QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2011

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission file number: 001-33876

Athersys, Inc.

(Exact name of registrant as specified in its charter)

Delaware

20-4864095

*(State or other jurisdiction
of incorporation or organization)*

(I.R.S. Employer Identification No.)

3201 Carnegie Avenue, Cleveland, Ohio

44115-2634

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code: **(216) 431-9900**

Former name, former address and former fiscal year, if changed since last report: **Not Applicable**

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting
company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): Yes No

The number of outstanding shares of the registrant's common stock, \$0.001 par value, as of July 29, 2011 was 23,502,581.

Notes to Unaudited Condensed Consolidated Financial Statements

Three- and Six-Month Periods Ended June 30, 2011 and 2010

1. Background and Basis of Presentation

We are a biopharmaceutical company engaged in the discovery and development of therapeutic products in one business segment. Our operations consist primarily of research and product development activities.

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the audited financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2010. The accompanying financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and Article 10 of Regulation S-X. Accordingly, since they are interim statements, the accompanying financial statements do not include all of the information and notes required by GAAP for complete financial statements. The accompanying financial statements reflect all adjustments, consisting of normal recurring adjustments, that are, in the opinion of management, necessary for a fair presentation of financial position and results of operations for the interim periods presented. Interim results are not necessarily indicative of results for a full year.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Our critical accounting policies, estimates and assumptions are described in Management's Discussion and Analysis of Financial Condition and Results of Operations, which is included below in this Quarterly Report on Form 10-Q. Certain prior year amounts have been reclassified to conform with current year presentations.

2. Recently Issued Accounting Standards

In September 2009, Accounting Standards Codification (ASC) 605-25, *Multiple-Element Arrangements*, was updated (Accounting Standards Update (ASU) No. 2009-13) related to revenue recognition for arrangements with multiple elements. The revised guidance provides for two significant changes to the existing guidance. The first change relates to the determination of when the individual deliverables included in a multiple-element arrangement may be treated as separate units of accounting, which will likely result in the requirement to separate more deliverables within an arrangement leading to less revenue deferral. The second change modifies the manner in which the transaction consideration is allocated across the separately identified deliverables. Together, these changes are likely to result in earlier recognition of revenue for multiple-element arrangements than under previous guidance. The new guidance also significantly expands the disclosures required for multiple-element revenue arrangements. The new guidance was effective for us for new arrangements or modifications to existing arrangements entered into on or after January 1, 2011 and had no effect on our financial statements for the three and six months ended June 30, 2011. The adoption of this new guidance may have the potential effect of less future revenue deferral for new collaborations and bundled units of accounting being accounted for as separate units than we have historically experienced.

In March 2010, ASC 605-28, *Milestone Method of Revenue Recognition*, was amended (ASU No. 2010-17) related to the ratification of the application of the proportional performance model of revenue recognition when applied to milestones in research and development arrangements. Accordingly, the consensus states that an entity can make an accounting policy election to recognize a payment that is contingent upon the achievement of a substantive milestone in its entirety in the period in which the milestone is achieved. The new guidance was effective for us for new arrangements entered into on or after January 1, 2011. The adoption of this guidance had no effect on our financial statements, since we have been historically recognizing milestone revenue consistent with this guidance.

Table of Contents**3. Net Loss per Share**

Basic and diluted net loss per share has been computed using the weighted-average number of shares of common stock outstanding during the period. We have outstanding options and warrants that are not used in the calculation of diluted net loss per share because to do so would be antidilutive. The following instruments were excluded from the calculation of diluted net loss per share because their effects would be antidilutive:

	Three months ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Outstanding options	4,493,101	4,124,262	4,493,101	4,124,262
Restricted stock units	39,300		39,300	
Outstanding warrants	6,435,496	5,125,496	6,435,496	5,125,496
	10,967,897	9,249,758	10,967,897	9,249,758

4. Comprehensive Loss

All components of comprehensive loss, including net loss, are reported in the financial statements in the period in which they are recognized. Comprehensive loss is defined as the change in equity during a period from transactions and other events and circumstances from non-owner sources.

Below is a reconciliation (in thousands) of net loss to comprehensive loss for all periods presented.

	Three months ended June 30,		Six months ended June 30,	
	2011	2010	2011	2010
Net loss	\$ (3,223)	\$ (3,077)	\$ (7,153)	\$ (5,638)
Unrealized gain (loss) on available-for-sale securities	19	(6)	40	(19)
Proportionate share of comprehensive income for equity method investment	19		31	
Comprehensive loss	\$ (3,185)	\$ (3,083)	\$ (7,082)	\$ (5,657)

5. Fair Value of Financial Instruments

Our available-for-sale securities include U.S. government obligations, corporate debt securities, a fixed income mutual fund, and a corporate equity security that we received in a settlement in 2003, for which the corporation completed an initial public offering in 2011. As of June 30, 2011, approximately 80% of our investments were in U.S. government obligations, including government-backed agencies, and 12% of our investments were in a fixed-income mutual fund. The inputs used to measure fair value are classified into the following hierarchy:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Adjusted quoted prices in active markets for similar assets or liabilities, or unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or significant inputs other than quoted prices that are observable for the asset or liability.

Level 3 Unobservable inputs for the asset or liability.

