Annual Report

to Stockholders

December 31, 2003

INVESTMENT ADVISER'S COMMENTARY

Dear Fellow Stockholders:

January 5, 2004

Reflecting the ongoing turnaround in economic and stock market fundamentals, the Blue Chip Value Fund net asset value (NAV) appreciated 12.02% during the fourth quarter of 2003, in line with the 12.18% return of its benchmark, S&P 500 Index. For the fiscal year ended December 31, 2003, the Fund's NAV increased 26.37%, underperforming a 28.68% gain in the S&P 500 Index. While this annual performance is unsatisfying relative to the broad market index, we take pleasure in reporting that our disciplined investment process continued to reward investors across longer, more meaningful time frames. To illustrate, over the three- and five-year annualized periods ended December 31, 2003, the Fund's NAV has outpaced the S&P 500 Index by 3.16% and 1.26%, respectively.

In acknowledgement of this noteworthy performance, and the contributions of those responsible, the investment adviser, effective December 1, 2003, recognized Mark Adelman, Troy Dayton, Kris Herrick, and Derek Anguilm as the portfolio management team of Blue Chip Value Fund. This does not represent a change in personnel, but rather an evolution of the management team supporting the Fund.

As you may know, our investment process consistently focuses on a company's ability to generate sustainable free cash flow from its investment in the business. We believe that this cash flow can be used, for example, to fund high-return capital projects, pursue strategic acquisitions, pay dividends, or reduce outstanding debt. In keeping with our long-term, risk-adjusted approach, we seek to invest primarily in quality businesses with a proven track record of using cash flow to build shareholder value. We seek to avoid situations where, in our opinion, the business is distressed or is dependent on events beyond management's control to succeed.

During much of 2003, it appears to us that the market displayed a willingness to 'bet' on economic recovery, and bid up the prices of lower-quality businesses. In this context, we were delighted to have outperformed the market in the third quarter, and performed in line with the market in the fourth quarter. As we move into 2004, we believe this speculative luster will soon wear off and quality will again rule the day. Thus, in our opinion, we remain confident in the ability of our

3

carefully selected holdings to generate free cash flow, and to continue to produce positive growth in both cash flows and returns on capital invested.

Turning to the portfolio, our best performing groups for the fourth

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

quarter again included technology, along with energy and commercial services. Within technology, specialty semiconductor company Xilinx Inc. turned in robust performance as accelerating revenue and order flow appears to have increased market confidence in its free cash flow prospects. Similarly, power management supplier American Power Conversion Corp. and value-added reseller Tech Data Corp. appears to have benefited from improving prospects in corporate capital spending. Energy rebounded as commodity prices and drilling levels remained firm, boding well, in our opinion, for continued strength in free cash flow. It appears to us that integrated oil and gas giant ConocoPhillips continued to benefit from better commodity prices and refining margins, while offshore driller Transocean Inc. showed signs of stabilization as rig activity increased modestly. Meanwhile, commercial services holding Accenture Ltd., a worldwide leader in business consulting and outsourcing, rallied as new contract wins and improved economic prospects appear to have lifted the market's expectations for stronger free cash flow growth.

As for the fiscal year, security selection in the capital goods sector contributed to relative underperformance. Our holdings were concentrated in aerospace and defense, where we perceive lingering concerns surrounding the business jet market and defense spending caused these stocks to fall short of our expectations. Our performance in the financials sector also lagged relative to the benchmark with Freddie Mac, a major player in the home loan secondary market, proving especially disappointing. Although we continue to believe that the company is undervalued, in our opinion the protracted resolution of its accounting restatement (in which prior year earnings were understated) weighed heavily on the stock. Likewise, while the value creation we project from property and casualty insurance companies such as Travelers Property & Casualty Corp. and Allstate Corp. exceeds the current market value of their shares, it appears that near-term pricing and asbestos worries led the group to underperform. Nevertheless, we remain confident in our theses, and have maintained these positions heading into 2004.

