Notes to the Condensed Consolidated Financial Statements September 30, 2005

(all tabular amounts are expressed in thousands of U.S. dollars except per share amounts)

(Unaudited)

1. BASIS OF PRESENTATION AND LIQUIDITY

The Company s accounting policies are in accordance with accounting principles generally accepted in Canada. These policies are consistent with accounting principles generally accepted in the U.S., except as outlined in Note 16. The unaudited condensed consolidated financial statements have been prepared on a basis consistent with the accounting principles and policies reflected in the December 31, 2004 consolidated financial statements. These interim condensed consolidated financial statements do not include all disclosures normally provided in annual consolidated financial statements. The December 31, 2004 consolidated balance sheet was derived from the audited consolidated financial statements, but does not include all disclosures required by generally accepted accounting principles (GAAP) in Canada and the U.S. In the opinion of management, all adjustments (which included normal recurring adjustments) necessary for the fair presentation for the interim periods have been made. The results of operations and cash flows are not necessarily indicative of the results for a full year.

The Company s financial statements as at and for the three-month and nine-month periods ended September 30, 2005 have been prepared on a going concern basis, which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. The Company incurred a net loss of \$4.6 million for the nine-month period ended September 30, 2005, and, as at September 30, 2005, had an accumulated deficit of \$86.4 million and negative working capital of \$17.2 million. The Company expects to incur substantial expenditures to further its capital investment programs and the Company s cash flow from operating activities will not be sufficient to satisfy its current obligations and meet its capital investment objectives. Management s plans include sale of additional equity securities, alliances or other partnership agreements with entities with the resources to support the Company s projects as well as convertible loan, debt and mezzanine financing in order to generate sufficient resources to assure continuation of the Company s operations and achieve its capital investment objectives. The Company is continuing active negotiation with a third party for the formation of a joint venture for the deployment, in a specific region of the world, of the GTL and RTP technologies it licenses or owns. The transaction that is being discussed would, if consummated, include a potentially significant equity investment in the Company by the third party. No assurances can be given that the Company and the third party with whom it is presently negotiating will successfully conclude this potential transaction nor that the Company will be able to raise additional capital or enter into one or more alternative business alliances with other parties if this potential transaction is not successfully concluded. If the Company is unable to obtain adequate additional financing or enter into such business alliances, management will be required to sharply curtail the Company s operations, which may include the sale of assets.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts and other disclosures in these condensed consolidated financial statements. Actual results may differ from those estimates.

Certain items in the 2004 financial statements have been reclassified for comparison to the 2005 presentation.

2. SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

As more fully described in Note 12, on April 15, 2005 the Company acquired all the issued and outstanding common shares of Ensyn Group, Inc. (**Ensyn**) pursuant to a merger between Ensyn and a wholly owned subsidiary of the Company (**Merger**) in accordance with an Agreement and Plan of Merger dated December 11, 2004 (**Merger Agreement**). This acquisition was accounted for using the purchase method. These consolidated financial statements include the accounts of Ivanhoe Energy Inc. and its subsidiaries, including those acquired in

the Merger, all of which are wholly owned.

The Company conducts most exploration, development and production activities in its oil and gas business jointly with others. As part of the Merger, the Company acquired a 50% interest in a joint venture, which owns a heavy oil upgrading rapid thermal processing (**RTP**^M) commercial demonstration facility (**RTP** CDF) located in California s San Joaquin Basin as well as certain rights to manufacture RTP^M facilities (See Note 13). Our accounts reflect only the Company s proportionate interest in the assets and liabilities of these joint ventures. All inter-company transactions and balances have been eliminated for the purposes of these condensed consolidated financial statements.

Intangible Assets

Intangible assets are initially recognized and measured at cost. Intangible assets with finite lives are amortized over their useful lives whereas intangible assets with indefinite useful lives are not amortized unless it is subsequently determined to have a finite useful life. Intangible assets are reviewed annually for impairment, or when events or changes in circumstances indicate that the carrying value of an intangible asset may not be recoverable. If the carrying value of an intangible asset exceeds its fair value or expected future discounted cash flows, the excess is written down to the results of operations with a corresponding reduction in the carrying value of the intangible asset. In the Merger, the Company acquired an intangible asset in the form of an exclusive, irrevocable license to employ rapid thermal processing technology (**RTPM Technology**) for petroleum applications. The Company will assign the carrying value of the RTPTM Technology to the number of RTPTM facilities it expects to develop that will use the RTPTM Technology. The amount of the carrying value of the RTPTM facility from the date on which the facility is placed into service. The carrying value of the RTP Technology is evaluated for impairment annually, or as changes in circumstances indicate the intangible asset might be impaired, based on an assessment of its fair market value.

Development Costs

The Company incurs various costs in the pursuit of gas-to-liquids (**GTL**) and enhanced oil recovery (**EOR**), including RTPTM Technology for heavy oil processing, projects throughout the world. Such costs incurred prior to signing a memorandum of understanding (**MOU**), or similar agreements, are considered to be business development and are expensed as incurred. Upon executing an MOU to determine the technical and commercial feasibility of a project, including studies for the marketability for the project s products, the Company assumes the feasibility and related costs incurred have potential future value, are probable of leading to a definitive agreement for the exploitation of proved reserves and should be capitalized as development costs. If a definitive agreement is not subsequently reached, then the project s capitalized development costs, which are deemed to have no future value, are written down to the results of operations with a corresponding reduction in the investments in GTL and EOR assets.

