MARITRANS INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2004

1. Basis of Presentation/Organization

Maritrans Inc. owns Maritrans Operating Company L.P. (the "Operating Company"), Maritrans General Partner Inc., Maritrans Tankers Inc., Maritrans Barge Co., Maritrans Holdings Inc. and other Maritrans entities (collectively, the "Company"). These subsidiaries, directly and indirectly, own and operate oceangoing petroleum tank barges, tugboats, and oil tankers principally used in the transportation of oil and related products along the Gulf and Atlantic Coasts.

In the opinion of management, the accompanying condensed consolidated financial statements of Maritrans Inc., which are unaudited (except for the Condensed Consolidated Balance Sheet as of December 31, 2003, which is derived from audited financial statements), include all adjustments (consisting of normal recurring accruals) necessary to present fairly the financial statements of the consolidated entities.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States ("GAAP") requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Pursuant to the rules and regulations of the Securities and Exchange Commission, the unaudited condensed consolidated financial statements do not include all of the information and notes normally included with annual financial statements prepared in accordance with GAAP. These financial statements should be read in conjunction with the consolidated historical financial statements and notes thereto included in the Company's Form 10-K for the period ended December 31, 2003.

2. Earnings per Common Share

The following data show the amounts used in computing basic and diluted earnings per share ("EPS"):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2004	2003	2004	2003
	(000's)		(000's)	
Income available to common stockholders used in basic EPS	\$ 3,112	\$ 3,754	\$ 4,899	\$ 6,933
Weighted average number of common shares used in basic EPS	8,212	7,969	8,116	7,926
Effect of dilutive stock options and restricted shares	190	387	297	510
Weighted number of common shares and dilutive potential common stock used in diluted EPS	8,402	8,356	8,413	8,436

3. Stock-Based Compensation

Maritrans Inc. has a stock incentive plan (the "Plan"), whereby non-employee directors, officers and other key employees may be granted stock, stock options and, in certain cases, receive cash under the Plan. In May 1999, the Company adopted an additional plan, the Maritrans Inc. 1999 Directors' and Key Employees Equity Compensation Plan, which provides non-employee directors, officers and other key employees with

[Back to Index](#)

certain rights to acquire common stock and stock options. Any outstanding options granted under either Plan are exercisable at a price not less than market value of the shares on the date of grant. During the second quarter of 2004, 507,425 shares were issued as a result of the exercise of options. The exercise price of these options ranged from \$5.375 to \$14.20.

In December 2002, the FASB issued Statement of Financial Accounting Standards No. 148, *Accounting for Stock-Based Compensation - Transition and Disclosure* (SFAS 148). SFAS 148 amends Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation* (SFAS 123), to provide three alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS 148 also amends the disclosure provisions of SFAS 123 and Accounting Principles Board (APB) Opinion No. 28, *Interim Financial Reporting*. SFAS 148 is effective for fiscal years ending after December 15, 2002, with certain disclosure requirements effective for interim periods beginning after December 15, 2002. The Company adopted the transition provision of SFAS 148 using the prospective method beginning January 1, 2003. The prospective method requires the Company to apply the fair value based method to all employee stock awards granted, modified or settled in its consolidated statements of income beginning on the date of adoption.

For purposes of pro forma disclosures, the estimated fair value of the options is amortized to expense over the options vesting period. The Company's pro forma information was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2004	2003	2004	2003
	(\$000, except per share data)			
Net income as reported	\$ 3,112	\$ 3,754	\$ 4,899	\$ 6,933
Add: Stock based compensation included in net income, net of tax	12	7	26	21
Deduct: Total stock based compensation determined under the fair value based method, net of tax	14	34	37	66
Pro forma net income	\$ 3,110	\$ 3,727	\$ 4,888	\$ 6,888
Basic earnings per share as reported	\$ 0.38	\$ 0.47	\$ 0.60	\$ 0.87
Pro forma basic earnings per share	\$ 0.38	\$ 0.47	\$ 0.60	\$ 0.87
Diluted earnings per share as reported	\$ 0.37	\$ 0.45	\$ 0.58	\$ 0.82
Pro forma diluted earnings per share	\$ 0.37	\$ 0.45	\$ 0.58	\$ 0.82

4. Income Taxes

The Company's effective tax rate differs from the federal statutory rate due primarily to state income taxes and certain nondeductible items.

5. Share Buyback Program

On February 9, 1999, the Board of Directors authorized a share buyback program (the "Program") for the repurchase of up to one million shares of the Company's common stock. In February 2000 and again in February 2001, the Board of Directors authorized the repurchase of an additional one million shares in the Program. The total authorized shares under the Program is three million. As of June 30, 2004, 2,485,442 shares had been repurchased.

6. Impact of Recent Accounting Pronouncements

In September 2001, the rule making body of the AICPA issued an Exposure Draft on a Statement of Position, *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment* (the "SOP"). This

[Back to Index](#)

group, referred to as AcSEC, approved the SOP in September 2003. The SOP was presented at a clearance meeting with the Financial Accounting Standards Board (FASB) in April 2004. At that time, the FASB voted unanimously not to clear the SOP. The FASB will reconsider the SOP during the 2005-2006 time frame.

