2009 Business Report

For AU Optronics Corp. ("AUO" or the "Company"), the year 2009 was full of turns and changes. The global financial crisis saw a worldwide slide in actual demand and a decrease in consumer spending, and the TFT-LCD industry was by no means immune from its impact. In 2009, AUO reported consolidated revenues of NTD359.6 billion, a 15.2% slide from 2008, and an annual loss of NTD 27.2 billion or NTD 3.04 per common share. Although the management team spent their best efforts to manage the situation and put forth the best annual sectoral performance in Taiwan, it was still the most difficult year for the Company in its history.

Nevertheless, in the midst of this tumultuous environment, we have stood our ground. From the trough seen in the first quarter to the subsequent gradual recovery and the formation of new alliances among industry competitors, the management team has maintained a high degree of flexibility and adaptiveness. Through our steady leadership with its focused management and execution we ensured that AUO was fully prepared to get through this crisis and we have laid the foundation for growth as the worldwide economy improves. During the past year of changes and challenges, the Company was vigorous in activating internal resources, beginning new business ventures, developing new technologies, and expanding its role in the green energy industry. In doing so, we have steadfastly met the changes and turmoil of a fiercely competitive industry.

Looking back at 2009 on the implementation of our vision, the successes of AUO's new operational model can be seen in the following items:

1. LCD TV Assembly Service: Representing a brand-new integration of technology and design, AUO entered into a new era of systems applications from its original position in panel manufacturing. Additionally, through moves such as joint ventures and strategic alliances, AUO is poised to cultivate the market and strengthen cooperative relationships with its customers.
2. Globalization of Operations: AUO formally expanded beyond Asia by establishing two manufacturing bases in Europe to provide faster, more direct customer support and to enhance our service links around the globe. In addition, our operations in Mainland China will gradually transform from production-oriented to market-oriented business operations.
3. The Launch of Energy Business: AUO formally established the Solar-Photovoltaic Business Unit, a step which facilitates our cultivation of and investment in the solar power industry. Based on AUO's "Total Solution" strategy, we plan to integrate leading technology and services within the energy industry value chain, including actively collaborating with terminal solar system integrators to rapidly build our competencies in system integration and design capabilities and acquiring silicon wafer manufacturing resources to secure two key ends of the value chain, materials and sales channels. As a result of our successful efforts, AUO's first batch of solar-photovoltaic modules was shipped to Europe in June of 2009.
4. The Release of Electronic Paper: We formally stepped into the electronic paper market by supplying electronic paper display for use in labels and e-books. We continue to strive for innovation in product applications for TFT technologies.

Looking into the future and as the financial crisis wanes, AUO believes 2010 will be a year filled with opportunities. Aside from sustaining our efforts to reduce costs and increase operational performance, the management team will also work to shore up growth potential by seeking to grow steadily in the following directions:

~11~

1. A Full-Scale March into Emerging Markets

In view of the strong demand growth in emerging markets, AUO will seek out new modes of strategic cooperation and deepen collaboration with regional partners.

2. Actively Increasing our Asset Turnover Rates

As the race for the latest generation of capacity and the size migration of products gradually settle down, future competitiveness will be defined by the innovation of new technologies and applications. Building on our rich history of innovation, the Company will continue to provide more efficient and competitive products. Additionally, we plan to strategically cooperate with key customers to further stabilize our downstream sales, to broaden our customer portfolio, and to increase our returns on assets.

3. Stressing Both Technology Upgrades and Product Quality

AUO will actively step into advanced display technologies, such as OLED and FED, and product technologies such as 3D and touch panels. We aim to become a leader in these technologies, and will leverage applications of future technical innovations as a growth opportunity.

4. Providing Comprehensive Green Solutions

AUO will fulfill its Green Promise by providing consumers with a new choice of green, energy-saving products and by becoming a provider of renewable resources and energy services.

In the past ten years, there has been a change from the trend in the display panel industry of seeking growth through capacity expansion. In the next ten years, competitiveness and growth will be derived from the following five “new” areas: new applications, new technologies, new business models, new markets and new businesses. AUO’s management team holds fast to our unchanging core value of integrity and will maintain our fervor and focus on core competencies. We will continue to strive for excellence and take advantage of future growth opportunities to ensure AUO’s growth in the coming decade. We will also continue to implement our Green Promise, fulfilling our responsibility to the wider community. AUO is on a mission to become a world leader for green solutions and will continue to work to bring about our vision of “Bright Innovation, Amazing Life.”