Additionally, the Company incurs costs to develop, enhance and identify improvements in the application of the GTL and RTPTM technologies it licenses or owns. The cost of equipment and facilities acquired or constructed for such purposes are capitalized development costs and amortized over the expected economic life of the equipment or facilities commencing with the start up of commercial operations for which the equipment or facilities are intended. The Company reviews the recoverability of such capitalized development costs annually, or as changes in circumstances indicate the development costs might be impaired, through an evaluation of the expected future discounted cash flows from the associated projects. If the carrying value of such capitalized development costs exceeds the expected future discounted cash flows, the excess is written down to the results of operations with a corresponding reduction in the investments in GTL and EOR assets.

Costs incurred in the operation of equipment and facilities used to develop or enhance GTL and RTPTM technologies prior to commencing commercial operations are business development expenses and are charged to the results of operations in the period incurred.

3. OIL AND GAS PROPERTIES AND INVESTMENTS

Capital assets categorized by geographic locations and business segments are as follows:

	As at September 30, 2005						
		Oil an	d Ga	S

		113		62		10	185
	\$	43,266	\$	58,412	\$ 14,491	\$ 10,043	\$ 126,212

	As at December 31, 2004						
		Oil and	d Gas				
		U.S.	China	GTL	EOR	Total	
Oil and Gas Properties:							
Proved	\$	81,648	\$ 35,771	\$	\$	\$ 117,419	
Unproved		20,447	10,581			31,028	
		102,095	46,352			148,447	
Accumulated depletion		(10,956)	(6,663)			(17,619)	
Accumulated provision for impairment		(50,350)				(50,350)	

	40,789	39,689			80,478
GTL and EOR Investments: GTL master license Feasibility studies and other			10,000		10,000
deferred costs			3,793	2,091	5,884
			13,793	2,091	15,884
Furniture and equipment Accumulated depreciation	417 (300)	84 (22)		11 (1)	512 (323)
	117	62		10	189
	\$ 40,906	\$ 39,751	\$ 13,793	\$ 2,101	\$ 96,551

Costs as at September 30, 2005 and December 31, 2004 of \$31.9 million and \$31.0 million, respectively, related to unproved oil and gas properties were separately assessed for impairment and excluded from the depletion and ceiling test calculations.

For the three-month and nine-month periods ended September 30, 2005, general and administrative expenses related directly to oil and gas acquisition, exploration and development activities, and investments in GTL and EOR projects of \$1.0 million and \$3.1 million, respectively, were capitalized. For the same periods ended September 30, 2004, \$0.7 million and \$2.3 million, respectively, were capitalized.

As at September 30, 2005, the GTL and EOR Investments include \$4.7 million of costs associated with the RTP CDF acquired in the Merger including \$0.1 million in improvements made to the facility. The RTPTM CDF is being used to develop and identify improvements in the application of the RTPTM Technology by processing and testing heavy crude feedstock of prospective customers until such time as the RTPTM CDF is sold or dismantled and redeployed (See Note 13).

For the nine-month period ended September 30, 2005, the Company wrote down \$0.3 million related to its GTL project in Bolivia and, in the three-month period ended September 30, 2005, \$0.3 million related to its MOU with Ecopetrol S.A. (**Ecopetrol**) for the Llanos Heavy Basin Crude Project . The Company wrote down its investment in its GTL project in Bolivia due to the impact that political and fiscal uncertainty in Bolivia could have on the viability of a GTL plant and its investment in the MOU with Ecopetrol as the Company did not meet the company-size requirements specified by Ecopetrol in their final bidding qualifications for the Llanos Basin Heavy Crude Project , which included the Castilla and Chichimene field developments. For the nine-month period ended September 30, 2004, GTL investments of \$0.3 million were written down related to a study for a GTL fuels plant in Oman as the opportunity to build a 45,000 bpd GTL fuels plant in Oman failed to materialize due to a lack of sufficient uncommitted gas volumes to support a plant of that size.

4. LONG TERM ASSETS

During 2004, prior to entering into the Merger Agreement, the Company acquired from Ensyn a 15% equity interest in Ensyn Petroleum International Ltd. (**EPIL**) and exclusive rights to use the RTP Technology for petroleum applications in key international markets. Ensyn, the parent company of EPIL, retained the remaining 85% of EPIL. The \$3.0 million cost to acquire the 15% equity interest in EPIL plus \$2.5 million of costs incurred by the Company in connection with the Merger, including \$1.0 million to acquire an option to purchase an additional 5% of EPIL (which expired, unexercised, in January 2005) are included in long-term assets as at December 31, 2004. The Merger was completed on April 15, 2005 and the 15% equity interest in EPIL was eliminated upon consolidating the accounts of the Company and its subsidiaries as at September 30, 2005. An additional \$1.5 million of Merger related costs were incurred in 2005. The \$4.0 million of Merger related costs were allocated among the net assets acquired in the Merger (See Note 12).

As at December 31, 2004, long term assets includes \$0.4 million of deferred costs to obtain debt financing for the Company s Dagang development project in China. The Company incurred an additional \$0.5 million of such costs during the nine-month period ended September 30, 2005. As the Company is presently assessing current production levels and future drilling activity in this project, the Company has suspended current project-financing discussions with potential lending institutions and has written off the \$0.9 million of deferred financing costs in the three month-period ended September 30, 2005.