If the existing SOP is issued, it would require the Company to modify its accounting policy for maintenance and repairs. Such costs would no longer be accrued in advance of performing the related maintenance and repairs; rather, the SOP requires these costs to be expensed as incurred, unless they meet the capitalization provisions of the SOP, in which case the costs will be depreciated over their estimated useful life. The Company has not yet quantified the impact of adopting the SOP on its financial statements; however, the Company's preliminary assessment is that the adoption of this pronouncement would decrease the shipyard accrual and increase stockholders' equity of the Company.

7. Retirement Plans

Net periodic pension cost included the following components:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2004	2003	2004	2003
	(000's)		(000's)	
Service cost of current period	\$ 157	\$ 130	\$ 314	\$ 260
Interest cost on projected benefit obligation	463	459	926	918
Expected return on plan assets	(476)	(416)	(952)	(832)
Amortization of prior service cost	35	34	70	68
Net periodic pension cost	\$ 179	\$ 207	\$ 358	\$ 414

8. Note Receivable

In December 1999, the Company sold vessels to K-Sea Transportation LLC for total consideration of \$34 million, which consisted of \$29 million in cash and a \$4.5 million subordinated note receivable maturing in December 2007. On January 14, 2004, the Company received payment of the \$4.5 million note from K-Sea Transportation LLC.

In December 1999, the Company sold vessels to Vane Line Bunkering, Inc. for total consideration of \$14 million, which consisted of \$10 million in cash and a \$4 million promissory note maturing in December 2009. On April 2, 2004, Vane repaid the remaining \$2.7 million under the note.

9. Debt

In June 2004, the Company entered into a \$29.5 million credit facility with a 9.5-year amortization and a 55 percent balloon payment at the end of the term. The new facility accrues interest at a fixed rate of 6.28 percent. A portion of the proceeds of the new debt were used to pay down existing borrowings under the Company's revolving credit facility. Principal payments are required on a monthly basis beginning in August 2004. The Company has granted first preferred ship mortgages and a first security interest in the M 214 and Honour to secure the debt.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF
ITEM 2. OPERATIONS

Forward Looking Information

Some of the statements in this Form 10-Q (this "10-Q") constitute forward-looking statements under Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including statements made with respect to present or anticipated utilization, future revenues and customer relationships, capital expenditures, future financings, and other statements regarding matters that are not historical facts, and involve predictions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results, levels of activity, growth, performance, earnings per share or achievements to be materially different from any future results, levels of activity, growth, performance, earnings per share or achievements expressed in or implied by such forward-looking statements.

The forward-looking statements included in this 10-Q relate to future events or the Company's future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may," "seem," "should," "believe," "future," "potential," "estimate," "offer," "opportunity," "quality," "growth," "expect," "intend," "through," "strategy," "provide," "meet," "allow," "represent," "commitment," "create," "implement," "result," "seek," "establish," "work," "perform," "make," "continue," "can," "will," "include," or the negative of such terms or comparable terminology. These forward-looking statements inherently involve certain risks and uncertainties, although they are based on the Company's current plans or assessments that are believed to be reasonable as of the date of this 10-Q. Factors that may cause actual results, goals, targets or objectives to differ materially from those contemplated, projected, forecast, estimated, anticipated, planned or budgeted in such forward-looking statements include, among others, the factors outlined in this 10-Q, changes in oil companies' decisions as to the type and origination point of the crude that it processes, changes in the amount of imported petroleum products, competition for marine transportation, domestic and international oil consumption, levels of foreign imports, the continuation of federal law restricting United States point-to-point maritime shipping to U.S. vessels (the Jones Act), the timing and success of its rebuilding program, demand for petroleum products, future spot market rates, demand for our services, changes in interest rates, the effect of war or terrorists activities and the general financial, economic, environmental and regulatory conditions affecting the oil and marine transportation industry in general. Given such uncertainties, current or prospective investors are cautioned not to place undue reliance on any such forward-looking statements. These factors may cause the Company's actual results to differ materially from any forward-looking statement.

Although the Company believes that the expectations in the forward-looking statements are reasonable, the Company cannot guarantee future results, levels of activity, performance, growth, earnings per share or achievements. However, neither the Company nor any other person assumes responsibility for the accuracy and completeness of such statements. The Company is under no duty to update any of the forward-looking statements after the date of this 10-Q to conform such statements to actual results.

The following discussion should be read in conjunction with the unaudited financial statements and notes thereto included in Part I Item 1 of this Form 10-Q and the audited financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2003 contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2003.

Overview

Maritrans serves the petroleum and petroleum product distribution industry by using tank barges, tugboats and oil tankers to provide marine transportation services primarily along the Gulf and Atlantic coasts of the United States. The Company owns and operates one of the largest fleets serving the U.S. coastwise trade, consisting of four oil tankers and eleven oceangoing married tug/barge units with an aggregate fleet capacity of approximately 3.6 million barrels. 64 percent of the Company's fleet capacity is double-hulled. The Company holds patents for its double-hulling technology and has been

[Back to Index](#)

rebuilding its single-hull vessels to double-hulls since 1998, in preparation for upcoming government mandated retirements of single-hull vessels. Maritrans provides marine transportation services primarily to integrated oil companies, independent oil companies, petroleum trading companies, petroleum marketers and petroleum distributors in the southern and eastern United States. The Company monitors the supply and distribution patterns of its actual and prospective customers and focuses its efforts on providing services that are responsive to the current and future needs of these customers. Business is done on both a term contract basis and a spot market basis. The Company strives to maintain an appropriate mix of contracted business, based on current market conditions.

