NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
QUARTERS AND NINE MONTHS ENDED JUNE 30, 2012 AND 2011
(UNAUDITED)

NOTE A – Summary of Significant Accounting Policies

The consolidated unaudited interim financial statements included in this report have been prepared by Washington Federal, Inc. (“Company”). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires management to make estimates and assumptions that affect amounts reported in the financial statements. Actual results could differ from these estimates. In the opinion of management, all adjustments (consisting only of normal recurring accruals) necessary for a fair presentation are reflected in the interim financial statements. The September 30, 2011 Consolidated Statement of Financial Condition was derived from audited financial statements.

The information included in this Form 10-Q should be read in conjunction with Company’s 2011 Annual Report on Form 10-K (“2011 Form 10-K”) as filed with the SEC. Interim results are not necessarily indicative of results for a full year.

Loans receivable – When a borrower defaults on a loan, the Company attempts to cure the deficiency by working with the borrower. In most cases, deficiencies are cured promptly, sometimes as a result of a negotiated modification of terms. If the delinquency is not promptly cured, and negotiations do not lead to a modification of terms, the Company may institute appropriate legal action to collect the loan, which may include foreclosure of collateral. If foreclosed, the collateral is liquidated in a reasonable time frame at prices available in the market place.

The Company will consider modifying the interest rates and terms of a loan if it determines that a modification is a better alternative to foreclosure.

Loans are placed on nonaccrual status when, in the judgment of management, the probability of collection of interest is deemed to be insufficient to warrant further accrual. When a loan is placed on nonaccrual status, previously accrued but unpaid interest is deducted from interest income. The Company does not accrue interest on loans 90 days past due or more. If payment is made on a loan so that the loan becomes less than 90 days past due, and the Company expects full collection of principal and interest, the loan is returned to full accrual status. Any interest ultimately collected is credited to income in the period of recovery. A loan is charged-off when the loss is estimable and it is confirmed that the borrower will not be able to meet its contractual obligations.

The Company maintains an allowance for loan losses to absorb losses inherent in the loan portfolio. The allowance is based on ongoing, quarterly assessments of the probable and estimable losses inherent in the loan portfolio. The Company’s methodology for assessing the appropriateness of the allowance consists of two components, which include the general allowance and specific allowances.

The general loan loss allowance is established by applying a loss percentage factor to the different loan types. Management believes loan types are the most relevant factor to group loans for the allowance calculation as the risk characteristics in these groups are similar. The loss percentage factor is made up of 2 parts – the historical loss factor (“HLF”) and the qualitative loss factor (“QLF”). The HLF takes into account historical charge-offs, while the QLF is determined by loan type and allows management to augment reserve levels to reflect the current environment and portfolio performance trends including recent charge-off trends. The allowances are provided based on Management’s continuing evaluation of the pertinent factors underlying the quality of the loan portfolio, including changes in the size and composition of the loan portfolio, actual loan loss experience, current economic conditions, collateral values, geographic concentrations, seasoning of the loan portfolio, specific industry conditions, and the duration of the current business cycle. The recovery of the carrying value of loans is susceptible to future market conditions beyond the Company’s control, which may result in losses or recoveries differing from those provided.

Specific allowances are established for loans which are individually evaluated, in cases where Management has identified weaknesses that it believes indicate the probability that a loss has been incurred.

Impaired loans consist of loans receivable that are not expected to have their principal and interest repaid in accordance with their contractual terms. Collateral dependent impaired loans are measured using the fair value of the

collateral, less selling costs. Non-collateral dependent loans are measured at the present value of expected future cash flows.

The Company receives fees for originating loans in addition to various fees and charges related to existing loans, which may include prepayment charges, late charges and assumption fees. Deferred loan fees and costs are recognized over the life of the loans using the effective interest method.

Off-Balance-Sheet Credit Exposures – The only material off-balance-sheet credit exposure is loans in process (“LIP”), which had a balance at June 30, 2012, excluding covered loans, of \$155,051,000. The Company estimates losses on LIP by including LIP

(UNAUDITED)

with the related principal balance outstanding and then applying its general reserve methodology to the gross amount. Certain reclassifications have been made to the financial statements to conform prior periods to current classifications.

NOTE B - Acquisitions

Western National Bank

Effective December 16, 2011, Washington Federal, acquired certain assets and liabilities, including most of the loans and deposits, of Western National Bank, headquartered in Phoenix, Arizona (“WNB”) from the Federal Deposit Insurance Corporation (“FDIC”) in an FDIC assisted transaction. Under the terms of the Purchase and Assumption Agreement, the Company and the FDIC agreed to a discount of \$53 million on net assets and no loss sharing provision or premium on deposits.