Table of Contents

The following table provides a summary of the fair values of our assets and liabilities measured at fair value on a recurring basis as of June 30, 2011 (in thousands):

Description	Balance as of June 30, 2011	Fair Value Measurements at June 30, 2011 Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Available-for-sale securities	\$ 16,194	\$ 16,019	\$ 175	\$
Warrant liability	\$ 1,873	\$	\$	\$ 1,873

Fair value is based upon quoted market prices in active markets for our level 1 investments and quoted market prices for similar assets for our level 2 investments. The estimated fair value of warrants accounted for as liabilities, representing a level 3 fair value measure, was determined on the issuance date and subsequently adjusted to its fair value at each financial reporting date. The fair value of the warrants is estimated using the expected volatility based on the historical volatilities of comparable companies from a representative peer group selected based on industry and market capitalization, using a Black-Scholes valuation model with the following inputs at June 30, 2011:

Exercise price	\$ 3.55
Market value of stock at end of period	\$ 2.71
Expected volatility	73.42%
Risk-free interest rate	1.76%
Expected life (in years)	4.59

A rollforward of fair value measurements using significant unobservable inputs (Level 3) for the warrants is as follows (in thousands):

	Three months ended June 30, 2011	Six months ended June 30, 2011
Balance January 1, 2011		\$
Issuance of warrants February 2011		1,795
Balance April 1, 2011 (for three-month period, only)	\$ 2,070	
(Gain) loss included in other expense for the period	(197)	78
Balance June 30, 2011	\$ 1,873	\$ 1,873

We review and reassess the fair value hierarchy classifications on a quarterly basis. Changes from one quarter to the next related to the observability of inputs in a fair value measurement may result in a reclassification between fair value hierarchy levels.

The following is a summary of available-for-sale securities (in thousands) at June 30, 2011 and December 31, 2010, respectively:

Amortized	Gross Unrealized	Gross Unrealized	Estimated Fair
-----------	------------------	------------------	----------------

Edgar Filing: ATHERSYS, INC / NEW - Form 10-Q

	Cost	Losses	Gains	Value
June 30, 2011:				
U.S. government obligations, which included government-backed agencies	\$ 13,010	\$	\$ 8	\$ 13,018
Corporate debt securities	1,004	(1)		1,003
Fixed income mutual fund	2,000	(2)		1,998
Corporate equity security, with restrictions	114		61	175
	\$ 16,128	\$ (3)	\$ 69	\$ 16,194
December 31, 2010:				
U.S. government obligations, which included government-backed agencies	\$ 11,034	\$	\$ 23	\$ 11,057
Corporate debt securities	2,016		3	2,019
	\$ 15,144	\$	\$ 26	\$ 13,076

Table of Contents

We had no realized gains or losses on the sale of available-for-sale securities for any of the periods presented. Unrealized gains and losses on our available-for-sale securities are excluded from earnings and are reported as a separate component of stockholders' equity within accumulated other comprehensive income until realized. When and if available-for-sale securities are sold in the future, the cost of the securities will be specifically identified and used to determine any realized gain or loss. The net unrealized gain on available-for-sale securities was \$66,000 and \$26,000 as of June 30, 2011 and December 31, 2010, respectively.

The amortized cost of and estimated fair value of available-for-sale securities at June 30, 2011 by contractual maturity are shown below (in thousands). Actual maturities may differ from contractual maturities because the issuers of the securities may have the right to repay the obligations without prepayment penalties.

	June 30, 2011	
	Amortized Cost	Estimated Fair Value
Due in one year or less	\$ 14,014	\$ 14,021
Mutual fund and an equity security	2,114	2,173
	\$ 16,128	\$ 16,194

6. Collaborative Arrangements and Revenue Recognition*Pfizer*

In December 2009, we entered into a collaboration with Pfizer to develop and commercialize MultiStem to treat inflammatory bowel disease (IBD) for the worldwide market. Under the terms of the agreement, we received a non-refundable up-front payment from Pfizer and receive research funding and support. In addition, we are eligible to receive milestone payments upon the successful achievement of certain development, regulatory and commercial milestones, for which we evaluated the nature of the events triggering these contingent payments and concluded that these events constituted substantive milestones that will be recognized as revenue in the period in which the underlying triggering event occurs.

Pfizer pays us for manufacturing product for clinical development and commercialization purposes. Pfizer has responsibility for development, regulatory and commercialization and will pay us tiered royalties on worldwide commercial sales of MultiStem IBD products. Alternatively, in lieu of royalties and certain commercialization milestones, we may elect to co-develop with Pfizer and the parties will share development and commercialization expenses and profits/losses on an agreed basis beginning at Phase III clinical development.

We evaluated the facts and circumstances of the agreement and determined the Pfizer agreement has multiple deliverables that should be combined into a single unit of accounting. We are recognizing the license and technology access fee and research and development funding ratably on a straight-line basis over the estimated performance period, which is estimated to be completed in 2012. Further, we are measuring manufacturing revenue beginning upon the culmination of the earnings process and recognizing it over the remainder of the performance period of the bundled unit of accounting. Prepaid license and technology access fee and prepaid research and development funding are recorded as deferred revenue and amortized on a straight-line basis over the performance period.

Angiotech

In our 2006 co-development collaboration with Angiotech to develop and commercialize MultiStem to treat acute myocardial infarction (AMI) for the worldwide market, we received initial equity investments and may also receive cash payments and an equity investment based on the successful achievement of specified clinical development and commercialization milestones. We evaluated the nature of the events triggering these contingent payments and concluded that these events constituted substantive milestones that will be recognized as revenue in the period in which the underlying triggering event occurs. The parties jointly fund clinical development activity and will share net profits from the future sale of approved products.

