BEVERLY A. BARTLETT
Corporate Secretary

PRELIMINARY FINAL REPORT OF IVANHOE MINES LTD. FOR THE FISCAL YEAR ENDED 31 DECEMBER 2004, GIVEN TO THE AUSTRALIAN STOCK EXCHANGE PURSUANT TO ASX LISTING RULE 4.3A.

THIS PRELIMINARY FINAL REPORT IS BASED ON FINANCIAL STATEMENTS WHICH ARE IN THE PROCESS OF BEING AUDITED AND AS SUCH MAY BE SUBJECT TO CHANGE. AUDITED ANNUAL FINANCIAL INFORMATION WILL ONLY BE FILED WITH THE CANADIAN SECURITIES ADMINISTRATORS AND THE UNITED STATES SECURITIES AND EXCHANGE COMMISSION, AND LODGED WITH THE AUSTRALIAN STOCK EXCHANGE, ON OR PRIOR TO 31 MARCH 2004.

INFORMATION CONTAINED IN THIS ASX PRELIMINARY FINAL REPORT IS PROVIDED SOLELY FOR PURPOSES OF COMPLIANCE WITH ASX LISTING RULES AND DOES NOT CONSTITUTE A FILING OF ANNUAL FINANCIAL INFORMATION FOR THE PURPOSES OF OTHER APPLICABLE SECURITIES LAWS. READERS ARE CAUTIONED TO RELY ONLY UPON THE COMPANY'S AUDITED ANNUAL FINANCIAL INFORMATION AS SUBSEQUENTLY FILED WITH APPLICABLE SECURITIES REGULATORS.

Ivanhoe Mines Ltd

Notes to the Preliminary Consolidated Financial Statements (UNAUDITED)

For the year ended December 31, 2004

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These preliminary unaudited consolidated financial statements of Ivanhoe Mines Ltd. (the Company) and its subsidiaries (collectively, Ivanhoe Mines) have been prepared in accordance with accounting principles generally accepted in Canada. These preliminary financial statements should be read in conjunction with the most recent annual financial statements of the Company for the year ended December 31, 2003 (the Annual Financial Statements).

Certain of the comparative figures have been reclassified to conform with the presentation as at and for the year ended December 31, 2004. In particular, the assets and liabilities of ABM as at December 31, 2003, and its results of operations and cash flows for the year then ended (Note 2) have been classified as held for sale and discontinued operations, respectively.

2. ASSETS HELD FOR SALE

In November 2004, the Company adopted a plan to dispose of the Savage River Iron Ore Project (the Project). This decision is part of the Company's plan to rationalize its non-core assets as it focuses on the Oyu Tolgoi project in Mongolia. In February 2005, Ivanhoe Mines sold the Project for two initial payments totalling \$21.5 million, plus a series of contingent, escalating-scale annual payments based on annual iron ore pellet sales of 1.8 million tonnes and an escalating price formula using the annual Nibrasco/JSM pellet price. The escalating payments will be made over five years commencing March 2006. Ivanhoe Mines received the first initial payment of \$15.0 million on February 28, 2005 and the second payment of \$6.5 million is due on July 31, 2005.

Ivanhoe Mines expects to recover the carrying value of the net assets held for sale through expected future cash flows arising from the sale of the Project, and any excess will be included in operations if, as and when realized.

Inner Mongolia, China	1,436	255
South Korea		175
	\$ 50,316	\$ 49,796

5. LONG-TERM DEBT

JVCo's loan of \$15,000,000 (of which \$7,500,000 is Ivanhoe Mines' proportionate share) at December 31, 2004 bears interest at a rate equal to LIBOR plus 2.5%, subject to certain adjustments, and is repayable in minimum semi-annual instalments of \$7,500,000 (of which \$3,750,000 is attributable to Ivanhoe Mines) until maturity in August 2005. The loan facility is secured by, amongst other things, a fixed charge on the Monywa Copper Mine Project assets, an assignment of JVCo's operating and restricted cash balances, and a floating charge on all other assets of JVCo. This debt is non-recourse to the Company.