In contrast, our strongest and most consistent performer during the year was the healthcare sector. Standouts in this group included Omnicare Inc., a leading provider of managed pharmacy services, whose revenue growth, margin stability

4

and cash flow expansion exceeded market expectations. Managed healthcare provider Aetna Inc. also continued to grow profitably, confirming, in our opinion, the durability of management's increasingly disciplined approach. At the same time, strong stock selection in generic and specialty pharmaceuticals, specifically Watson Pharmaceuticals Inc. and Mylan Laboratories Inc., allowed us to benefit from the apparent trend toward generic replacements of branded prescription drugs.

After three years of down markets, 2003 provided a welcome change on all fronts. Looking at 2004, we remain optimistic that the economic recovery is headed in a positive, stable direction. Investors appear to be putting money back into stocks, which we believe provides support for further gains in values. In our opinion, various conditions exist that point toward improved capital spending, as well as a resumption of mergers and acquisitions activity. In light of these factors, not to mention our own rigorous company-by-company research, we continue to hold a very positive outlook for the stocks held in your portfolio. Therefore, in December we began to use our line of credit obtained by the Fund earlier in the year to leverage the portfolio. At the end of the year, the borrowings equal \$5 million at a current annualized interest rate of 2.14% and we expect to increase this amount during the first quarter of 2004. At this time, we have no plans for the borrowing to exceed \$15 million. More information

about the Fund's borrowing policy is available on page 11. We remain optimistic about the prospects for the year ahead.

Sincerely,

/s/ Todger Anderson

Past performance is no guarantee of future results. Share prices will fluctuate, so that a share may be worth more or less than its original cost when sold. Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Rights offerings, if any, are assumed for purposes of this calculation to be fully subscribed under the terms of the rights offering. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on the net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.

- (1) Reflects the cumulative total return of an investment made by a stockholder who purchased one share at inception (\$10.00 IPO) and then reinvested all annual distributions as indicated, and fully participated in primary subscriptions of rights offerings.
- (2) Reflects the actual market price of one share as it has traded on the NYSE.
- (3) Annual distribution totals represent actual amounts. The Fund currently pays 2.5% of its net asset value quarterly; however this policy may be changed at the discretion of the Fund's Board of Directors.

WHY DIVIDEND REINVESTMENT IS IMPORTANT

A very important component of a stockholder's total return comes from the reinvestment of distributions as the chart above demonstrates. Please read the

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

following summary of the Fund's Dividend Reinvestment and Cash Purchase Plan and call us at (800) 624-4190 or visit www.blu.com to obtain an enrollment form or if you have any additional questions.

DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN

Blue Chip Value Fund, Inc.'s (the "Fund") Dividend Reinvestment and Cash Purchase Plan offers stockholders the opportunity to reinvest dividends and capital gain distributions in additional shares of the Fund. A stockholder may also make additional cash investments under the Plan. There is no service charge for participation.

Participating stockholders will receive additional shares issued at a price equal to the net asset value per share as of the close of the New York Stock Exchange on the record date ("Net Asset Value"), unless at such time the Net Asset Value is higher than the market price of the Fund's common stock, plus brokerage commission. In this case, the Fund will attempt, generally over the next 10 business days (the "Trading Period"), to acquire shares of the Fund's common stock in the open market at a price plus brokerage commission which is less than the Net Asset Value. In the event that prior to the time such acquisition is completed, the market price of such common stock plus commission equals or exceeds the Net Asset Value, or in the event that such market purchases are unable to be completed by the end of the Trading Period, then the balance of the distribution shall be completed by issuing additional shares at Net Asset Value.

Participating stockholders may also make additional cash investments (minimum \$50 and maximum \$10,000 per month) by check or money order (or by wire for a \$10 fee) to acquire additional shares of the Fund. Please note, however, that these additional shares will be purchased at market value plus brokerage commission (without regard to net asset value) per share.

A stockholder owning a minimum of 50 shares may join the Plan by sending an Enrollment Form to the Plan Agent at Mellon Investor Services, LLC, Overpeck Centre, 85 Challenger Road, Ridgefield Park, NJ, 07660.

The automatic reinvestment of dividends and distributions will not relieve participants of any income taxes that may be payable (or required to be withheld) on dividends or distributions, even though the stockholder does not receive the cash. Participants must own at least 50 shares at all times.