WNB operated three full-service offices in Arizona. The Company acquired certain assets with a book value of \$177 million, including \$143 million in loans and \$7 million in foreclosed real estate, and selected liabilities with a book value of \$153 million, including \$136 million in deposits. Pursuant to the purchase and assumption agreement with the FDIC, the Company received a cash payment from the FDIC for \$30 million.

The acquisition was accounted for under the acquisition method of accounting. The purchased assets and assumed liabilities were recorded at their respective acquisition date estimated fair values. The purchase accounting for acquired assets and liabilities were provisionally recorded at their estimated fair values as of the December 16, 2011 acquisition date. The initial accounting for acquired loans, real estate held for sale and deposits was incomplete as of December 31, 2011. The amounts recognized at December 31, 2011 were determined provisionally as the fair value analysis of those assets was incomplete as of December 31, 2011. These amounts have been retrospectively adjusted to reflect the completion of the fair value analysis during the quarter ended June 30, 2012. The adjustments recorded in the quarter ended June 30, 2012 were a decrease in acquired loans of \$716,000, a decrease in real estate held for sale of \$252,000 and an increase in other assets of \$836,000 to reflect the core deposit intangible.

The operating results of the Company include the operating results produced by the acquired assets and assumed liabilities for the period December 16, 2011 to June 30, 2012.

The table below displays the amounts recognized as of the acquisition date for each major class of assets acquired and liabilities assumed:

South Valley Bancorp, Inc.

On April 4, 2012, the Company and South Valley Bancorp, Inc. (“South Valley”) announced the signing of a definitive merger agreement. The merger agreement calls for the merger of South Valley with and into the Company, followed by the merger of South Valley's wholly owned subsidiary, South Valley Bank & Trust, into the Company's wholly owned subsidiary, Washington Federal. Under the terms of the definitive merger agreement, each outstanding share of South Valley common stock will be converted into the right to receive: (i) 0.2962 of a share of the Company's common stock, (ii) a contingent cash payment equal to the pro rata portion of an earn-out from the net proceeds collected from a pool of specified assets of South Valley with a value of approximately \$39 million as of March 31, 2012, and (iii) a contingent cash payment equal to the pro rata portion of the net proceeds, if any, received by South Valley from the sale of its trust business and/or wealth management business prior to the closing of the merger. Assuming a per share price of \$16.88 for the Company's common stock, the aggregate value of the stock portion of the merger consideration is approximately \$33.7 million. After consummation of the merger, the combined company will have 190 offices in eight western states with total assets of approximately \$14.4 billion and total deposits of approximately \$9.6 billion, based on financial results as of December 31, 2011. The merger is expected to close in the

third calendar quarter of 2012, pending the receipt of all requisite regulatory approvals and the satisfaction of other customary closing conditions. On June 28, 2012, the shareholders of South Valley approved the merger transaction, with over 82% of the outstanding shares of South Valley common stock voting in favor of the merger.

Most loans restructured in troubled debt restructurings ("TDRs") are accruing and performing loans where the borrower has proactively approached the Company about modification due to temporary financial difficulties. Each request is individually evaluated for merit and likelihood of success. The concession for these loans is typically a payment reduction through a rate reduction of between 100 to 200 basis points for a specific term, usually six to twelve months. Interest-only payments may also be approved during the modification period. Principal forgiveness is not an available option for restructured loans. As of June 30, 2012, single-family residential loans comprised 83.2% of TDRs.

The Company reserves for restructured loans within its allowance for loan loss methodology by taking into account the following performance indicators: 1) time since modification, 2) current payment status and 3) geographic area.

The following tables provide information related to loans that were restructured during the periods indicated:

	Quarter Ended June 30, 2012		2011

NOTE E – Allowance for Losses on Loans

The Company has an asset quality review function that analyzes its loan portfolios and reports the results of the review to the Board of Directors on a quarterly basis. The single-family residential, HELOC and consumer portfolios are evaluated based on their performance as a pool of loans, since no single loan is individually significant or judged by its risk rating, size or potential risk of loss. The construction, land, multi-family, commercial real estate and commercial and industrial loans are risk rated on a loan by loan basis to determine the relative risk inherent in specific borrowers or loans. Based on that risk rating, the loans are assigned a grade and classified as follows:

Pass – the credit does not meet one of the definitions below.