As at September 30, 2005 and December 31, 2004, long term assets consisted of the following:

	Septemb 2005	December 31, 2004		
Investment in EPIL	\$		\$	3,000
Merger related costs				2,513
Drilling deposits		400		400
Deferred debt financing costs		27		384
Other long term deposits and assets		186		127
	\$	613	\$	6,424

5. INTANGIBLE ASSET

The Company s intangible asset consists of the underlying value of an exclusive, irrevocable license acquired in the Merger with Ensyn to deploy, worldwide, the RTPTM Technology for petroleum applications as well as the exclusive right to deploy RTPTM Technology in all applications other than bio-mass (See Note 12). This intangible

asset is not currently being amortized and its carrying value was not impaired for the three-month and nine-month periods ended September 30, 2005.

6. SEGMENT INFORMATION

The following tables present the Company s interim segment information for the three-month and nine-month periods ended September 30, 2005 and 2004 and identifiable assets as at September 30, 2005 and December 31, 2004:

	Three-Month Period Ended September 30, 2005

		11				

Private Placements

In April and July 2005, the Company closed two special warrant financings by way of private placements for Cdn.\$15.8 million (U.S.\$12.6 million, net of U.S.\$0.2 million in share issue costs). Proceeds from the financings were used to complete the Merger and to pursue opportunities for the commercial deployment of the Company s RTP Technology as well as funding the ongoing development of its oil and gas projects in China and for general corporate purposes. The financings consisted of 5,100,000 special warrants at Cdn.\$3.10 per special warrant. The April 2005 special warrant financing for 4,100,000 special warrants entitled the holders to receive, for each special warrant and at no additional cost, one common share and one common share purchase warrant which were issued on July 4, 2005. The July 2005 special warrant financing for 1,000,000 special warrants entitles the holder to receive, for each special warrant and at no additional cost, one common share and one common share purchase warrant four months after the closing date. Each common share purchase warrant entitles the holder to purchase one common share at a price of Cdn.\$3.50 until the second anniversary date of the closings.

Warrants

Purchase warrants as at September 30, 2005 were \$2.4 million for the value of the 4,100,000 common share purchase warrants outstanding, associated with the April 2005 private placement. This value was calculated in accordance with the Black-Scholes pricing model using a risk-free interest rate of 2.6%, a dividend yield of 0.0%, a volatility factor of 60.1% and an expected life of 2 years.

Special warrants as at September 30, 2005 were \$2.5 million for the July 2005 special warrant financing for which common shares had not been issued as at September 30, 2005. The common shares and common share purchase warrants for the July 2005 financing will be issued on November 8, 2005.

For the nine-month period ended September 30, 2005, 9,029,412 common share purchase warrants were exercised for the purchase of 4,514,706 common shares at an average exercise price of \$1.36 (Cdn.\$1.64) for a total of \$6.1 million. As at September 30, 2005, the following common share purchase warrants were exercisable to purchase additional common shares until the expiry date at the price per share as indicated:

Year of		Number of	Remaining			
Special Warrant Financing	Price per Special Warrant	Purchase Warrants Issued	Number of Purchase Warrants	Number of Common Shares	Expiry Date	Exercise Price per Share
			(thousands)			
2003	U.S.\$4.00	1,250	1,250	1,250	October 31, 2005 February 18,	U.S.\$4.30
2004	U.S.\$2.90	5,449	5,449	2,725	2006	U.S.\$3.20
2004	U.S.\$2.90	1,724	1,724	862	March 5, 2006	U.S.\$3.20
2005	Cdn.\$3.10	4,100	4,100	4,100	April 15, 2007	Cdn.\$3.50
		12,523	12,523	8,937		

8. STOCK BASED COMPENSATION

The Company accounts for all stock options granted using the fair value based method of accounting. This method was adopted effective January 1, 2004 for stock options granted to employees and directors after January 1, 2002. Under this method, compensation costs are recognized in the financial statements over the stock options vesting period using an option-pricing model for determining the fair value of the stock options at the grant date. For the three-month and nine-month periods ended September 30, 2005, the Company incurred \$0.6 million and \$1.4 million, respectively, in stock based compensation costs. For the same periods ended September 30, 2004, the Company incurred \$0.4 million and \$0.9 million, respectively.

9. NOTE AND ADVANCE PAYABLE

In February 2003, the Company obtained a bank facility for up to \$5.0 million to develop the southern expansion of its South Midway field. The note is repayable over three years starting August 2004 with interest at 0.5% above the bank s prime rate or 3.0% over the London Inter-Bank Offered Rate (LIBOR), at the option of the Company. The note is secured by all the Company s rights and interests in its South Midway properties. The note balance, as at September 30, 2005 and December 31, 2004, was \$3.1 million and \$4.3 million, respectively, with a six-month fixed LIBOR rate of 7.375% per annum effective October 13, 2005.

