2015 Annual Review and

A Few Words on Closed-End Funds

Royce & Associates, LLC manages three closed-end funds: Royce Value Trust, which invests primarily in small-cap securities; Royce Micro-Cap Trust, which invests primarily in micro-cap securities; and Royce Global Value Trust, which invests in both U.S. and non-U.S. small-cap stocks. A closed-end fund is an investment company whose shares are listed and traded on a stock exchange. Like all investment companies, including open-end mutual funds, the assets of a closed-end fund are professionally managed in accordance with the investment objectives and policies approved by the fund's Board of Directors. A closed-end fund raises cash for investment by issuing a fixed number of shares through initial and other public offerings that may include shelf offerings and periodic rights offerings. Proceeds from the offerings are invested in an actively managed portfolio of securities. Investors wanting to buy or sell shares of a publicly traded closed-end fund after the offerings must do so on a stock exchange, as with any publicly traded stock. Shares of closed-end funds frequently trade at a discount to their net asset value. This is in contrast to open-end mutual funds, which sell and redeem their shares at net asset value on a continuous basis.

A Closed-End Fund Can Offer Several Distinct Advantages

A closed-end fund does not issue redeemable securities or offer its securities on a continuous basis, so it does not need to liquidate securities or hold uninvested assets to meet investor demands for cash redemptions.

In a closed-end fund, not having to meet investor redemption requests or invest at inopportune times can be effective for value managers who attempt to buy stocks when prices are depressed and sell securities when prices are high.

A closed-end fund may invest in less liquid portfolio securities because it is not subject to potential stockholder redemption demands. This is potentially beneficial for Royce-managed closed-end funds, which invest primarily in small- and micro-cap securities.

The fixed capital structure allows permanent leverage to be employed as a means to enhance capital appreciation potential.

Royce Value Trust and Royce Micro-Cap Trust distribute capital gains on a quarterly basis. Each of these Funds has adopted a quarterly distribution policy for its common stock.

We believe that the closed-end fund structure can be an appropriate investment for a long-term investor who understands the benefits of a more stable pool of capital.

Why Dividend Reinvestment Is Important

A very important component of an investor's total return comes from the reinvestment of distributions. By reinvesting distributions, our investors can maintain an undiluted investment in a Fund. To get a fair idea of the impact of reinvested distributions, please see the charts on pages 12 and 13. For additional information on the Funds' Distribution Reinvestment and Cash Purchase Options and the benefits for stockholders, please see page 14 or visit our website at www.roycefunds.com.

Managed Distribution Policy

The Board of Directors of each of Royce Value Trust and Royce Micro-Cap Trust has authorized a managed distribution policy (MDP). Under the MDP, Royce Value Trust and Royce Micro-Cap Trust pay quarterly distributions at an annual rate of 7% of the average of the prior four quarter-end net asset values, with the fourth quarter being the greater of these annualized rates or the distribution required by IRS regulations. With each distribution, the Fund will issue a notice to its stockholders and an accompanying press release that provides detailed information regarding the amount and composition of the distribution (including whether any portion of the distribution represents a return of capital) and other information required by a Fund's MDP. You should not draw any conclusions about a Fund's investment performance from the amount of distributions or from the terms of a Fund's MDP. A Fund's Board of Directors may amend or terminate the MDP at any time without prior notice to stockholders; however, at this time there are no reasonably foreseeable circumstances that might cause the termination of any of the MDPs.

Letter to Our Stockholders

GOODBYE TO ALL THAT

It was the sort of year that, when you first look at the final equity market returns, might seem unexceptional, almost quiet. **It is only when plugged into the context of the long, mostly bullish market since March 2009 that 2015's more muted results begin to make more sense** — one could even be forgiven for wondering why the losses for the major domestic stock indexes were not steeper than they were at the end of December, considering the heights to which most indexes ascended following the end of the Financial Crisis. Yet the mostly single-digit losses that marked 2015 were the first negative calendar-year returns for small-caps since 2011 (as measured by the Russell 2000 Index). For their part, large-caps, as measured by the Russell 1000 and S&P 500 Indexes, had low single-digit positive returns.

An equally important contextual piece is the larger macro situation and few stock market cycles have been shaped as deeply as the current period has been by forces beyond the companies themselves. So while factors such as interest rates, commodity prices, technological innovation, consumer confidence, and the like always influence the movement of share prices to some extent, the fragility of the global economy in the years following the crisis has resulted in levels of central bank and other government interventions not seen since The Great Depression. These actions were almost assuredly necessary to keep the economy afloat. At the same time, however, these policies — particularly zero interest rates and quantitative easing — had significant unintended consequences. And only now, a full seven years after the tumult, is the situation in the U.S. slouching toward something resembling the Old Normal — that is, a business cycle in which access to credit is more constrained, borrowing has a cost (however low) and both financial health and profitable execution are likely to matter to investors. **To be sure, the road back has proved both longer and more winding than any of us could have foreseen at almost any point over the last seven years.** At this writing in January of 2016 we know the path in front of us will have its own share of formidable challenges as we embark on the latest leg of the journey.

As equity investors, we find ourselves in a curious, ambiguous place. The number of risks affecting share prices (among other things) is long and somewhat chilling: Weak commodity prices, flagging currency in China, elevated credit concerns, and geopolitical instability. By year-end, the spread between the U.S. 10-Year note and the Two-Year note — which, when it inverts, often signals recession — had narrowed to a point near the bottom of its six-year range at about 122 basis points. Still far from inverted, it is worth keeping an eye on. We also saw widening credit spreads, a growing number of defaults, and additional signs of a potential credit crunch, especially in the energy industry. Our concerns over credit only intensified in light of the market's mild reaction to the Fed's hike on December 16. The situation is of particular interest and concern to us as small-cap specialists. As has been the case historically, a significant deterioration in access to capital would likely have a larger negative impact on small-caps, especially those carrying excess leverage. Of course, this development could also produce an advantage for more conservatively capitalized small-cap businesses — and we own plenty across our value, core, and growth

2 | This page is not part of the 2015 Annual Report to Stockholders

strategies. **This is one facet of what we believe is a strong case for disciplined, contrarian, bottom-up small-cap approaches that put a premium on managing risk. More widespread success for these kinds of approaches would be a welcome departure from 2015, to which we are happy to say, Goodbye and good riddance.**

A WILD RIDE TO NOWHERE

Our own Charlie Dreifus described 2015 as a wild ride to nowhere. We can think of no more fitting way to characterize the year, which was distinguished by high volatility and broadly divergent sector and industry results. **The market's indecision and frustration displayed itself with 19 crossings back and forth over the flat line for the S&P 500.** There were single-digit gains in 2015 for a few global and domestic indexes and single-digit losses for several more. The important exceptions to the downward trend were the Nasdaq Composite, U.S. large-caps, and European issues small-caps in particular. The Nasdaq Composite was the clear domestic leader in 2015, while the large-cap Russell 1000 and S&P 500 just barely escaped a volatile and bearish December to finish with modestly positive results.