IVANHOE MINES LTD
COMMENTARY ON OPERATING RESULTS FOR THE YEAR
(Stated in U.S. dollars)

INTRODUCTION

In these commentaries, unless the context otherwise dictates, a reference to the Company refers to Ivanhoe Mines Ltd. and a reference to Ivanhoe Mines refers to Ivanhoe Mines Ltd. together with its subsidiaries and joint ventures.

FORWARD LOOKING STATEMENTS

Except for statements of historical fact relating to Ivanhoe Mines, certain information contained herein constitutes forward-looking statements within the meaning of Section 21E of the United States Securities Exchange Act of 1934, as amended, and Section 27A of the United States Securities Act of 1933, as amended. Forward-looking statements include, but are not limited to, statements concerning estimates of expected capital expenditures, statements relating to expected future production and cash flows, statements relating to the continued advancement of Ivanhoe Mines exploration, development and production projects, statements relating to the potential of the Oyu Tolgoi Project, statements relating to target milling rates and other statements that are not historical facts. When used in this document, the words such as could, plan, estimate, expect, intend, may, potential, should and similar expressions are used in forward-looking statements. Although Ivanhoe Mines believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. Important factors that could cause actual results to differ from these forward-looking statements include the potential that Ivanhoe Mines projects will experience technological and mechanical problems, geological conditions in the deposits may not result in commercial levels of mineral production, changes in product prices, changes in political conditions, changes in the availability of project financing and other risks. Forward-looking statements are based on the opinions and estimates of management at the date the statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. The Company undertakes no obligation to update forward-looking statements if circumstances or management's estimates or opinions should change. The reader is cautioned not to place undue reliance on forward-looking statements.

These commentaries contain references to estimates of mineral resources. The estimation of reserves and resources is inherently uncertain and involves subjective judgments about many relevant factors. The accuracy of any such estimates is a function of the quantity and quality of available data, and of the assumptions made and judgments used in engineering and geological interpretation, which may prove to be unreliable. There can be no assurance that these estimates of mineral resources will be accurate or that such mineral resources can be mined or processed profitably. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Factors that could cause actual results to differ materially include, but are not limited to, those set forth herein under Risks and Uncertainties.

IVANHOE MINES LTD
COMMENTARY ON OPERATING RESULTS FOR THE YEAR
(Stated in U.S. dollars)

CORPORATE STRATEGY & OUTLOOK

Ivanhoe Mines Ltd. is an international mining company currently primarily focused on exploring and developing a major discovery of copper and gold at the Oyu Tolgoi (Turquoise Hill) project in southern Mongolia (the Oyu Tolgoi Project). Ivanhoe Mines' operations also include the extraction of copper from the Monywa copper project in Myanmar (the Monywa Copper Project). The Company continues also to explore for minerals in Eastern Asia and Australia.

The Company devotes at this time most of its management and financial resources to furthering the exploration and development of the Oyu Tolgoi Project.

Mongolia Oyu Tolgoi Project

In 2004, the Company spent a total of \$98.2 million in exploration including \$71.8 million on the Oyu Tolgoi Project. The Company's Southwest, South, Far South and Central zones (Southern Oyu deposits) appear to have been largely defined. In contrast, at the Hugo Dummett deposit, which encompasses the Hugo South and the Hugo North deposits, drilling is ongoing and the Hugo North deposit remains open both at depth and to the north. The extent of the Hugo North deposit has yet to be established.

In May and August of 2004, updated resource estimates, prepared by qualified independent geological consultants, were announced by the Company. The Company anticipates releasing an updated, independently prepared resource estimate for the Oyu Tolgoi project in Q2 05.