The scheduled maturities of the bank note payable as at September 30, 2005 were as follows:

2005 2006 2007	\$ 417 1,667 972
Less: current portion	3,056 1,667
	\$ 1,389

In March 2004, the Company received a \$10.0 million advance as part of a \$20.0 million up-front payment due to a farm-in to the Company s Dagang oil project. Upon finalization of the farm-in agreement in June 2004, the Company s farm-in partner elected to apply \$10.0 million of the up-front payment due to the Company against the advance. **10. CONVERTIBLE LOANS**

The Company has two unsecured convertible loans, of \$6.0 million and \$2.0 million, which bear interest at 8.0% per annum. Accrued and unpaid interest as at September 30, 2005 was \$0.3 million. The loans, originally due on August 23, 2005, were extended for up to three months and are currently due upon the earliest of i.) five days following receipt of proceeds from a private placement or public offering of Company common shares ii.) thirty days following written demand for repayment from lender or iii.) November 23, 2005. A 3% extension fee of approximately \$0.3 million is payable on the unpaid principal and interest at maturity and has been accrued as at September 30, 2005.

During the term of the loans the lender may convert, at its option, unpaid principal and interest, in whole or in part, to the Company s common shares at \$2.25 per share as to the \$6.0 million loan and \$2.15 per share as to the \$2.0 million loan. However, if the Company completes a private placement or public offering of Company common shares during the term of the loans at a price per share that is less than either of the loans conversion rates of \$2.25 per share and \$2.15 per share and the lender elects to convert the loans, in whole or in part, to the Company s common shares then the Company will, at its election, either i.) convert the loans to the Company s common shares at a conversion rate equal to the share price obtained from a private placement or public offering of Company common shares or ii.) pay the lender, in cash, the difference between the loans conversion rates and the share price obtained from a private placement or public offering of Company common shares times the number of the Company s common shares to be issued to the lender based on the lender s election.

The fair value of the convertible loans approximates their carrying values due to the short-term maturity. No value was assigned to the equity component of the loans.

11. ASSET RETIREMENT OBLIGATIONS

The undiscounted amount of expected cash flows required to settle the Company s asset retirement obligations as at September 30, 2005 was estimated at \$3.0 million, which includes \$0.1 million for dismantlement and site restoration of the RTPTM CDF and \$1.5 million to permanently abandon the Northwest Lost Hills # 1-22 well. The liability for the expected cash flows, as reflected in the financial statements, has been discounted at 5% to 7% and is estimated to be settled over a twelve-year period starting in 2010.

12. MERGER

On April 15, 2005, the Company and Ensyn completed the Merger (as more fully described in the Company s 2004 Annual Report filed on Form 10-K) in which the Company paid \$10.0 million in cash and issued 30 million Ivanhoe common shares (**Merger Shares**) in exchange for all of the issued and outstanding Ensyn common shares. Ten million of the Merger Shares issued were deposited in an escrow fund and are being held to secure certain obligations on the part of the former Ensyn stockholders to indemnify the Company for damages in the event of any breaches of representations, warranties and covenants in the Merger Agreement and certain liabilities, including those arising from any failure by Ensyn to meet certain development milestones set out in the Merger Agreement. As at September 30, 2005, the Company incurred \$4.0 million of costs associated with the Merger, including

\$1.0 million to acquire an option to purchase an additional 5% of EPIL, which expired, unexercised, in January 2005. The total purchase consideration and cost of the Merger was \$89.0 million and has been allocated to the net assets acquired from Ensyn as follows:

Purchase Consideration

29,999,886 shares of Ivanhoe at \$2.50 per share Cash	\$ 75,000 10,000
Merger related costs	85,000 4,000
Total purchase consideration and cost of the Merger	\$ 89,000
Net Assets Acquired	
Cash	\$ 21
Non-cash working capital, net	(117)
Oil and gas properties and investments	4,561
Intangible asset	89,531
Asset retirement obligation	(96)
Contingent obligation (Note 13)	(1,900)
Less : previous investment in EPIL	(3,000)
	\$ 89,000

The allocation of the purchase consideration and cost of the Merger is preliminary and subject to change. The Company s consolidated results of operations for the three-month and nine-month periods ended September 30, 2005 included a net loss of \$0.7 million, or nil per share and \$1.3 million, or \$0.01 per share, respectively, associated with the operations acquired from Ensyn after the completion of the Merger on April 15, 2005. Had the Merger been completed on January 1, 2005 or 2004, the pro forma revenue, net loss and net loss per share of the merged entity for the three-month and nine-month periods ended September 30, 2005 and 2004 would have been as follows:

	Three-Month Periods Ended Sept						30,

13. ENSYN AGREEMENTS

RTPTM Joint Venture

In the Merger, the Company acquired a 50% interest in a joint venture (**RTP**^M **Joint Venture**), which owns the RTPTM CDF and exclusive right to use the RTPTM Technology to manufacture RTPTM facilities, at cost plus 25%, or be paid a fixed fee if the RTPTM facilities are manufactured by any party other than the RTPTM Joint Venture. The fixed fee is a one-time fee for each RTPTM facility installed determined based on factors including the capacity and application of the RTPTM facility. The RTPTM Joint Venture must include in the sale price for RTPTM facilities a royalty of \$500/barrel of capacity of each installed RTPTM facility payable in a lump sum and pay such royalty to the Company or alternately, at the Company s option, the royalty may be paid to the Company by the purchaser of the RTPTM facility. The Company has a 50% interest in the profits and losses of the RTPTM Joint Venture. In 2003, Ensyn (which changed its name following the Merger to Ivanhoe Energy HTL Inc. (**IE HTL**)) entered into an agreement with Aera Energy LLC (**Aera**) providing for the construction of an RTPTM Technology. The RTPTM Joint Venture partners agreed to fund the construction of an RTPTM CDF to be owned and operated by the RTPTM Joint Venture up until its redeployment to another site or sale to a third party. Within six months after completing the RTPTM CDF s testing and demonstration period, the Company is responsible for dismantling the facility and restoring the Aera site to its original condition.