Special mention – A special mention credit is considered to be currently protected from loss but is potentially weak. No loss of principal or interest is foreseen; however, proper supervision and Management attention is required to deter further deterioration in the credit. Assets in this category constitute some undue and unwarranted credit risk but not to the point of justifying a risk rating of substandard. The credit risk may be relatively minor yet constitutes an unwarranted risk in light of the circumstances surrounding a specific asset.

Substandard – A substandard credit is an unacceptable credit. Additionally, repayment in the normal course is in jeopardy due to the existence of one or more well defined weaknesses. In these situations, loss of principal is likely if the weakness is not corrected. A substandard asset is inadequately protected by the current sound worth and paying capacity of the borrower or of the collateral pledged, if any. Assets so classified will have a well defined weakness or weaknesses that jeopardize the liquidation of the debt. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets risk rated substandard.

Doubtful – A credit classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weakness makes collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The probability of loss is high, but because of certain important and reasonably specific pending factors that may work to the advantage and strengthening of the asset, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral, and

refinancing plans.

Loss – Credits classified loss are considered uncollectible and of such little value that their continuance as a bankable asset is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this asset even though partial recovery may be affected in the future. Losses should be taken in the period in which they are identified as uncollectible. Partial charge-off versus full charge-off may be taken if the collateral offers some identifiable protection.

HELOC	586	(939)	185	1,307	1,139
Consumer	7,394	(4,602)	1,429	(1,250)	2,971
	\$163,094	\$(109,709)	\$11,424	\$92,351	\$157,160

The Company recorded a \$10,367,000 provision for loan losses during the quarter ended June 30, 2012, while a \$21,000,000 provision was recorded for the same quarter one year ago. Non-performing assets (“NPAs”) amounted to \$278,490,000, or 2.07%, of total assets at June 30, 2012, compared to \$394,679,000, or 2.96%, of total assets one year ago. Acquired loans, including covered loans, are not classified as non-performing loans because, at acquisition, the carrying value of these loans was adjusted to reflect fair value. There was no additional provision for loan losses recorded on acquired or covered loans during the quarter ended June 30, 2012. Non-accrual loans decreased from \$232,752,000 at June 30, 2011, to \$171,033,000 at June 30, 2012, a 26.5% decrease. The Company had net charge-offs of \$16,235,000 for the quarter ended June 30, 2012, compared with \$23,519,000 of net charge-offs for the same quarter one year ago. A loan is charged-off when the loss is estimable and it is confirmed that the borrower will not be able to meet its contractual obligations. The percentage of loans 30 days or more delinquent decreased from 3.66% at June 30, 2011, to 2.69% at June 30, 2012. Delinquencies in the single-family residential portfolio, the largest portion of the loan portfolio, decreased from 3.43% at June 30, 2011, to 2.81% at June 30, 2012. In addition to these

improving asset quality trends, real estate values are beginning to increase in most of the Company's primary markets. As a result, the Company recorded a smaller provision for loan losses in the current quarter as compared to the same quarter one year ago. \$116,164,000 of the allowance was calculated under the formulas contained in our general allowance methodology and the remaining \$21,787,000 was made up of specific reserves on loans that were deemed to be impaired at June 30, 2012. For the period ending June 30, 2011,

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 QUARTERS AND NINE MONTHS ENDED JUNE 30, 2012 AND 2011
 (UNAUDITED)

\$114,159,000 of the allowance was calculated under the formulas contained in our general allowance methodology and the remaining \$46,940,000 was made up of specific reserves on loans that were deemed to be impaired. The primary reasons for the shift in total allowance allocation from specific reserves to general reserves is due to the Company having already addressed many of the problem loans focused in the speculative construction and land A&D portfolios, combined with a still weak macro economic environment which may negatively impact the single-family residential portfolio.

The following tables shows a summary of loans collectively and individually evaluated for impairment and the related allocation of general and specific reserves as of June 30, 2012 and September 30, 2011:

June 30, 2012	Loans Collectively Evaluated for Impairment			Loans Individually Evaluated for Impairment

NOTE F – New Accounting Pronouncements

In December 2011, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2011-11, Balance Sheet (Topic 210) – Disclosures about Offsetting Assets and Liabilities. The amendments in this ASU will enhance disclosures required by U.S. GAAP by requiring improved information about financial instruments and derivative instruments that are either (1) offset in accordance with current U.S. GAAP or (2) subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in accordance with current U.S. GAAP. The guidance in this ASU is effective for the first interim or annual period beginning on or after January 1, 2013 and should be applied retrospectively. This new guidance is not expected to have a material impact on the Company's consolidated financial statements.