9

A stockholder may elect to withdraw from the Plan at any time on 15-days' prior written notice, and receive future dividends and distributions in cash. There is no penalty for withdrawal from the Plan and stockholders who have withdrawn from the Plan may rejoin in the future.

The Fund may amend the Plan at any time upon 30-days prior notice to participants.

Additional information about the Plan may be obtained from Blue Chip Value Fund, Inc. by writing to 1225 17th Street, 26th Floor, Denver, CO 80202, by telephone at (800) 624-4190 or by visiting us at www.blu.com.

If your shares are registered with a broker, you most likely can still

participate in the Dividend Reinvestment Plan. Please contact your broker about how to participate and to inquire if there are any fees which may be charged by the broker to your account.

IMPLEMENTATION OF BORROWING

Under the Fund's investment policies, which can be changed by the Board, the Fund is permitted to borrow up to 15% of the value of its total assets, including the amounts borrowed and use the proceeds for investment purposes, when DIA believes that the return from securities purchased with the borrowed funds will be greater than the cost of the borrowing. On March 13, 2003, the Board unanimously agreed to permit the Fund to enter into secured borrowings so that the Fund's portfolio securities could be pledged as collateral for loans. In addition, the Board recently clarified this policy so that the percentage limitation is measured at the incurrence of the loan, as permitted by the Investment Company Act of 1940. This means that a later increase or decrease in percentage resulting from a change in value of portfolio securities or amount of total assets will not be considered a violation of the 15% percentage limitation.

In November 2003, the Fund entered into a loan with Custodial Trust Company that permits the Fund to borrow up to the lesser of \$15 million or the maximum amount permitted under the Investment Company Act of 1940. Interest is payable at a variable rate that is tied to 30-day LIBOR plus 1.00% and a portion

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

of the Fund's portfolio securities have been pledged as collateral to secure this loan.

Borrowing for investment purposes creates an opportunity of increased return, but at the same time, involves special risk considerations. Borrowing increases the likelihood of greater volatility of net asset value and market price of the Fund's common stock. To the extent that the return that the Fund earns on the securities purchased with borrowed monies exceeds the interest paid, the net asset value of the Fund's shares (and the return of the Fund) will increase to a greater extent than would otherwise be the case. Conversely, if the return that the Fund earns on the additional securities purchased fails to cover the interest incurred on the monies borrowed, the net asset value of the Fund (and the return of the Fund) would be lower than if borrowing had not been used. In addition, when the Fund borrows at a variable interest rate, there is a risk that fluctuations in the interest rate may adversely affect the return to the holders of the Fund's common stock. Borrowing on a secured basis results in certain additional risks. Should securities that are pledged as

11

collateral to secure the loan decline in value, the Fund may be required to pledge additional funds in the form of cash or securities to the lender to avoid liquidation of those pledged assets. In the event of a steep drop in the value of pledged securities, it might not be possible to liquidate assets quickly enough and this could result in mandatory liquidation of the pledged assets in a declining market at relatively low prices. Furthermore, the investment adviser's ability to sell the pledged securities is limited by the terms of the loan, which may reduce its investment flexibility over the pledged securities. In addition, the rights of the lender to receive payments of interest on and repayments of principal will be senior to the rights of the Fund's Stockholders. Successful use of a borrowing strategy may depend on the investment adviser's ability to predict correctly interest rates and market movements, and there is no assurance that a borrowing strategy will be successful during any period in which it is employed.

See accompanying notes to financial statements.

- (1) Past performance is no guarantee of future results. Share prices will fluctuate, so that a share may be worth more or less than its original cost when sold. Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Rights offerings, if any, are assumed for purposes of this calculation to be fully subscribed under the terms of the rights offering. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on the net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.
- (2) A portfolio turnover rate is the percentage computed by taking the lesser of purchases or sales of portfolio securities (excluding short-term investments) for a year and dividing it by the monthly average of the market value of the portfolio securities during the year. Purchases and sales of investment securities (excluding short-term securities) for the year ended December 31, 2003 were \$69,222,249 and \$69,049,508, respectively.
- (3) The increase in the expense ratio during 2003 was primarily attributable to certain non-recurring legal and stockholder reporting expenses associated with management seeking shareholder approval on proposals related to implementing a leveraging strategy, which ultimately resulted in the Fund negotiating and entering into a loan agreement.