No royalties were paid by the RTPTM Joint Venture to the Company for the construction of the RTPTM CDF. Other than the RTPTM CDF and exclusive right to use the RTPTM Technology to manufacture RTPTM facilities, the RTPTM Joint Venture had no assets, liabilities, revenues or net income for the three-month and nine-month periods ended September 30, 2005. The Company has included its 50% interest in the RTPTM CDF in its balance sheet as at September 30, 2005.

ConocoPhillips Canada Resources Limited

Under a pre-existing agreement between IE HTL and ConocoPhillips Canada Resources Corp. (**ConocoPhillips Canada**), certain non-exclusive rights to use the RTP Technology for petroleum applications in Canada were granted. ConocoPhillips Canada has the right, through August 2010, to place orders for RTP facilities with input capacity of up to 250,000 barrels-per-day. Should ConocoPhillips Canada install RTP facilities, IE HTL is entitled to receive royalties per barrel after the first 50,000 barrels-per day of feedstock input capacity.

14. COMMITMENTS AND CONTINGENCIES

Zitong Exploration Commitment

With the signing of the production-sharing contract for the Zitong block, the Company is obligated to conduct a minimum exploration program during the first three years ending December 1, 2005 (**Phase 1**). The Phase 1 work program includes acquiring approximately 300 miles of new seismic lines, reprocessing approximately 1,250

miles of existing seismic and drilling a minimum of approximately 23,000 feet. The Company has completed Phase 1 with the exception of drilling approximately 13,800 feet. On October 20, 2005, the Company requested an extension of Phase 1 to assess its election to proceed into the next three-year exploration phase (**Phase 2**) as further review and mapping of the Company s seismic data is necessary. In addition, the Company is in active discussion with two potential partners who have indicated an interest in participating in the Zitong block exploration program. The Company expects to receive the extension by the end of 2005 and is planning to drill a second Phase 1 exploration well with its partner(s) upon receipt of such extension after which an election would be made as to its decision to enter into Phase 2. If an extension were not granted, the Company could elect not to enter Phase 2 and would be required to pay China National Petroleum Corporation (**CNPC**), within 30 days after its election, a cash equivalent of the deficiency in the work program estimated at \$4.3 million as at September 30, 2005. If the Company did not elect to enter Phase 2, the aggregate costs related to the Zitong block in the approximate amount of \$13.2 million , including the \$4.3 million cash requirement, would be included in the depletable base of the China full cost pool and would be subject to the ceiling test. This could result in a ceiling test impairment related to the China full cost pool in an amount which is not determinable at this time.

Contingent Obligations

As part of the Merger, the Company assumed a contingent obligation to pay \$1.9 million in the event, and at such time that, the sale of units incorporating the RTPTM Technology for petroleum applications reach a total of \$100 million. This contingent obligation was recorded in the Company s balance sheet as at September 30, 2005 as part of the net assets acquired in the Merger. Additionally, the Company assumed a contingent obligation to advance to a subsidiary of Ensyn Corporation, formed from the spin-off of Ensyn s Renewables Business immediately prior to the Merger, up to approximately \$0.4 million if this subsidiary cannot meet certain debt servicing ratios required under a Canadian municipal government loan agreement. The loan principal is repayable in nine equal annual installments commencing April 1, 2006 and ending April 1, 2014. Ensyn Corporation has agreed to indemnify the Company for any amounts advanced to the subsidiary under the loan agreement.

15. SUBSEQUENT EVENTS

On November 7, 2005, the Company closed a special warrant financing by way of private placement for \$15.75 million. The financing consisted of 7,208,599 special warrants issued for cash and 2,453,988 issued for the repayment of convertible loans, both at U.S.\$1.63 per special warrant. Each special warrant entitles the holder to receive, at no additional cost, one common share and one common share purchase warrant. Each common share purchase warrant entitles the holder to purchase one common share at a price of U.S. \$2.50 per share until the second anniversary date of the closing.

A portion of the proceeds of the financing, in the amount of \$6.75 million, has been used to acquire the 50% interest in the RTP Joint Venture not already owned by the Company (see Note 13).

A further portion of the proceeds of the financing will be used to pay interest and an extension fee of approximately \$ 0.7 million accrued to date on the convertible loans (See Note 10). As noted above, the Company has agreed with the holder of \$8.0 million of convertible loans to convert \$4.0 million of the loans into 2,453,988 common shares of the Company at U.S.\$1.63 per share under the private placement. Additionally, the repayment period of the remaining \$4.0 million of convertible loans has been extended until November 23, 2007 with interest payable monthly at a rate of 8% per annum. The previously granted conversion rights attached to the convertible loans 2,000,000 common share purchase warrants, each of which will entitle the holder to purchase one common share at a price of U.S. \$2.00 per share until November 23, 2007.

The balance of the private placement proceeds of \$4.3 million will be used for working capital and general corporate purposes.