Within our chosen specialty of small-cap stocks, there were strong returns within the Russell 2000 for Health Care and discrete, more growth-oriented pockets of Information Technology that were accompanied by losses for each of the index's eight remaining equity sectors, including Energy, Materials, Industrials, and Consumer Discretionary. Along with Information Technology, those four sectors have been among our largest portfolios weightings and/or

substantial overweights versus all three of our closed-end Funds' respective benchmarks over the last few years. One can get a sense of how confounding 2015 was by noting the confluence of losses for Energy and Consumer Discretionary in the Russell 2000, which defied the historical trend of low energy prices creating widespread demand for discretionary purchases. Indeed, traditional retail stocks were a particular source of red ink for the sector, in spite of consumer confidence remaining high and select, mostly large online companies scoring significant successes. In fact, the 4.4% decline for the Russell 2000 masks just how challenging it was to find strong small-cap performers, especially outside the bio-pharma complex. The difficulty becomes clearer in the context of the small-cap index's decline of 10.1% on an equal-weighted basis in 2015. (Similarly, the S&P 500 was also down on an equal-weighted basis, falling 2.2% for the calendar year.)

Looking within small-cap from a style perspective reveals another year in which the Russell 2000 Growth Index, which was down 1.4%, outpaced the Russell 2000 Value Index, which lost 7.5%. Yet small-cap value actually fared better than its growth sibling during the third-quarter correction, losing 10.7% versus 13.1%. Perhaps more interestingly to us, at least small-cap value led from the July 17, 2015 high for small-cap non-earners through year-end, falling 8.0% compared to an 11.3% decline for small-cap growth. Down and flat markets have historically favored value, as well as other valuation-focused approaches, so it was reassuring to see that pattern recur, however briefly, in 2015. The last decade, after all, has belonged to small-cap growth. The Russell 2000 Growth beat the Russell 2000

Equity Indexes As of December 31, 2015 (%)

The Calendar Year Was a Wild Ride To Nowhere 2015 saw single-digit losses for a number of global and domestic indexes. The important exceptions to these mostly modest equity declines came from U.S. large-caps, the Nasdaq Composite, international small-caps, and European issues (especially small-caps).

Longer-Term Perspective Returns Moving Lower Toward More Historically Typical Levels Three- and five-year returns remained higher than their long-term rolling averages but were down noticeably from where they were for the same periods through 6/30/15. Large-cap led for the three- and five-year periods ended 12/31/15, followed for both periods by the Russell Midcap, Russell Microcap, and Russell 2000. The Russell 2000 Growth outpaced the Russell 2000 Value for the three- and five-year periods ended 12/31/15.

LETTER TO OUR STOCKHOLDERS

Value for the third consecutive year as of the end of 2015, and finished ahead in seven of the last 10 calendar years, resulting in a historically wide margin of outperformance on a trailing 10-year basis through the end of 2015. **As long-time believers in mean reversion, we suspect that leadership from value will be the more likely relative performance pattern going forward.** (Certainly that has been the case through January the Russell 2000 Value Index has thus far held up better than its growth counterpart.)

WHERE ARE WE NOW?

The question is: Where are we now? We first want to stress that while the equity and other capital markets are under pressure, not all the news is grim. Several notable bright spots are present that militate against the rising wave of recessionary anxieties: job growth in the U.S. remains steady, while real incomes, as well as expectations, have risen. Perhaps more important is the fact that household formations picked up in 2015 and many expect them to rise again in 2016. **The economy also received a probable boost late in December when the government passed a budget deal that increased spending and put business tax credits in place. These moves, which could add as much as 0.7% to U.S. GDP in 2016, could also help areas as diverse as technology, defense, consumer, and nonresidential construction.** With so much of the global spotlight on China, it is also worth mentioning that the U.S. economy remains by far the world's largest and has little dependence on that of China.

That being said, many investors are understandably anxious over the 4 Cs of commodities, currency, credit, and China worries that were intense even before the massive sell-off that opened 2016. As mentioned, we peg the troubled state of the credit markets as the greatest concern for small-cap investors, especially in the near term. **Yet we also believe that these uncertain conditions offer fertile ground for disciplined stock pickers (though January's ground probably felt more like quicksand for many).** The driving force behind each of our distinct investment strategies value, growth, and core is a bottom-up approach, the result of our firm conviction that deep knowledge of companies and their industry dynamics ultimately matters more than the larger macro picture. While the last five years have not been kind to these approaches, we think the seismic shifts in the markets of late are another sign that the next five years will be different.

In addition to the tightening credit climate, we think that the world is moving out of an intensely macro-focused phase into a more historically typical period that will feature lower equity returns. Long-term returns for the Russell 2000 have shifted from spectacular highs to levels more in line with their historical averages. **We think returns for the next three-to-five years will be positive, but lower than, or close to, their long-term average. In this environment, we expect leadership to come from companies with low leverage, high returns on invested capital, and other financial and/or operational strengths, which should bode well for many of our holdings in more cyclical areas.** So while there may be additional pain for many small-caps in the initial phase of a significant credit or other market-rocking event, we think financially self-supporting companies should emerge in far better condition than their more highly leveraged and/or less profitable peers. Earnings will matter. Their increasing importance should cause a shift in small-cap leadership away from unprofitable or money-losing businesses toward profitable ones. **We see earnings growth, as opposed to P/E expansion, driving market returns as stocks seek to regain their balance later in 2016.**

To be sure, we saw evidence of positive change during January 2016. As equity prices were falling at an alarming rate, our three closed-end portfolios held up very well. In fact, each outpaced their respective benchmarks in January. In addition, Royce Value Trust outperformed the Russell 2000 on an NAV basis for the one-year period ended January 31, 2016. While not wanting to make too much of a short-term period, these developments bolster our optimism for better times ahead.

Sincerely,

Charles M.

Important Performance and Risk Information

Edgar Filing: ROYCE GLOBAL VALUE TRUST, INC. - Form N-CSR

All performance information in this *Review and Report* reflects past performance, is presented on a total return basis, net of the Fund's investment advisory fee, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate, so that shares may be worth more or less than their original cost when sold. Current performance may be higher or lower than performance quoted. Current month-end performance may be obtained at www.roycefunds.com. The Funds are closed-end registered investment companies whose respective shares of common stock may trade at a discount to the net asset value. Shares of each Fund's common stock are also subject to the market risk of investing in the underlying portfolio securities held by each Fund. Certain immaterial adjustments were made to the net assets of Royce Micro-Cap Trust at 12/31/12, as well as 12/31/14, for financial reporting purposes, and as a result the net asset value originally calculated on that date and the total return based on that net asset value differs from the adjusted net asset value and total return reported in the Financial Highlights. All indexes referenced are unmanaged and capitalization-weighted. Each index's returns include net reinvested dividends and/or interest income. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group. The Russell 2000 Index is an index of domestic small-cap stocks that measures the performance of the 2,000 smallest publicly traded U.S. companies in the Russell 3000 Index. The Russell Microcap Index includes 1,000 of the smallest securities in the small-cap Russell 2000 Index, along with the next smallest eligible securities as determined by Russell. The Russell Global Small Cap Index is an unmanaged, capitalization-weighted index of global small-cap stocks. The performance of an index does not represent exactly any particular investment, as you cannot invest directly in an index. Index returns include net reinvested dividends and/or interest income. Royce Value, Micro-Cap and Global Value Trust shares of common stock trade on the NYSE. Royce Fund Services, Inc (RFS) is a member of FINRA and has filed this *Review and Report* with FINRA on behalf of each Fund. RFS is not an underwriter or distributor of any of the Funds.