Demand for the Company's services is driven primarily by the demand for crude oil in the Northeastern U.S. and refined petroleum products in Florida and the Northeastern U.S. This demand is positively impacted by increased domestic consumption of petroleum products, higher U.S. refining levels, low product inventory levels and cold weather in the Northeast. In addition, reduced competition from foreign imports of refined petroleum products in our primary markets, as well as increased demand for refined petroleum product movements from the U.S. Gulf refining system to the U.S. West Coast also have a positive impact on demand for the Company's services.

Utilization of the Company's fleet is dependent on factors such as the customers service needs, out of service time for maintenance and weather.

Definitions

In order to facilitate your understanding of the disclosure contained in the results of operations, the following are definitions of some commonly used industry terms used herein:

□Available days□ refers to the number of days the fleet was not out of service due to maintenance or other operational requirements and therefore was available to work.

□Barge rebuild program□ refers to the Company's program to rebuild its single-hull barges to a double-hull configuration to conform with OPA utilizing its patented process of computer assisted design and fabrication.

□Cargo□ refers to the petroleum products transported by our vessels.

□Clean oil□ refers to refined petroleum products.

□Jones Act trade□ refers to the federal law restricting United States point-to-point maritime shipping to vessels built in the United States, owned by U.S. citizens and manned by U.S. crews.

□Lightering□ refers to the process of off-loading crude oil or petroleum products from deeply laden inbound tankers into smaller tankers and/or barges.

□OPA□ refers to the Oil Pollution Act of 1990 which is a federal law prohibiting the operation of single-hull vessels in U.S. waters based on a retirement schedule that began on January 1, 1995 and ends on January 1, 2015.

□Revenue days□ refers to the number of days the fleet was working for customers.

□Spot market□ refers to a term describing a one-time open-market transaction where transportation services are provided at current market rates.

□Term contract□ refers to a contract with a customer for specified services over a specified period for a specified price.

□Time Charter Equivalent□ (□TCE□) refers to the measure where direct voyage costs are deducted from voyage revenue. TCE yields a measure that is comparable regardless of the type of contract utilized.

[Back to Index](#)

□Vessel utilization□ refers to the measure, expressed as a percentage, of the days the fleet worked and is calculated by revenue days divided as calendar days in the period.

□Voyage costs□ refer to the expenses incurred for fuel and port charges. In a time charter contract, the customer pays all voyage costs directly to vendors.

□Voyage revenue□ refers to the revenue generated by the transportation of petroleum products.

Results of Operations

To supplement its financial statements prepared in accordance with GAAP, the Company's management has used the financial measure of Time Charter Equivalent (□TCE□), a commonly used industry measure where direct voyage costs are deducted from voyage revenue. Maritrans enters into various types of charters, some of which involve the customer paying substantially all voyage costs, while other types of charters involve Maritrans paying some or substantially all of the voyage costs. The Company has presented TCE in this discussion to enhance an investor's overall understanding of the way management analyzes the Company's financial performance. Specifically, the Company's management used the presentation of TCE revenue to allow for a more meaningful comparison of the Company's financial condition and results of operations because TCE revenue essentially nets the voyage costs and voyage revenue to yield a measure that is comparable between periods regardless of the types of contracts utilized. These voyage costs are included in the □Operations expense□ line item on the Consolidated Statements of Income. TCE revenue is a non-GAAP financial measure and a reconciliation of TCE revenue to revenue, the most directly comparable GAAP measure, is set forth below. The presentation of this additional information is not meant to be considered in isolation or as a substitute for results prepared in accordance with GAAP.

Three Month Comparison*Revenues*

TCE revenue for the quarter ended June 30, 2004 compared to the quarter ended June 30, 2003 was as follows:

	June 30, 2004	June 30, 2003
Voyage revenue	\$ 36,747	\$ 36,212
Voyage costs	6,401	5,776
Time Charter Equivalent	\$ 30,346	\$ 30,436
Vessel utilization	82.5%	86.8%
Available days	1,232	1,260
Revenue days	1,126	1,185

TCE revenue of \$30.3 million for the quarter ended June 30, 2004 was consistent with TCE revenue for the quarter ended June 30, 2003 of \$30.4 million. TCE revenue was consistent with the same quarter of last year due to lower vessel utilization and fewer barrels carried offset by an increase in rates.

Vessel utilization decreased 4.3% compared to the second quarter of 2003. The decrease in utilization had a negative impact on voyage revenue and resulted primarily from the out of service time for the OCEAN STATES double-hull rebuild. The OCEAN STATES was taken out of service early in September 2003 and returned to service early in the third quarter of 2004 as the M 214, and therefore, was out of service for the entire second quarter of 2004. There were no vessels out of service for double-hull rebuilding during the second quarter of 2003. Though the Company has fewer vessels scheduled for routine shipyard maintenance during the remainder of 2004, the Company anticipates that utilization in 2004 will be similar to 2003 due to more out of service time for double-hull rebuilding in 2004. Barrels of cargo transported decreased from 46.8 million in the quarter ended June 30, 2003 to 44.4 million in the quarter ended June 30, 2004 as a result of cyclical dredging at customer refining facilities performed early in the first quarter of 2004.

[Back to Index](#)

The majority of the Company's fleet was deployed in contract business in the second quarter of 2004. Contract rates remained strong and were higher than in the second quarter of 2003. The Company expects contract rates in the remainder of 2004 to remain consistent with the first six months of 2004. Demand for the Company's services in its contract business during the current quarter increased compared to the same period of 2003. In addition, the Company experienced increased rates in some of its renewed contracts.

The Company continued to have limited exposure to the spot market in the second quarter of 2004 though the exposure was higher than in the same period in 2003. Spot market rates were slightly higher than in the same period of 2003. During the quarter there were an increased number of U.S. Jones Act vessels transporting cargoes from the Gulf of Mexico to the West Coast. This was due to an increased demand for gasoline blend components resulting from the MTBE ban in California and Washington. Low clean product inventories and reduced clean product imports in the areas the Company serves also supported the higher spot rates.

The Company expects exposure to the spot market to be higher in the remainder of 2004 than in 2003 due to fewer vessels on contract than in the same period of 2003. The Company believes spot rates will remain steady or increase during the remainder of 2004. The Company is currently evaluating the optimal balance between contract and spot coverage and expects to increase its exposure to the spot market during the second half of 2004. A majority of the Company's business will remain on contract in 2004.

Operations expense

Voyage costs increased from \$5.8 million for the quarter ended June 30, 2003 to \$6.4 million for the quarter ended June 30, 2004, an increase of \$0.6 million or 11 percent. Fuel costs increased \$0.2 million or 6 percent compared to the same quarter in 2003. The average price of fuel increased 14 percent compared to the same quarter in 2003. This increase was offset by a decrease in fuel consumption resulting from the higher amount of out of service time experienced in the second quarter of 2004 and the fact that more vessels were on time charter contracts during the 2004 quarter pursuant to which the customer directly pays for the fuel costs. Port charges increased \$0.4 million although a large portion of those amounts were billed back to customers under contract terms.

Operations expenses, excluding voyage costs discussed above, decreased from \$12.3 million for the quarter ended June 30, 2003 to \$11.8 million for the quarter ended June 30, 2004, a decrease of \$0.5 million or 4 percent. Crew expenses increased \$0.5 million due to seagoing salary and benefit increases as well as a higher level of training compared to the same period in 2003. During the quarter, the Company reversed approximately \$0.8 million of previously recorded insurance claims and deductibles that no longer required a related liability. This reversal offset the increases in expenses discussed above.

Maintenance expense

Maintenance expenses decreased \$0.5 million or 9 percent from \$5.7 million for the quarter ended June 30, 2003 to \$5.2 million for the quarter ended June 30, 2004. Routine maintenance incurred during voyages and in port decreased \$0.1 million from the quarter ended June 30, 2003 to the quarter ended June 30, 2004 period. Expenses accrued for maintenance in shipyards decreased \$0.4 million from the quarter ended June 30, 2003 to the quarter ended June 30, 2004. The Company continuously reviews upcoming shipyard maintenance costs and adjusts the shipyard accrual rate to reflect the expected costs.

General and Administrative expense

General and administrative expenses increased \$1.0 million, or 47 percent, from \$2.1 million for the quarter ended June 30, 2003 to \$3.1 million for the quarter ended June 30, 2004. The increase resulted primarily from higher fees incurred as a result of additional litigation expenses, additional shoreside personnel and employment related expenses.

Operating Income

As a result of the aforementioned changes in revenue and expenses, operating income decreased from \$6.3 million for the quarter ended June 30, 2003 to \$5.0 million for the quarter ended June 30, 2004, a decrease of \$1.3 million, or 20 percent. Operating income for the quarter ended June 30, 2003 included a \$1.1 million pre-tax gain on the sale of property not used in operations.

[Back to Index](#)*Income Tax Expense*

Income tax expense decreased from \$2.2 million for the quarter ended June 30, 2003 to \$1.9 million for the quarter ended June 30, 2004, a decrease of \$0.3 million and resulted from the aforementioned changes in revenue and expenses.

Net Income

Net income decreased from \$3.8 million for the quarter ended June 30, 2003 to \$3.1 million for the quarter ended June 30, 2004, a decrease of \$0.6 million and resulted from the aforementioned changes in revenue and expenses.

Six Month Comparison*Revenues*

TCE revenue for the six months ended June 30, 2004 compared to the six months ended June 30, 2003 was as follows:

	<u>June 30, 2004</u>	<u>June 30, 2003</u>
Voyage revenue	\$ 71,408	\$ 72,141
Voyage costs	12,409	12,861
Time Charter Equivalent	<u>\$ 58,999</u>	<u>\$ 59,280</u>
Vessel utilization	81.2%	88.1 %
Available days	2,418	2,557
Revenue days	2,218	2,393

TCE revenue of \$59.0 million for the six months ended June 30, 2004 was consistent with TCE revenue for the six months ended June 30, 2003 of \$59.3 million. TCE revenue was consistent with the same period of last year due to lower vessel utilization and fewer barrels carried offset by an increase in rates.

Vessel utilization decreased 6.9% from the same period in 2003. The decrease in utilization had a negative impact on voyage revenue and resulted primarily from vessel out of service time for double-hull rebuilding and vessel repairs in the six months ended June 30, 2004. The OCEAN STATES was taken out of service early in September 2003 for her double-hull rebuild and returned to service early in the third quarter of 2004 as the M 214, and therefore, was out of service for the first six months of 2004. There were no vessels out of service for double-hull rebuilding during the first six months of 2003. In addition, late in the fourth quarter of 2003, several design issues were identified on three of the double-hull rebuilt 250,000 barrel class barges that led the Company to remove these vessels from service and further inspect and re-analyze the original rebuild designs. Working with industry experts and the American Bureau of Shipping, the Company identified structural enhancements that would improve the long-term strength of these three barges. The Company made these repairs and enhancements in the first quarter of 2004 and the vessels returned to service during the same quarter. Though the Company has fewer vessels scheduled for routine shipyard maintenance periods during the remainder of 2004, the Company anticipates that utilization in 2004 will be similar to 2003 due to more out of service time for double-hull rebuilding in 2004. Barrels of cargo transported decreased from 92.3 million in the six months ended June 30, 2003 to 87.3 million in the six months ended June 30, 2004 as a result of cyclical dredging at customer refining facilities.

The majority of the Company's fleet was deployed in contract business in the first six months of 2004. Contract rates remained strong and were higher than in 2003. The Company expects contract rates in the remainder of 2004 to remain consistent with the first six months of 2004. Demand for the Company's services in its contract business during the current year increased compared to the same period of 2003. In addition, the Company experienced increased rates in some of its renewed contracts.

[Back to Index](#)

The Company had limited exposure to the spot market in the first six months of 2004 and had less exposure than in the same period in 2003. Spot market rates were higher than in the same period of 2003 driven primarily by the impact of world and oil industry events. During the first six months of 2004 there was an increased number of U.S. Jones Act vessels transporting cargoes from the Gulf of Mexico to the West Coast. This was due to an increased demand for gasoline blend components resulting from the MTBE ban in California and Washington. Refinery problems on the West Coast in the first quarter of 2004 also increased the amount of product being transported to that area. Low product inventories in the areas the Company serves has helped to increase spot rates in 2004. For the six months ended June 30, 2004, the level of clean product imports was lower than the same period in the prior year. This decrease resulted from higher demand for transportation fuels in Europe and higher international transportation rates. Both were caused by the strong world economy which decreased the amount of European imports and had a positive impact on spot rates.

The Company expects exposure to the spot market to be higher in the remainder of 2004 than in 2003 due to fewer vessels on contract than in the same period of 2003. The Company believes spot rates will remain steady or increase during the remainder of 2004. The Company is currently evaluating the optimal balance between contract and spot coverage and expects to increase its exposure to the spot market during the second half of 2004. A majority of the Company's business will remain on contract in 2004.

Operations expense

Voyage costs decreased from \$12.9 million for the six months ended June 30, 2003 to \$12.4 million for the six months ended June 30, 2004, a decrease of \$0.5 million or 4 percent. Fuel costs decreased \$1.1 million or 13 percent compared to 2003. Fuel consumption decreased as a result of increased out of service time experienced in the first six months of 2004 and the fact that more vessels were on time charter contracts during the 2004 period pursuant to which the customer pays directly for the fuel costs. Port charges increased \$0.7 million although much of those amounts were billed back to customers under contracts.

Operations expenses, excluding voyage costs discussed above, increased from \$24.1 million for the six months ended June 30, 2003 to \$24.3 million for the six months ended June 30, 2004, an increase of \$0.2 million or 1 percent. Crew expenses increased \$0.8 million due to seagoing salary and benefit increases as well as a higher level of training compared to the same period in 2003. Shoreside support expenses increased \$0.3 million, primarily as a result of an increase in personnel, higher shoreside related insurance premiums and travel cost offset by lower consulting and training fees compared to the same period in 2003. The cost of supplies for the vessels also increased \$0.3 million compared to the same period in 2003. During the second quarter, the Company reversed approximately \$0.8 million of previously recorded insurance claims and deductibles that no longer required a related liability. This reversal offset the increases in expenses discussed above.

Maintenance expense

Maintenance expenses increased \$0.5 million or 5 percent from \$10.0 million for the six months ended June 30, 2003 to \$10.5 million for the six months ended June 30, 2004. Routine maintenance incurred during voyages and in port increased \$0.2 million from the six months ended June 30, 2003 to the six months ended June 30, 2004. Expenses accrued for maintenance in shipyards increased \$0.4 million from the six months ended June 30, 2003 to the six months ended June 30, 2004. The Company continuously reviews upcoming shipyard maintenance costs and adjusts the shipyard accrual rate to reflect the expected costs. Increases in regulatory and customer vetting requirements, which increases the scope of maintenance performed in the shipyard, result in higher shipyard costs.

General and Administrative expense

General and administrative expenses increased \$1.3 million, or 29 percent, from \$4.3 million for the six months ended June 30, 2003 to \$5.5 million for the six months ended June 30, 2004. Most of the increase resulted from higher fees incurred as a result of additional litigation expenses, additional shoreside personnel and employment related expenses.

[Back to Index](#)

Operating Income

As a result of the aforementioned changes in revenue and expenses, operating income decreased from \$11.7 million for the six months ended June 30, 2003 to \$8.2 million for the six months ended June 30, 2004, a decrease of \$3.5 million, or 30 percent. Operating income for the six months ended June 30, 2003 included a \$1.1 million pre-tax gain on the sale of property not used on operations.

Income Tax Expense

Income tax expense decreased from \$4.1 million for the six months ended June 30, 2003 to \$2.9 million for the six months ended June 30, 2004, a decrease of \$1.1 million and resulted from the aforementioned changes in revenue and expenses.

Net Income

Net income decreased from \$6.9 million for the six months ended June 30, 2003 to \$4.9 million for the six months ended June 30, 2004, a decrease of \$2.0 million and resulted from the aforementioned changes in revenue and expenses.

Liquidity and Capital Resources

General

For the six months ended June 30, 2004, cash provided by operating activities was \$17.7 million. These funds, augmented by the Company's Revolving Credit Facility, described below, were sufficient to meet debt service obligations and loan agreement restrictions, to make capital acquisitions and improvements and to allow the Company to pay a dividend in the current quarter. Management believes funds provided by operating activities, augmented by the Company's Revolving Credit Facility and investing activities, will be sufficient to finance operations, anticipated capital expenditures, lease payments and required debt repayments for the foreseeable future. While dividends have been made quarterly in each of the last two years, there can be no assurances that the dividend will continue. The ratio of total debt to capitalization is .42:1 at June 30, 2004.

On February 9, 1999, the Board of Directors authorized a share buyback program for the repurchase of up to one million shares of the Company's common stock, which represented approximately 8 percent of the 12.1 million shares outstanding at that time. In February 2000 and again in February 2001, the Board of Directors authorized the repurchase of an additional one million shares in the program. The total authorized shares under the buyback program are three million. As of June 30, 2004, 2,485,442 shares had been purchased under the plan and financed by internally generated funds. The Company intends to hold the majority of the shares as treasury stock, although some shares will be used for employee compensation plans and others may be used for acquisition currency and/or other corporate purposes.

In December 1999, the Company sold vessels to Vane Line Bunkering, Inc. for total consideration of \$14 million, which consisted of \$10 million in cash and a \$4 million promissory note maturing in December 2009. On April 2, 2004, Vane repaid the remaining \$2.7 million outstanding under the note.

Debt Obligations and Borrowing Facility

At June 30, 2004, the Company had \$64.8 million in total outstanding debt, secured by mortgages on some of the fixed assets of the Company. The current portion of this debt at June 30, 2004 was \$3.6 million.

In November 2001, the Company entered into an \$40 million credit and security agreement (the "Revolving Credit Facility") with Citizens Bank (formerly Mellon Bank, N.A.) and a syndicate of other financial institutions (the "Lenders"). Pursuant to the terms of the credit and security agreement, the Company could borrow up to \$40 million under the Revolving Credit Facility. Interest is variable based on either the LIBOR rate plus an applicable margin (as defined in the Revolving Credit Facility) or the prime rate. The Revolving Credit Facility expires in January 2007. The Company has granted first preferred ship mortgages and a first security interest in some of the Company's vessels and other collateral in connection with the Revolving Credit Facility. At June 30, 2004, there

[Back to Index](#)

were no amounts outstanding under the Revolving Credit Facility. The Revolving Credit Facility requires the Company to maintain its properties in a specific manner, maintain specified insurance on its properties and business, and abide by other covenants, which are customary with respect to such borrowings. The Revolving Credit Facility also requires the Company to meet certain financial covenants. If the Company fails to comply with any of the covenants contained in the Revolving Credit Facility, the Lenders may foreclose on the collateral or call the entire balance outstanding immediately due and payable. The Company was in compliance with all covenants at June 30, 2004.

In September 2003, the Company entered into additional financing agreements. The additional agreements consist of a \$7.3 million loan with Lombard US Equipment Financing Corp. with a 5-year amortization and a \$29.5 million loan with Fifth Third Bank with a 9.5-year amortization and a 50 percent balloon payment at the end of the term. The new debt accrues interest at an average fixed rate of 5.53 percent. Principal payments on the \$7.3 million loan are required on a quarterly basis and began in January 2004. Principal payments on the \$29.5 million loan are required on a monthly basis and began in November 2003. The Company has granted first preferred ship mortgages and a first security interest in some of the Company's vessels and other collateral in connection with the loan agreements. The loan agreements require the Company to maintain its properties in a specific manner, maintain specified insurance on its properties and business, and abide by other covenants, which are customary with respect to such borrowings. The loan agreements also require the Company to meet certain financial covenants that began in the quarter ended December 31, 2003. If the Company fails to comply with any of the covenants contained in the loan agreements, the Lenders may foreclose on the collateral or call the entire balance outstanding on the loan agreements immediately due and payable. The Company was in compliance with all such covenants at June 30, 2004.

In June 2004, the Company entered into a new \$29.5 million credit facility (the "Credit Facility") with Fifth Third Bank. The debt has a 9.5-year amortization and a 55 percent balloon payment at the end of the term and accrues interest at a fixed rate of 6.28 percent. A portion of the proceeds of the Credit Facility were used to pay down existing borrowings under the Revolving Credit Facility. The Company continues to maintain \$40 million of available borrowing capacity under its Revolving Credit Facility. Principal payments on the Credit Facility are required on a monthly basis beginning in August 2004. The Company has granted first preferred ship mortgages and a first security interest in the M 214 and Honour to secure the new debt. The Credit Facility requires the Company to maintain the collateral in a specific manner, maintain specified insurance on its properties and business, and abide by other covenants, which are customary with respect to such borrowings. The Credit Facility also requires the Company to meet certain financial covenants that begin in the quarter ended September 30, 2004. If the Company fails to comply with any of the covenants contained in the additional debt agreements, the Lenders may foreclose on the collateral or call the entire balance outstanding on the Credit Facility immediately due and payable. The Company was in compliance with all applicable covenants at June 30, 2004.