16. ADDITIONAL DISCLOSURE REQUIRED UNDER U.S. GAAP

The consolidated financial statements have been prepared in accordance with Canadian GAAP, which conforms to U.S. GAAP except as described below:

Shareholders Equity

In June 1999, the shareholders approved a reduction of stated capital in respect of the common shares by an amount of \$74.4 million being equal to the accumulated deficit as at December 31, 1998. Under U.S. GAAP, a reduction of the accumulated deficit such as this is not recognized except in the case of a quasi reorganization. The effect of this is that under U.S. GAAP, share capital and accumulated deficit are increased by \$74.4 million as at September 30, 2005 and December 31, 2004.

For Canadian GAAP, the Company accounts for all stock options granted to employees and directors since January 1, 2002 using the fair value based method of accounting. Under this method, compensation costs are recognized in

the financial statements over the stock options vesting period using an option-pricing model for determining the fair value of the stock options at the grant date. For U.S. GAAP, the Company continues to apply APB Opinion No. 25, as interpreted by FASB Interpretation No. 44, in accounting for its stock option plan and does not recognize compensation costs in its financial statements for stock options issued to employees and directors. This resulted in a reduction of \$3.3 million and \$2.0 million in the accumulated deficit as at September 30, 2005 and December 31, 2004, respectively, equal to accumulated stock based compensation for stock options granted to employees and directors since January 1, 2002 expensed under Canadian GAAP.

Oil and Gas Properties and Investments

For U.S. GAAP purposes, the aggregate value attributed to the acquisition of U.S. royalty rights during 1999 and 2000 was \$1.4 million higher, due to the difference between Canadian and U.S. GAAP in the value ascribed to the shares issued to acquire the royalty rights, primarily resulting from differences in the recognition of effective dates of the transactions.

As more fully described in our financial statements in Item 8 of our 2004 Annual Report filed on Form 10-K, there are differences between the full cost method of accounting for oil and gas properties as applied in Canada and as applied in the U.S. The principal difference is in the method of performing ceiling test evaluations under the full cost method of accounting rules. The Company performed the ceiling test in accordance with U.S. GAAP and determined that for 2004 an impairment provision of \$15.0 million was required on its U.S. oil and gas properties compared to a \$16.3 million impairment provision under Canadian GAAP. For 2001, a \$10.0 million provision for impairment was required, for U.S. GAAP purposes, in connection with the Company s China oil and gas properties. These differences result in accumulated net additional impairment provisions of \$8.7 million for U.S. GAAP purposes as at September 30, 2005 and December 31, 2004.

The differences in the amount of impairment provisions between Canadian and U.S. GAAP resulted in a reduction in accumulated depletion of \$1.3 million and \$0.5 million as at September 30, 2005 and December 31, 2004, respectively.

As more fully described in Note 2 to these consolidated financial statements, for Canadian GAAP, the Company capitalizes certain costs incurred for GTL and EOR projects subsequent to executing an MOU to determine the technical and commercial feasibility of a project, including studies for the marketability for the projects products. If no definitive agreement is reached, then a project s capitalized costs, which are deemed to have no future value, are written down and charged to operations with a corresponding reduction in the investments in GTL and EOR assets. For U.S. GAAP, feasibility, marketing and related costs are considered to be research and development and are expensed as incurred. As at September 30, 2005 and December 31, 2004, the Company capitalized \$9.9 million and \$5.9 million, respectively, for Canadian GAAP, which was expensed for U.S. GAAP purposes.

Condensed Consolidated Statements of Loss

The application of U.S. GAAP had the following effects on net loss and net loss per share as reported under Canadian GAAP:

U.S. GAAP (in thousands)				191,374			1	66,935	

As discussed under Shareholders Equity in this note, for U.S. GAAP, the Company continues to apply APB Opinion No. 25, as interpreted by FASB Interpretation No. 44, in accounting for its stock option plan and does not recognize compensation costs in its financial statements for stock options issued to employees and directors. This resulted in a reduction of \$0.5 and \$1.3 million in the net losses for the three-month and nine-month periods ended September 30, 2005, respectively, and a reduction of \$0.4 million and \$0.9 million in the net losses for the three-month and nine-month periods ended September 30, 2004, respectively.

As discussed under Oil and Gas Properties and Investments in this note, there is a difference in performing the ceiling test evaluation under the full cost method of accounting between U.S. and Canadian GAAP. Application of the ceiling test evaluation under U.S. GAAP resulted in accumulated net additional impairment provisions of \$8.7 million for U.S. GAAP purposes as at September 30, 2005 and December 31, 2004. The net increase in impairment provisions resulted in lower depletion rates for U.S. GAAP purposes, a reduction of \$0.4 million and \$0.8 million in the net losses for the three-month and nine-month periods ended September 30, 2005, respectively, and a reduction of \$0.1 million each in the net losses for the three-month and nine-month periods ended September 30, 2004. As described under Oil and Gas Properties and Investments in this note, for Canadian GAAP, feasibility, marketing and related costs incurred prior to executing a GTL or EOR definitive agreement are capitalized and are subsequently

written down upon determination that a project s future value has been impaired. For U.S. GAAP, such costs are considered to be research and development and are expensed as incurred. For the three-month and nine-month periods ended September 30, 2005, the Company expensed \$0.7 million and \$4.0 million, respectively, of GTL and EOR development costs for U.S. GAAP purposes and \$0.5 million and \$1.4 million for the three-month and nine-month periods ended September 30, 2004, respectively.