MANAGER'S DISCUSSION **Royce Global Value Trust (RGT)****Chuck Royce FUND PERFORMANCE**

Royce Global Value Trust (NYSE: RGT) fell 3.4% on an NAV (net asset value) basis and lost 6.1% on a market price basis in 2015, lagging its unleveraged benchmark, the Russell Global Small Cap Index, which declined 1.8% for the same period. The Fund struggled on a relative basis through much of the year. For the year-to-date period ended June 30, 2015, RGT gained 5.6% on an NAV basis and 3.4% on a market price basis versus a gain of 6.4% for the Russell Global Small Cap for the same period. Stocks then suffered a sweeping correction in the third quarter, with many global and domestic indexes enduring double-digit losses. The Fund underperformed in the third quarter, down 12.4% on an NAV basis and 15.6% on a market price basis versus a decline of 11.6% for the Russell Global Small Cap Index. During the fourth quarter, RGT participated fully when stocks first rebounded in October, slipped behind its benchmark in November, and held its value better when markets turned down again in December. For the fourth quarter as a whole, the Fund increased 4.3% based on NAV and advanced 7.7% based on market price while the Russell Global Small Cap rose 4.4%.

WHAT WORKED... AND WHAT DIDN'T In many cases, the most important factor for our holdings was what did not happen – economies across the globe failed to accelerate with the kind of speed that would drive investors toward the more cyclical areas where we have been most actively investing. This effect was particularly noticeable for holdings in Materials, Information Technology, and Energy – three economically sensitive sectors that also posted the most significant net losses in 2015. A certain pace of growth must be present to key more robust performance for many cyclical businesses, and we simply did not see enough of it in 2015. Against this backdrop, we continued to focus on companies that in our analyses showed a combination of attractive valuation, balance sheet strength, and/or promising growth prospects.

Net losses for the Information Technology sector were spread across a number of positions and industry groups. The largest net losses for the latter came from software, electronic equipment, instruments & components, and semiconductors & semiconductor equipment companies. However, the portfolio's most significant detractor at the industry level was the metals & mining group. On the positive side, Health Care made a notable positive contribution, driven by strong net gains in the health care equipment & supplies group.

At the position level, New World Department Store China posted the largest net losses, its sales slowed by the decelerating economy on the mainland. We held a small position at year-end. Dundee Corporation is a holding company based in Toronto that is involved in investment advisory, corporate finance, energy, resources, agriculture, real estate, and infrastructure. The company also holds investment portfolios in these areas. Its stock was hurt by significant exposure to the weakened commodity markets in 2015. Liking its long-term prospects, we built our stake in 2015. We acted similarly, though on a larger scale, with top-10 holding Genworth MI Canada. Shares of this residential mortgage insurer often move with energy prices, and ongoing concerns about mortgage losses in the energy-dominated western Canada continued to push its price down. True to our contrarian nature, we suspect the bulk of those losses have already been priced in.

RGT's top contributor was Japan's Relo Holdings, which provides corporate fringe benefit outsourcing services, including maintenance and management services for expatriates' homes. We like its niche business, history of raising dividends, and steady company growth throughout 2015. We took gains at various times through the year. Italy's De'Longhi owns a collection of consumer brands in the domestic appliance market, such as coffee makers, food processors, electric ovens, kettles, toasters, and more. Growing revenues and expanding margins, driven in part by the increasing popularity of its home espresso machines, helped draw investors to its shares. We held a good-sized position at year-end.

On a relative basis, the Fund was hurt most by Information Technology, mostly by ineffective stock selection in the software and semiconductors & semiconductor equipment industries. Conversely, stock selection was a strength both in Industrials and Health Care versus the Russell Global Small Cap.

CURRENT POSITIONING AND OUTLOOK We expect reversals in a number of trends that should help benefit many portfolio holdings over the next few years. Our own research and regular meetings with confident management teams have made us comfortable with a contrarian, pro-cyclical bias for the portfolio. Moreover, we suspect that the protracted leadership of growth over value stocks is likely to reverse in 2016 and that companies with better balance sheets will do well in an environment of elevated corporate bond spreads. We also expect the combined effects of these reversals to put the market's focus squarely on the attributes we emphasize, which we think are overdue for recovery.

quoted. Returns as of the most recent month-end may be obtained at www.roycefunds.com. The market price of the Fund's shares will fluctuate, so that shares may be worth more or less than their original cost when sold. The Fund invests primarily in securities of small- and micro-cap companies, which may involve considerably more risk than investments in securities of larger-cap companies. The Fund's broadly diversified portfolio does not ensure a profit or guarantee against loss. From time to time, the Fund may invest a significant portion of its net assets in foreign securities, which may involve political, economic, currency and other risks not encountered in U.S. investments. Regarding the Top Contributors and Top Detractors tables shown on page 10, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund's year-to-date performance for 2015.

MANAGER'S DISCUSSION **Royce Micro-Cap Trust (RMT)****Chuck Royce FUND PERFORMANCE**

Royce Micro-Cap Trust (NYSE: RMT) was down 11.7% on an NAV (net asset value) basis and fell 16.1% on a market price basis in 2015. These results trailed those for each of its unleveraged benchmarks, the small-cap Russell 2000 Index, which lost 4.4%, and the Russell Microcap Index, which declined 5.2% for the same period. The Fund struggled versus its benchmarks throughout the year. For the year-to-date period ended June 30, 2015, RMT was down 0.5% on an NAV basis and fell 4.2% based on its market price while the Russell 2000 Index gained 4.8% and the Russell Microcap Index increased 6.0% for the same period. During the widespread correction in the third quarter, the Fund lost 13.8% on an NAV basis and lost 14.0% on a market price basis, compared to declines of 11.9% for the Russell 2000 and 13.8% for the Russell Microcap. Stock prices then revived somewhat in the fourth quarter, when RMT increased 2.9% on an NAV basis and 1.8% on a market price basis versus respective gains of 3.6% and 3.7% for the Russell 2000 and Microcap Indexes.

For a sense of how challenging the year was for small and micro-cap stocks (and the active managers who pick them), consider that the Russell 2000 lost 10.1% on an equal-weighted basis in 2015. This shows just how hard it was to find stocks that grew appreciably by year-end, especially in the more economically sensitive, cyclical areas of the market that have been our primary focus over the last few years. In this climate, we continued to focus on companies that in our analyses showed a combination of attractive valuation, balance sheet strength, and/or promising growth prospects. The Fund outperformed the Russell 2000 on an NAV basis for the 15-, 20-year, and since inception (12/14/93) periods ended December 31, 2015 while also beating the Russell Microcap on an NAV basis for the 10- and 15-year periods ended December 31, 2015. (Returns for the Russell Microcap only go back to 2000.) **RMT's average annual NAV total return since inception was 10.3%.**

WHAT WORKED... AND WHAT DIDN'T

Seven of the portfolio's 10 sectors were in the red at year-end (versus eight of 10 in negative territory for the Russell 2000). Financials detracted most by a wide margin, hampered mostly by net losses in the capital markets industry. This group includes asset managers, a business we believe we know well and in which we have many years of investment experience. So while we were disappointed in overall results for the group in 2015, we nonetheless think highly of both the recovery potential and long-term prospects for our holdings in the industry. Two of RMT's five biggest detractors came from that group. Dundee Corporation is a holding company based in Toronto that is involved in investment advisory, corporate finance, energy, resources, agriculture, real estate, and infrastructure. The company also holds investment portfolios in these areas. Its stock was hurt by significant exposure to the weakened commodity markets in 2015. Based in Greenwich, CT., Fifth Street Asset Management is a credit-focused asset manager that also specializes in providing credit solutions to small- and mid-sized businesses. The volatile market of the second half challenged its business and slowed revenues. We built positions in both companies through much of the year.