Southern Oyu resource estimate

In August 2004, the Southern Oyu resource estimate included measured and indicated resources totaling 1.06 billion tonnes grading 0.48% copper, and 0.36 grams per tonne (gpt) gold, plus inferred mineral resources totaling 285 million tonnes grading 0.35% copper, and 0.23 gpt gold

The measured and indicated resources were estimated using a 0.30% copper equivalent cut-off down to 560 metres (m) below surface and 0.60% copper equivalent cut-off below a depth of 560 m. In addition to the measured and indicated resources, the Southern Oyu deposits' inferred resources were estimated to a maximum depth of 560 m using a 0.30% copper equivalent cut-off. The August 2004 resources estimate is separate and in addition to the Hugo Dummett deposits resource estimate released in May 2004.

Hugo Dummett resource estimate

In May 2004, the Hugo Dummett mineral resource estimate totaled 1.16 billion tonnes of inferred resource grading 1.29% copper, and 0.23 gpt gold. The inferred resource was estimated using a 0.60% copper equivalent cut-off grade.

In H2 04, Ivanhoe Mines' drilling efforts were concentrated on the Hugo Dummett deposit to continue the infill drilling and exploratory program designed to expand the existing inferred resource base. The drilling program's main focus is to upgrade a large percentage of the current inferred resource to the indicated category. Initially, the drilling program was expected to be completed in early 2005 but additional drilling will be required throughout 2005 to cover the enlargement of the Hugo North deposit and establish the degree of continuity, if any, of mineralization from the Hugo North deposit onto Entrée's property.

Shivee Tolgoi property

On November 10, 2004, the Company closed an earn-in and equity participation agreement with Entrée Gold Inc. (Entrée) to explore and potentially develop approximately 40,000 hectares of Entrée's Shivee Tolgoi property. The Shivee Tolgoi's southern property boundaries are contiguous to Hugo North deposit's northern property boundaries. By spending \$35 million over eight years, including \$15 million in the first three years, the Company has the option to earn up to 80% in mineralization deeper than 560 m and up to 70% in mineralization above the 560-m level.

The Company also has the right to acquire all of Entrée's surface rights on the Shivee Tolgoi's property by spending a minimum of \$3 million in exploration expenditures in the first year and

IVANHOE MINES LTD
 COMMENTARY ON OPERATING RESULTS FOR THE YEAR
 (Stated in U.S. dollars)

sufficient condemnation drilling to ensure that there is no economic mineralization below the surface of the areas directly affected.

The Company acquired 4.6 million units of Entrée for Cdn\$4.6 million. Each unit consists of one Entrée common share and a warrant; each warrant entitles the holder to acquire, for a period of two years, one common share of Entrée at Cdn\$1.10 per share.

Mongolia Other projects.

In 2004, regional reconnaissance work, rock sampling, induced polarization surveys and diamond drilling was carried out mainly on the Kharmagtai property, the Bronze Fox District and some coal properties located in southern Mongolia. In December 2004, the Company announced its intentions to initiate the development of, what the Company currently believes to be, extensive coal deposits in the South Gobi region of Mongolia. Following a year-long evaluation of the coal-bearing basins in southern Mongolia, the Company has delineated three major coal-bearing basins located on lands wholly controlled by Ivanhoe Mines.

Ivanhoe's current mapping, surface sampling and drilling to date have established that the Nariin Sukhait coal mine, located approximately 40 kilometre (km) from the Chinese border, is contained within the most southerly coal basin. The Nariin Sukhait mine, a relatively small property operated by an independent Mongolian-Chinese joint venture, adjoins and is completely surrounded by the Company's existing large land holdings . In 2004, the Nariin Sukhait operation started mining an outcropping seam with an estimated true thickness of approximately 60 m. Current annual production for the mine is estimated at 450,000 tonnes of coal and is expected to increase to 2 million tonnes per year, upon completion of the construction of a 400 km long railroad link on the Chinese side of the border.

In January 2005, the Company announced the start of a resource delineation drilling program in order to determine the extent and quality of coal that might be located on Ivanhoe Mines' property surrounding the Nariin Sukhait mine.