NOTES TO FINANCIAL STATEMENTS

December 31, 2003

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Blue Chip Value Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company.

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

Security Valuation - All securities of the Fund are valued as of the close of regular trading on the New York Stock Exchange ("NYSE"), currently 4:00 p.m. (Eastern Time), on each day that the NYSE is open. Listed securities are generally valued at the last sales price as of the close of regular trading on the NYSE. Securities traded on the National Association of Securities Dealers Automated Quotation ("NASDAQ") National Market are generally valued at the NASDAQ Official Closing Price ("NOCP"). The Fund started to use the NOCP on May 21, 2003. In the absence of sales and NOCP, such securities are valued at the mean of the bid and asked prices.

27

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

Securities having a remaining maturity of 60 days or less are valued at amortized cost which approximates market value.

When market quotations are not readily available or when events occur that make established valuation methods unreliable, securities of the Fund may be valued at fair value determined in good faith by or under the direction of the Board of Directors.

Investment Transactions - Investment transactions are accounted for on the date the investments are purchased or sold (trade date). Realized gains and losses from investment transactions and unrealized appreciation and depreciation of investments are determined on the first-in, first-out basis for both financial statement and federal income tax purposes. Dividend income is recorded on the ex-dividend date. Interest income, which includes interest earned on money market funds, is accrued and recorded daily.

Federal Income Taxes - The Fund intends to comply with the requirements of the Internal Revenue Code that are applicable to regulated investment companies and to distribute all of its taxable income to its stockholders. Therefore, no provision has been made for federal income taxes.

As of December 31, 2003, the Fund had available for federal income tax purposes unused capital loss carryforwards as follows:

Expiring	
2010	\$ 15,484,833
2011	45,245

Total	\$ 15,530,078
	=====

The Fund intends to elect to defer to its fiscal year ending December 31, 2004, approximately \$35,000 of losses recognized during the period November 1, 2003 to December 31, 2003, which will expire in 2012 if unutilized.

Classification of Distributions to Stockholders - The Fund adjusts classifications of distributions to stockholders to reflect the differences between financial statement amounts and distributions determined in accordance with income tax regulations. Accordingly, during the year ended December 31, 2003, amounts have been reclassified to reflect a decrease in paid in capital of \$13,273,611 and a decrease in overdistributed net investment income of \$13,273,611. Net assets of the Fund were unaffected by the reclassifications.

28

The tax character of the distributions paid was as follows:

	Year Ended December 31,	
	----- 2003 -----	----- 2002 -----
Distributions paid from:		
Ordinary income	\$ 363,532	\$ 930,340
Long-term capital gain	--	--
Return of capital	13,273,611	13,857,137
	-----	-----
Total	\$13,637,143	\$14,787,477
	=====	=====

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

As of December 31, 2003, the components of distributable earnings on a tax basis were as follows:

Accumulated net realized loss	\$(15,564,900)
Net unrealized appreciation	19,232,382

Total	\$ 3,667,482
	=====

The difference between book basis and tax basis is attributable to the tax deferral of losses on wash sales.

Distributions to Stockholders - Distributions to stockholders are recorded on the ex-dividend date.

The Fund currently maintains a "managed distribution policy" which distributes at least 2.5% of its net asset value quarterly to its stockholders. These fixed distributions are not related to the amount of the Fund's net investment income or net realized capital gains or losses and will be classified to conform to the tax reporting requirements of the Internal Revenue Code. If the Fund's total distributions required by the fixed quarterly payout policy for the year exceed the Fund's "current and accumulated earnings and profits," the excess will be treated as non-taxable return of capital, reducing the stockholder's adjusted basis in his or her shares. Although capital loss carryforwards may offset any current year net realized capital gains, such amounts do not reduce the Fund's "current earnings and profits." Therefore, to the extent that current year net realized capital gains are offset by capital loss carryforwards, such excess distributions would be classified as taxable ordinary income rather than non-taxable return of capital. In this situation, the Fund's Board of Directors would consider that factor, among others, in determining whether to retain, alter or eliminate the "managed distribution policy." The Fund's distribution policy may be changed at the discretion of the Fund's Board of Directors. At this time, the Board of Directors has no plans to change the current policy.