Stock Based Compensation

Had stock based compensation expense been determined based on fair value at the stock option grant date, consistent with the method of SFAS No. 123, Accounting for Stock Based Compensation, the Company s net loss and net loss per share would have been increased to the pro forma amounts indicated below:

	Three-Month Periods Ended September 30, 2005 2004				Nine-Month Periods Ended September 30, 2005 2004			
Net loss under U.S. GAAP Stock-based compensation expense determined under the fair value based method	\$	1,843	\$	980	\$	6,415	\$	3,960
for employee and director awards		570		507		1,430		1,499
Pro forma net loss under U.S. GAAP	\$	2,413	\$	1,487	\$	7,845	\$	5,459
Basic loss per common share under U.S. GAAP:								
As reported	\$	0.01	\$	0.01	\$	0.03	\$	0.02
Pro forma	\$	0.01	\$	0.01	\$	0.04	\$	0.03
Weighted Average Number of Shares under U.S. GAAP (in thousands)		206,629		169,534		191,374		166,935

Stock based compensation for U.S. GAAP was calculated in accordance with the Black Scholes option-pricing model using the same assumptions as used for Canadian GAAP.

Pro Forma Effect of Merger

The Company s U.S. GAAP consolidated results of operations for the three-month and nine-month periods ended September 30, 2005 included a net loss of \$0.7 million, or nil per share and a net loss of \$1.3 million, or \$0.01 per share, respectively, associated with the operations acquired from Ensyn after the completion of the Merger on April 15, 2005. Had the Merger been completed on January 1, 2005 or 2004, the U.S. GAAP pro forma revenue, net loss and net loss per share of the merged entity for the three-month and nine-month periods ended September 30, 2005 and 2004 would have been as follows:

	Three-Month Periods Ended September 30,								
		2005					2004		
		Net	Net	t Loss			Net	Ne	t Loss
	Revenue	Loss	Per	Share	Revenue]	Loss	Per	Share
As reported Pro forma adjustments	\$ 8,907	\$ 1,843	\$	0.01	\$ 4,932 90	\$	980 635	\$	0.01
	\$ 8,907	\$ 1,843	\$	0.01	\$ 5,022	\$	1,615	\$	0.01
Weighted Average Number of Shares (in thousands)			20	06,629				1	99,534

Nine-Month Periods Ended September 30,

	Revenue	Net Loss			Net Loss	Net Loss Per Share
As reported Pro forma adjustments	\$ 21,288 736	\$ 6,415 730	\$ 0.03	\$ 11,785 264	\$ 3,960 1,240	\$ 0.02
	\$ 22,024	\$ 7,145	\$ 0.03	\$ 12,049	\$ 5,200	\$ 0.02
Weighted Average Number of Shares (in thousands)			202,583			196,935

Condensed Consolidated Statements of Cash Flow

As a result of the write-down of GTL and EOR development costs required under U.S. GAAP, the statements of

cash flow would result in cash provided by operating activities of \$1.4 million and \$0.5 million for the three-month and nine-month periods ended September 30, 2005, respectively and cash deficiency from operating activities of \$0.7 million and \$0.5 million for the three-month and nine-month periods ended September 30, 2004, respectively. Additionally, capital investments reported under investing activities would be \$8.7 million and \$29.5 million for the three-month and nine-month periods, respectively, and \$7.8 million and \$32.0 million for the three-month and nine-month periods ended September 30, 2005, respectively.

Impact of New and Pending Canadian GAAP Accounting Standards

In January 2005, the Canadian Institute of Chartered Accountants (**CICA**) approved Section 1530 Comprehensive Income (**S.1530**), Section 3855 Financial Instruments Recognition and Measurement (**S.3855**) and Section 3865 Hedges (**S.3865**) to harmonize financial instrument and hedge accounting with U.S. GAAP and introduce the concept of comprehensive income. S.1530 requires presentation of certain gains and losses outside of net income, such as unrealized gains and losses related to hedges or other derivative instruments. S.3855 establishes standards for recognizing and measuring financial assets and financial liabilities and non-financial derivatives as required to be disclosed under Section 3861 Financial Instruments Disclosure and Presentation . S.3865 establishes standards for how and when hedge accounting may be applied. We apply SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities for U.S. GAAP purposes and will implement S.3865 for Canadian GAAP for hedging activities. These sections apply to interim and annual financial statements relating to fiscal years beginning on or after October 1, 2006 and are not expected to have a material impact on our financial statements.

In January 2005, the CICA approved Section 3251 Equity which establishes standards for the presentation of equity and changes in equity during a reporting period. This section applies to interim and annual financial statements relating to fiscal years beginning on or after October 1, 2006 and is not expected to have a material impact on our financial statements.

Effective January 1, 2005, the Company adopted revised CICA Accounting Guideline 15 (AcG 15), Consolidation of Variable Interest Entities . AcG 15 is harmonized in all material respects with U.S. GAAP and provides guidance for applying consolidation principles to certain entities (defined as VIEs) that are subject to control on a basis other than ownership of voting interests. An entity is a VIE when, by design, one or both of the following conditions exist: (a) total equity investment at risk is insufficient to permit that entity to finance its activities without additional subordinated support from other parties; (b) as a group, the holders of the equity investment at risk lack certain essential characteristics of a controlling financial interest. AcG 15 requires consolidation by a business of VIEs in which it is the primary beneficiary. The primary beneficiary is defined as the party that has exposure to the majority of the expected losses and/or expected residual returns of the VIE. AcG 15 does not impact us at this time.