In December 2011, the FASB issued ASU 2011-12, Comprehensive Income (Topic 220) – Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. Under the amendments in ASU 2011-05, entities are required to present reclassification adjustments and the effect of those reclassification adjustments on the face of the financial statements where net income is presented, by component of net income, and on the face of the financial statements where other comprehensive income is presented, by component of other comprehensive income. In addition, the amendments in ASU 2011-05 require that reclassification adjustments be presented in interim financial periods. The amendments in ASU 2011-12 supersede and defer changes to those paragraphs in ASU 2011-05 that pertain to how, when and where reclassification adjustments are presented while the FASB redeliberates the presentation of reclassification adjustments. All other requirements of ASU 2011-05 are not affected by ASU 2011-12.

In July 2012, the FASB issued ASU 2012-02, Intangibles - Goodwill and Other (Topic 350) – Testing Indefinite-Lived Intangible Assets for Impairment. The objective of this ASU is to reduce the cost and complexity of performing an impairment test for indefinite-lived intangible assets by simplifying how an entity tests those assets for impairment and to improve consistency in impairment testing guidance among long-lived asset categories. This ASU permits an entity first to assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with Subtopic 350-30, Intangibles - Goodwill and Other - General Intangibles Other than Goodwill. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. Previous guidance in Subtopic 350-30 required an entity to test indefinite-lived intangible assets for impairment, on at least an annual basis, by comparing the fair value of the asset with its carrying amount. If the fair value of the asset is less than its carrying amount, an entity should recognize an impairment loss in the amount of the difference. In accordance with the amendments in this ASU, an entity will have an option not to calculate annually the fair value of an indefinite-lived intangible asset if the entity determines that it is not more likely than not that the asset is impaired. Permitting an entity to assess qualitative factors when testing indefinite-lived intangible assets for impairment results in guidance that is similar to the goodwill impairment testing guidance in Update 2011-08. The Company early adopted this ASU and the guidance had no impact on the Company's financial condition and results of operations.

NOTE G – Fair Value Measurements

U.S. GAAP defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active exchange markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 QUARTERS AND NINE MONTHS ENDED JUNE 30, 2012 AND 2011
 (UNAUDITED)

We have established and documented the Company's process for determining the fair values of our assets and liabilities, where applicable. Fair value is based on quoted market prices, when available, for identical or similar assets or liabilities. In the absence of quoted market prices, fair value is determined using valuation models or third-party appraisals. The following is a description of the valuation methodologies used to measure and report the fair value of financial assets and liabilities on a recurring or nonrecurring basis:

Measured on a Recurring Basis

Securities

Securities available for sale are recorded at fair value on a recurring basis. Securities at fair value are priced using model pricing based on the securities' relationship to other benchmark quoted prices as provided by an independent third party, and under the provisions of the Fair Value Measurements and Disclosures topic of the FASB Accounting Standards Codification are considered a Level 2 input method.

The following table presents the balance of assets measured at fair value on a recurring basis at June 30, 2012:

	Fair Value at June 30, 2012			Total
	Level 1 (In thousands)	Level 2	Level 3	
Available-for-sale securities				
Equity securities	\$—	\$—	\$—	\$—
Obligations of U.S. government	—	114,141	—	114,141
Obligations of states and political subdivisions	—	24,001	—	24,001
Obligations of foreign governments	—	—	—	—
Corporate debt securities	—	303,214	—	303,214
Mortgage-backed securities	—	—	—	—
Agency pass-through certificates	—	3,184,759	—	3,184,759
Other debt securities	—	—	—	—
Balance at end of period	\$—	\$3,626,115	\$—	\$3,626,115

There were no transfers between, into and/or out of Levels 1, 2 or 3 during the quarter ended June 30, 2012.

Measured on a Nonrecurring Basis

Impaired Loans & Real Estate Held for Sale

From time to time, and on a nonrecurring basis, fair value adjustments to collateral-dependent loans and real estate held for sale are recorded to reflect write-downs of principal balances based on the current appraised or estimated value of the collateral. When management determines that the fair value of the collateral or the real estate held for sale requires additional adjustments, either as a result of a non-current appraisal value or when there is no observable market price, the Company classifies the impaired loan or real estate held for sale as Level 3. Level 3 assets recorded at fair value on a nonrecurring basis at June 30, 2012 included loans for which a specific reserve allowance was established or a partial charge-off was recorded based on the fair value of collateral, as well as covered REO and real estate held for sale for which fair value of the properties was less than the cost basis.