29

During the fiscal year ending December 31, 2003, 100% of the dividends paid by the Fund from net investment income qualify for the corporate dividends received deduction and the requirements regarding qualified dividend income. The return of capital distributions in 2002 and 2003 were non-taxable.

For the year ended December 31, 2003, there were no amendments to a provision of this code of ethics, nor were there any waivers granted from a provision of the code of ethics. A copy of the Registrant's code of ethics is filed under Item 11(a)(1) of this Form N-CSR.

Item 3. Audit Committee Financial Expert

The Board of Directors of the Registrant has determined that the Registrant has at least one "audit committee financial expert" serving on its audit committee. The Board of Directors has designated Gary P. McDaniel and Roberta M. Wilson as the Registrant's "audit committee financial experts." Mr. McDaniel and Ms. Wilson are "independent" as defined in paragraph (a)(2) of Item 3 to Form N-CSR.

Item 4. Principal Accountant Fees and Services

(a) Audit Fees: For the Registrant's fiscal years ended December 31, 2003 and December 31, 2002, the aggregate fees billed for professional services rendered by the principal accountant for the audit of the Registrant's annual financial statements were \$16,430 for each year.

(b) Audit-Related Fees: In Registrant's fiscal years ended December 31, 2003 and December 31, 2002, no fees were billed for assurance and related services by the principal accountant that are reasonably related to the performance of the audit of the Registrant's financial statements and are not reported under paragraph (a) of this Item.

(c) Tax Fees: For the Registrant's fiscal years ended December 31, 2003 and December 31, 2002, aggregate fees of \$7,786 and \$6,070, respectively, were billed for professional services rendered by the principal accountant for tax compliance, tax advice, and tax planning. The fiscal year 2003 tax fees were for tax return preparation services and assistance with research, advice and inquiries to taxing authorities concerning certain tax regulations for the Registrant. The fiscal year 2002 tax fees were for tax return preparation services for the Registrant.

(d) All Other Fees: For the Registrant's fiscal year ended December 31, 2002, aggregate fees of \$1,000 were billed by the principal accountant for a reading of the Registrant's unaudited semi-annual financial statements. No fees were billed to Registrant by the principal accountant for services other than the services reported in paragraph (a) through (c) for the Registrant's fiscal year ended December 31, 2003.

(e) (1) Audit Committee Pre-Approval Policies and Procedures: The Registrant's Audit Committee has not adopted pre-approval policies and procedures. Instead, the Audit Committee approves on a case-by-case basis each audit or non-audit service before the engagement.

(e) (2) No services described in paragraphs (b) through (d) above were approved pursuant to paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X.

(f) Not applicable.

(g) Aggregate non-audit fees of \$31,286 were billed by the Registrant's principal accountant for services rendered to the Registrant and to Registrant's investment adviser for the Registrant's fiscal year ended December 31, 2003 and aggregate non-audit fees of \$30,570 were billed by the Registrant's principal accountant for services rendered to the Registrant and to Registrant's investment adviser for the Registrant's fiscal year ended December 31, 2002.

(h) The non-audit services rendered to Registrant's investment adviser

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

disclosed in paragraph (g) above were not required to be pre-approved by the Registrant's audit committee because they were provided prior to May 6, 2003, the effective date of Rule 2-01(c)(7) of Regulation S-X. The Audit Committee has considered whether the provision of non-audit services that were rendered to the Registrant's investment adviser that were not pre-approved is compatible with maintaining the principal accountant's independence.

Item 5. Audit Committee of Listed Registrants.

Not applicable to annual reports for the fiscal year ended December 31, 2003.

Item 6. [Reserved]

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies

The Registrant's Board of Directors, at their May 2003 Board meeting, delegated to its investment adviser, Denver Investment Advisors, subject to the supervision of the Board, the authority to vote Registrant's proxies relating to portfolio securities and directed Denver Investment Advisors to follow and apply Denver Investment Advisors' proxy voting policies and procedures when voting such proxies. A copy of Denver Investment Advisors' Proxy Voting Policy which sets forth the guidelines to be utilized by Denver Investment Advisors in voting proxies for the Registrant follows.

Denver Investment Advisors Proxy Voting Policy

Denver Investment Advisors LLC, unless otherwise directed by our clients, will research, vote and record all proxy ballots for the security positions we maintain on our clients' behalf. To execute this responsibility to the highest standard, Denver Investment Advisors LLC relies heavily on its subscription to the ISS Proxy Voting system ("VoteX"). ISS (or Institutional Shareholder Services) provides proxy research and recommendations, as well as automated voting and record keeping, and is the world's leader in these services.

We have fully reviewed and approved the ISS Proxy Voting Guidelines and follow their recommendations on most issues brought to a shareholder vote. Subcategories within the guidelines include:

- 1) Operational Items
- 2) Board of Directors
- 3) Proxy Contests
- 4) Anti-takeover Defenses and Voting Related Issues
- 5) Mergers and Corporate Restructurings
- 6) State of Incorporation
- 7) Capital Structure
- 8) Executive and Director Compensation
- 9) Social and Environmental Issues
- 10) Mutual Fund Proxies
- 11) Global Proxy Voting Matters

In the rare instance where our research or security analyst believes that any ISS recommendation would be to the detriment of our investment clients, we can and will override the ISS recommendation through a manual vote. The final authorization to override an ISS recommendation must be approved by an Executive Manager of Denver Investment Advisors LLC or a member of its Management Committee other than the analyst. A written record supporting the decision to override the ISS recommendation will be maintained.

Special considerations are made for stocks traded on foreign exchanges. Specifically, if voting will block the liquidity of these stocks, Denver

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

Investment Advisors LLC will not exercise its voting rights.

For any matters subject to proxy vote for mutual funds in which Denver Investment Advisors LLC is an affiliated party, Denver Investment Advisors will vote on behalf of clients invested in such mutual funds in accordance with ISS, with no exceptions.

Client information is automatically recorded in "VoteX" for record keeping. For accounts custodied at financial institutions that are not clients of ISS, physical proxy cards are received, marked and returned for voting. Those votes are then manually recorded in the ISS Proxy VoteX system. For client accounts held in an omnibus registration, ballots that are received will be voted, but no records for individual accounts held in omnibus registration are maintained.

Denver Investment Advisors LLC maintains proxy data showing the voting pattern on specific issues - either for an individual meeting or for all proxies voted within a specified time period, in addition to proxy voting on individual client accounts.

If you have any specific questions or concerns that have not been addressed here, please do not hesitate to contact your portfolio manager. Upon request we have available ISS Proxy Voting Guidelines Summary documentation from the ISS Proxy Voting manual.

- o An auditor has a financial interest in or association with the company, and is therefore not independent
- o Fees for non-audit services are excessive, or

Vote CASE-BY-CASE on shareholder proposals asking companies to prohibit or limit their auditors from engaging in non-audit services.

Vote CASE-BY-CASE on shareholder proposals asking for audit firm rotation, taking into account the tenure of the audit firm, the length of rotation specified in the proposal, any significant audit-related issues at the company, and whether the company has a periodic renewal process where the auditor is evaluated for both audit quality and competitive price.

Transact Other Business

Vote AGAINST proposals to approve other business when it appears as a voting item.

2. Board of Directors

Voting on Director Nominees in Uncontested Elections

Votes on director nominees should be made on a CASE-BY-CASE basis, examining the following factors: composition of the board and key board committees, attendance at board meetings, corporate governance provisions and takeover activity, long-term company performance relative to a market index, directors' investment in the company, whether the chairman is also serving as CEO, and whether a retired CEO sits on the board. However, there are some actions by directors that should result in votes being WITHHELD. These instances include directors who:

- o Attend less than 75 percent of the board and committee meetings without a valid excuse
- o Implement or renew a dead-hand or modified dead-hand poison pill
- o Ignore a shareholder proposal that is approved by a majority of the shares outstanding
- o Ignore a shareholder proposal that is approved by a majority of the votes cast for two consecutive years
- o Failed to act on takeover offers where the majority of the shareholders tendered their shares
- o Are inside directors or affiliated outsiders and sit on the audit, compensation, or nominating committees
- o Are inside directors or affiliated outsiders and the full board serves as the

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

audit, compensation, or nominating committee or the company does not have one of these committees

o Are audit committee members and the non-audit fees paid to the auditor are excessive.

o Are inside directors or affiliated outside directors and the full board is less than majority independent

o Sit on more than six boards

o Are members of a compensation committee that has allowed a pay-for-performance disconnect as described in Section 8 (Executive and Director Compensation).