Industrials was also a sore spot in 2015, with net losses coming from several industry groups. It is a large and highly diverse sector home to RMT's two biggest contributors Frontier Services Group and Integrated Electrical Services, and its second-largest detractor, Universal Truckload Services. Frontier Services Group is a Hong Kong-based company with a base of operations in Nairobi that provides logistical services in Africa and benefited in part from the investor perception that asset growth can help fund FSG's plan to expand its logistics network.

The largest detractor to relative performance versus the Russell 2000 on a sector basis in 2015 was Financials. Several developments negatively impacted results, including an underweight in banks, an overweight and poor stock selection in capital markets, and ineffective stock picking in the consumer finance and diversified financial services industries. Information Technology, where we were hurt by stock selection misses in the Internet software & services industry, also detracted from calendar-year results relative to the small-cap index. We received a relative advantage from our underweight in Energy as well as modest stock selection success in Health Care and Industrials.

CURRENT POSITIONING AND OUTLOOK

We expect reversals in a number of trends that should help benefit many portfolio holdings over the next few years. Our own research and regular meetings with confident management teams have made us comfortable with a contrarian, pro-cyclical bias for the portfolio. Moreover, we suspect that the protracted leadership of growth over value stocks is likely to reverse in 2016 and believe that companies with better balance sheets will do well in an environment of elevated corporate bond spreads. We also expect the combined effects of these reversals to put the market's focus squarely on the attributes we emphasize, which we think are overdue for recovery.

Net leverage is the percentage, in excess of 100%, of the total value of equity type investments, divided by net assets.

² **Geometric Average.** This weighted calculation uses each portfolio holding's market cap in a way designed to not skew the effect of very large or small holdings; instead, it aims to better identify the portfolio's center, which Royce believes offers a more accurate measure of average market cap than a simple mean or median. ³

Edgar Filing: ROYCE GLOBAL VALUE TRUST, INC. - Form N-CSR

Harmonic Average. This weighted calculation evaluates a portfolio as if it were a single stock and measures it overall. It compares the total market value of the portfolio to the portfolio's share in the earnings or book value, as the case may be, of its underlying stocks.

4
The Fund's P/E ratio calculation excludes companies with zero or negative earnings (28% of portfolio holdings as of 12/31/15).

5
Active Share is the sum of the absolute values of the different weightings of each holding in the Fund versus each holding in the benchmark, divided by two.

Important Performance and Risk Information All performance information reflects past performance, is presented on a total return basis, net of the Fund's investment advisory fee, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at www.roycefunds.com. Certain immaterial adjustments were made to the net assets of Royce Micro-Cap Trust at 12/31/12 and 12/31/14 for financial reporting purposes, and as a result the net asset value originally calculated on that date and the total return based on that net asset value differs from the adjusted net asset value and total return reported in the Financial Highlights. The market price of the Fund's shares will fluctuate, so that shares may be worth more or less than their original cost when sold. The Fund normally invests in micro-cap companies, which may involve considerably more risk than investments in securities of larger-cap companies. The Fund's broadly diversified portfolio does not ensure a profit or guarantee against loss. From time to time, the Fund may invest a significant portion of its net assets in foreign securities, which may involve political, economic, currency and other risks not encountered in U.S. investments. Regarding the Top Contributors and Top Detractors tables shown on page 8, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund's year-to-date performance for 2015.

2015 Annual Report to Stockholders | 9

MANAGER'S DISCUSSION **Royce Value Trust (RVT)**

Chuck Royce

FUND PERFORMANCE Royce Value Trust (NYSE: RVT) fell **8.1% on an NAV (net asset value) basis and 9.6% on a market price basis in 2015, behind both of its unleveraged small-cap benchmarks.** For the same period, the Russell 2000 was down 4.4% while the S&P SmallCap 600 slid 2.0%. For the year-to-date period ended June 30, 2015, RVT gained 1.7% on an NAV basis and 0.3% based on its market price versus respective gains of 4.8% and 4.2% for the Russell 2000 and S&P SmallCap 600. The third quarter saw a significant correction for equities. In this challenging environment, the Fund was down 12.4% on an NAV basis and 14.6% on a market price basis. For the same period, the Russell 2000 fell 11.9% and the S&P SmallCap 600 was down 9.3%. Stocks then rallied in the fourth quarter through most of October and November. For the quarter as a whole, RVT advanced 3.2% based on NAV and 5.6% based on market price while the Russell 2000 increased 3.6% and the S&P SmallCap 600 rose 3.7%.

For a sense of how challenging the year was for small-cap stocks (and the active managers who pick them), consider that the Russell 2000 lost 10.1% on an equal-weighted basis in 2015. This shows just how hard it was to find stocks that grew appreciably by year-end, especially in the more economically sensitive, cyclical areas of the market that have been our primary focus over the last few years. In this climate, we continued to focus on companies that in our analyses showed a combination of attractive valuation, balance sheet strength, and/or promising growth prospects. On an NAV and market price basis, the Fund outperformed the Russell 2000 for the 15-, 20-, 25-year, and since inception (11/26/86) periods ended December 31, 2015 while trailing the S&P SmallCap 600. **RVT's average annual NAV total return for the since inception period was 10.0%.** **WHAT WORKED... AND WHAT DIDN'T** Six of the Fund's 10 equity sectors finished the year in negative territory, which compares favorably to the eight of 10 detracting sectors in the Russell 2000. Industrials, where we were substantially overweight at the end of 2015, detracted most on an absolute basis. It also hurt relative performance, but our disadvantage resulted from greater exposure to the sector—stock selection was a net positive versus the benchmark. On an industry level, the sector's largest net losses in Industrials came from machinery stocks, which was also a significant overweight. Long-time holding Kennametal makes tools and tooling systems, focusing on the metalworking, mining, oil, and energy industries, all of which faced sluggish industry conditions in 2015. The Financials, Energy, Information Technology, Consumer Discretionary, and Materials sectors also posted notable net losses. At the industry level, significant detractors other than machinery included electronic equipment, instruments & components, energy equipment & services, and capital markets. Slumping commodity prices and slowing industrial activity on a near-global scale were major factors behind poor performance for these areas. Modest net gains came from Health Care and Consumer Staples.

Edgar Filing: ROYCE GLOBAL VALUE TRUST, INC. - Form N-CSR

At the position level, RVT's biggest detractor was Dundee Corporation, a holding company based in Toronto that is involved in investment advisory, corporate finance, energy, resources, agriculture, real estate, and infrastructure. The Company also holds investment portfolios in these areas. Its stock was hurt by its large exposure to the commodity markets. Confident in its long-term potential, we added shares in 2015. We did the same with our position in Tejon Ranch. Based in Lebec, CA., Tejon is a diversified real estate development and agribusiness company that is also one of the largest private landowners in the Golden State. Reduced revenues in its commodity-based farming and mineral resources businesses, as well as increased expenses across several business units, drove investors away from its shares.

The largest detractor to relative performance on a sector basis in 2015 was Information Technology, where poor stock selection in the electronic equipment, instruments & components and semiconductors & semiconductor equipment industries hurt most. The combination of an underweight in banks, an overweight in capital markets, and poor stock selection in insurance all hampered relative results in Financials. Health Care's modest net gain in the portfolio was mitigated by our significant underweight in the sector (particularly in biotech) it detracted from results relative to the Russell 2000. We were pleased, however, with our stock-picking strength in Materials and Consumer Discretionary two highly challenged sectors in which we sought to high-grade positions in 2015.