Discontinued operations.

In February 2005, the Company announced the sale of its Savage River operations for \$21.5 million in cash plus a series of contingent, escalating-scale annual payments based on sales and prices of iron ore pellets over the next five years (the Deferred Cash Consideration). The 2004 benchmark price for iron ore pellets was set at \$38.10 per tonne. The following table lists the approximate Deferred Cash Consideration expected to be received by the Company, based on the average future benchmark prices over the next five years:

Average benchmark pellet prices over next five years	Expected Deferred Cash Consideration \$ Million
\$40/tonne	\$ 18.0 million
\$60/tonne	\$ 85.5 million
\$70/tonne	\$117.0 million

Edgar Filing: IVANHOE MINES LTD - Form 6-K

At the end of February 2005, a 71.5% increase in iron ore prices for the April 2005 to March 2006 year was announced. Based on an anticipated iron ore pellet price of approximately \$65 per tonne, the Company expects to receive a Deferred Cash Consideration of approximately \$22.5 million by the end of March 2006 and an additional \$100 million if pellet prices remain at this level for the next five years. Iron ore pellet prices are volatile, so there are no assurances that the unit prices negotiated for 2005 will be maintained over the next five years.

Financial results from the Savage River operation, for both the 2003 and 2004 year, are being disclosed as discontinued operations and no longer form part of Ivanhoe Mines' financial results from continuing operations.

(1) Includes ore and waste material

Copper prices on the London Metal Exchange averaged \$1.30 per pound in 2004, compared to \$0.81 per pound in 2003.

In 2004, the cash component of cost of operations increased by 16% (\$1.8 million) over 2003. The increase in costs was mainly attributable to increased unit power costs, higher commercial and import taxes, increased chemical costs and higher road maintenance charges. This increase in costs is net of a 49% reduction in equipment rental charges (\$2.4 million), mainly attributable to lower tonnage moved.

Assisted by higher copper prices, improved ore grades and higher copper production, the S&K mine is continuing to generate excellent results. The Company expects to release in Q2 '05 a three-step development plan for the Monywa Copper Complex that combines the expansion of the existing operations at the S&K mine with the development of the Letpadaung deposit, (the Monywa Copper Project). This development plan is expected to be implemented over a period of five years resulting in the Monywa Copper Project's overall copper cathode production capacity of 200,000 tonnes per year.

- The first step of the plan, completed in mid-October 2004, increased the S&K mine's annual copper cathode throughput to 39,000 tonnes (86 million pounds). All development costs were funded from the mine's internally generated cash flow.

2. The second step, which is subject to an expected 2006 upgrade of the mine's power supply to 40 megawatts, is expected to take annual copper production from the S&K deposit to a projected rate of 50,000 tonnes (110 million pounds). This second step is anticipated to be in place in H1 '06.
3. The third step, which is subject to power supply to between 60 and 80 megawatts being made available, proposes to develop the Letpadaung deposit over a four year period. The proposed development will consist in the construction of three SX/EW modules, each with an annual capacity of 50,000 tonnes of copper cathode per year. Japanese, Korean and Chinese companies have made written expressions of interest in providing financing to fast-track the expansion of copper production from the S&K and Letpadaung deposits. Financing discussions are ongoing between these companies and the management of the Monywa Copper Project, although there are no assurances that satisfactory negotiations will be concluded.

(Stated in U.S. dollars)

DISCONTINUED OPERATIONS**SAVAGE RIVER MINE, TASMANIA**

On February 28, 2005, the Company announced the completion of the sale of the Savage River operations for two initial cash payments totalling \$21.5 million, plus a series of contingent, escalating-scale annual payments based on the annual iron ore pellet price benchmark. The escalating payments will be made over five years commencing March 2006. A 71.5% increase in the iron ore price benchmark for the 2005 year was announced at the end of February 2005. Based on this announced increase, the Company expects to receive by the end of March 2006, cumulative payments totalling approximately \$44.0 million. In addition, if the 2005 newly increased pellet price benchmark and the Savage River pellet production are maintained over the following five years, the Company should receive Deferred Cash Considerations totalling approximately \$79 million. Total pellet production for 2005 is estimated to be approximately 2.0 million tonnes.