We continue to jointly fund clinical development activities with Angiotech in accordance with our co-development collaboration, and \$175,000 was due from Angiotech as of June 30, 2011. Our clinical costs for the six months ended

June 30, 2011 and 2010 are reflected net of Angiotech's cost-sharing amount of \$152,000 and \$389,000, respectively. Included in the \$152,000 cost share for the six months ended June 30, 2011 was a write down of \$114,000 from the final court settlement of our prepetition claims in connection with Angiotech's bankruptcy proceedings, which are now concluded. Angiotech assumed our collaboration agreement in the bankruptcy proceedings and following the bankruptcy, has made payments to us in accordance with our agreement.

Table of Contents*RTI Biologics, Inc.*

In September 2010, we entered into an agreement with RTI, a provider of orthopedic and other biologic implants, under which we provided RTI a license to one of our technologies to enable RTI to develop and commercialize biologic implants exclusively for certain orthopedic applications in the bone graft substitutes market. Under the terms of the agreement, we received \$3.0 million of guaranteed license fee payments and are entitled to receive \$2.0 million of license fee payments contingent on future milestone events. We are also eligible to receive milestone payments upon the successful achievement of certain development and commercial milestones, including the \$2.0 million contingent license fee payments mentioned above. We evaluated the nature of the events triggering these contingent license payments and concluded that these events are substantive and that revenue will be recognized in the period in which the underlying triggering event occurs. In addition, we will receive tiered royalties on worldwide commercial sales, if any, of implants using our technologies.

We evaluated the facts and circumstances and determined the RTI agreement has multiple deliverables that should be combined into a single unit of accounting. We recognize the \$3.0 million guaranteed license fee ratably on a straight-line basis over the estimated performance period, which is estimated to be completed in the fourth quarter of 2011.

7. Stock-based Compensation

Our equity incentive plans authorize an aggregate of 5,500,000 shares of common stock for awards to employees, directors and consultants, which includes an increase of 1,000,000 authorized shares that was approved by stockholders in June 2011. Our incentive plans authorize the issuance of equity-based compensation in the form of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares and units, and other stock-based awards to qualified employees, directors and consultants.

As of June 30, 2011, a total of 968,674 shares were available for issuance under our equity compensation plans and stock-based awards to purchase 4,532,401 shares of common stock were outstanding (which includes options to purchase 1,075 shares of common stock related to our old option plans prior to our merger in June 2007). During the three-month period ended June 30, 2011, we granted 195,900 stock options and 39,300 restricted stock units. For the three-month periods ended June 30, 2011 and 2010, stock-based compensation expense was approximately \$147,000 and \$594,000, respectively. At June 30, 2011, total unrecognized estimated compensation cost related to unvested stock-based awards was approximately \$1,065,000, which is expected to be recognized by the first quarter of 2015 using the straight-line method.

8. Issuance of Common Stock and Warrants

In February 2011, we completed a registered direct offering of 4,366,667 shares of common stock and five-year warrants to purchase 1,310,000 shares of common stock with an exercise price of \$3.55 per share, generating net proceeds of \$11.9 million. The securities were sold in multiples of a fixed combination of one share of common stock and a warrant to purchase 0.3 of a share of common stock at an offering price of \$3.00 per fixed combination.

In connection with the offering in February 2011, our former lenders were entitled to a milestone payment in the amount of \$810,000, of which \$202,500 was paid in cash and \$607,500 was paid through the issuance of our common stock to the former lenders at \$2.96 per share in February 2011. This milestone payment is included in other expense in the consolidated statement of operations.

9. Warrant Liability

We account for common stock warrants as either liabilities or as equity instruments depending on the specific terms of the warrant agreement. Registered common stock warrants that could require cash settlement are accounted for as liabilities. We classify these warrant liabilities on the consolidated balance sheet as a non-current liability, which is revalued to fair value at each reporting date subsequent to the initial issuance. We use a Black-Scholes valuation model to value the warrant liability at its fair value (See Note 5). Changes in the fair market value of the warrant are reflected in the consolidated statement of operations as other income (expense).

Table of Contents

The warrants issued in the February 2011 registered direct offering contain a provision for net cash settlement in the event that there is a fundamental transaction (e.g., merger, sale of substantially all assets, tender offer, or share exchange). If a fundamental transaction occurs in which the consideration issued consists of all cash or stock in a non-public company, then the warrant holder has the option to receive cash equal to the fair value of the remaining unexercised portion of the warrant. Also, the warrants generally provide that, in the event the related registration statement or an exemption from registration is not available for the issuance or resale of the warrant shares, the holder may exercise the warrant on a cashless basis. However, the warrant agreements do not expressly state that a net cash settlement is prohibited. Therefore, even though a cashless exercise feature is available to the holder, in the absence of an express prohibition on net cash settlement, the warrants may be subject to cash settlement, as it is not within the absolute control of the Company to provide freely-tradable shares in all circumstances.

The warrants issued in February 2011 have been classified as liabilities, as opposed to equity, due to the potential cash settlement upon the occurrence of certain events as described above, and are recorded at a fair value of \$1,873,000 at June 30, 2011.

As of June 30, 2011, we had the following outstanding warrants to purchase shares of common stock:

Number of underlying shares	Exercise Price	Expiration
4,976,470	\$ 6.00	June 8, 2012
149,026	\$ 5.00	June 8, 2014
1,310,000	\$ 3.55	February 2, 2016
6,435,496		

9. Income Taxes

We have net operating loss and research and development tax credit carryforwards that may be used to reduce future taxable income and tax liabilities. Our deferred tax assets have been fully offset by a valuation allowance due to our cumulative losses.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This discussion and analysis should be read in conjunction with our financial statements and notes thereto included in this Quarterly Report on Form 10-Q and the audited financial statement and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2010. Operating results are not necessarily indicative of results that may occur in future periods.

Overview and Recent Developments

We are a biopharmaceutical company engaged in the discovery and development of therapeutic product candidates designed to extend and enhance the quality of human life. Through the application of our proprietary technologies, we have established a pipeline of therapeutic product development programs in multiple disease areas. Our current product development portfolio includes MultiStem, a patented and proprietary stem cell product that we are developing as a treatment for multiple disease indications, and is currently being evaluated in clinical trials. In addition, we are developing novel pharmaceuticals to treat indications such as obesity, related metabolic conditions such as diabetes, and certain neurological conditions.

Current Programs

By applying our proprietary cell therapy platform, MultiStem, we have established therapeutic product development programs in the areas of treating cardiovascular disease, neurological conditions, inflammatory and immune system disorders, and certain other conditions. To date, we have advanced four programs to clinical development stage, including:

An ongoing Phase II clinical study involving administration of MultiStem to patients suffering from ulcerative colitis, the most common form of inflammatory bowel disease, or IBD. This study is being conducted with our partner, Pfizer, and began enrolling patients in the first quarter of 2011;

A Phase I clinical study involving administration of MultiStem to patients that have suffered an acute myocardial infarction, or AMI, more commonly referred to as a heart attack. We successfully completed patient enrollment and announced initial results in 2010, and completed the one-year follow-up phase of the study during the second quarter of 2011. We intend to initiate a Phase II study to evaluate the safety and efficacy of MultiStem administration to AMI patients in 2011, in collaboration with Angiotech;

A Phase I clinical study involving administration of MultiStem to patients undergoing a hematopoietic stem cell transplant in the treatment of leukemia or related conditions. Such patients are at risk for serious complications, including graft-versus-host disease. In May 2011, we announced the preliminary results from the single ascending dose arm of the ongoing study, and we expect to complete enrollment of the repeat dose portion of this study in 2011; and

A planned Phase II study designed to enable us to evaluate both the safety and efficacy of MultiStem treatment following an ischemic stroke. We plan to initiate the study in 2011.

In addition to our current and anticipated clinical development activities, we are also engaged in preclinical development and evaluation of MultiStem in other disease indications in the cardiovascular, neurological, inflammatory and immune disorder, and other areas. We conduct such work both through our own internal research programs and through the broad network of collaborations that we have established with investigators at leading research institutions across the United States and in Europe.

We are also working with our collaborator, RTI, to develop products for certain orthopedic applications in the bone graft substitutes market using our stem cell technologies.

Additionally, we are engaged in the development of novel small molecule therapies to treat obesity and related metabolic conditions. We are conducting preclinical evaluation of novel compounds that we have developed and intend to select a clinical development candidate for this program in 2011.

Table of Contents*Financial*

In February 2011, we completed a registered direct offering of 4,366,667 shares of common stock and five-year warrants to purchase 1,310,000 shares of common stock with an exercise price of \$3.55 per share, generating net proceeds of \$11.8 million. The securities were sold in multiples of a fixed combination of one share of common stock and a warrant to purchase 0.3 of a share of common stock at an offering price of \$3.00 per fixed combination.

We have incurred losses since inception of operations in 1995 and had an accumulated deficit of \$212 million at June 30, 2011. Our losses have resulted principally from costs incurred in research and development, clinical and preclinical product development, acquisition and licensing costs, and general and administrative costs associated with our operations. We have used the financing proceeds from private and public equity and debt offerings and other sources of capital to develop our technologies, to discover and develop therapeutic product candidates, and to acquire certain technologies and assets. We have also built drug development capabilities that have enabled us to advance product candidates into clinical trials. We have established strategic collaborations that have provided revenues and capabilities to help further advance our product candidates, and we have also built a substantial portfolio of intellectual property.

Results of Operations

Since our inception, our revenues have consisted of license fees, contract revenues and milestone payments from our collaborators, and grant proceeds primarily from federal, state and foundation grants. We have derived no revenue from the commercial sale of therapeutic products to date. Research and development expenses consist primarily of external clinical and preclinical study fees, manufacturing costs, salaries and related personnel costs, legal expenses resulting from intellectual property prosecution processes, facility costs, and laboratory supply and reagent costs. We expense research and development costs as they are incurred. We expect to continue to make significant investments in research and development to enhance our technologies, advance clinical trials of our product candidates, expand our regulatory affairs and product development capabilities, conduct preclinical studies of our product and manufacture our product candidates. General and administrative expenses consist primarily of salaries and related personnel costs, professional fees and other corporate expenses. We expect to continue to incur substantial losses through at least the next several years.

The following tables set forth our revenues and expenses for the periods indicated and amounts are stated in thousands.

Revenues

	Three months ended		Six months ended	
	June 30,		June 30,	
	2011	2010	2011	2010

	\$ 1,392	\$ 1,483	\$ 2,611	\$ 2,920

Three Months Ended June 30, 2011 and 2010

Revenues. Revenues increased to \$2.4 million for the three months ended June 30, 2011 from \$1.9 million in the comparable period in 2010. Contract revenue increased \$621,000 for this period primarily as a result of our arrangement with RTI to develop an orthopedic allograft product. Our contract revenues reflect the amortization of Pfizer payments, including a \$6.0 million non-refundable up-front license fee, research and development funding, and the performance of manufacturing services over the estimated performance period, and the amortization of a \$3.0 million license fee over the estimated performance period from the RTI collaboration. Our contract revenues may also include license fees, milestone payments and royalties on compounds developed by Bristol-Myers Squibb using one of our technologies. Grant revenue decreased \$57,000 for the three months ended June 30, 2011 compared to the three months ended June 30, 2010 primarily due to the timing of expenditures that are reimbursed with grant proceeds. Our grant revenues may fluctuate from period to period based on the timing of grant-related activities and the award of new grants.

Research and Development Expenses. Research and development expenses increased to \$4.4 million for the three months ended June 30, 2011 from \$3.4 million in the comparable period in 2010. The increase of \$1.0 million related primarily to an increase in clinical and preclinical development costs of \$637,000, an increase in personnel costs of \$193,000, an increase in other research and development expenses of \$136,000, an increase in sponsored research of \$111,000 and an increase in patent legal fee expense of \$107,000 for the three months ended June 30, 2011 from the comparable period in 2010. These increases were partially offset by a decrease in stock-based compensation expense of \$167,000 for this period related to a significant number of options becoming fully vested in mid-2010. The increase in clinical and preclinical development costs for this period related primarily to costs associated with our MultiStem

clinical trials, including increased manufacturing and process development costs.

Table of Contents

Our clinical costs for the three months ended June 30, 2011 and 2010 are reflected net of Angiotech's cost-sharing amount of \$175,000 and \$145,000, respectively. The increase in personnel costs related to the addition over the past twelve months of personnel supporting our preclinical and clinical programs, combined with the impact of the accrual of a potential bonus in connection with the Company's compensation plan. Sponsored research costs increased primarily due to an increase in grant-funded programs that require collaboration with certain academic research institutions. Patent legal fees increased related to international patent prosecution activities. We expect our research and development expenses for the remainder of 2011 to increase due to increased MultiStem clinical trial and clinical manufacturing activities.

General and Administrative Expenses. General and administrative expenses decreased to \$1.4 million for the three months ended June 30, 2011 from \$1.5 million in the comparable period in 2010. The \$100,000 decrease was due primarily to a decrease in stock-based compensation expense of \$280,000 related to a significant number of options becoming fully vested in mid-2010, partially offset by an increase in legal and professional fees of \$115,000 and an increase in other corporate expenses of \$56,000 for the three months ended June 30, 2011 from the comparable period in 2010. We expect our general and administrative expenses to continue at similar levels for the remainder of 2011.

Depreciation. Depreciation expense decreased to \$67,000 for the three months ended June 30, 2011 from \$70,000 in the comparable period in 2010, as more assets are becoming fully depreciated.

Interest Income, net. Interest income represents interest earned on our cash and available-for-sale securities. Net interest income decreased to \$33,000 for the three months ended June 30, 2011 from \$57,000 for the comparable period in 2010 due to the decline in our investment balances as they are used to fund our operations. We expect our 2011 interest income to decline over the course of the year due to declining cash balances resulting from our ongoing and planned clinical and preclinical development, absent any new financings or business transactions.

Other Income (Expense), net. Other income (expense), net, includes foreign currency gains and losses, if any, related to our activities in Europe and certain contracts denominated in foreign currencies. Also, in February 2011, we issued warrants to purchase common stock that are classified as liabilities, with changes in market value reflected as either other income or expense. For the three months ended June 30, 2011, other income of \$197,000 was recorded from the decrease in the warrant liability.

Six Months Ended June 30, 2011 and 2010

Revenues. Revenues increased to \$5.4 million for the six months ended June 30, 2011 from \$3.6 million in the comparable period in 2010. Contract revenue increased \$1.7 million for this period primarily as a result of our multi-element arrangements with Pfizer and RTI. Our contract revenues reflect the amortization of Pfizer payments, including a \$6.0 million non-refundable up-front license fee, research and development funding, and the performance of manufacturing services over the estimated performance period, and the amortization of a \$3.0 million license fee over the estimated performance period from the RTI collaboration. Our contract revenues may also include license fees, milestone payments and royalties on compounds developed by Bristol-Myers Squibb using one of our technologies. Grant revenue increased \$87,000 for the six months ended June 30, 2011 compared to the six months ended June 30, 2010 primarily due to the timing of expenditures that are reimbursed with grant proceeds. Our grant revenues may fluctuate from period to period based on the timing of grant-related activities and the award of new grants.

Table of Contents

Research and Development Expenses. Research and development expenses increased to \$9.0 million for the six months ended June 30, 2011 from \$6.2 million in the comparable period in 2010. The increase of approximately \$2.8 million related primarily to an increase in clinical and preclinical development costs of \$1.8 million, an increase in personnel costs of \$426,000, an increase in sponsored research of \$342,000, an increase in patent legal fees of \$222,000, an increase in other research and development expenses of \$198,000 and an increase in research supplies of \$73,000 for the six months ended June 30, 2011 from the comparable period in 2010. These increases were partially offset by a decrease in stock-based compensation expense of \$277,000 for this period related to a significant number of options becoming fully vested in mid-2010. The increase in clinical and preclinical development costs for the three months ended June 30, 2011 related primarily to costs associated with our MultiStem clinical trials, including increased manufacturing and process development costs. Our clinical costs for the six months ended June 30, 2011 and 2010 are reflected net of Angiotech's cost-sharing amount of \$152,000 and \$389,000, respectively. The increase in personnel costs related to the addition over the past twelve months of personnel supporting our preclinical and clinical programs, combined with the impact of the accrual of a potential bonus in connection with the Company's compensation plan. Sponsored research costs increased primarily due to an increase in grant-funded programs that require collaboration with certain academic research institutions. Sponsored research costs increased primarily due to an increase in grant-funded programs that require collaboration with certain academic research institutions. Patent legal fees increased related to international patent prosecution activities. We expect our research and development expenses for the remainder of 2011 to increase due to increased MultiStem clinical trial and clinical manufacturing activities.

General and Administrative Expenses. General and administrative expenses decreased to \$2.6 million for the six months ended June 30, 2011 from \$2.9 million in the comparable period in 2010. The \$309,000 decrease was due primarily to a decrease in stock-based compensation expense of \$501,000 related to a significant number of options becoming fully vested in mid-2010, partially offset by an increase in personnel costs of \$84,000 and an increase in legal and professional fees of \$96,000 for the six months ended June 30, 2011 from the comparable period in 2010. The increase in personnel costs related to the impact of the accrual of a potential bonus in connection with the Company's compensation plan. We expect our general and administrative expenses to continue at similar levels for the remainder of 2011.

Depreciation. Depreciation expense decreased to \$127,000 for the six months ended June 30, 2011 from \$145,000 in the comparable period in 2010, as more assets are becoming fully depreciated.

Interest Income, net. Interest income represents interest earned on our cash and available-for-sale securities. Net interest income decreased to \$66,000 for the six months ended June 30, 2011 from \$118,000 for the comparable period in 2010 due to the decline in our investment balances as they are used to fund our operations. We expect our 2011 interest income to decline over the course of the year due to declining cash balances resulting from our ongoing and planned clinical and preclinical development, absent any new financings or business transactions.

Other Income (Expense), net. Other income (expense), net, includes foreign currency gains and losses, if any, related to our activities in Europe and certain contracts denominated in foreign currencies. Included in other expense in 2011 is a milestone payment of \$810,000 to our former lenders that was paid in connection with our February 2011 registered direct offering, 75% of which was settled in shares of common stock. Also, in February 2011, we issued warrants to purchase common stock that are classified as liabilities, with changes in market value reflected as either other income or expense. For the six months ended June 30, 2011, net other expense of \$78,000 was recorded from the changes in the warrant liability.

Liquidity and Capital Resources

Our sources of liquidity include our cash balances and available-for-sale securities. At June 30, 2011, we had \$4.7 million in cash and cash equivalents and \$16.2 million in available-for-sale securities. We have primarily financed our operations through equity and debt financings. We conduct all of our operations through our wholly-owned subsidiary, ABT Holding Company. Consequently, our ability to fund our operations depends on ABT Holding Company's financial condition and its ability to make dividend payments or other cash distributions to us. There are no restrictions such as government regulations or material contractual arrangements that restrict the ability of ABT Holding Company to make dividend and other payments to us.

In February 2011, we completed a registered direct offering of 4,366,667 shares of common stock and five-year warrants to purchase 1,310,000 shares of common stock with an exercise price of \$3.55 per share, generating net proceeds of \$11.9 million. The securities were sold in multiples of a fixed combination of one share of common stock and a warrant to purchase 0.3 of a share of common stock at an offering price of \$3.00 per fixed combination.

Table of Contents

Our former lenders have a right to receive a milestone payment of \$1.44 million as of June 30, 2011, after taking into account a payment of \$810,000 in conjunction with our February 2011 registered direct offering. Further payments will be made upon the occurrence of certain events as follows: (1) the entire amount upon (a) the merger with or into another entity where our stockholders do not hold at least a majority of the voting power of the surviving entity, (b) the sale of all or substantially all of our assets, or (c) our liquidation or dissolution; or (2) a portion of the amount from proceeds of equity financings not tied to specific research and development activities that are part of a research or development collaboration, in which case, the lenders will receive an amount equal to 10% of proceeds above \$5.0 million in cumulative gross proceeds until the milestone amount is paid in full. The milestone payment is payable in cash, except that if the milestone event is (2) above, we may elect to pay 75% of the milestone in shares of common stock at the per-share offering price. In connection with the registered direct offering in February 2011, the former lenders were entitled to a milestone payment under this commitment in the amount of \$810,000, of which \$202,500 was paid in cash and \$607,500 was paid through the issuance of our common stock at \$2.96 per share in February 2011. The former lenders also received warrants to purchase 149,026 shares of common stock with an exercise price of \$5.00 upon the closing of our equity offering in June 2007. The exercise of such warrants could provide us with cash proceeds. No warrants were exercised as of June 30, 2011.

Under the terms of our agreement with Pfizer, we receive research funding and support, and we are also eligible to receive milestone payments of up to \$105 million upon the successful achievement of certain development, regulatory and commercial milestones, though there can be no assurance that we will achieve any milestones. No significant milestone payments have been received as of June 30, 2011. Pfizer pays us for manufacturing product for clinical development and commercialization purposes. Pfizer has responsibility for development, regulatory and commercialization and will pay us tiered royalties on worldwide commercial sales of MultiStem IBD products. Alternatively, in lieu of royalties and certain commercialization milestones, we may elect to co-develop with Pfizer and the parties will share development and commercialization expenses and profits/losses on an agreed basis beginning at Phase III clinical development.

In connection with our MultiStem collaboration with Angiotech, upon the successful achievement of specified clinical development and commercialization milestones, we may also receive up to \$63.75 million of aggregate cash payments and \$3.75 million from an additional equity investment, though there can be no assurance that we will achieve any milestones. No milestone payments have been received as of June 30, 2011. Under the terms of the collaboration, the parties are jointly funding clinical development activity, whereby preclinical costs are borne solely by us, costs for Phase I and Phase II clinical trials are borne 50% by us and 50% by Angiotech, costs for the first Phase III clinical trial will be borne 33% by us and 67% by Angiotech, and costs for any subsequent Phase III clinical trial will be borne 25% by us and 75% by Angiotech. Upon product commercialization, we will receive nearly half of the net profits from the sale of any jointly developed, approved products. In April 2011, the court approved Angiotech's plan for recapitalization through its voluntary filing under the Companies Creditors Arrangement Act in Canada, under which our prepetition claims for reimbursement were settled resulting in a \$114,000 loss. Although Angiotech has assumed the collaboration agreement in the bankruptcy proceedings, in the event that Angiotech fails to fund its ongoing obligations under the terms of the collaboration agreement, our net costs for subsequent AMI clinical trials would increase or alternative funding would be required for such clinical trials. However, under these circumstances, Angiotech would be deemed to have opted out of continued development, losing rights to such product candidate or such failure could constitute a breach that would be the basis for termination of the collaboration agreement by Athersys.

Under the terms of our RTI agreement, we received \$3.0 million of guaranteed license fee payments and are entitled to \$2.0 million of license fee payments contingent on future events. We are also eligible to receive an additional \$35.5 million in cash payments upon the successful achievement of certain development and commercial milestones, though there can be no assurance that we will achieve any milestones. No milestone payments have been received as of June 30, 2011. In addition, we will receive tiered royalties on worldwide commercial sales of implants using our technologies.

We will remain entitled to receive license fees for targets that were delivered to Bristol-Myers Squibb under our completed 2001 collaboration, as well as milestone payments and royalties on compounds developed by Bristol-Myers

Squibb using our technology, though there can be no assurance that we will achieve any milestones or royalties. As of June 30, 2011, we have received an aggregate amount of \$2.0 million in milestone payments and \$8.4 million in license fees since inception under the collaboration with Bristol-Myers Squibb.

Our available-for-sale securities typically include U.S. government obligations, corporate debt securities, fixed income mutual funds and corporate securities. As of June 30, 2011, approximately 80% of our investments were in U.S. government obligations, including government-backed agencies, and 12% of our investments were in a fixed income mutual fund. We have been investing conservatively due to the ongoing economic conditions and have prioritized liquidity and the preservation of principal in lieu of potentially higher returns. As a result, we have experienced no losses on the principal of our investments and have held our investments until maturity. Also, although these unfavorable market and economic conditions have resulted in a decrease to our market capitalization, there has been no impairment to the value of our assets. Our fixed assets are used for internal research and development and, therefore, are not impacted by these external factors.

Table of Contents

We will require substantial additional funding in order to continue our research and product development programs, including preclinical testing and clinical trials of our product candidates. We expect to have available cash to fund our operations at least through mid-2012 based on our current business and operational plans and assuming no new financings or collaborations. Our capital requirements beyond that will depend on a number of factors, including scientific progress in our research and development programs, additional personnel costs, progress in preclinical testing and clinical trials, and the costs in filing and prosecuting patent applications and enforcing patent claims. Further, these requirements may change at any time due to technological advances or competition from other companies. We will continue to explore and consider new opportunities for funding our operations and activities through grants and business partnerships involving our technologies and product candidates, as well as selling equity securities and possibly borrowings from financial institutions. We cannot assure you that adequate funding will be available to us or, if available, that it will be available on acceptable terms. Any shortfall in funding could result in our having to curtail research and development efforts.

We expect to continue to incur substantial losses through at least the next several years and may incur losses in subsequent periods. The amount and timing of our future losses are highly uncertain. Our ability to achieve and thereafter sustain profitability will be dependent upon, among other things, successfully developing, commercializing and obtaining regulatory approval or clearances for our technologies and products resulting from these technologies. Net cash used in operating activities was \$5.8 million for both the six months ended June 30, 2011 and the six months ended June 30, 2010, and represented the use of cash in both funding preclinical and clinical product development activities. We expect that net cash used in operating activities will increase for the remainder of 2011 in connection with increased research and development expenses of our MultiStem clinical trials.

Net cash used in investing activities was \$3.4 million for the six months ended June 30, 2011 and \$2.9 million for the six months ended June 30, 2010. The fluctuations from period to period were due to the timing of purchases and maturity dates of investments and the purchase of equipment. Purchases of equipment were \$377,000 and \$323,000 for the second quarter of 2011 and 2010, respectively. We expect that our capital equipment expenditures will continue at similar levels in 2011 compared to 2010.

Net cash provided from financing activities was \$11.8 million for the six months ended June 30, 2011 and \$0 for the six months ended June 30, 2010 as a result of our February 2011 registered direct offering.

Investors in our February 2011 registered offering received five-year warrants to purchase an aggregate of 1,310,000 shares of common stock with an exercise price of \$3.55 per share. The exercise of such warrants could provide us with cash proceeds. No warrants have been exercised at June 30, 2011.

Investors in our equity offering in June 2007 received five-year warrants to purchase an aggregate of 3,250,000 shares of common stock with an exercise price of \$6.00 per share. The lead investor in the June offering received additional five-year warrants to purchase an aggregate of 500,000 shares of common stock with a cash or cashless exercise price of \$6.00 per share. The placement agents for the June 2007 offering received five-year warrants to purchase an aggregate of 1,093,525 shares of common stock with a cash or cashless exercise price of \$6.00 per share. Also, investors that participated in a bridge financing in 2006 received in the June 2007 offering five-year warrants to purchase an aggregate of 132,945 shares of common stock with an exercise price of \$6.00 per share. The exercise of such warrants could provide us with cash proceeds. No warrants have been exercised at June 30, 2011.

We have no off-balance sheet arrangements.