Important Performance and Risk Information

All performance information reflects past performance, is presented on a total return basis, net of the Fund's investment advisory fee, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at www.roycefunds.com. The market price of the Fund's shares will fluctuate, so that shares may be worth more or less than their original cost when sold. The Fund invests primarily in securities of small- and micro-cap companies, which may involve considerably more risk than investing in larger-cap companies. The Fund's broadly diversified portfolio does not ensure a profit or guarantee against loss. Regarding the Top Contributors and Top Detractors tables shown on page 6, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund's year-to-date performance for 2015.

History Since Inception

The following table details the share accumulations by an initial investor in the Funds who reinvested all distributions and participated fully in primary subscriptions for each of the rights offerings. Full participation in distribution reinvestments and rights offerings can maximize the returns available to a long-term investor. This table should be read in conjunction with the Performance and Portfolio Reviews of the Funds.

Distribution Reinvestment and Cash Purchase Options

Why should I reinvest my distributions?

By reinvesting distributions, a stockholder can maintain an undiluted investment in the Fund. The regular reinvestment of distributions has a significant impact on stockholder returns. In contrast, the stockholder who takes distributions in cash is penalized when shares are issued below net asset value to other stockholders. **How does the reinvestment of distributions from the Royce closed-end funds work?**

The Funds automatically issue shares in payment of distributions unless you indicate otherwise. The shares are generally issued at the lower of the market price or net asset value on the valuation date. **How does this apply to registered stockholders?**

If your shares are registered directly with a Fund, your distributions are automatically reinvested unless you have otherwise instructed the Funds' transfer agent, Computershare, in writing, in which case you will receive your distribution in cash. A registered stockholder also may have the option to receive the distribution in the form of a stock certificate. **What if my shares are held by a brokerage firm or a bank?**

If your shares are held by a brokerage firm, bank, or other intermediary as the stockholder of record, you should contact your brokerage firm or bank to be certain that it is automatically reinvesting distributions on your behalf. If they are unable to reinvest distributions on behalf, you should have your shares registered in your name in order to participate. **What other features are available for registered stockholders?**

The Distribution Reinvestment and Cash Purchase Plans also allow registered stockholders to make optional cash purchases of shares of a Fund's common stock directly through Computershare on a monthly basis, and to deposit certificates representing your RVT and RMT shares with Computershare for safekeeping. (RGT does not issue shares in certificated form). Plan participants are subject to a \$0.75 service fee for each voluntary cash purchase under the Plans. The Funds' investment adviser absorbed all commissions on optional cash purchases under the Plans through December 31, 2015.

How do the Plans work for registered stockholders?

Computershare maintains the accounts for registered stockholders in the Plans and sends written confirmation of all transactions in the account. Shares in the account of each participant will be held by Computershare in non-certificated form in the name of the participant, and each participant will be able to vote those shares at a stockholder meeting or by proxy. A participant may also send stock certificates for RVT and RMT held by them to Computershare to be held in non-certificated form. RGT does not issue shares in certificated form. There is no service fee charged to participants for reinvesting distributions. If a participant elects to sell shares from a Plan account, Computershare will deduct a \$2.50 service fee from the sale transaction. The Funds' investment adviser absorbed all commissions on optional sales under the Plans through December 31, 2015. If a nominee is the registered owner of your shares, the nominee will maintain the accounts on your behalf. **How can I get more information on the Plans?**

You can call an Investor Services Representative at (800) 221-4268 or you can request a copy of the Plan for your Fund from Computershare. All correspondence (including notifications) should be directed to: [Name of Fund] Distribution Reinvestment and Cash Purchase Plan, c/o Computershare, PO Box 43078, Providence, RI 02940-3078, telephone (800) 426-5523 (from 9:00 A.M. to 5:00 P.M.).

New additions in 2015.

1

Non-income producing.

2

All or a portion of these securities were pledged as collateral in connection with the revolving credit agreement at December 31, 2015. Total market value of pledged securities at December 31, 2015, was \$12,402,589.

3

A security for which market quotations are not readily available represents 0.0% of net assets. This security has been valued at its fair value under procedures approved by the Fund's Board of Directors. This security is defined as a Level 3 security due to the use of significant unobservable inputs in the determination of fair value. See Notes to Financial Statements.

4

At December 31, 2015, a portion of these securities were rehypothecated in connection with the Fund's revolving credit agreement in the aggregate amount of \$3,933,961.

Securities of Global/International Funds are categorized by the country of their headquarters, with the exception of exchange-traded funds.

Bold indicates the Fund's 20 largest equity holdings in terms of December 31, 2015, market value.

TAX INFORMATION: The cost of total investments for Federal income tax purposes was \$108,211,627. At December 31, 2015, net unrealized depreciation for all securities was \$8,924,689, consisting of aggregate gross unrealized appreciation of \$7,516,891 and aggregate gross unrealized depreciation of \$16,441,580. The primary difference between book and tax basis cost is the timing of the recognition of losses on securities sold and mark-to-market of Passive Foreign Investment Companies.

1

The Fund commenced operations on October 18, 2013.

2

The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund's Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund's net asset value is used on the purchase and sale dates instead of market value.

Royce Global Value Trust

Notes to Financial Statements

Summary of Significant Accounting Policies

Royce Global Value Trust, Inc. (the Fund), is a diversified closed-end investment company that was incorporated under the laws of the State of Maryland on February 14, 2011. The Fund commenced operations on October 18, 2013.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standard Codification Topic 946 Financial Services-Investment Companies.

VALUATION OF INVESTMENTS:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdaq's Electronic Bulletin Board, are valued at their last reported sales price or Nasdaq official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their highest bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund's Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from quoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund's investments, as noted above. These inputs are summarized in the three broad levels below:

Level 1 quoted prices in active markets for identical securities. **Level 2** other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements). The table below includes all Level 2 securities. Any Level 2 securities with values based on quoted prices for similar securities would be noted in the Schedule of Investments.

Level 3 significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of December 31, 2015. For a detailed breakout of common stocks by country, please refer to the Schedule of Investments.

	LEVEL 1	LEVEL 2	LEVEL 3	TOTAL	
Common Stocks	\$21,678,424	\$75,886,804	\$18,710	\$97,583,938	Cash
Equivalents		1,703,000		1,703,000	

For the year ended December 31, 2015, certain securities have transferred in and out of Level 1, Level 2 and Level 3 measurements. The Fund recognizes transfers between levels as of the end of the reporting period. At December 31, 2015, securities valued at \$42,260 were transferred from Level 2 to Level 1 and securities valued at \$18,710 were transferred from Level

2 to Level 3 within the fair value hierarchy.

24 | 2015 Annual Report to Stockholders

Royce Global Value Trust

Notes to Financial Statements (continued)

VALUATION OF INVESTMENTS (continued):

Level 3 Reconciliation:

	REALIZED AND UNREALIZED	BALANCE AS OF 12/31/14	TRANSFERS IN	GAIN (LOSS) ¹	BALANCE AS OF 12/31/15
Common Stocks	\$ 18,710	\$ 18,710	1		

The net change in unrealized appreciation (depreciation) is included in the accompanying Statement of Operations. Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized. Net realized gain (loss) from investments and foreign currency transactions is included in the accompanying Statement of Operations.