In addition, directors who enacted egregious corporate governance policies or failed to replace management as appropriate would be subject to recommendations to WITHHOLD votes.

Age Limits

Vote AGAINST shareholder or management proposals to limit the tenure of outside directors either through term limits or mandatory retirement ages.

Board Size

Vote FOR proposals seeking to fix the board size or designate a range for the board size.

Vote AGAINST proposals that give management the ability to alter the size of the board outside of a specified range without shareholder approval.

Classification/Declassification of the Board

Vote AGAINST proposals to classify the board.

Vote FOR proposals to repeal classified boards and to elect all directors annually.

Cumulative Voting

Vote AGAINST proposals to eliminate cumulative voting.

Vote proposals to restore or permit cumulative voting on a CASE-BY-CASE basis relative to the company's other governance provisions.

Director and Officer Indemnification and Liability Protection

Proposals on director and officer indemnification and liability protection should be evaluated on a CASE-BY-CASE basis, using Delaware law as the standard.

Vote AGAINST proposals to eliminate entirely directors' and officers' liability for monetary damages for violating the duty of care.

Vote AGAINST indemnification proposals that would expand coverage beyond just legal expenses to actions, such as negligence, that are more serious violations of fiduciary obligation than mere carelessness.

Vote FOR only those proposals providing such expanded coverage in cases when a director's or officer's legal defense was unsuccessful if both of the following apply:

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

- o The director was found to have acted in good faith and in a manner that he reasonably believed was in the best interests of the company, and
- o Only if the director's legal expenses would be covered.

Establish/Amend Nominee Qualifications

Vote CASE-BY-CASE on proposals that establish or amend director qualifications. Votes should be based on how reasonable the criteria are and to what degree they may preclude dissident nominees from joining the board.

Vote AGAINST shareholder proposals requiring two candidates per board seat.

Filling Vacancies/Removal of Directors

Vote AGAINST proposals that provide that directors may be removed only for cause.

Vote FOR proposals to restore shareholder ability to remove directors with or without cause.

Vote AGAINST proposals that provide that only continuing directors may elect replacements to fill board vacancies.

Vote FOR proposals that permit shareholders to elect directors to fill board vacancies.

Independent Chairman (Separate Chairman/CEO)

Generally vote FOR shareholder proposals requiring the position of chairman be filled by an independent director unless there are compelling reasons to recommend against the proposal, such as a counterbalancing governance structure. This should include all of the following:

- o Designated lead director, elected by and from the independent board members with clearly delineated and comprehensive duties
- o Two-thirds independent board
- o All-independent key committees
- o Established governance guidelines

Majority of Independent Directors/Establishment of Committees

Vote FOR shareholder proposals asking that a majority or more of directors be independent unless the board composition already meets the proposed threshold by ISS's definition of independence.

Vote FOR shareholder proposals asking that board audit, compensation, and/or nominating committees be composed exclusively of independent directors if they currently do not meet that standard.

Open Access

Vote CASE-BY-CASE on shareholder proposals asking for open access taking into account the ownership threshold specified in the proposal and the proponent's rationale for targeting the company in terms of board and director conduct.

Stock Ownership Requirements

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

Generally vote AGAINST shareholder proposals that mandate a minimum amount of stock that directors must own in order to qualify as a director or to remain on the board. While ISS favors stock ownership on the part of directors, the company should determine the appropriate ownership requirement.

Vote CASE-BY-CASE shareholder proposals asking that the company adopt a holding or retention period for its executives (for holding stock after the vesting or exercise of equity awards), taking into account any stock ownership requirements or holding period/retention ratio already in place and the actual ownership level of executives.

Term Limits

Vote AGAINST shareholder or management proposals to limit the tenure of outside directors either through term limits or mandatory retirement ages.