Critical Accounting Policies and Management Estimates

The SEC defines critical accounting policies as those that are, in management's view, important to the portrayal of our financial condition and results of operations and demanding of management's judgment. Our discussion and analysis of financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles, or GAAP. The preparation of these financial statements requires us to make estimates on experience and on various assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates. A description of these accounting policies and estimates is included in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended

December 31, 2010. There have been no material changes in our accounting polices and estimates as described in our Annual Report. For additional information regarding our accounting policies, see Note B to the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2010.

Table of Contents**Recently Issued Accounting Standards**

In September 2009, Accounting Standards Codification, or ASC, 605-25, *Multiple-Element Arrangements*, was updated (Accounting Standards Update, or ASU, No. 2009-13) related to revenue recognition for arrangements with multiple elements. The revised guidance provides for two significant changes to the existing guidance, the first relates to the determination of when the individual deliverables included in a multiple-element arrangement may be treated as separate units of accounting, which will likely result in the requirement to separate more deliverables within an arrangement leading to less revenue deferral. The second change modifies the manner in which the transaction consideration is allocated across the separately identified deliverables. Together, these changes are likely to result in earlier recognition of revenue for multiple-element arrangements than under previous guidance. The new guidance also significantly expands the disclosures required for multiple-element revenue arrangements. The new guidance was effective for us for new arrangements or modifications to existing arrangements entered into on or after January 1, 2011 and had no effect on our financial statements for the three and six months ended June 30, 2011. The adoption of this new guidance may have the potential effect of less future revenue deferral for new collaborations than we have historically experienced.

In March 2010, ASC 605-28, *Milestone Method of Revenue Recognition*, was amended (ASU No. 2010-17) related to the ratification of the application of the proportional performance model of revenue recognition when applied to milestones in research and development arrangements. Accordingly, the consensus states that an entity can make an accounting policy election to recognize a payment that is contingent upon the achievement of a substantive milestone in its entirety in the period in which the milestone is achieved. The new guidance was effective for us for new arrangements entered into on or after January 1, 2011. The adoption of this guidance had no effect on our financial statements, since we have been historically recognizing milestone revenue consistent with this guidance.

Cautionary Note on Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties. These forward-looking statements relate to, among other things, the expected timetable for development of our product candidates, our growth strategy, and our future financial performance, including our operations, economic performance, financial condition, prospects, and other future events. We have attempted to identify forward-looking statements by using such words as anticipates, believes, can, continue, could, estimates, expects, intends, may, plans, potential, should, will, or other similar terms. These forward-looking statements are only predictions and are largely based on our current expectations. These forward-looking statements appear in a number of places in this Quarterly Report on Form 10-Q.

In addition, a number of known and unknown risks, uncertainties, and other factors could affect the accuracy of these statements. Some of the more significant known risks that we face are the risks and uncertainties inherent in the process of discovering, developing, and commercializing products that are safe and effective for use as human therapeutics, including the uncertainty regarding market acceptance of our product candidates and our ability to generate revenues. These risks may cause our actual results, levels of activity, performance, or achievements to differ materially from any future results, levels of activity, performance, or achievements expressed or implied by these forward-looking statements.

Other important factors to consider in evaluating our forward-looking statements include:

- the possibility of delays in, adverse results of and excessive costs of the development process;
- our ability to successfully initiate and complete clinical trials;

Table of Contents

changes in external market factors;
changes in our industry's overall performance;
changes in our business strategy;
our ability to protect our intellectual property portfolio;
our possible inability to realize commercially valuable discoveries in our collaborations with pharmaceutical and other biotechnology companies;
our ability to meet milestones under our collaboration agreements;
our collaborators' ability to continue to fulfill their obligations under the terms of our collaboration agreements, including Angiotech;
our possible inability to execute our strategy due to changes in our industry or the economy generally;
changes in productivity and reliability of suppliers;
the success of our competitors and the emergence of new competitors; and
those risks set forth in Item 1A (Risk Factors), as found in our Annual Report on Form 10-K for the year ended December 31, 2010.

Although we currently believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee our future results, levels of activity or performance. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. You are advised, however, to consult any further disclosures we make on related subjects in our reports on Forms 10-Q, 8-K and 10-K furnished to the SEC. You should understand that it is not possible to predict or identify all risk factors. Consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Interest Rate Risk

Our exposure to interest rate risk is related to our investment portfolio and our borrowings. Fixed rate investments and borrowings may have their fair market value adversely impacted from changes in interest rates. Due in part to these factors, our future investment income may fall short of expectations. Further, we may suffer losses in investment principal if we are forced to sell securities that have declined in market value due to changes in interest rates. We invest our excess cash primarily in debt instruments of the U.S. government and its agencies, corporate debt securities, fixed income mutual funds, and a corporate security. As of June 30, 2011, approximately 80% of our investments were in U.S. government obligations, including government-backed agencies, and 12% of our investments were in a fixed income mutual fund. We have been investing conservatively due to the current economic conditions and have prioritized liquidity and the preservation of principal in lieu of potentially higher returns. As a result, we have experienced no losses on the principal of our investments.

We enter into loan arrangements with financial institutions when needed and when available to us. At June 30, 2011, we had no borrowings outstanding.

Item 4. Controls and Procedures.

Disclosure controls and procedures

Our management, under the supervision of and with the participation of our Chief Executive Officer and our Vice President of Finance, has evaluated the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as of the end of the period covered by this quarterly report on Form 10-Q. Based upon this evaluation, our Chief Executive Officer and Vice President of Finance have concluded that, as of the end of the period covered by this quarterly report on Form 10-Q, our disclosure controls and procedures were effective.

Changes in internal control over financial reporting

During the second quarter of 2011, there has been no change in our internal control over financial reporting (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
