based on its relative fair value. For maintenance contracts this is typically the price charged when such contracts are sold separately or renewed. Because professional services related to installation and training can be provided by other third party organizations, we allocate revenue related to professional services based on rates that are consistent with other like companies providing similar services, i.e., the market rate for such services. Revenue from product maintenance contracts is deferred and recognized ratably over the contract term, generally twelve months. Revenue from installation, training and consulting is recognized as the services are performed.

For software sales, we apply SOP 97-2, whereby revenue is recognized from software licenses at the time the product is delivered, provided we have no significant obligations related to the sale, the resulting receivable is deemed collectible and there is vendor-specific objective evidence supporting the value of the separate contract elements. For arrangements with multiple elements, we allocate revenue to each element using the residual method based on vendor specific objective evidence of the undelivered items. A portion of the arrangement fee equal to the fair value of the undelivered elements, typically software maintenance contracts, is deferred and recognized ratably over the contract term, generally twelve months. Vendor specific objective evidence is based on the price charged when the element is sold separately. A typical arrangement includes a software licensing fee and maintenance agreement.

The cost of maintenance contracts entered into with third parties is deferred and recognized as expense over the contract term. At December 31, 2004 and 2005, the balance of deferred costs for maintenance contracts was \$0.1 million and less than \$0.1 million, respectively and is included in prepaid expenses and other current assets.

Table of Contents

DOT HILL SYSTEMS CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Product Warranties

We generally extend to our customers the warranties provided to us by our suppliers and, accordingly, the majority of our warranty obligations to customers are covered by supplier warranties. For warranty costs not covered by our suppliers, we provide for estimated warranty costs in the period the revenue is recognized. There can be no assurance that our suppliers will continue to provide such warranties to us in the future, which could have a material adverse effect on our operating results and financial condition. Our warranty cost activity for the years ended December 31 is as follows (in thousands):

Accrued Warranty Costs	Balance at Beginning of Year	Charged to Operations	Deductions for Costs Incurred	Deductions for Change in Estimates	Balance at End of Year
2003	\$ 336	\$ 876	\$ (876)	\$ (74)	\$ 262
2004	\$ 262	\$ 1,703	\$ (861)	\$	\$ 1,104
2005	\$ 1,104	\$ 2,445	\$ (2,803)	\$	\$ 746

Advertising Costs

We expense advertising costs as incurred. For the years ended December 31, 2003, 2004 and 2005, advertising expenses were \$0.3 million, \$0.8 million, and \$1.2 million, respectively.

Research and Development

Research and development costs are expensed as incurred. In conjunction with the development of our products, we incur certain software development costs. No costs have been capitalized pursuant to SFAS No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*, because the period between achieving technological feasibility and completion of such software is relatively short and software development costs qualifying for capitalization have been insignificant.

Stock-Based Compensation

We have two stock-based compensation plans, which are described more fully in Note 14. SFAS No. 123, *Accounting for Stock-Based Compensation*, encourages, but does not require us to record compensation cost for stock-based employee compensation plans at fair value. We have chosen to continue to account for stock-based compensation using the intrinsic value method prescribed in APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations for all periods presented. Accordingly, compensation cost for stock options is measured as the excess, if any, of the fair value of our stock at the date of grant over the amount an employee must pay to acquire the stock.

On December 1, 2005, we accelerated vesting of certain unvested and out-of-the-money stock options with exercise prices equal to or greater than \$6.74 per share that were previously awarded under our equity compensation plans to our employees. These options were accelerated to avoid recording future compensation expense with respect to such options following adoption of SFAS No. 123(R). Our management believes that because such options had exercise prices in excess of the current market value of our stock, the options were not achieving their original objective. The acceleration of vesting was effective for stock options outstanding as of December 1, 2005. Options to purchase 0.6 million shares of common stock were subject to the acceleration and the weighted average exercise price of the options subject to the acceleration was \$11.71. Due to this acceleration, an additional \$2.8 million representing the unrecognized compensation cost at the modification date is included in the pro forma stock-based compensation expense for the year ended December 31, 2005.

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Had compensation cost for our stock option awards been determined based upon the fair value at the date of grant, in accordance with SFAS No. 123, our net income and basic and diluted net income per share would have been adjusted to the following amounts for the years ended December 31 (in thousands):

	2003	2004	2005
Net income attributable to common stockholders as reported	\$ 11,990	\$ 11,597	\$ 26,597
Stock-based employee compensation expense included in reported net income attributable to common stockholders	20	20	8
Stock-based employee compensation expense determined under fair value based method for all awards	(7,047)	(4,553)	(6,374)
Pro forma net income attributable to common stockholders	\$ 4,963	\$ 7,064	\$ 20,231
Basic net income per share:			
As reported	\$ 0.35	\$ 0.27	\$ 0.61
Pro forma	\$ 0.15	\$ 0.16	\$ 0.46
Diluted net income per share:			
As reported	\$ 0.31	\$ 0.25	\$ 0.58
Pro forma	\$ 0.13	\$ 0.15	\$ 0.44

We account for stock options granted to non-employees using the fair value method. Compensation expense for options granted to non-employees has been determined in accordance with SFAS No. 123 and Emerging Issues Task Force, or EITF, No. 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services*, as the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measured. Compensation expense for options granted to non-employees is periodically recalculated as the underlying options vest and is recorded as expense and deferred compensation in the financial statements.

Foreign Currency Transactions and Translation

A portion of our international business is presently conducted in currencies other than the U.S. dollar. Foreign currency transaction gains and losses arising from normal business operations are included in current period earnings. As a result, fluctuations in the value of the currencies in which we conduct our business relative to the U.S. dollar, will cause currency transaction gains and losses, which we have experienced in the past and continue to experience. Due to the substantial volatility of currency exchange rates, among other factors, we cannot predict the effect of exchange rate fluctuations upon future operating results. We have not previously undertaken hedging transactions to cover currency exposure and do not intend to engage in hedging activities in the future.

The functional currency of each of our foreign subsidiaries is the local currency and accordingly, assets and liabilities are translated into U.S. dollars at year-end exchange rates; revenues and expenses, and gains and losses are translated at rates of exchange that approximate the rates in effect on the transaction date. Resulting translation gains and losses are recognized as a component of other comprehensive income.

Income Taxes

We record deferred income taxes to reflect temporary differences between the reporting of income for financial statement and tax reporting purposes. Measurement of the deferred income tax items is based on enacted tax laws and rates. In the event the future consequences of differences between financial reporting bases and tax bases of our assets and liabilities result in a deferred income tax asset, an evaluation is performed to determine the probability we will be able to realize the future benefits of such asset. A valuation allowance

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

related to a deferred income tax asset is recorded when it is considered more likely than not that some portion or all of the deferred income tax asset will not be realized.

Net Income Per Share

Basic net income per share is calculated by dividing net income or net income attributable to common stockholders by the weighted average number of common shares outstanding during the period.

Diluted net income per share reflects the potential dilution of securities by including common stock equivalents, such as stock options, stock warrants and convertible preferred stock, in the weighted average number of common shares outstanding for a period, if dilutive.

The following table sets forth a reconciliation of the basic and diluted number of weighted average shares outstanding used in the calculation of net income per share for the years ended December 31 (in thousands):

	2003	2004	2005
Weighted average shares used to calculate basic net income per share	33,856	43,460	43,903
Dilutive effect of stock options and stock warrants	3,696	2,935	1,736
Dilutive effect of convertible preferred stock	612		
Weighted average shares used to calculate diluted net income per share	38,164	46,395	45,639

As of December 31, 2003, options to purchase 100,716 shares of common stock with exercise prices ranging from \$11.30 to \$16.46 per share were outstanding, but were not included in the calculation of diluted net income per share because their effect was antidilutive.

As of December 31, 2004, options to purchase 1,087,476 shares of common stock with exercise prices ranging from \$9.81 to \$17.14 per share were outstanding, but were not included in the calculation of diluted net income per share because their effect was antidilutive.

As of December 31, 2005, options to purchase 2,578,763 shares of common stock with exercise prices ranging from \$6.03 to \$17.14 per share were outstanding, but were not included in the calculation of diluted net income per share because their effect was antidilutive.

Recent Accounting Pronouncements

The Company currently accounts for stock-based compensation awards using the intrinsic value measurement provisions of APB Opinion No. 25. Accordingly, no compensation expense is recorded for stock options granted with exercise prices greater than or equal to the fair value of the underlying common stock at the date of grant. In December 2004, the FASB issued SFAS No. 123(R) and in March 2005, the SEC issued SAB No. 107, *Share-Based Payment*, relating to the adoption of SFAS No. 123(R). SFAS No. 123(R) eliminates the alternative of applying the intrinsic value measurement provisions of APB Opinion No. 25 to stock compensation awards. Rather, SFAS No. 123(R) requires enterprises to measure the cost of services received in exchange for an award of equity instruments based on the fair value of the award at the date of grant. That cost will be recognized over the period during which a person is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

The Company's management expects that the adoption of SFAS No. 123(R) will impact the Company's financial results in the future, as it is expected to significantly reduce net income as the Company has not had significant stock-based compensation expense in the recent past. The pro forma effects on net income and earnings per share if the fair value recognition provisions of original SFAS No. 123 on stock compensation

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

awards (rather than applying the intrinsic value measurement provisions of APB Opinion No. 25) is presented in Note 1. Although such pro forma effects of applying the original SFAS No. 123 may be indicative of the effects of adopting SFAS No. 123(R), the provisions of these two statements differ in important respects. The actual effects of adopting SFAS No. 123(R) will be dependent on numerous factors including, but not limited to, the valuation model chosen by the Company to value stock-based awards; the assumed award forfeiture rate; the accounting policies adopted concerning the method of recognizing the fair value of awards over the requisite service period; and the transition method (as described below) chosen for adopting SFAS No. 123(R).

The Company will adopt SFAS No. 123(R) on January 1, 2006 using the Modified Prospective Application Method. Under this method, SFAS No. 123(R) is applied to new awards and to awards modified, repurchased or cancelled after the effective date. Additionally, compensation cost for the portion of awards for which the requisite service has not been rendered (such as unvested options) that are outstanding as of the date of adoption will be recognized as the remaining requisite services are rendered. The compensation cost relating to unvested awards at the date of adoption shall be based on the fair value at the date of grant of those awards as calculated for pro forma disclosures under the original SFAS No. 123.

On November 24, 2004, the FASB issued SFAS No. 151, *Inventory Costs, and Amendment of ARB No. 43, Chapter 4*, to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material. This Statement is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. We have not completed the process of evaluating the impact that the adoption of Statement 151 will have on our financial position or results of operations.

In December 2004, the FASB issued SFAS No. 153, *Exchanges of Nonmonetary Assets*, which eliminates the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. SFAS No. 153 will be effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005. We do not believe the adoption of SFAS No. 153 will have material impact on our results of operations or financial condition.

In March 2005, the FASB issued interpretation number 47, *Accounting for Conditional Asset Retirement Obligations* an interpretation of FASB SFAS No. 143, *Accounting for Asset Retirement Obligation*, which refers to a legal obligation to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and/or method of settlement. Thus, the timing and/or method of settlement may be conditional on a future event. Accordingly, an entity is required to be reasonably estimated. The fair value of a liability for the conditional asset retirement obligation should be recognized when incurred generally upon acquisition, construction, or development and/or through the normal operation of the asset. Uncertainty about the timing and/or method of settlement of a conditional asset retirement obligation should be factored into the measurement of the liability when sufficient information exists. SFAS No. 143 acknowledges that in some cases, sufficient information may not be available to reasonably estimate the fair value of asset retirement obligation. There was no effect of adoption of the statement on our results of operations or financial condition.

In May 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections*, which requires retrospective application to prior periods financial statements of a voluntary change in accounting principle and that a change in method of depreciation, amortization, or depletion for long-lived, nonfinancial assets be accounted for as a change in accounting estimate that is effected by a change in accounting principle. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005.

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In June 2005, the FASB issued Staff Position No. 143-1, *Accounting for Electronic Equipment Waste Obligations*, or FSP 143-1, which provides guidance on the accounting for obligations associated with the Directive on Waste Electrical and Electronic Equipment, or the WEEE Directive, which was adopted by the European Union. FSP 143-1 provides guidance on accounting for the effects of the WEEE Directive with respect to historical waste and waste associated with products on the market on or before August 13, 2005. FSP 143-1 requires commercial users to account for their WEEE obligation as an asset retirement liability in accordance with FASB Statement No. 143, *Accounting for Asset Retirement Obligations*. FSP 143-1 was required to be applied to the later of the first reporting period ending after June 8, 2005 or the date of the adoption of the WEEE Directive into law by the applicable European Union member country. The WEEE Directive has been adopted into law by the majority of European Union member countries in which the Company has significant operations. The Company adopted the provisions of FSP 143-1 as it relates to these countries with no material impact on its financial statements. The Company will apply the guidance of FSP 143-1 as it relates to the remaining European Union member countries in which it operates when those countries have adopted the WEEE Directive into law. The effect of applying FSP 143-1 in the remaining countries in future periods is not expected to have a material effect on our results of operations or financial condition.

In November 2005, the FASB issued Staff Position No. 115-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, or FSP No. 115-1. FSP No. 115-1 provides accounting guidance for identifying and recognizing other-than-temporary impairments of debt and equity securities, as well as cost method investments in addition to disclosure requirements. FSP No. 115-1 is effective for periods beginning in 2006. We do not believe adoption of FSP No. 115-1 will have a material effect on our results of operations or financial condition.

2. Acquisition

In accordance with SFAS No. 141, *Business Combinations*, Dot Hill allocates the purchase price of its acquisitions to the tangible assets, liabilities and intangible assets acquired, including in-process research and development (IPR&D), based on their estimated fair values. The excess purchase price over those fair values is recorded as goodwill. The fair value assigned to intangible assets acquired is based on a number of factors including a valuation prepared by an independent third party appraisal firm. Goodwill and purchased intangible assets with indefinite useful lives are not amortized but are reviewed annually for impairment. Purchased intangible assets with finite lives are amortized on a straight-line basis over their respective useful lives.

On February 23, 2004, we completed the acquisition of Chaparral Network Storage, Inc., or Chaparral, a privately held developer of specialized storage appliances as well as high-performance, mid-range RAID controllers and data routers. The aggregate purchase price paid in cash was \$62.0 million. In addition, we agreed to pay \$4.1 million to certain employees covered by change in control agreements as a result of the acquisition and we incurred direct transaction costs of approximately \$0.8 million and approximately \$0.7 million in integration costs. The acquisition of Chaparral is expected to enable us to increase the amount of proprietary technology within our storage systems, broaden our product line and diversify our customer base. The results of operations of Chaparral have been included in our results prospectively from February 23, 2004.

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Based on our estimates and assumptions, the total purchase price of approximately \$67.6 million was allocated as follows (in thousands):

Assets:	
Cash and cash equivalents	\$ 2,202
Accounts receivable	1,769
Inventories	955
Prepaid expenses and other	147
Property and equipment	648
Goodwill	56,768
Intangible assets:	
Developed technology	2,600
Core technology	5,000
Customer relationships	2,500
Backlog	100
In-process research and development	4,700
Total assets	77,389
Liabilities:	
Current liabilities	2,859
Convertible debt and accrued interest	6,945
Total liabilities	9,804
Net assets acquired	\$ 67,585

No changes were made to the original purchase price allocation during the year ended December 31, 2004 or 2005 and the purchase price allocation is now considered final.

Of the acquired intangible assets, \$4.7 million pertained to IPR&D and was written off by our recognition of a charge to operations on the acquisition date. The remaining acquired identifiable intangible assets are being amortized using the straight-line method over their estimated useful lives as follows: developed and core technology, 2.5 to 4.5 years; customer relationships, 3.5 years, and backlog, 8 months. The goodwill recorded in this transaction has been allocated to our SANnet family-operating segment. None of this goodwill will be deductible for tax purposes.

IPR&D recorded in connection with the acquisition of Chaparral represents the present value of the estimated after-tax cash flows expected to be generated by purchased technologies that, as of the acquisition dates, had not yet reached technological feasibility. The classification of the technology as complete or under development was made in accordance with the guidelines of SFAS No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*, and Financial Accounting Standards Board Interpretation No. 4, *Applicability of SFAS No. 2 to Business Combinations Accounted for by the Purchase Method*. In addition, the Fair Value, as defined below, of the IPR&D projects was determined in accordance with SFAS No. 141, and SFAS No. 142, *Goodwill and Other Intangible Assets*.

Chaparral's IPR&D projects were valued through the application of discounted cash flow analyses, taking into account many key characteristics of Chaparral as well as its future prospects, the rate technology changes in the industry, product life cycles, risks specific to each project, and various projects' stage of completion. Stage of

completion was estimated by considering the time, cost, and complexity of tasks completed prior to the acquisition versus the project's overall expected cost, effort and risks required for achieving technological

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

feasibility. In the application of the discounted cash flow analyses, Chaparral's management provided distinct revenue forecasts for each IPR&D project. The projections were based on the expected date of market introduction, an assessment of customer needs, the expected pricing and cost structure of the related products, product life cycles, and the importance of the existing technology relative to the in-process technology. In addition, the costs expected to complete each project were added to the operating expenses to calculate the operating income for each IPR&D project. As certain other assets contribute to the cash flow attributable to the assets being valued, returns to these other assets were calculated and deducted from the pre-tax operating income to isolate the economic benefit solely attributable to each of the in-process technologies. The present value of IPR&D was calculated based on discount rates recommended by the American Institute of Certified Public Accountants IPR&D Practice Aid, which depend on the stage of completion and the additional risk associated with the completion of each of the IPR&D projects. We also considered venture capital rates of return and the weighted average cost of capital for Chaparral, which was based on a capital asset pricing model as an appropriate measure of the discount rates associated with each IPR&D project. As a result, the earnings associated with the incomplete technology were discounted at a rate of approximately 22%.

Certain of our employees are former Chaparral employees who were party to agreements with Chaparral providing for payment in the event of a change in control of Chaparral, 50% of which was payable immediately and 50% of which is payable after 18 months of service following the acquisition date. As a result of our acquisition of Chaparral, these employees were paid approximately \$3.1 million in March 2004, and approximately \$1.0 million in 2005. As of December 31, 2005, our obligations under these agreements were completely satisfied.

Pro Forma Results of Operations

The following pro forma results of operations present the impact on our results of operations for the year ended December 31, 2003 and 2004 as if the acquisition of Chaparral had been completed as of the beginning of the period presented. The charge of \$4.7 million related to the write-off of IPR&D has been excluded from the pro forma results of operations, as it is nonrecurring in nature (in thousands):

	Year Ended December 31,			
	2003 Historical	2003 Pro Forma	2004 Historical	2004 Pro Forma
Revenues	\$ 187,448	\$ 197,434	\$ 239,376	\$ 241,132
Net income (loss)	\$ 12,131	\$ (1,765)	\$ 11,597	\$ 14,341
Basic income (loss) per share	\$ 0.35	\$ (0.06)	\$ 0.27	\$ 0.33
Diluted income (loss) per share	\$ 0.31	\$ (0.06)	\$ 0.25	\$ 0.31

3. Risks and Uncertainties***Concentration of Credit Risk***

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of trade accounts receivable. We do not require collateral or other securities to support customer receivables. A majority of our net revenue is derived from a limited number of customers. For the years ended December 31, 2003, 2004, and 2005 sales to one customer accounted for approximately 83.4%, 86.3%, and 86.2%, respectively. At December 31, 2004 and 2005 our accounts receivable from one customer were approximately 81.6% and 85.2%, respectively. Generally, our customers have no minimum purchase requirements and have certain rights to extend, delay or cancel shipment of their orders without penalty.

Table of Contents

DOT HILL SYSTEMS CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash, Cash Equivalents, and Short-Term Investments, Concentrations

The Federal Deposit Insurance Corporation, or FDIC, insures a corporation's funds deposited in a bank up to a maximum of \$0.1 million in the event of a bank failure. As of December 31, 2005, our cash, cash equivalents, and short-term investments held exceeded the FDIC insured amount by approximately \$122.1 million. We have not experienced any losses in relation to cash, cash equivalents, and short-term investments in excess of FDIC insurance limits.

Foreign Sales

The following table summarizes foreign sales by geographic region as a percentage of net revenue for the years ended December 31:

	2003	2004	2005
Europe	4.9%	4.0%	4.6%
Asia	1.7	2.8	2.4
Total foreign sales	6.6%	6.8%	7.0%

Net revenue is recorded in the geographic area in which the sale is originated.

Dependence on Suppliers

We rely on other companies to supply certain key components of our products and products that we resell. Many of these components and third-party products are available only from limited sources in the quantities and quality demanded by us. Our third party contract manufacturers are responsible for purchasing and obtaining supplies.

We have outsourced the manufacture of substantially all of our products to a single manufacturer. Approximately 93%, 94%, and 96% of our total raw material purchases for the years ended December 31, 2003, 2004 and 2005, respectively, were from this manufacturer. If our relationship with this manufacturer terminates, it could take several months to establish alternative manufacturing for these products and we may not be able to fulfill orders for these products in a timely manner, which would have a material adverse effect on our financial condition and operating results. Under an OEM agreement with a significant customer, this customer has the right to require that we use a third party to manufacture product. Such an external manufacturer must meet this customer's engineering, qualification and logistics requirements. If our relationship with the current manufacturer terminates, we may be unable to find another suitable external manufacturer, which would have a material adverse effect on our financial condition and operating results.

With respect to certain components, such as disk drives and controllers, if our third party manufacturer had to seek alternative sources of supply, the incorporation of such components from alternative suppliers and the manufacture and shipment of product could be delayed while modifications to such products and the accompanying software were made to accommodate the introduction of the alternative suppliers' components. We estimate that replacing the controllers that we currently use with those of another supplier would involve several months of hardware and software modification, which would have a material adverse effect on our financial condition and operating results.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

4. Accumulated Other Comprehensive Loss

The balance of accumulated other comprehensive loss consists of foreign currency translation adjustments and unrealized gains and losses on short-term investments classified as available for sale. Changes in the accumulated other comprehensive loss balance for the years ended December 31, 2003, 2004 and 2005 are detailed as follows (in thousands):

Balance, January 1, 2003	\$ (318)
Foreign currency translation adjustment	30
Net unrealized gain on short-term investments	25
Balance, December 31, 2003	(263)
Foreign currency translation adjustment	(45)
Net unrealized loss on short-term investments	(154)
Balance, December 31, 2004	(462)
Foreign currency translation adjustment	255
Net unrealized gain on short-term investments	89
Balance, December 31, 2005	\$ (118)

Accumulated other comprehensive loss consists of the following at December 31, (in thousands):

	2004	2005
Foreign currency translation adjustments	\$ (333)	\$ (78)
Unrealized loss on marketable equity securities classified as available for sale	(129)	(40)
	\$ (462)	\$ (118)

5. Restructuring Costs and Asset Write-downs

In March 2001, we announced plans to reduce our full-time workforce by up to 30% and reduce other expenses in response to delays in customer orders, lower than expected revenues and slowing global market conditions. The cost reduction actions were designed to reduce our breakeven point in light of an economic downturn. The cost reductions resulted in a charge for employee severance, lease termination costs and other office closure expenses related to the consolidation of excess facilities. We recorded restructuring expenses in the first quarter of 2001 of approximately \$2.9 million, as follows (in thousands):

Employee termination costs	\$ 1,271
Impairment of property and equipment	1,007
Facility closures and related costs	637
Professional fees and other	20
Total	\$ 2,935

In June 2001, we announced plans to further reduce our full-time workforce by up to 17% and reduce other expenses in response to a continuing economic downturn and overall decrease in revenue. As a result of

F-17

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

these additional restructuring actions, we recorded additional restructuring expenses during the second quarter of 2001 of approximately \$1.5 million, as follows (in thousands):

Employee termination costs	\$ 259
Impairment of property and equipment	350
Facility closures and related costs	861
Total	\$ 1,470

Employee termination costs consist primarily of severance payments for 180 employees. Impairment of property and equipment consists of the write-down of certain fixed assets associated with facility closures. The facility closures and related costs consist of lease termination costs for five sales offices and closure of the New York City office.

During the fourth quarter of 2001, we increased our March 2001 related restructuring accrual by approximately \$0.2 million and our June 2001 restructuring accrual by approximately \$0.3 million due to the continuing deterioration of various real estate markets and the inability to sublet excess space in our Carlsbad and New York City facilities.

During the fourth quarter of 2002, we again increased our March 2001 related restructuring accrual by approximately \$0.7 million and our June 2001 related restructuring accrual by approximately \$0.9 million to reflect additional deterioration of real estate markets in Carlsbad and New York City, as well as the effects of lease buyouts negotiated on several facilities and a sublease arrangement reached on another facility.

As of December 31, 2005, the Company only has accruals for facility closures and related costs remaining. The following is a summary of restructuring activity recorded during the period from January 1, 2003 to December 31, 2005 (in thousands):

March 2001 Restructuring

	Accrued Restructuring Expenses at January 1, 2003	Amounts Utilized in 2003	Accrued Restructuring Expenses at December 31, 2003	Additional Restructuring Expenses in (Settlement)	Current Amount Utilized	Accrued Restructuring Expenses at December 2004	Additional Restructuring Expenses	Current Amount Utilized	Accrued Restructuring Expenses at December 31, 2005
Facility closures and related costs	\$ 661	(260)	401	(79)	(154)	168	17	(140)	\$ 45

June 2001 Restructuring

	Accrued Restructuring Expenses at January 1,	Amounts Utilized in	Accrued Restructuring Expenses at December 31,	Additional Restructuring Expenses in	Current Amount	Accrued Restructuring Expenses at December 2004	Additional Restructuring Expenses	Current Amount	Accrued Restructuring Expenses at December 31,
--	--	---------------------------	--	---	-------------------	--	---	-------------------	--

	2003	2003	2003	(Settlement)	Utilized	2004	Expenses	Utilized	2005
Facility closures and related costs	\$ 925	(402)	523	(354)	(159)	10	75	(85)	\$

In June 2004, we negotiated an exit from our lease of the 10th floor of our former New York City office thereby eliminating our related rent exposure. Accordingly, during the year ended December 31, 2004, we recorded a reduction of approximately \$0.5 million to our restructuring reserve previously established in connection with the closure of our New York City office. Additionally, we have evaluated certain factors pertaining to our remaining sublease tenant; accordingly, during the year ended December 31, 2004, we recorded an additional restructuring accrual of approximately \$0.1 million. We are not aware of any further unresolved issues or additional liabilities that may result in a significant adjustment to restructuring expenses accrued as of December 31, 2005.

6. Short-Term Investments

The following tables summarize our short-term investments as of December 31, 2005 and 2004 (in thousands):

December 31, 2005				
	Cost	Net Unrealized Losses	Net Unrealized Gains	Fair Value
U.S. Government securities	\$ 11,395	\$ (39)	\$	\$ 11,356
Corporate debt	2,076	(1)		2,075
	\$ 13,471	\$ (40)	\$	\$ 13,431

December 31, 2004				
	Cost	Net Unrealized Losses	Net Unrealized Gains	Fair Value
U.S. Government securities	\$ 49,583	\$ (172)	\$ 27	\$ 49,438
Municipal securities	600			600
Corporate debt	1,811	(11)		1,800
Commercial paper	6,825		27	6,852
	\$ 58,819	\$ (183)	\$ 54	\$ 58,690

Gross realized gains on these investments were \$2,448, \$118,371, and \$8,550 for the years ended December 31, 2003, 2004 and 2005, respectively. Gross realized losses on these investments were \$58,485, \$106,388, and \$3,322 for the years ended December 31, 2003, 2004 and 2005, respectively.

Expected maturities will differ from contractual maturities because the issuers of the securities may have the right to prepay obligations without prepayment penalties. The cost and fair value of short-term investments at December 31, 2005 and 2004 by contractual maturity are shown below (in thousands).

December 31, 2005			
	Cost	Fair Value	
Due in one year or less	\$ 1,276	\$	1,276
Due after one year through five years	12,195		12,155
Total	\$ 13,471	\$	13,431

	December 31, 2004	
	Cost	Fair Value
Due in one year or less	\$ 53,326	\$ 53,208
Due after one year through five years	4,893	4,882
Due after five years through ten years		
Due after ten years	600	600
Total	\$ 58,819	\$ 58,690

F-19

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table shows the gross unrealized losses and fair values of the Company's investments in individual securities that have been in a continuous unrealized loss position deemed to be temporary for less than and greater than 12 months, aggregated by investment category, at December 31, 2005 (in thousands):

	Less Than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Government securities	\$ 6,479	\$ (17)	\$ 4,877	\$ (22)	\$ 11,356	\$ (39)
Corporate debt	2,025	(1)			2,025	(1)
Total	\$ 8,504	\$ (18)	\$ 4,877	\$ (22)	\$ 13,381	\$ (40)

U.S. Government Securities. The unrealized losses on our investments in U.S. Government securities were caused by interest rate increases. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment. Because we have the ability and intent to hold these investments until a recovery of fair value, which may be maturity, we do not consider these investments to be other-than-temporarily impaired at December 31, 2005.

Corporate Debt Securities. The Company's investments in debt securities consist primarily of investments in corporate bonds. The unrealized losses on the Company's investment in debt securities were caused by credit quality and industry or company specific events. Because the severity and duration of the unrealized losses were not significant, the Company considers these unrealized losses to be temporary at December 31, 2005.

7. Inventories

Inventories consist of the following at December 31 (in thousands):

	2004	2005
Purchased parts and materials	\$ 1,507	\$ 1,058
Work-in-process	37	
Finished goods	2,127	1,746
Total inventory	\$ 3,671	\$ 2,804

8. Property and Equipment

Property and equipment consist of the following at December 31 (in thousands):

	2004	2005
Machinery and equipment	\$ 15,438	\$ 8,770
Furniture, fixtures, and computer software	1,366	1,433
Leasehold improvements	679	670
Construction in progress		3,259

Total property and equipment, at cost	17,483	14,132
Less accumulated depreciation	(9,624)	(6,241)
Total property and equipment, net	\$ 7,859	\$ 7,891

Construction in progress at December 31, 2005 was comprised of \$1.6 million associated with the implementation of our ERP system, \$1.1 million associated with leasehold improvements at our new corporate headquarters in Carlsbad, and \$0.6 million related to tooling and test equipment.

F-20

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Depreciation expense was \$2.0 million, \$3.2, and \$4.6 million for the years ended December 31, 2003, 2004 and 2005, respectively.

9. Goodwill and Intangible Assets

Under the provisions of SFAS No. 142, goodwill and intangible assets with indefinite lives are not amortized, but instead are tested for impairment annually or more frequently if impairment indicators arise. All of our other intangible assets are considered to have finite lives and are being amortized in accordance with this statement. All of our goodwill has been allocated to our SANnet family-operating segment (see Note 2).

In December 2005, we entered into a Patent Cross License with International Business Machines Corporation, or IBM. Pursuant to the Patent Cross License, each party acquired a nonexclusive worldwide license under certain of the other party's patents related to information handling systems. The license term extends for the remaining life of the patents and any new patents that are granted to either party through December 31, 2008. In connection with the Patent Cross License, we paid IBM a one-time licensing fee of \$2.5 million. The Patent Cross License was recorded as an intangible asset and will be amortized over the patents' applicable useful lives.

Intangible assets that are subject to amortization under SFAS No. 142 consist of the following as of December 31, 2004 and 2005 (in thousands):

	December 31, 2004		
	Gross	Accumulated Amortization	Net
Core technology	\$ 5,000	\$ (926)	\$ 4,074
Developed technology	2,600	(867)	1,733
Customer relationships	2,500	(595)	1,905
Backlog	100	(100)	
Total intangible assets	\$ 10,200	\$ (2,488)	\$ 7,712

	December 31, 2005		
	Gross	Accumulated Amortization	Net
Core technology	\$ 5,000	\$ (2,037)	\$ 2,963
Developed technology	2,600	(1,907)	693
Customer relationships	2,500	(1,309)	1,191
Backlog	100	(100)	
Licensed Patent Portfolio	2,570	(3)	2,567
Total intangible assets	\$ 12,770	\$ (5,356)	\$ 7,414

As of December 31, 2004 and 2005, the weighted average amortization period for the above intangibles is 3.8 and 4.0 years, respectively.

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Estimated future amortization expense related to intangible assets at December 31, 2005 is as follows (in thousands):

2006	\$ 3,033
2007	2,101
2008	1,255
2009	514
2010	511
Total	\$ 7,414

10. Credit Facilities***Line of Credit***

Effective July 1, 2004, we entered into a credit agreement with Wells Fargo Bank, National Association, or Wells Fargo, which allows us to borrow up to \$30.0 million under a revolving line of credit that expires July 1, 2006. Amounts loaned under the agreement bear interest at our option at a fluctuating rate per annum equal to the Prime Rate in effect from time to time, or at a fixed rate per annum determined by Wells Fargo to be 0.65% above LIBOR in effect on the first day of the applicable fixed rate term. In connection with the agreement, to the extent we have outstanding borrowings, we have granted Wells Fargo a security interest in our investment management account maintained with Wells Capital Management Incorporated. As of December 31, 2004 and 2005, there was no balance outstanding under this line of credit. The agreement limits any new borrowings, loans or advances outside of the agreement to an amount less than \$1.0 million.

The above-mentioned line of credit replaces the credit agreement we had with Wells Fargo that provided for borrowings of up to \$15.0 million under a revolving line of credit that expired on May 1, 2004. The maximum amount we were allowed to borrow under the line of credit was limited by the amount of our cash and investment balances held at the bank at any given time and could have been reduced by the amount of any outstanding letters of credit with the bank. Borrowings under the facility were collateralized by a pledge of our deposits held at the bank. Borrowings under the line of credit incurred interest at the bank's prime rate or 50 basis points above LIBOR, at our option. Interest on outstanding borrowings was due monthly, with the principal due at maturity.