Twelve month period ended December 31,

		Year ended December 31,		Percent
		2004	2003	Increase (decrease)
Total volumes moved ⁽¹⁾	BCM (000 s)		10,007	(100%)
Tonnes milled	(000 s)	5,336	5,308	1%
	Tonnes waste/tonnes			
Strip ratio	ore	4.4	5.5	(21%)
Concentrate production	Tonnes (000 s)	2,106	2,286	(8%)
Iron ore content	Fe%	29.9%	32.6%	(8%)
Pellet production	Tonnes	2,102,863	2,255,938	(7%)
Pellet sales	Tonnes	2,118,197	2,180,000	(3%)
Sales	\$/tonne	\$ 40	\$ 31	29%
	\$(000)	83,898	66,833	26%
Cost of operations	\$(000)	71,614	63,480	13%
Operating profit (loss)	\$(000)	7,915	(1,952)	506%
Average foreign exchange rate	US\$/AUD\$	0.7370	0.6529	13%

Net income from discontinued operations was approximately \$8.6 million in 2004, compared to a net loss of \$4.7 million in 2003. The 29% increase in the unit sale price resulted from the 19% increase in the approved pellet price for 2004, plus higher prices obtained in Q4 04 from the pellet and concentrate sales negotiated at spot prices, which reached almost double the established standard rate for the year. Net operating profit was affected by a 14% increase in operating costs, mainly attributable to higher wages, electricity, fuel and gas charges.

CASH RESOURCES AND LIQUIDITY

At December 31, 2004, consolidated working capital was \$142.5 million, including cash of \$122.6 million, compared with working capital of \$128.1 million and cash of \$107.0 million at December 31, 2003.

Operating activities. The \$99.2 million in cash used in operating activities in 2004 was primarily the result of \$98.2 million in exploration expenditures.

Investing activities. After repayment of the \$50 million Mongolian Treasury Bill in Q4 04, a total of \$39.3 million in cash was used in investing activities in 2004. The main cash expenditures included \$8.2 million in sustaining capital expenditures on mining property, plant and equipment; \$5.4 million in non-producing mining plant and equipment on exploration projects primarily located in Mongolia and Australia, and \$20.8 million on the acquisition of various mineral interests, consisting mainly of the second \$20.0 million installment of the \$37.0 million purchase price for the BHP royalty interest acquisition in Q4 03.

IVANHOE MINES LTD
COMMENTARY ON OPERATING RESULTS FOR THE YEAR
(Stated in U.S. dollars)

Financing activities. Financing activities in 2004 consisted mainly of net proceeds totalling \$100.6 million from the 20.0 million common shares issued at a price of \$5.32 (Cdn\$7.00) per share in July 2004 less \$15.0 million of debt repayments by the S&K Mine (\$7.5 million net to Ivanhoe Mines).

The Company's existing cash resources, together with the proceeds from the sale of the Savage River Mine, are expected to be sufficient to fund the Company's current and planned activities through the end of June 2005. The Company expects to fund additional planned expenditures for the second half of 2005 and beyond from external sources, which may include debt or equity financing, proceeds from the sale of existing non-core assets, third-party participation in one or more of the Company's projects, or a combination thereof.

There can be no assurance that the Company will be successful in generating sufficient funds from any of these sources. Failure to generate sufficient funding from one or more of these sources may require Ivanhoe Mines to delay, postpone or curtail certain of its planned activities in 2005, and thereafter. Over the long term, the Company still needs to obtain additional funding for, or third-party participation in, its undeveloped or partially developed projects (including the Oyu Tolgoi Project, the Company's other Mongolian exploration projects, its Chinese and Australian exploration projects and the Bakyrchik project) to bring them into full production.