Real estate held for sale consists principally of properties acquired through foreclosure.

The following table presents the aggregated balance of assets measured at estimated fair value on a nonrecurring basis through the quarter ended June 30, 2012, and the total losses resulting from those fair value adjustments for the quarter and nine months ended June 30, 2012. The following estimated fair values are shown gross of estimated selling costs:

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 QUARTERS AND NINE MONTHS ENDED JUNE 30, 2012 AND 2011
 (UNAUDITED)

	Through June 30, 2012				Quarter Ended June 30, 2012	Nine Months Ended June 30, 2012
	Level 1 (In thousands)	Level 2	Level 3	Total	Total Losses	
Impaired loans (1)	\$—	\$—	\$133,929	\$133,929	\$13,459	\$36,291

Real estate held for sale (2)	—	—	157,547	157,547	21,756	61,100
Balance at end of period	\$—	\$—	\$324,293	\$324,293	\$36,138	\$99,515

(1) The losses represents remeasurements of collateral-dependent loans.

(2) The losses represents aggregate writedowns and charge-offs on real estate held for sale.

There were no liabilities carried at fair value, measured on a recurring or nonrecurring basis, at June 30, 2012.

The following describes the process used to value Level 3 assets measured on a nonrecurring basis:

Impaired loans - The Company adjusts the carrying amount of impaired loans when there is evidence of probable loss and the expected fair value of the loan is less than its contractual amount. The amount of the impairment may be determined based on the estimated present value of future cash flows or the fair value of the underlying collateral. Impaired loans with a specific reserve allowance based on cash flow analysis or the value of the underlying collateral are classified as Level 3 assets.

The evaluations for impairment are prepared by the Problem Loan Review Committee, which is chaired by the Chief Credit Officer and includes the Loan Review manager and Special Credits manager, as well as senior credit officers, division managers and group executives, as applicable. These evaluations are performed in conjunction with the quarterly allowance for loan loss ("ALLL") process.

Applicable loans are evaluated for impairment on a quarterly basis. Loans included in the previous quarter's review are reevaluated and if their values are materially different from the prior quarter evaluation, the underlying information (loan balance and collateral value) are compared. Material differences are evaluated for reasonableness and discussions are held between the relationship manager and their division manager to understand the difference and determine if any adjustment is necessary. The inputs are developed and substantiated on a quarterly basis, based on current borrower developments, market conditions and collateral values. The following method is used to value impaired loans:

The fair value of the collateral, which may take the form of real estate or personal property, is based on internal estimates, field observations, assessments provided by third-party appraisers and other valuation models. The Company performs or reaffirms valuations of collateral-dependent impaired loans at least annually. Adjustments are made if management believes that more recent information is available and relevant with respect to the fair value of the collateral.

Real estate held for sale ("REO") - These assets are valued based on inputs such as appraisals and third-party price opinions, less estimated selling costs. Assets that are acquired through foreclosure are recorded initially at the lower of the loan balance or fair value at the date of foreclosure. After foreclosure, valuations are updated periodically, and current market conditions may require the assets to be written down further to a new cost basis. The following method is used to value real estate held for sale:

When a loan is reclassified from loan status to real estate held for sale due to the Company taking possession of the collateral, a Special Credits officer, along with the Special Credits manager, obtains a valuation, which may include a third-party appraisal, which is used to establish the fair value of the underlying collateral. The determined fair value, to the extent it does not exceed the carrying value of the loan, becomes the carrying value of the REO asset. In

addition to the valuations from independent third-party sources, the carrying balance of REO assets are written down once a bona fide offer is contractually accepted, through execution of a Purchase and Sale Agreement, where the accepted price is lower than the current balance of the particular REO asset. The fair value of REO assets is re-evaluated quarterly and the REO asset is adjusted to reflect the lower of cost or fair value as necessary.

Fair Values of Financial Instruments

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 QUARTERS AND NINE MONTHS ENDED JUNE 30, 2012 AND 2011
 (UNAUDITED)

U. S. GAAP requires disclosure of fair value information about financial instruments, whether or not recognized on the statement of financial condition, for which it is practicable to estimate those values. Certain financial instruments and all non-financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value estimates presented do not reflect the underlying fair value of the Company. Although management is not aware of any factors that would materially affect the estimated fair value amounts presented below, such amounts have not been comprehensively revalued for purposes of these financial statements since the dates shown, and therefore, estimates of fair value subsequent to those dates may differ significantly from the amounts presented below.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
QUARTERS AND NINE MONTHS ENDED JUNE 30, 2012 AND 2011
(UNAUDITED)

The following methods and assumptions were used to estimate the fair value of financial instruments:

Cash and cash equivalents – The carrying amount of these items is a reasonable estimate of their fair value.