REPURCHASE AGREEMENTS:

The Fund may enter into repurchase agreements with institutions that the Fund's investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities. The remaining contractual maturity of the repurchase agreement held by the Fund at December 31, 2015 is overnight and continuous.

FOREIGN CURRENCY:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

SECURITIES LENDING:

The Fund loans securities through a lending agent to qualified institutional investors for the purpose of realizing additional income. Collateral for the Fund on all securities loaned is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral maintained is at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund retains the risk of any loss on the securities on loan as well as incurring the potential loss on investments purchased with cash collateral received for securities lending. The Fund's securities lending income consists of the income earned on investing cash collateral, plus any premium payments received for lending certain securities, less any rebates paid to borrowers and lending agent fees associated with the loan. The lending agent is not affiliated with Royce. No securities were on loan at December 31, 2015.

DISTRIBUTIONS AND TAXES:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption "Tax Information".

The Fund pays any dividends and capital gain distributions annually in December. Because federal income tax regulations differ from generally accepted accounting principles, income and capital gain distributions determined in accordance with tax regulations may differ from net investment income and realized gains recognized for financial reporting purposes. Accordingly, the character of distributions and composition of net assets for tax purposes differ from those reflected in the accompanying financial statements.

CAPITAL GAINS TAXES:

The Fund is subject to a tax imposed on short-term capital gains on securities of issuers domiciled in certain countries. The Fund records an estimated deferred tax liability for these securities that have been held for less than one year. This amount, if any, is reported as deferred capital gains tax in the accompanying Statement of Assets and Liabilities, assuming those positions were

disposed of at the end of the period, and accounted for as a reduction in the market value of the security.

INVESTMENT TRANSACTIONS AND RELATED INVESTMENT INCOME:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Royce Global Value Trust

Notes to Financial Statements (continued)

EXPENSES:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund's operations, while expenses applicable to more than one of the Royce Funds are allocated equitably. Certain personnel, occupancy costs and other administrative expenses related to the Funds are allocated by Royce & Associates, LLC (Royce) under an administration agreement and are included in administrative and office facilities and professional fees.

COMPENSATING BALANCE CREDITS:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian's fee is paid indirectly by credits earned on the Fund's cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 48,927 and 75,721 shares of Common Stock as reinvestment of distributions for the years ended December 31, 2015 and December 31, 2014, respectively.

Borrowings:

The Fund has entered into a revolving credit agreement (the credit agreement) with BNP Paribas Prime Brokerage Inc. (BNPP). The Fund pays a commitment fee of 0.50% per annum on the unused portion of the credit agreement. The credit agreement has a 360-day rolling term that resets daily; however, if the Fund exceeds certain net asset value triggers, the credit agreement may convert to a 60-day rolling term that resets daily. The Fund is required to pledge portfolio securities as collateral in an amount up to two times the loan balance outstanding and has granted a security interest in the securities pledged to, and in favor of, BNPP as security for the loan balance outstanding. If the Fund fails to meet certain requirements, or maintain other financial covenants required under the credit agreement, the Fund may be required to repay immediately, in part or in full, the loan balance outstanding under the credit agreement necessitating the sale of portfolio securities at potentially inopportune times. The credit agreement also permits, subject to certain conditions, BNPP to rehypothecate portfolio securities pledged by the Fund up to the amount of the loan balance outstanding. The Fund continues to receive payments in lieu of dividends and interest on rehypothecated securities. The Fund also has the right under the credit agreement to recall the rehypothecated securities from BNPP on demand. If BNPP fails to deliver the recalled security in a timely manner, the Fund is compensated by BNPP for any fees or losses related to the failed delivery or, in the event a recalled security is not returned by BNPP, the Fund, upon notice to BNPP, may reduce the loan balance outstanding by the amount of the recalled security failed to be returned. The Fund receives a portion of the fees earned by BNPP in connection with the rehypothecation of portfolio securities.

As of December 31, 2015, the Fund has outstanding borrowings of \$8,000,000. During the year ended December 31, 2015, the Fund borrowed an average daily balance of \$7,693,151 at a weighted average borrowing cost of 1.27%. The maximum amount outstanding during the year ended December 31, 2015 was \$8,000,000. As of December 31, 2015, the aggregate value of rehypothecated securities was \$3,933,961. During the year ended December 31, 2015, the Fund earned \$2,675 in fees from rehypothecated securities.

Investment Advisory Agreement:

The Investment Advisory Agreement between Royce and the Fund provides for fees to be paid at an annual rate of 1.25% of the Fund's average daily net assets. For the year ended December 31, 2015, the Fund accrued and paid Royce investment advisory fees totaling \$1,198,138.

Purchases and Sales of Investment Securities:

For the year ended December 31, 2015, the costs of purchases and proceeds from sales of investment securities, other than short-term securities, amounted to \$72,146,832 and \$65,666,166, respectively.

Cross trades were executed by the Fund pursuant to Rule 17a-7 under the 1940 Act. Cross trading is the buying or selling of portfolio securities between funds to which R&A serves as investment adviser. At its regularly scheduled quarterly meetings, the Board reviews such transactions as of the most recent calendar quarter for compliance with the requirements and restrictions set forth by Rule 17a-7. Cross trades for the year ended December 31, 2015, were as follows:

PURCHASES	SALES	REALIZED GAIN (LOSS)	\$10,074,569	\$1,041,581	\$(148,026)
------------------	--------------	-----------------------------	--------------	-------------	-------------

Tax Information:

Distributions during the years ended December 31, 2015 and 2014, were characterized as follows for tax purposes:

ORDINARY INCOME	LONG-TERM CAPITAL GAINS	2015	2014	2015	2014	\$1,029,597	\$1,533,038	\$	\$

Royce Global Value Trust

Tax Information (continued):

The tax basis components of distributable earnings at December 31, 2015, were as follows:

UNDISTRIBUTED LONG-TERM ORDINARY AND SUBJECT TO EXPIRATION)	TOTAL ORDINARY (DEPRECIATION) ¹	QUALIFIED LATE YEAR (CAPITAL LOSSES DEFERRALS) ²	APPRECIATION EARNINGS	UNDISTRIBUTED POST-OCTOBER LOSS	CAPITAL GAINS OR DISTRIBUTABLE INCOME	NET UNREALIZED NOT
			\$23,117	\$(16,563,303)	\$(8,952,873)	\$(263,051)
\$(25,756,110) ¹ Includes timing differences on foreign currency, recognition of losses on securities sold and mark-to-market of Passive Foreign Investment Companies. ²						

Under the current tax law, capital losses and qualified late year ordinary losses incurred after October 31 may be deferred and treated as occurring on the first day of the following fiscal year.

For financial reporting purposes, capital accounts and distributions to stockholders are adjusted to reflect the tax character of permanent book/tax differences. For the year ended December 31, 2015, the Fund recorded the following permanent reclassifications, which relate primarily to current publicly traded partnerships, foreign currency transactions, foreign capital gains tax and gains from the sale of Passive Foreign Investment Companies. Results of operations and net assets were not affected by these reclassifications.

UNDISTRIBUTED NET ACCUMULATED NET INVESTMENT INCOME REALIZED GAIN (LOSS) \$18,961 \$(18,961)

Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years (2013-2015) and has concluded that as of December 31, 2015, no provision for income tax is required in the Fund's financial statements.

Royce Global Value Trust

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Royce Global Value Trust, Inc.:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statement of operations, of changes in net assets, and of cash flows and the financial highlights present fairly, in all material respects, the financial position of Royce Global Value Trust, Inc. (the Fund) at December 31, 2015, the results of its operations, the changes in its net assets, its cash flows and its financial highlights for the year then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as financial statements) are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit, which included confirmation of securities at December 31, 2015 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion. The statement of changes in net assets for the year ended December 31, 2014 and the financial highlights for each of the fiscal periods presented in the period ended December 31, 2014 were audited by other independent accountants whose report dated February 23, 2015 expressed an unqualified opinion on those statements.

32 | 2015 Annual Report to Stockholders THE ACCOMPANYING NOTES ARE AN INTEGRAL PART OF THESE FINANCIAL STATEMENTS
December 31, 2015

New additions in 2015. 1 All or a portion of these securities were pledged as collateral in connection with the revolving credit agreement at December 31, 2015. Total market value of pledged securities at December 31, 2015, was \$82,340,578. 2 At December 31, 2015, a portion of these securities were rehypothecated in connection with the Fund's revolving credit agreement in the aggregate amount of \$29,125,481. 3 Non-income producing. 4 These securities are defined as Level 2 securities due to fair value being based on quoted prices for similar securities. See Notes to Financial Statements. 5 A security for which market quotations are not readily available represents 0.1% of net assets. This security has been valued at its fair value under procedures approved by the Fund's Board of Directors. This security is defined as a Level 3 security due to the use of significant unobservable inputs in the determination of fair value. See Notes to Financial Statements. 6 Includes securities first acquired in 2015 and less than 1% of net assets. **Bold indicates the Fund's 20 largest equity holdings in terms of December 31, 2015, market value.**

TAX INFORMATION: The cost of total investments for Federal income tax purposes was \$355,802,750. At December 31, 2015, net unrealized depreciation for all securities was \$632,400, consisting of aggregate gross unrealized appreciation of \$64,839,661 and aggregate gross unrealized depreciation of \$65,472,061. The primary difference between book and tax basis cost is the timing of the recognition of losses on securities sold, investments in publicly traded partnerships and mark-to-market of Passive Foreign Investment Companies.

1 The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund's Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund's net asset value is used on the purchase and sale dates instead of market value. 2 The investment advisory fee is calculated based on average net assets over a rolling 36-month basis, while the above ratios of investment advisory fee expenses are based on the average net assets applicable to Common Stockholders over a 12-month basis. 3 Expense ratios based on total average net assets including liquidation value of Preferred Stock were 1.10% and 0.93% for the years ended December 31, 2012 and 2011, respectively.

38 | 2015 Annual Report to Stockholders **THE ACCOMPANYING NOTES ARE AN INTEGRAL PART OF THESE FINANCIAL STATEMENTS**

Royce Micro-Cap Trust

Notes to Financial Statements Summary of Significant Accounting Policies

Royce Micro-Cap Trust, Inc. (the Fund), is a diversified closed-end investment company that was incorporated under the laws of the State of Maryland on September 9, 1993. The Fund commenced operations on December 14, 1993.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standard Codification Topic 946 Financial Services-Investment Companies.

VALUATION OF INVESTMENTS:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdaq's Electronic Bulletin Board, are valued at their last reported sales price or Nasdaq official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their highest bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund's Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The

Edgar Filing: ROYCE GLOBAL VALUE TRUST, INC. - Form N-CSR

Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from quoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund's investments, as noted above. These inputs are summarized in the three broad levels below:

Level 1 quoted prices in active markets for identical securities. **Level 2** other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements). The table below includes all Level 2 securities. Level 2 securities with values based on quoted prices for similar securities are noted in the Schedule of Investments. **Level 3** significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information). The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of December 31, 2015. For a detailed breakout of common stocks by sector classification, please refer to the Schedule of Investments.

LEVEL 1	LEVEL 2	LEVEL 3	TOTAL		Common Stocks	\$ 313,789,996	\$ 25,421,117	\$ 225,738	\$
339,436,851	Preferred Stocks	1,315,499	1,315,499	Cash Equivalents			14,418,000		
14,418,000									

For the year ended December 31, 2015, certain securities have transferred in and out of Level 1 and Level 2 measurements. The Fund recognizes transfers between levels as of the end of the reporting period. At December 31, 2015, securities valued at \$643,961 were transferred from Level 2 to Level 1 within the fair value hierarchy.

2015 Annual Report to Stockholders | 39

Royce Micro-Cap Trust

Notes to Financial Statements (continued) VALUATION OF INVESTMENTS (continued):

Level 3 Reconciliation:	REALIZED AND UNREALIZED			BALANCE AS OF 12/31/14	SALES		
GAIN (LOSS)¹	BALANCE AS OF 12/31/15	Common Stocks	\$325,702	\$1	\$(99,963)	\$225,738	1

The net change in unrealized appreciation (depreciation) is included in the accompanying Statement of Operations. Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized. Net realized gain (loss) from investments and foreign currency transactions is included in the accompanying Statement of Operations.

The following table summarizes the valuation techniques used and unobservable inputs approved by the Valuation Committee to determine the fair value of certain, material Level 3 investments. The table does not include Level 3 investments with values derived utilizing prices from prior transactions or third party pricing information with adjustments (e.g. broker quotes, pricing services, net asset values).

FAIR VALUE AT INPUT(S)	RANGE AVERAGE	IMPACT TO VALUATION FROM AN INCREASE IN INPUT 1	12/31/15	VALUATION TECHNIQUE(S)	UNOBSERVABLE
Balance Sheet Analysis	Liquidity Discount	30%-40%	Decrease	1	This column represents the directional change in the fair value of the Level 3 investments that would result in an increase from the corresponding unobservable input. A decrease to the unobservable input would have the opposite effect. Significant increases and decreases in these unobservable inputs in isolation could result in significantly higher or lower fair value measurements.

REPURCHASE AGREEMENTS:

The Fund may enter into repurchase agreements with institutions that the Fund's investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities. The remaining contractual maturity of the repurchase agreement held by the Fund at December 31, 2015 is overnight and continuous.

FOREIGN CURRENCY:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

TAXES:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption Tax Information.

DISTRIBUTIONS:

The Fund pays quarterly distributions on the Fund's Common Stock at the annual rate of 7% of the rolling average of the prior four calendar quarter-end NAVs of the Fund's Common Stock, with the fourth quarter distribution being the greater of 1.75% of the rolling average or the distribution required by IRS regulations. Prior to November 15, 2012, distributions to Preferred Stockholders were accrued daily and paid quarterly. Distributions to Common Stockholders are recorded on ex-dividend date. Distributable capital gains and/or net investment income were first allocated to Preferred Stockholder distributions, with any excess allocable to Common Stockholders. If capital gains and/or net investment income were allocated to both Preferred and Common Stockholders, the tax character of such allocations was proportional. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Royce Micro-Cap Trust Notes to Financial Statements (continued)

INVESTMENT TRANSACTIONS AND RELATED INVESTMENT INCOME:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

EXPENSES:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund's operations, while expenses applicable to more than one of the Royce Funds are allocated equitably. Certain personnel, occupancy costs and other administrative expenses related to the Funds are allocated by Royce & Associates, LLC (Royce) under an administration agreement and are included in administrative and office facilities and professional fees. The Fund has adopted a deferred fee agreement that allows the Directors to defer the receipt of all or a portion of directors' fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

COMPENSATING BALANCE CREDITS:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian's fee is paid indirectly by credits earned on the Fund's cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 2,189,322 and 3,505,620 shares of Common Stock as reinvestment of distributions for years ended December 31, 2015 and December 31, 2014, respectively.

Borrowings:

The Fund has entered into a revolving credit agreement (the credit agreement) with BNP Paribas Prime Brokerage Inc. (BNPP). The Fund pays a commitment fee of 0.50% per annum on the unused portion of the credit agreement. The credit agreement has a 360-day rolling term that resets daily; however, if the Fund exceeds certain net asset value triggers, the credit agreement may convert to a 60-day rolling term that resets daily. The Fund is required to pledge portfolio securities as collateral in an amount up to two times the loan balance outstanding and has granted a security interest in the securities pledged to, and in favor of, BNPP as security for the loan balance outstanding. If the Fund fails to meet certain requirements, or maintain other financial covenants required under the credit agreement, the Fund may be required to repay immediately, in part or in full, the loan balance outstanding under the credit agreement necessitating the sale of portfolio securities at potentially inopportune times. The credit agreement also permits, subject to certain conditions, BNPP to rehypothecate portfolio securities pledged by the Fund up to the amount of the loan balance outstanding. The Fund continues to receive payments in lieu of dividends and interest on rehypothecated securities. The Fund also has the right under the credit agreement to recall the rehypothecated securities from BNPP on demand. If BNPP fails to deliver the recalled security in a timely manner, the Fund is compensated by BNPP for any fees or losses related to the failed delivery or, in the event a recalled security is not returned by BNPP, the Fund, upon notice to BNPP, may reduce the loan balance outstanding by the amount of the recalled security failed to be returned. The Fund receives a portion of the fees earned by BNPP in connection with the rehypothecation of portfolio securities.

As of December 31, 2015, the Fund has outstanding borrowings of \$45,000,000. During the year ended December 31, 2015, the Fund borrowed an average daily balance of \$57,698,630 at a weighted average borrowing cost of 1.26%. The maximum amount outstanding during the year ended December 31, 2015 was \$60,000,000. As of December 31, 2015, the aggregate value of rehypothecated securities was \$29,125,481. During the year ended December 31, 2015, the Fund earned \$258,203 in fees from rehypothecated securities.

Investment Advisory Agreement:

As compensation for its services under the Investment Advisory Agreement, Royce receives a fee comprised of a Basic Fee (Basic Fee) and an adjustment to the Basic Fee based on the investment performance of the Fund in relation to the investment record of the Russell 2000.

The Basic Fee is a monthly fee equal to 1/12 of 1% (1% on an annualized basis) of the average of the Fund's month-end net assets applicable to Common Stockholders, plus the liquidation value of outstanding Preferred Stock through October 31, 2015, for the rolling 36-month period ending with such month (the performance period). The Basic Fee for each month is increased or decreased at the rate of 1/12 of .05% for each percentage point that the investment performance of the Fund exceeds, or is exceeded by, the percentage change in the investment record of the Russell 2000 for the performance period by more than two percentage points. The performance period for each such month is a rolling 36-month period ending with such month. The maximum increase or decrease in the Basic Fee for any month may not exceed 1/12 of .5%. Accordingly, for each month, the maximum monthly fee rate as adjusted for performance is 1/12

2015 Annual Report to Stockholders | 41

Royce Micro-Cap Trust Notes to Financial Statements (continued)**Investment Advisory Agreement (continued):**

of 1.5% and is payable if the investment performance of the Fund exceeds the percentage change in the investment record of the Russell 2000 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the percentage change in the investment record of the Russell 2000 exceeds the investment performance of the Fund by 12 or more percentage points for the performance period.

For the twelve rolling 36-month periods in 2015, the Fund's investment performance ranged from 1% to 10% below the investment performance of the Russell 2000. Accordingly, the net investment advisory fee consisted of a Basic Fee of \$3,847,073 and a net downward adjustment of \$496,816 for the performance of the Fund relative to that of the Russell 2000. For the year ended December 31, 2015, the Fund accrued and paid Royce investment advisory fees totaling \$3,350,257.

Purchases and Sales of Investment Securities:

For the year ended December 31, 2015, the costs of purchases and proceeds from sales of investment securities, other than short-term securities, amounted to \$146,797,402 and \$180,593,359, respectively.

Cross trades were executed by the Fund pursuant to Rule 17a-7 under the 1940 Act. Cross trading is the buying or selling of portfolio securities between funds to which R&A serves as investment adviser. At its regularly scheduled quarterly meetings, the Board reviews such transactions as of the most recent calendar quarter for compliance with the requirements and restrictions set forth by Rule 17a-7. Cross trades for the year ended December 31, 2015, were as follows:

PURCHASES	SALES	REALIZED GAIN (LOSS)	\$27,582,337	\$3,448,609	\$(1,067,717)
------------------	--------------	-----------------------------	--------------	-------------	---------------

Tax Information:

Distributions during the years ended December 31, 2015 and 2014, were characterized as follows for tax purposes:

ORDINARY INCOME	LONG-TERM CAPITAL GAINS	2015	2014	2015	2014	\$7,501,533	\$15,250,124
\$36,418,446	\$75,623,389						

The tax basis components of distributable earnings at December 31, 2015, were as follows:

UNDISTRIBUTED LONG-TERM ORDINARY AND TOTAL ORDINARY NOT SUBJECT TO EXPIRATION)	QUALIFIED LATE YEAR (CAPITAL LOSSES DEPRECIATION) 1	UNDISTRIBUTED POST-OCTOBER EARNINGS	CAPITAL GAINS OR LOSS	NET UNREALIZED DISTRIBUTABLE INCOME
\$510,737	\$6,312,289	1	\$(635,134)	
\$(635,427)	\$5,552,465			

Includes timing differences on foreign currency, recognition of losses on securities sold, publicly traded partnerships and mark-to-market of Passive Foreign Investment Companies.

2

Under the current tax law, capital losses and qualified late year ordinary losses incurred after October 31 may be deferred and treated as occurring on the first day of the following fiscal year.

For financial reporting purposes, capital accounts and distributions to stockholders are adjusted to reflect the tax character of permanent book/tax differences. For the year ended December 31, 2015, the Fund recorded the following permanent reclassifications, which relate primarily to current investments in publicly traded partnerships and Trusts, foreign currency transactions, dividend redesignations and gains from the sale of Passive Foreign Investment Companies. Results of operations and net assets were not affected by these reclassifications.

UNDISTRIBUTED NET	ACCUMULATED NET	INVESTMENT INCOME	REALIZED GAIN (LOSS)	PAID-IN CAPITAL
\$1,128,953	\$(684,544)	\$(444,409)		

Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years (2012-2015) and has concluded that as of December 31, 2015, no provision for income tax is required in the Fund's financial statements.

42 | 2015 Annual Report to Stockholders

Royce Micro-Cap Trust Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Royce Micro-Cap Trust, Inc.:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statement of operations, of changes in net assets, and of cash flows and the financial highlights present fairly, in all material respects, the financial position of Royce Micro-Cap Trust, Inc. (the Fund) at December 31, 2015, the results of its operations, the changes in its net assets, its cash flows and its financial highlights for the year then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as financial statements) are the responsibility of the Funds management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit, which included confirmation of securities at December 31, 2015 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion. The statement of changes in net assets for the year ended December 31, 2014 and the financial highlights for each of the fiscal periods presented in the period ended December 31, 2014 were audited by other independent accountants whose report dated February 23, 2015 expressed an unqualified opinion on those statements.