3. Proxy Contests

Voting for Director Nominees in Contested Elections

Votes in a contested election of directors must be evaluated on a CASE-BY-CASE basis, considering the following factors:

- o Qualifications of director nominees (both slates)
- o Evaluation of what each side is offering shareholders as well as the likelihood that the proposed objectives and goals can be met; and stock ownership positions.

Reimbursing Proxy Solicitation Expenses

Voting to reimburse proxy solicitation expenses should be analyzed on a CASE-BY-CASE basis. In cases where ISS recommends in favor of the dissidents, we also recommend voting for reimbursing proxy solicitation expenses.

Confidential Voting

Vote FOR shareholder proposals requesting that corporations adopt confidential voting, use independent vote tabulators and use independent inspectors of election, as long as the proposal includes a provision for proxy contests as follows:

In the case of a contested election, management should be permitted to request that the dissident group honor its confidential voting policy. If the dissidents agree, the policy remains in place. If the dissidents will not agree, the confidential voting policy is waived.

Vote FOR management proposals to adopt confidential voting.

4. Antitakeover Defenses and Voting Related Issues

Advance Notice Requirements for Shareholder Proposals/Nominations

Votes on advance notice proposals are determined on a CASE-BY-CASE basis, giving

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

Edgar Filing: BLUE CHIP VALUE FUND INC - Form N-CSR

determined using a model developed by ISS.

Tracking Stock

Votes on the creation of tracking stock are determined on a CASE-BY-CASE basis, weighing the strategic value of the transaction against such factors as: adverse governance changes, excessive increases in authorized capital stock, unfair method of distribution, diminution of voting rights, adverse conversion features, negative impact on stock option plans, and other alternatives such as spinoff.

8. Executive and Director Compensation

Votes with respect to equity-based compensation plans should be determined on a CASE-BY-CASE basis. Our methodology for reviewing compensation plans primarily focuses on the transfer of shareholder wealth (the dollar cost of pay plans to shareholders instead of simply focusing on voting power dilution). Using the expanded compensation data disclosed under the SEC's rules, ISS will value every award type. ISS will include in its analyses an estimated dollar cost for the proposed plan and all continuing plans. This cost, dilution to shareholders' equity, will also be expressed as a percentage figure for the transfer of shareholder wealth, and will be considered along with dilution to voting power. Once ISS determines the estimated cost of the plan, we compare it to a company-specific dilution cap.

Our model determines a company-specific allowable pool of shareholder wealth that may be transferred from the company to plan participants, adjusted for:

- o Long-term corporate performance (on an absolute basis and relative to a standard industry peer group and an appropriate market index),
- o Cash compensation, and
- o Categorization of the company as emerging, growth, or mature.

These adjustments are pegged to market capitalization.

Vote AGAINST plans that expressly permit the repricing of underwater stock options without shareholder approval. Generally vote AGAINST plans in which the CEO participates if there is a disconnect between the CEO's pay and company performance (an increase in pay and a decrease in performance) and the main source of the pay increase (over half) is equity-based. A decrease in performance is based on negative one- and three- year total shareholder returns. An increase in pay is based on the CEO's total direct compensation (salary, cash bonus, present value of stock options, face value of restricted stock, face value of longterm incentive plan payouts, and all other compensation) increasing over the previous year. Also WITHHOLD votes from the Compensation Committee members.

Director Compensation

Votes on compensation plans for directors are determined on a CASE-BY-CASE basis, using a proprietary, quantitative model developed by ISS.

- o The percentage of revenue derived from international operations, particularly in Europe, where GE products are more regulated and consumer backlash is more pronounced.

Vote AGAINST proposals seeking a report on the health and environmental effects of genetically modified organisms (GMOs). Health studies of this sort are better undertaken by regulators and the scientific community.

Vote AGAINST proposals to completely phase out GE ingredients from the company's products or proposals asking for reports outlining the steps necessary to eliminate GE ingredients from the company's products. Such resolutions presuppose that there are proven health risks to GE ingredients (an issue better left to federal regulators) that outweigh the economic benefits derived from biotechnology.

Charitable contributions are generally useful for assisting worthwhile causes and for creating goodwill in the community. In the absence of bad faith, self-dealing, or gross negligence, management should determine which contributions are in the best interests of the company.