Available-for-sale securities and held-to-maturity securities – Securities at fair value are priced using model pricing based on the securities' relationship to other benchmark quoted prices as provided by an independent third party, and under the provisions of the Fair Value Measurements and Disclosures topic of the FASB Accounting Standards Codification are considered a Level 2 input method.

Loans receivable and covered loans – For certain homogeneous categories of loans, such as fixed- and variable-rate residential mortgages, fair value is estimated for securities backed by similar loans, adjusted for differences in loan characteristics, using the same methodology described above for AFS and HTM securities. The fair value of other loan types is estimated by discounting the future cash flows and estimated prepayments using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining term. Some loan types were valued at carrying value because of their floating rate or expected maturity characteristics. Net deferred loan fees are not included in the fair value calculation but are included in the carrying amount.

FDIC indemnification asset – The fair value of the indemnification asset is estimated by discounting the expected future cash flows using the current rates.

FHLB stock – The fair value is based upon the par value of the stock which equates to its carrying value.

Customer accounts – The fair value of demand deposits, savings accounts, and money market accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated by discounting the estimated future cash flows using the rates currently offered for deposits with similar remaining maturities.

FHLB advances and other borrowings – The fair value of FHLB advances and other borrowings is estimated by discounting the estimated future cash flows using rates currently available to the Company for debt with similar remaining maturities.

The following is a reconciliation of amortized cost to fair value of available-for-sale and held-to-maturity securities:

During the period ending June 30, 2012, \$3,500,000 of available-for-sale securities were sold, resulting in a gain of \$0. \$131,361,000 of available-for-sale securities were sold during the period ending June 30, 2011, resulting in a gain of \$8,147,000.

Substantially all mortgage-backed securities have contractual due dates that exceed 10 years.

The following table shows the unrealized gross losses and fair value of securities at June 30, 2012, by length of time that individual securities in each category have been in a continuous loss position. Management believes that the declines in fair value of these investments are not an other than temporary impairment.

	Less than 12 months		12 months or more		Total	
	Unrealized Gross Losses	Fair Value	Unrealized Gross Losses	Fair Value	Unrealized Gross Losses	Fair Value

NOTE H – Covered Assets

Covered assets represent loans and real estate held for sale acquired from the FDIC that are subject to loss sharing agreements and were \$335,823,000 as of June 30, 2012, versus \$438,566,000 as of September 30, 2011.

Changes in the carrying amount and accretible yield for acquired impaired and non-impaired loans were as follows:

June 30, 2012	Acquired Impaired		Acquired Non-impaired	
	Accretible Yield	Carrying Amount of Loans	Accretible Yield	Carrying Amount of Loans
	(In thousands)			
Balance at beginning of period	\$37,072	\$116,061	\$30,370	\$269,888
Accretion	(15,142) 15,142	(4,939) 4,939
Transfers to REO	—	(13,094) —	—
Payments received, net	—	(43,361) —	(46,894
Balance at end of period	\$21,930	\$74,748	\$25,431	\$227,933
September 30, 2011	Acquired Impaired		Acquired Non-impaired	
	Accretible Yield	Carrying Amount of Loans	Accretible Yield	Carrying Amount of Loans
	(In thousands)			
Balance at beginning of period	\$27,019	\$190,530	\$39,813	\$343,944
Reclassification from nonaccretable balance, net	24,025	—	—	—
Accretion	(13,972) 13,972	(9,443) 9,443
Transfers to REO	—	(54,638) —	—
Payments received, net	—	(33,803) —	(83,499
Balance at end of period	\$37,072	\$116,061	\$30,370	\$269,888

At June 30, 2012, none of the acquired impaired or non-impaired loans were classified as non-performing assets. Therefore, interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, was recognized on all acquired loans. The allowance for credit losses related to the acquired loans resulted from decreased expectations of future cash flows due to increased credit losses for certain acquired loan pools.

The outstanding principal balance of acquired loans was \$399,768,000 and \$495,358,000 as of June 30, 2012 and September 30, 2011, respectively. The discount balance related to the acquired loans was \$93,321,000 and \$109,409,000 as of June 30, 2012 and September 30, 2011, respectively.

The following table shows the year to date activity for the FDIC indemnification asset:
