#### Dear Shareholder:

Municipal bond prices advanced during the fiscal year ended September 30, 2010 (the period), driven by the U.S. government stimulus plan, evidence of a stabilizing economy, and increasing investor demand for tax-exempt securities. As evidence mounted that the economy was improving during the first half of the period, municipals generally outperformed U.S. government securities. This trend abated during the second half of the period, as gross domestic product (GDP) growth slowed and investors grew skittish about fiscal problems facing many state and local governments. Some shifted out of municipal bonds (and out of corporate bonds and stocks as well) and into the perceived safe haven of U.S. Treasury bonds.

#### The Year in Review

For the fiscal year ended September 30, 2010:

PIMCO Municipal Income Fund III returned 10.33% on net asset value ( NAV ) and 9.90 % on market price.

PIMCO California Municipal Income Fund III rose 9.34% on NAV and 11.94% on market price.

PIMCO New York Municipal Income Fund III advanced 10.57% on NAV and 8.98% on market price.

In this environment, the Barclays Capital Municipal Bond Index returned 5.81% for the period, while the Barclays Capital U.S. Treasury Bond Index returned 0.14%. The broad, taxable bond market, as represented by the Barclays Capital U.S. Aggregate Index, gained 8.16% for the twelve months ended September 30, 2010.

As the economy weakened during the latter half of the period, the Federal Reserve (the Fed ) indicated that it would resume purchasing U.S. Treasury bonds a reversal of its position earlier in the year. The goal behind this strategy, known as Quantitative Easing, was to boost economic activity by pushing already low interest rates even lower. Hans W. Kertess

Chairman

Brian S. Shlissel *President & CEO* 

#### The Road Ahead and the Case for Municipals

With regard to worries about possible defaults at the state and local level, some perspective may be useful. Of all municipal bonds rated by Moody s Investors Service since 1970, only 0.09%, have defaulted. States are not allowed by law to file for bankruptcy and 49 have laws requiring balanced budgets, inclusive of servicing their debt. At the local government level, while Chapter 9 bankruptcy filings are permitted in 26 states, this has occurred only twice in the past 40 years. In both cases, the entities continued to pay interest on their debt while their cases were worked out. That long-term perspective notwithstanding, municipal bonds may come under some short-term pressure. One reason: the potential end, on December 31, 2010, of the federal government s Build American Bonds (BAB) program. Because these bonds are subsidized, they have lowered borrowing costs for states and local governments. But as the end of the program nears, a rush to sell BABs has flooded the municipal bond market. This oversupply has exceeded demand causing prices to tumble.

The Fed s quantitative easing strategy may impact municipal bonds as well. This is because the Fed s purchase of Treasury securities would exclude bonds with longer maturities. This could lead to lower prices for longer-term municipal bond prices, which correlate closely with Treasuries.

But again, we think these issues are short-term in nature. From a longer vantage point, the expectation of higher taxes at all levels of government and historically low default rates will continue to make municipal securities compelling investments for many people.

For specific information on the Funds and their performance, please review the following pages. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Funds shareholder servicing agent at (800) 254-5197. In addition, a wide range of information and resources is available on our website, www.allianzinvestors.com/closedendfunds.

Together with Allianz Global Investors Fund Management LLC, the Funds investment manager, and Pacif	ïc
Investment Management Company LLC ( PIMCO ), the Funds sub-adviser, we thank you for investing w	vith us. We
remain dedicated to serving your investment needs.	

Sincerely,

Hans W. Kertess Chairman Brian S. Shlissel President & Chief Executive Officer

#### **PIMCO Municipal Income Funds III Fund Insights**

September 30, 2010 (unaudited)

For the fiscal year ended September 30, 2010 PIMCO Municipal Income Fund III increased 10.33% on net asset value ( NAV ) and 9.90% on market price. PIMCO California Municipal Income Fund III advanced 9.34% on NAV and 11.94% on market price. PIMCO New York Municipal Income Fund III rose 10.57% on NAV and 8.98% on market price.

The high-quality segment of the municipal bond market produced positive returns for the reporting period, as yields moved lower across the curve. On longer maturities, municipal bonds underperformed the stronger taxable bond market, with the Barclays Capital Long Municipal Bond Index returning 6.56% while the Barclays Capital Long Government/Credit Index returned 13.61%, and the Barclays Capital Long U.S. Treasury Index returned 12.74%. The Barclay s Capital Zero Coupon Municipal Bond Index returned 7.25% for the reporting period. Municipal to Treasury yield ratios (a measure of the relative attractiveness of municipal and Treasury bonds) ended higher as Treasuries outperformed municipals. The 10-year ratio increased to 95% and the 30-year ratio decreased to 100%.

The Funds holdings of tobacco securitization-backed debt suffered from the sector s volatility during the period. Water and sewer exposure also hampered returns.

#### **Municipal III**

Amid generally declining yields, the municipal yield curve steepened slightly during the reporting period, following the lead of the Treasury market. During the period, 30-year maturity AAA General Obligation (GO) yields decreased 11 basis points while 2-year yields fell 17 basis points.

Holdings in the health care sector added to the Fund s returns, as this sector significantly outperformed other sectors of the municipal bond market. The Fund also benefited from its interest rate positioning during the reporting period. Exposure to longer maturity zero coupon and nominal municipals allowed the Fund to participate in the widespread decline in yields at the longer end of the municipal market. The Fund also gained from its positions in corporate-backed municipals, which marginally outperformed the general municipal market during the period.

#### California Municipal III

California municipal bonds outperformed the national index, with the Barclays Capital California Municipal Bond Index returning 6.04% versus 5.81% for the Barclays Capital Municipal Bond Index during the period. In spite of this outperformance, continued volatility is expected as the state continues to struggle through its budget approval process. Long California municipal bonds underperformed their peers in the national index, returning 6.02% versus the Barclays Capital Long Municipal Bond Index gain of 6.56% cited above. The California municipal curve steepened even more significantly than the national markets during the reporting period, with 30-year yields increasing by 1 basis point while 2-year yields declining 42 basis points.

Holdings in the health care sector contributed to the Fund s returns, as the sector significantly outperformed the rest of the municipal bond market. The Fund also benefited from its interest rate positioning. Exposure to longer maturity traditional and zero coupon municipals enabled the Fund to participate in the widespread decline in yields at the longer end of the municipal market. The Fund also gained from its positions in corporate-backed municipals, which marginally outperformed the general municipal market. Significant exposure to longer-maturity California municipals

was neutral for performance as that portion of the curve performed in-line with the general market.

Other positions were less beneficial for returns. An underweighting in California State general obligation (GO) bonds was negative for performance as these securities outperformed during the reporting period.

#### **New York Municipal III**

Amid generally declining yields, the New York municipal yield curve steepened, following the lead of the national municipal and Treasury markets. During the period, 30-year maturity yields decreased 10 basis points while 2-year yields fell 33 basis points. New York municipals, as measured by the Barclays Capital New York Municipal Bond Index, returned 5.75% for the period, slightly trailing the national market s 5.81% gain, as measured by the Barclays Capital Municipal Bond Index. The long-maturity segment of the New York market also outperformed the long segment of the national municipal bond market, returning 6.62% versus the Barclays Capital Long Municipal Bond Index gain of 6.56% cited above.

Holdings in the health care sector contributed to the Fund s returns, as the sector significantly outperformed the rest of the municipal bond market. The Fund also gained from its positions in transportation municipals, which outperformed the general municipal market. Exposure to corporate-backed municipals contributed marginally to returns. The Fund also benefited from its interest rate positioning. Exposure to longer maturity traditional and zero coupon municipals in New York allowed the Fund to participate in the decline in yields at the longer end of the New York municipal market.

#### Moody s Rating

(as a % of total investments)

<sup>(1)</sup> Past performance is no guarantee of future results. Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. The calculation assumes that all income dividends and capital gain distributions, if any, have been reinvested. Total return does not reflect broker commissions or sales charges. Total return for a period of more than one year represents the average annual total return.

Performance at market price will differ from its results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Funds, market conditions, supply and demand for each Fund s shares, or changes in each dividends.

An investment in each Fund involves risk, including the loss of principal. Total return, market price, market yield and NAV asset will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a onetime public offering and once issued, shares of closed-end funds are traded in the open market through a stock exchange. NAV is equal to total assets attributable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current monthly per share dividend (comprised of net investment income) payable to common shareholders by the market price per common share at September 30, 2010.

#### PIMCO Municipal Income Funds III Schedules of Investments

September 30, 2010

#### **Notes to Schedules of Investments:**

- \* Unaudited
- (a) Private Placement Restricted as to resale and may not have a readily available market. Securities with an aggregate value of \$16,728,433, representing 2.9% of total investments in Municipal III and \$7,229,070, representing 2.0% of total investments in California Municipal III.
- (b) 144A Exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, typically only to qualified institutional buyers. Unless otherwise indicated, these securities are not considered to be illiquid.
- (c) When-issued. To be settled after September 30, 2010.
- (d) In default.
- (e) Inverse Floater The interest rate shown bears an inverse relationship to the interest rate on another security or the value of an index. The interest rate disclosed reflects the rate in effect on September 30, 2010.
- (f) Variable Rate Notes Instruments whose interest rates change on specified date (such as a coupon date or interest payment date) and/or whose interest rates vary with changes in a designated base rate (such as the prime interest rate). The interest rate disclosed reflects the rate in effect on September 30, 2010.
- (g) Residual Interest Bonds held in Trust Securities represent underlying bonds transferred to a separate securitization trust established in a tender option bond transaction in which each Fund acquired the residual interest certificates. These securities serve as collateral in a financing transaction.
- (h) Step Bond Coupon is a fixed rate for an initial period then resets at a specific date and rate.

#### PIMCO Municipal Income Funds III Notes to Financial Statements

September 30, 2010

#### 1. Organization and Significant Accounting Policies

PIMCO Municipal Income Fund III (Municipal III), PIMCO California Municipal Income Fund III (California Municipal III) and PIMCO New York Municipal Income Fund III (New York Municipal III), each a Fund and collectively referred to as the Funds or PIMCO Municipal Income Funds III, were organized as Massachusetts business trusts on August 20, 2002. Prior to commencing operations on October 31, 2002, the Funds had no operations other than matters relating to their organization and registration as non-diversified, closed-end management investment companies registered under the Investment Company Act of 1940 and the rules and regulations thereunder, as amended. Allianz Global Investors Fund Management LLC (the Investment Manager) serves as the Investment Manager and is an indirect, wholly-owned subsidiary of Allianz Global Investors of America L.P. (Allianz Global). Allianz Global is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. Each Fund has an unlimited amount of \$0.00001 par value per share of common shares authorized.

Under normal market conditions, Municipal III invests substantially all of its assets in a portfolio of municipal bonds, the interest from which is exempt from federal income taxes. Under normal market conditions, California Municipal III invests substantially all of its assets in municipal bonds which pay interest that is exempt from federal and California state income taxes. Under normal market conditions, New York Municipal III invests substantially all of its assets in municipal bonds which pay interest that is exempt from federal, New York State and New York City income taxes. The Funds will generally seek to avoid investing in bonds generating interest income which could potentially subject individuals to alternative minimum tax. The issuers abilities to meet their obligations may be affected by economic and political developments in a specific state or region. There is no guarantee that the Funds will meet their stated objectives.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the Funds financial statements. Actual results could differ from those estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations that provide general indemnifications. The Funds maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

The following is a summary of significant accounting policies consistently followed by the Funds:

#### (a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available, or for which a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to procedures established by the Board of Trustees, or persons acting at their discretion pursuant to procedures established by the Board of Trustees. The Funds investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price. Independent pricing services use

information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Securities purchased on a when-issued basis are marked to market daily until settlement at the forward settlement date. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Funds to value securities may differ from the value that would be realized if the securities were sold and these differences could be material to the Funds financial statements. Each Fund s net asset value is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange (NYSE) on each day the NYSE is open for business.

#### (b) Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.* the exit price ) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

Level 1 quoted prices in active markets for identical investments that the Funds have the ability to access

Level 2 valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.) or quotes from inactive exchanges

9.30.10 PIMCO Municipal Income Funds III Annual Report 31

#### **PIMCO Municipal Income Funds III Notes to Financial Statements**

September 30, 2010

#### 1. Organization and Significant Accounting Policies (continued)

Level 3 valuations based on significant unobservable inputs (including the Funds own assumptions in determining the fair value of investments)

An investment asset s or liability s level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation technique used.

The valuation techniques used by the Funds to measure fair value during the year ended September 30, 2010 maximized the use of observable inputs and minimized the use of unobservable inputs.

The inputs or methodology used for valuing securities is not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Funds generally use to evaluate how to classify each major category of assets and liabilities in accordance with Generally Accepted Accounting Principles (GAAP).

Municipal Bonds and Variable Rate Notes Municipal bonds and variable rate notes are valued by independent pricing services based on pricing models that take into account, among other factors, information received from market makers and broker-dealers, current trades, bid-want lists, offerings, market movements, the callability of the bond, state of issuance, benchmark yield curves, and bond insurance. To the extent that these inputs are observable, the values of municipal bonds and variable rate notes are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

The Funds policy is to recognize transfers between levels at the end of the reporting period.

A summary of the inputs used at September 30, 2010 in valuing each Fund s assets and liabilities is listed below:

#### Municipal III:

	Level 1 - Quoted Prices	Level 2 - Other Significant Observable Inputs	Level 3 - Significant Unobservable Inputs	Value at 9/30/10
Investments in Securities Assets	S			
Municipal Bonds & Notes:				
New Jersey		\$ 26,291,932	\$16,045	\$ 26,307,977
All Other		533,815,911		533,815,911
Variable Rate Notes		13,403,109		13,403,109

**Total Investments** \$ 573,510,952 \$16,045 \$ 573,526,997

California Municipal III:

Level 2 - Level 3 -