Note Payable

In connection with our acquisition of Chaparral in February 2004, we assumed a \$6 million promissory note that incurred interest at 8%. During August 2004, we made a payment of approximately \$7.2 million representing both principal and interest to the holder of the \$6 million promissory note. There are no further amounts due.

Japanese Yen Facilities

Through November 2004, our Japanese subsidiary had two lines of credit with Tokyo Mitsubishi Bank, a Japanese bank, and one line of credit with National Life Finance Corporation in Japan, for borrowings up to an aggregate of 45 million Yen (approximately U.S. \$0.4 million). Borrowings under these lines of credit were previously collateralized by inventories of the Japanese subsidiary. As of November 2004, all of the lines of credit relating to our Japanese subsidiary described above were repaid and closed.

11. Income Taxes

Components of the income tax provision (benefit) are as follows for the years ended December 31 (in thousands):

	2003	2004	2005
Current:			
Federal	\$ 60	\$ 217	\$ 624
State, local and foreign	28	55	41
	88	272	665
Deferred:			
Federal			(18,697)
State, local and foreign			(7,165)
			(25,862)
Total income tax provision (benefit)	\$ 88	\$ 272	\$ (25,197)

A reconciliation of the income tax provision computed using the federal statutory income tax rate to the recognized income tax provision (benefit) is as follows for the years ended December 31 (in thousands):

	2003	2004	2005
Federal statutory rate	\$ 4,277	\$ 4,154	\$ 490
State and local income taxes, net of federal effect	713	930	(4,569)
Decrease in deferred income tax asset valuation allowance	(4,731)	(6,626)	(22,112)
Foreign taxes	(141)	306	1,418
In-process research and development		1,645	
Research and development credit			(393)
Other	(30)	(137)	(31)
Income tax provision (benefit)	\$ 88	\$ 272	\$ (25,197)

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The income tax effects of temporary differences that give rise to deferred income taxes are as follows at December 31 (in thousands):

	2004	2005
Deferred income tax assets:		
Net operating loss and tax credit carry forwards	\$ 54,238	\$ 51,911
Inventory reserve and uniform capitalization	587	454
Stock warrants	1,532	1,532
Restructuring accrual	75	19
In-process research and development	418	445
Acquisition costs		302
Allowance for bad debts	174	51
Vacation accrual	371	425
Deferred rent		94
Warranty accrual	464	313
Deferred revenue		343
Other accruals and reserves	625	101
Total deferred income tax assets	58,484	55,990
Deferred income tax liabilities:		
State taxes	(3,161)	(2,469)
Depreciation and amortization	(1,292)	(930)
Acquired intangibles	(3,095)	(1,889)
Total deferred income tax liabilities	(7,548)	(5,288)
Deferred income tax asset valuation allowance	(50,936)	(3,561)
Net deferred income tax asset	\$	\$ 47,141

As of December 31, 2005, the Company reversed a valuation allowance on its U.S. deferred tax assets totaling \$47.1 million. Based on the nature of the underlying deferred tax assets, the reversal of the valuation allowance resulted in an increase to additional paid-in capital of \$5.4 million, a reduction of Goodwill in the amount of \$16.4 million, and a net income tax benefit of \$25.3 million. This reversal is the result of the Company's recent sustained history of operating profitability and the determination by management that the future realization of the net deferred tax assets was judged to be more likely than not. The Company exercises significant judgment relating to the projection of future taxable income to determine the recoverability of any tax assets recorded on the balance sheet. If judgments regarding recoverability of deferred tax assets are not accurate, the Company could be required to record additional reserves against deferred tax assets in future periods.

As of December 31, 2005, a valuation allowance of \$3.6 million has been provided for the foreign deferred tax assets based upon the Company's assessment of the future realizability of certain foreign deferred tax assets, as it is more likely than not, that sufficient taxable income will not be generated to realize these temporary differences.

As of December 31, 2005, the Company has federal and state net operating losses of approximately \$113.1 million and \$49.0 million, which begin to expire in the tax years ending 2009 and 2006, respectively. In addition, the

Company has federal tax credit carryforwards of \$2.9 million, of which approximately \$0.5 million can be carried forward indefinitely to offset future taxable income, and the remaining \$2.4 million

F-24

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

will begin to expire in the tax year ending 2008. The Company also has state tax credit carryforwards of \$3.1 million, of which \$2.9 million can be carried forward indefinitely to offset future taxable income, and the remaining \$0.2 million will begin to expire in the tax year ending 2006.

Due to our equity transactions, an ownership change, within the meaning of Internal Revenue Code, or IRC, Section 382, occurred on September 18, 2003. As a result, annual use of our federal net operating loss and credit carry forwards is limited to (i) the aggregate fair market value of Dot Hill Systems Corp. immediately before the ownership change multiplied by (ii) the long-term tax-exempt rate (within the meaning of IRC Section 382 (f)) in effect at that time. The annual limitation is cumulative and, therefore, if not fully utilized in a year, can be utilized in future years in addition to the Section 382 limitation for those years.

As a result of our acquisition of Chaparral, an ownership change, within the meaning of Internal Revenue Code Section 382, occurred on February 23, 2004. As a result, annual use of the acquired Chaparral's federal net operating loss and credit carry forwards may be limited. The annual limitation is cumulative and, therefore, if not fully utilized in a year, can be utilized in future years in addition to the Section 382 limitation for those years.

We have not provided for any residual U.S. income taxes on the earnings from our foreign subsidiaries because such earnings are intended to be indefinitely reinvested. Such residual U.S. income taxes, if any, would be insignificant.

12. Stockholders Equity***Increase in Authorized Common Shares***

In April 2005, our board of directors authorized an increase of 1,000,000 shares of our common stock issuable pursuant to our 2000 Amended and Restated Equity Incentive Plan and 100,000 shares of our common stock issuable pursuant to our 2000 Amended and Restated Employee Stock Purchase Plan. This increase in shares became effective on the date of the 2005 Annual Stockholders Meeting, which was held April 25, 2005.

In May 2004, our board of directors authorized an increase of 867,261 shares of our common stock issuable pursuant to our 2000 Amended and Restated Equity Incentive Plan and 2,000,000 shares of our common stock issuable pursuant to our 2000 Amended and Restated Employee Stock Purchase Plan. This increase in shares became effective on the date of the 2004 Annual Stockholders Meeting, which was held May 3, 2004.

Common Stock Issuances

During March 2003, we raised net proceeds of approximately \$16.5 million in a private placement of 4,750,000 shares of our common stock at a price of \$3.75 per share. The shares in the private placement were sold at a price per share that was approximately 14% less than the five-day volume weighted average price of our common stock. We agreed to sell the shares in the private placement at a discount to the market price because the purchasers could not resell the shares to the public until the resale was registered. In connection with the private placement, we granted a warrant to the placement agent to purchase 183,000 shares of our common stock for \$4.50 per share. The warrant was recorded as a cost of the stock issuance.