As of June 30, 2004, the Company has the following amounts outstanding under its debt agreements:

- \$ 6.6 million under the 5-year term loan.
- \$28.7 million under the 9.5-year term loan with the 50 percent balloon payment at the end of the term.
- \$29.5 million under the 9.5-year term loan with the 55 percent balloon payment at the end of the term.

[Back to Index](#)*Contractual Obligations*

Total future commitments and contingencies related to the Company's outstanding debt obligations, noncancellable operating leases and purchase obligations, as of June 30, 2004, were as follows:

	Total	Less than one year	(\$000s) One to three years	Three to five years	More than five years
Debt Obligations	\$ 64,844	\$ 3,567	\$ 7,948	\$ 8,057	\$ 45,272
Operating Leases	2,543	515	814	873	341
Purchase Obligations*	18,150	18,150	□	□	□
Total	\$ 85,537	\$ 22,232	\$ 8,762	\$ 8,930	\$ 45,613

* Purchase obligations represent amounts due under existing vessel rebuild contracts.

In November 2002, the Company awarded a contract to rebuild the fifth large single-hull barge, the OCEAN STATES, to a double-hull configuration. The rebuild is expected to have a total cost of approximately \$26 million, of which \$18 million is a fixed contract with the shipyard and the remainder is changes in the scope of work and material furnished by the Company. In addition to the double-hull rebuild, the OCEAN STATES now has a 30,000 barrel mid-body insertion. As of June 30, 2004, \$23.7 million had been paid to the shipyard contractor for the project. The Company has financed this project from a combination of internally generated funds and borrowings under the Company's Revolving Credit Facility. The rebuilding of the OCEAN STATES was completed early in the third quarter of 2004. The barge re-entered the fleet renamed the M214.

In August 2003, the Company awarded a contract to rebuild its sixth large single-hull barge, the OCEAN 193, to a double-hull configuration. The rebuild is expected to have a total cost of approximately \$24 million, of which \$22 million is a fixed contract with the shipyard and the remainder is material to be furnished by the Company. As of June 30, 2004, \$9.5 million had been paid to the shipyard contractor for the project. The Company has financed and expects to continue the financing of, this project from a combination of internally generated funds and borrowings under the Company's Revolving Credit Facility. The rebuild of the OCEAN 193 is expected to be completed in the second quarter of 2005.

In October 2003, the Company awarded a contract to rebuild the tugboat Honour which currently works with the barge OCEAN STATES. The rebuild is expected to have a total cost of approximately \$7.0 million, of which \$3.7 million is a fixed contract with the shipyard and the remainder is material furnished by the Company. As of June 30, 2004, \$4.1 million had been paid to the shipyard contractor for the project. The Company has financed this project from a combination of internally generated funds and borrowings under the Company's Revolving Credit Facility. The rebuild of the Honour was completed early in the third quarter of 2004.

Critical Accounting Policies*Maintenance and Repairs*

Provision is made for the cost of upcoming major periodic overhauls of vessels and equipment in advance of performing the related maintenance and repairs. Based on the Company's methodology, approximately one-third of this estimated cost is included in accrued shipyard costs as a current liability with the remainder classified as long-term. Although the timing of the actual disbursements have fluctuated over the years, particularly as a result of changes in the size of the fleet and timing of the large maintenance projects, the classification has been in line with the actual disbursements over time.

Retirement Plans

Most of the shoreside employees participate in a qualified defined benefit retirement plan of Maritrans Inc. Substantially all of the seagoing supervisors who were supervisors in 1984, or who were hired as or promoted into

[Back to Index](#)

supervisory roles between 1984 and 1998 have pension benefits under the Company's retirement plan for that period of time. Beginning in 1999, the seagoing supervisors retirement benefits are provided through contributions to an industry-wide, multi-employer seaman's pension plan. Upon retirement, those seagoing supervisors will be provided with retirement benefits from the Company's plan for service periods between 1984 and 1998, and from the multi-employer seaman's plan for other covered periods.

Net periodic pension cost was determined under the projected unit credit actuarial method. Pension benefits are primarily based on years of service and begin to vest after two years. Employees who are members of unions participating in Maritrans' collective bargaining agreements are not eligible to participate in the qualified defined benefit retirement plan of Maritrans Inc.

The Maritrans Inc. Retirement Plan had utilized a Tactical Asset Allocation investment strategy. This strategy shifted assets between fixed income and equity investments according to where the market was perceived to be heading. The range was between 75% and 25% in either form of investment. The results are measured against a constant benchmark consisting of 65% equity and 35% fixed income. Effective February 2004, the Company changed to a Strategic Asset Allocation investment strategy that maintains a targeted allocation to the benchmark of 65% equity and 35% fixed income.

Impact of Recent Accounting Pronouncements

In September 2001, the rule making body of the AICPA issued an Exposure Draft on a Statement of Position, *Accounting for Certain Costs and Activities Related to Property, Plant, and Equipment* (the "SOP"). This group, referred to as AcSEC, approved the SOP in September 2003. The SOP was presented at a clearance meeting with the Financial Accounting Standards Board ("FASB") in April 2004. At that time, the FASB voted unanimously not to clear the SOP. The FASB will reconsider the SOP during the 2005-2006 time frame.