Impact of New and Pending U.S. GAAP Accounting Standards

In June 2004, the Financial Accounting Standards Board (**FASB**) issued an exposure draft of a proposed statement, Fair Value Measurements to provide guidance on how to measure the fair value of financial and non-financial assets and liabilities when required by other authoritative accounting pronouncements. The proposed statement attempts to address concerns about the ability to develop reliable estimates of fair value and inconsistencies in fair value guidance provided by current U.S. GAAP, by creating a framework that clarifies the fair value objective and its application in GAAP. In addition, the proposal expands disclosures required about the use of fair value to re-measure assets and liabilities. The standard would be effective for financial statements issued for fiscal years beginning after June 15, 2005.

In December 2004, the FASB issued a revision to SFAS No. 123, Accounting for Stock Based Compensation which supersedes APB No. 25, Accounting for Stock Issued to Employees . This statement (SFAS No. 123(R)) requires measurement of the cost of employee services received in exchange for an award of equity instruments based on the fair value of the award on the date of the grant and recognition of the cost in the results of operations over the period during which an employee is required to provide service in exchange for the award. No

compensation cost is recognized for equity instruments for which employees do not render the requisite service. The Company applies APB Opinion No. 25, as interpreted by FASB Interpretation No. 44, in accounting for awards issued from its stock option plan and does not recognize compensation costs in its U.S. GAAP financial statements for stock options issued to its employees and directors. This statement is effective for the first fiscal year that begins after June 15, 2005 and may be implemented on a modified prospective or retrospective basis. The Company has elected to implement this statement on a modified prospective basis starting in the first quarter of 2006. Under the modified prospective basis the Company would recognize stock based compensation in its U.S. GAAP results of operations for the unvested portion of awards outstanding as at January 1, 2006 and for all awards granted after January 1, 2006. To assist in the implementation of SFAS No. 123(R), the SEC issued SAB No. 107, Share-Based Payment . While SAB No. 107 addresses a wide range of issues, the largest area of focus is valuation methodologies and the selection of assumptions. Notably, SAB No. 107 lays out simplified methods for developing certain assumptions. In addition to providing the SEC staff s interpretive guidance on SFAS No. 123(R), SAB No. 107 addresses the interaction of SFAS No. 123(R) with existing SEC guidance (e.g., the interaction with the SEC s guidance dealing with non-GAAP disclosures). Its intent is to clarify, not change, any of SFAS No. 123(R) s guidance.

In March 2005, the FASB issued Interpretation No. 47 (**FIN 47**) Accounting for Conditional Asset Retirement Obligations an interpretation of FASB Statement No. 143. A conditional asset retirement obligation refers to a legal obligation to perform an asset retirement activity in which the timing and (or) method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and (or) method of settlement. Thus, the timing and (or) method of settlement may be conditional on a future event. FIN 47 requires an entity to recognize a liability for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated. FIN 47 is effective no later than the end of fiscal years ending after December 15, 2005 (December 31, 2005, for calendar-year enterprises). Retrospective application for interim financial information is permitted but is not required.

In May 2005, the FASB issued SFAS No. 154 (**SFAS 154**) Accounting Changes and Error Corrections a replacement of APB Opinion No. 20 and FASB Statement No. 3 . SFAS 154 changes the requirements for the accounting for and reporting of a change in accounting principle. APB Opinion No. 20 previously required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. SFAS 154 requires retrospective application to prior periods financial statements for changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. SFAS 154 applies to all voluntary changes in accounting principle. SFAS 154 applies to all voluntary changes in accounting principle. SFAS 154 applies to all voluntary changes in accounting principle. SFAS 154 applies to all voluntary changes in accounting principle. SFAS 154 applies to all voluntary changes in accounting principle. SFAS 154 also applies to changes required by an accounting pronouncement includes specific transition provisions. When a pronouncement includes specific transition provisions, those provisions should be followed. SFAS 154 carries forward without change the guidance contained in APB Opinion No. 20 for reporting the correction of an error in previously issued financial statements and a change in accounting estimate. SFAS 154 also carries forward the guidance in APB Opinion No. 20 requiring justification of a change in accounting principle on the basis of preferability. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005.

In June 2005, the FASB published an Exposure Draft containing proposals to change the accounting for business combinations. The proposed standards would replace the existing requirements of the FASB s Statement No. 141,

Business Combinations . The proposals would result in fewer exceptions to the principle of measuring assets acquired and liabilities assumed in a business combination at fair value. Additionally, the proposals would result in payments to third parties for consulting, legal, audit, and similar services associated with an acquisition being recognized generally as expenses when incurred rather than capitalized as part of the business combination. The FASB also published an Exposure Draft that proposes, among other changes, that non-controlling interests be classified as equity within the consolidated financial statements. The FASB s proposed standard would replace Accounting Research Bulletin No. 51,

Consolidated Financial Statements .

The following standards issued by the FASB do not impact the Company