During September 2003 we received net proceeds of approximately \$144.8 million from a secondary public offering of 9,904,000 shares of our common stock at a price of \$15.50 per share.

**DOT HILL SYSTEMS CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Stockholders Rights Plan

On May 19, 2003 we adopted a plan to provide certain rights to our stockholders, or a rights plan. Terms of the rights plan provide for a dividend distribution of one preferred share purchase right for each outstanding share of our common stock. The dividend was payable on May 30, 2003 to our stockholders of record on that date. Each such purchase right entitles the registered holder to purchase one one-hundredth of a share of our Series A Junior Participating Preferred Stock at a price of \$50.00, subject to adjustment. Each one one-hundredth of a share of this series of preferred stock has designations and powers, preferences and rights, and qualifications, limitations and restrictions that make its value approximately equal to the value of one share of our common stock.

13. Preferred Stock

On December 18, 2002, we received gross proceeds of \$6.0 million from the sale of 6,000 shares of preferred stock and warrants in a private placement. The preferred stock carried a 7% cumulative dividend. On May 2, 2003, we converted all of the outstanding shares of preferred stock into 1,846,152 shares of our common stock at a per share price of \$3.25. The warrants granted to the holders of the preferred stock entitle them to purchase an aggregate of 369,229 shares of our common stock at a per share price of \$3.25. The warrants terminate upon the earlier of December 19, 2007 or our consummation of certain acquisition transactions.

The warrants issued to the purchasers of the preferred stock were assigned a value of \$845,902 using the Black Scholes valuation model. The remaining gross proceeds of \$5,154,098 were allocated to the preferred stock. Based on the amount allocated to the preferred stock, a beneficial conversion amount of \$439,748 resulted, which has been recorded as a dividend.

In connection with the sale of the preferred stock, we issued a warrant, to the placement agent in the transaction, to purchase up to 118,812 shares of our common stock for \$3.25 per share. The warrant was recorded as a cost of the stock issuance.

14. Stock Options and Warrants

Equity Incentive Plan & Non-employee Stock Option Plan

Our 2000 Amended and Restated Equity Incentive Plan, or Incentive Plan, provides for the granting of incentive and nonqualified stock options to employees. Our 2000 Non-Employee Stock Option Plan, or Directors Plan, adopted in March 2000 provides for the granting of nonqualified stock options to non-employee directors. We currently have reserved 8,134,199 and 500,000 shares of common stock for issuance pursuant to the Incentive Plan and the Directors Plan, respectively. The terms and conditions of grants of stock options are determined by our board of directors in accordance with the terms of the Incentive Plan and Directors Plan.

F-26

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Information with respect to options under the Incentive Plan and Directors' Plan, as restated for the combination with Artecon's stock option plan, is as follows:

	Number of Shares	Weighted Average Exercise Price
BALANCE, January 1, 2003	3,670,843	\$ 3.86
Grants	961,000	7.81
Forfeitures	(296,280)	3.35
Exercises	(1,079,836)	3.83
BALANCE, December 31, 2003	3,255,727	5.08
Grants	1,626,750	10.31
Forfeitures	(386,588)	10.62
Exercises	(281,794)	3.75
BALANCE, December 31, 2004	4,214,095	6.68
Grants	1,328,000	5.78
Forfeitures	(396,172)	8.52
Exercises	(315,112)	3.11
BALANCE, December 31, 2005	4,830,811	\$ 6.52

The options generally vest ratably over a four or five year period and are exercisable over a period of ten years from the date of grant. Information with respect to options outstanding under the Incentive Plan and Directors' Plan at December 31, 2005 is as follows:

Range of Exercise Price		Options Outstanding		Options Exercisable		
		Outstanding	Weighted Average Remaining Contractual Life in Years	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$ 1.34	\$ 3.10	1,088,214	6.24	\$ 2.42	952,347	\$ 2.34
\$ 3.15	\$ 5.38	836,475	7.39	4.56	401,642	4.08
\$ 5.40	\$ 6.10	941,018	7.83	5.97	295,018	5.72
\$ 6.12	\$ 8.51	866,483	8.37	6.71	382,041	7.13
\$ 8.73	\$13.50	806,846	7.33	11.36	806,846	11.36
\$13.88	\$17.14	291,775	7.94	15.30	289,775	15.30
		4,830,811	7.42	\$ 6.52	3,127,669	\$ 6.99

On December 1, 2005, the Company accelerated vesting of certain unvested and out-of-the-money stock options with exercise prices equal to or greater than \$6.74 per share that were previously awarded under the Company's equity compensation plans to its employees. These options were accelerated to avoid recording future compensation expense with respect to such options following adoption of SFAS No. 123(R). The Company's management believes that because such options had exercise prices in excess of the current market value of the Company's stock, the options were not achieving their original objective. The acceleration of vesting was effective for stock options outstanding as of December 1, 2005. Options to purchase approximately 0.6 million shares of common stock were subject to the acceleration and the weighted average exercise price of the options subject to the acceleration was \$11.71.

F-27

Table of Contents**DOT HILL SYSTEMS CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of December 31, 2003 and 2004, approximately 1,322,443 and 1,867,338 options were exercisable at a weighted average exercise price of \$4.86 and \$4.56, respectively.

The pro forma compensation costs presented in Note 1 were determined using the weighted average fair values, at the date of grant, for options granted during the years ended December 31, 2003, 2004, and 2005 of \$5.87, \$6.41, and \$3.49 per share, respectively. The fair value of each option grant was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions for the years ended December 31:

	2003	2004	2005
Risk free interest	2.90%	3.23%	3.86%
Expected dividend yield			
Expected life	7.5 years	4.0 years	4.1 years
Expected volatility	82%	87%	78%

Warrants

On May 24, 2002, we granted an OEM customer a warrant to purchase 1,239,527 shares of our common stock at \$2.97 per share in connection with the signing of a product supply agreement. The warrant was fully vested upon issuance and became exercisable for 413,175 shares at signing, and becomes exercisable for an additional 413,176 shares on both May 24, 2003 and 2004 and expires on May 24, 2007. The fair value of the warrant, determined using the Black-Scholes option-pricing model, was \$3.7 million. The warrant was issued to induce the customer to purchase our products in the future and was not issued in consideration of any past transactions.

On February 14, 2003, we issued a warrant to an OEM customer to purchase 154,742 shares of our common stock at \$3.25 per share in connection with a private placement of our preferred stock. The warrant was fully vested upon issuance and became exercisable at signing.

During the year ended December 31, 2005, we received proceeds of approximately \$0.8 million from the exercise of warrants to purchase 246,153 shares of our common stock. As of December 31, 2005, there were outstanding warrants to purchase 1,720,696 shares of our common stock. The warrants have exercise prices ranging from \$2.97 to \$4.50 per share and expire at various dates through March 14, 2008.