If the existing SOP is issued, it would require the Company to modify its accounting policy for maintenance and repairs. Such costs would no longer be accrued in advance of performing the related maintenance and repairs; rather, the SOP requires these costs to be expensed as incurred, unless they meet the capitalization provisions of the SOP, in which case the costs will be depreciated over their estimated useful lives. The Company has not yet quantified the impact of adopting the SOP on its financial statements; however, the Company's preliminary assessment is that the adoption of this pronouncement would decrease the shipyard accrual and increase stockholders' equity of the Company.

ITEM 3. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

The principal market risk to which the Company is exposed is a change in interest rates on its Revolving Credit Facility. The Company manages its exposure to changes in interest rate fluctuations by optimizing the use of fixed and variable rate debt. The table below presents principal cash flows by year of maturity. The Company had only fixed rate debt at June 30, 2004. Variable interest rates would fluctuate with the LIBOR and federal fund rates. The weighted average interest rate on the Company's outstanding debt at June 30, 2004 was 5.88%.

Liabilities (\$000s)	Expected Years of Maturity					
	2004*	2005	2006	2007	2008	Thereafter
Fixed Rate	\$ 1,715	\$ 3,756	\$ 3,973	\$ 4,202	\$ 4,445	\$ 46,753
Average Interest Rate	5.88%	5.89%	5.92%	5.94%	5.97%	5.97%
Variable Rate	\$ □	\$ □	\$ □	\$ □	\$ □	\$ □
Average Interest Rate	□%	□%	□%	□%	□%	□%

* For the period July 1, 2004 through December 31, 2004

[Back to Index](#)

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures as of the end of the period covered by this report have been designed and are functioning effectively to provide reasonable assurance that the information required to be disclosed by the Company in reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. The Company believes that a controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

(b) Change in Internal Control over Financial Reporting

No change in the Company's internal control over financial reporting occurred during the Company's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II: OTHER INFORMATION

ITEM 1. Legal Proceedings

The Company is engaged in litigation instituted by a competitor to challenge its double-hull patent. *Penn Maritime, Inc. v. Maritrans Inc.*, was filed in the U.S. District Court for the Eastern District of New York on September 6, 2001. The Plaintiff was seeking damages and an injunction restraining the Company from enforcing its patent, which if awarded, would have a material adverse effect on the Company. The Company challenged the jurisdiction of the Court of New York, and on March 31, 2003 the court dismissed the action. On April 3, 2003, the Company sued Penn Maritime, Inc. in the U.S. District Court for the Middle District of Florida (*Maritrans Inc. v. Penn Maritime, Inc.*) for patent infringement, misappropriation of the Company's trade secrets, and other causes of action. Penn Maritime, Inc. has filed an answer and counterclaim which essentially reiterates the claims made in its original suit. Since the initiation of action, the parties have amended and defined their claims. In addition to patent infringement, the Company now claims in excess of \$8 million in affirmative damages plus punitive damages under the Florida Trade Secrets Act. Penn Maritime, Inc. claimed in excess of \$7 million plus punitive damages under the Sherman, Clayton and Lanham Acts, based on the claim that the Company obtained its patent through fraud. Penn Maritime has since dropped the Sherman Act claims. To obtain any affirmative recovery from the Company, Penn Maritime, Inc. must establish that the Company committed actual fraud in its submission to the U.S. Patent Office. The Company believes Penn Maritime, Inc.'s claim to be without merit.

[Back to Index](#)**Item 2. Changes in Securities, Use of Proceeds and Issuer Purchase of Equity Securities**

The following table summarizes the Company's purchases of its common stock for the three months ended June 30, 2004:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	(a) Total Number of Shares Purchased (1)	(b) Average Price Paid per share (or Units)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (2)
April 1-30, 2004	287,166	15.52	□	514,558
May 1-31, 2004	10,054	13.83		514,558
June 1-30, 2004	□	□	□	514,558
Total	297,221	15.46	□	514,558

(1) These amounts consist of shares the Company purchased from its officers, non-employee directors and other employees who elected to pay the exercise price or withholding taxes upon the exercise of stock options by delivering (and, thus, selling) shares of Maritrans common stock in accordance with the terms of the Maritrans equity compensation plans that were previously announced in its proxy statements. The Company purchased these shares at their fair market value, as determined by reference to the closing price of its common stock on the day of exercise.

(2) On February 9, 1999, the Company announced that its Board of Directors had authorized a common share repurchase program for up to one million shares of its common stock. On February 8, 2000 and February 13, 2001 each, the Company announced that its Board of Directors had authorized an additional one million shares in the program, for an aggregate of three million shares authorized. No repurchases were made under this program during the first six months of 2004. At June 30, 2004, 514,558 shares remained under these authorizations. The program has no fixed expiration date.

Item 4. Submission of Matters to a Vote of Security Holders

The Annual Meeting of Stockholders of the Company (the "Meeting") was held on April 29, 2004. At the Meeting, the following nominees were re-elected as directors of the Company to serve until the Annual Meeting of Stockholders in 2007 and until their successors shall have been elected and qualified and received the votes set forth after their names below:

Name of Nominee	For	Withheld
Mr. Robert J. Lichtenstein	6,645,681	738,929
Mr. Frederick C. Haab	7,265,065	119,545

The terms of office of the following directors continued after the meeting in accordance with the Company's Certificate of Incorporation: Mr. Stephen A. Van Dyck, Dr. Robert E. Boni, Dr. Craig E. Dorman, Mr. William A. Smith and Mr. Brent A. Stienecker.