15. Related Party Transactions

Purchases from affiliated companies for the years ended December 31, 2003, 2004 and 2005 were approximately \$15,000, \$8,000, and \$12,000, respectively.

16. Employee Benefit Plans***Dot Hill Retirement Savings Plan***

The Dot Hill Retirement Savings Plan, which qualifies under Section 401(k) of the Internal Revenue Code, is open to eligible employees over 21 years of age. Under the plan, participating U.S. employees may defer up to 100% of their pretax salary, but not more than statutory limits. We may match 50% of participating employees' contributions up to a specified limit of \$1,000. Our matching contributions vest to employees as a percentage based on years of employment from one to five years, and matching contributions are fully vested to employees after five years of employment. Our matching contributions to the retirement savings plan for the years ended December 31, 2003, 2004 and 2005 were approximately \$0.1 million, \$0.1 million, and \$0.1 million, respectively.

DOT HILL SYSTEMS CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Employee Stock Purchase Plan

Our Employee Stock Purchase Plan, or Purchase Plan, was adopted in August 1997, and amended and restated in March 2000. The Purchase Plan qualifies under the provisions of Section 423 of the Internal Revenue Code and provides our eligible employees, as defined in the Purchase Plan with an opportunity to purchase shares of our common stock at 85% of fair market value, as defined. We have reserved 2,100,046 shares of common stock for issuance pursuant to the Purchase Plan. During the years ended December 31, 2003, 2004 and 2005, approximately 524,000, 0 and 200,000 shares, respectively, were issued under the Purchase Plan.

17. Commitments and Contingencies***Operating Leases***

We lease office space and equipment under noncancelable operating leases, which expire at various dates through September 2009. Rent expense for the years ended December 31, 2003, 2004 and 2005 was \$0.9 million, \$1.2 million, and \$1.5 million, respectively. Sublease rental income for the years ended December 31, 2003, 2004 and 2005 was \$0.1 million, \$0.6 million, and \$0.6 million, respectively.

Future minimum lease payments due under all noncancelable operating leases as of December 31, 2005 are as follows (in thousands):

2006	\$ 1,477
2007	1,352
2008	1,110
2009	1,075
2010	1,025
Thereafter	2,502
Total minimum lease payments	\$ 8,541

The above minimum lease payments include minimum rental commitments totaling \$0.6 million that have been included in the restructuring accrual as of December 31, 2005. Minimum payments for operating leases have not been reduced by minimum sublease rentals of \$0.7 million due in the future under non-cancelable subleases.

In September 2005, we entered into an agreement to lease approximately 58,500 square feet of office space in Carlsbad, California, that will serve as a replacement for our current headquarters. The 88-month lease term will commence in January 2006. Upon the expiration of the initial term, we are entitled to two five-year renewal options. The minimum lease payments associated with this lease have been included in the future minimum lease payment table above.

Employment Agreements

In connection with the Merger, effective August 2, 1999 we adopted employment contracts with two of our executive officers. These contracts provide for base salaries totaling \$600,000 per year. In addition, each executive was eligible to receive, at the discretion of our board of directors, a cash bonus of up to 50% of such executives' then annual base salary. The employment contracts may be terminated at our option or at the executive's option for cause, or, upon 30 days written notice, for convenience and without cause. If we terminate for convenience, the executive is entitled to a severance payment equal to their then-current annual base salary. Following termination of employment other than due to death or disability, we may hire the

Table of Contents

DOT HILL SYSTEMS CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

executive as a consultant for a period of one year at a cost of 25% of the executive's then current annual base salary.

In August 2001, the Company entered into change of control agreements with three of its executive officers. Under one of the agreements, in the event of an acquisition of the Company or similar corporate event, referred to hereafter as a change of control, the executive officer's remaining stock options will become fully vested and the executive officer will be entitled to a lump sum cash payment equal to 150% of annual base salary then in effect. Under the second agreement, if the executive officer's employment is terminated other than for cause in connection with a change of control, the remaining unvested stock options will become fully vested and the executive officer will be entitled to a lump sum cash payment of 125% of annual base salary then in effect. Under the third agreement, in the event of a change of control, the executive officer's remaining unvested stock options will become fully vested and the executive officer will be entitled to a lump sum cash payment equal to 125% of annual base salary then in effect.

Effective April 1, 2002, we entered into a change of control agreement with an additional executive. Under the agreement, in the event of a change of control, the executive's remaining unvested stock options will become fully vested and the executive will be entitled to a lump sum cash payment equal to 125% of annual base salary then in effect.

On February 3, 2005, we adopted the Executive Compensation Plan 2005, or the Compensation Plan, for our Chief Executive Officer, our President, and our Chief Financial Officer. Under the Compensation Plans, our Chief Executive Officer, President and Chief Financial Officer are eligible to receive bonuses in an amount to be calculated in accordance with the terms of their respective Compensation Plans and dependent on the satisfaction of certain conditions relating to our revenues. In the case of the Chief Executive Officer, the target bonus is 80% of the Chief Executive Officer's base salary. In the case of the President, the target bonus is 70% of the President's base salary. In the case of the Chief Financial Officer, the target bonus is 50% of the Chief Financial Officer's base salary.

On March 3, 2006, we adopted the Executive Compensation 2006 Plan, or the 2006 Plan. Under the 2006 Plan, our President and Chief Executive Officer, our Chief Operating Officer, our Chief Financial Officer, our Senior Vice President of Sales and Marketing, and our Senior Vice President of Engineering, are each eligible to receive bonuses in an amount to be calculated in accordance with the terms of the 2006 Plan and are as follows: 40% dependent on certain quarterly management business objectives, 50% dependent on annual financial results relating to revenue and operating income, and 10% dependent on revenues associated with a certain customer. In the case of the President and Chief Executive Officer, the target bonus is 80% of the President and Chief Executive Officer's base salary. In the case of the Chief Operating Officer, the target bonus is 70% of the Chief Operating Officer's base salary. In the case of the Chief Financial Officer, the target bonus is 60% of the Chief Financial Officer's base salary. In the case of the Senior Vice President of Sales and Marketing, the target bonus is 50% of the Senior Vice President of Sales and Marketing's base salary. In the case of the Senior Vice President of Engineering, the target bonus is 40% of the Senior Vice President of Engineering's base salary.

Crossroads Systems Litigation

On October 17, 2003, Crossroads Systems, or Crossroads, filed a lawsuit against us in the United States District Court in Austin, Texas, alleging that our products infringe two United States patents assigned to Crossroads, Patent Numbers 5,941,972 and 6,425,035. We were served with the lawsuit on October 27, 2003. Chaparral was added as a party to the lawsuit in March 2004. The patents involve storage routers and methods for providing virtual local storage. Patent Number 5,941,972 involves the interface of SCSI storage devices and the Fibre Channel protocol
