**Approximate Date of Commencement of Proposed sale to the Public:**

From time to time after the effective date of this registration statement.

If the only securities being registered on this Form are being offered pursuant to dividend or interest reinvestment plans, please check the following box

If any of the securities being registered on this form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, as amended, other than securities offered only in connection with dividend or interest reinvestment plans, check the following box.

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If delivery of the prospectus is expected to be made pursuant to Rule 434, check the following box.

**CALCULATION OF REGISTRATION FEE**

Title of Each Class of	Amount To	Proposed Maximum	Proposed Maximum Aggregate	Amount of
------------------------	-----------	---------------------	----------------------------------	-----------

Edgar Filing: ELECTRIC CITY CORP - Form S-3

Securities to be Registered	Be Registered (1)	Offering Price Per Share (2)	Offering Price (2)	Registration Fee
Common Stock, par value \$0.0001	14,369,457	\$ 0.79	\$11,351,871	\$ 1,336

(1) In the event of a stock split, stock dividend or similar transaction involving the common stock of the registrant, in order to prevent dilution, the number of shares of common stock registered hereby shall be automatically adjusted to cover the additional shares of common stock in accordance with Rule 416 under the Securities Act of 1933, as amended.

(2) Estimated in accordance with Rule 457(c) under the Securities Act of 1933, as amended, solely for the purpose of calculating the registration fee based on the average of the high and low sale prices of the common

stock of Electric  
City Corp.  
reported on the  
American Stock  
Exchange on  
September 29,  
2005.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

*The information in this prospectus is not complete and may be changed. These securities may not be sold until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.*

**Subject to completion, dated October 3, 2005**

**PROSPECTUS**

**ELECTRIC CITY CORP.**

**14,369,457 Shares of Common Stock**

This prospectus relates to up to 14,369,457 shares of our common stock, par value \$0.0001 per share, which may be offered for sale by selling stockholders named in this prospectus. The selling stockholders can sell these shares on any exchange on which the shares are listed, in privately negotiated transactions or by any other legally available means, whenever they decide and at the prices they set. We may issue up to 3,135,000 of these shares upon exercise of common stock warrants issued by the Company held by some of the selling stockholders. We will not receive any of the proceeds from the sale of these shares of our common stock, but will receive proceeds from the exercise of any of such warrants.

Our common stock is quoted on the American Stock Exchange under the symbol ELC. On September 29, 2005, the closing sale price for shares of our common stock was \$0.81 per share.

Our principal executive office is located at 1280 Landmeier Road, Elk Grove Village, Illinois, 60007. Our telephone number at that address is (847) 437-1666. Our web site is located at <http://www.elccorp.com>.

*Investing in our common stock involves risks described beginning on page 5.*

*Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.*

The date of this prospectus is October 3, 2005.

**ABOUT THIS PROSPECTUS**

This prospectus is a part of a registration statement that we have filed with the Securities and Exchange Commission ( SEC or Commission ) using a shelf registration process. You should rely only on the information provided in this prospectus or any supplement or amendment. We have not authorized anyone else to provide you with additional or different information. You should not assume that the information in this prospectus or any supplement or amendment is accurate as of any date other than the date on the front of this prospectus or any supplement or amendment.

Unless the context otherwise requires, Electric City, the Company, we, our, us and similar expressions refers Electric City Corp. and its subsidiaries, and the term Common Stock means Electric City Corp. s common stock, par value \$0.0001 per share.

**WHERE YOU CAN FIND MORE INFORMATION**

We file reports, proxy statements and other information with the SEC. Information filed with the SEC by us can be inspected and copied at the public reference room maintained by the SEC at Headquarters Office, 100 F Street, N.E., Room 1580, Washington, D.C. 20549. You may also obtain copies of this information by mail from the Public Reference Section of the SEC, Headquarters Office, 100 F Street, N.E., Room 1580, Washington, D.C. 20549, at prescribed rates. Further information on the operation of the SEC s public reference room in Washington, D.C. can be obtained by calling the SEC at 1-800-SEC-0330.

The SEC also maintains a web site that contains reports, proxy statements and other information about issuers, such as us, who file electronically with the SEC. The address of that site is <http://www.sec.gov>.

Our Common Stock is listed on the American Stock Exchange (AMEX: ELC), and reports, proxy statements and other information concerning us can also be inspected at the offices of the American Stock Exchange at 86 Trinity Place, New York, New York 10006. Our web site address is <http://www.elccorp.com>. The information on our web site, however, is not, and should not be deemed to be, a part of this prospectus.

**INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE**

The rules of the SEC allow us to incorporate by reference information into this prospectus, which means that we can disclose important information to you by referring you to another document filed separately with the SEC. The information incorporated by reference is deemed to be part of this prospectus, and later information that we file with the SEC will automatically update and supersede that information. This prospectus incorporates by reference the documents set forth below that we have previously filed with the SEC. These documents contain important information about us.

our Annual Report on Form 10-K for the year ended December 31, 2004 (filed with the SEC on March 31, 2005);

the first amendment to our Annual Report on Form 10-K/A for the year ended December 31, 2004 (filed with the SEC on April 13, 2005);

Telephone: (847) 437-1666

You should rely only on the information provided or incorporated by reference in this prospectus or in the applicable supplement to this prospectus. You should not assume that the information in this prospectus and the applicable supplement is accurate as of any date other than the date on the front cover of the document.

**CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS**

This prospectus includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that reflect our current expectations and projections about our future results, performance, prospects and opportunities. We have tried to identify these forward-looking statements by using words such as may, should, expect, hope, anticipate, believe, intend, plan, estimat expressions. These forward-looking statements are based on information currently available to us and are subject to a number of risks, uncertainties and other factors, including the factors set forth under Risk Factors, that could cause our actual results, performance, prospects or opportunities in 2005 and beyond to differ materially from those expressed in, or implied by, these forward-looking statements. These factors include, without limitation, our limited operating

history, our history of operating losses, fluctuations in retail electricity rates, our

I-2

---

**Table of Contents**

reliance on licensed technologies, customers' acceptance of our new and existing products, the risk of increased competition, our ability to successfully integrate acquired businesses, products and technologies, our ability to manage our growth, our need for additional financing and the terms and conditions of any financing that is consummated, the possible volatility of our stock price, the concentration of ownership of our stock and the potential fluctuation in our operating results. Although we believe that the expectations reflected in these forward-looking statements are reasonable and achievable, such statements involve risks and uncertainties and no assurance can be given that the actual results will be consistent with these forward-looking statements. Except as otherwise required by Federal securities laws, we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or any other reason, after the date of this prospectus.

**PROSPECTUS SUMMARY**

The following summary is qualified in its entirety by the more detailed information appearing elsewhere in this prospectus.

**Our Company**

We were organized as Electric City LLC, a Delaware limited liability company, on December 5, 1997. On June 5, 1998 we merged Electric City LLC with and into Electric City Corp., a Delaware corporation. On June 10, 1998, we issued approximately six (6%) percent of our then issued and outstanding Common Stock to the approximately 330 stockholders of Pice Products Corporation ( "Pice" ), an inactive, unaffiliated company with minimal assets, pursuant to the merger of Pice with and into Electric City. This merger facilitated the establishment of a public trading market for our Common Stock. Trading in our Common Stock commenced on August 14, 1998 through the OTC Bulletin Board under the trading symbol "ECCC". Since December 12, 2000, our Common Stock has traded on the American Stock Exchange under the trading symbol "ELC".

**Our Products**

We are a developer, manufacturer and integrator of energy saving technologies and building automation controls as well as an independent developer of scalable, negative power systems. Our premier energy saving product is the EnergySaver system, which reduces energy consumed by lighting, typically by 20% to 30%, with minimal lighting level reduction. This technology has been installed in applications in commercial buildings, factories and office structures, as well as street lighting and parking lot lighting. Our GlobalCommander integrates with the EnergySaver allowing us to link multiple EnergySaver units together and to provide remote communications, measurement and verification of energy savings. The combined technology of the EnergySaver and GlobalCommander led to the development of our Virtual Negawatt Power Plan ( "VNPP" ), which is essentially a negative power system which we market primarily to utilities as a demand response system, although we have not yet recognized any revenue from our VNPP efforts. Demand response is a program whereby users of electricity voluntarily reduce their usage of electricity when so requested by their electric utility. The users typically accomplish this by turning off machinery, lights or air conditioning equipment. The problem with such voluntary load reduction programs is that utilities cannot always count on their customers to reduce their demand when they are requested to do so. By utilizing our EnergySaver system in conjunction with a GlobalCommander, a utility company can reduce demand in lighting applications remotely without the end users' involvement and in most cases without the end user noticing a reduction in the lighting levels. The measurement and verification capabilities of the GlobalCommander also

**Table of Contents**

reports to the utility the actual amount of demand reduction achieved. Our VNPP program involves installation of EnergySavers and GlobalCommanders in a number of end user sites within a utility's territory, thereby allowing the utility to reliably reduce electric demand when needed. We sometimes refer to such a system as a negative power system because it permits the utility to reduce the need to supply electric power. Thus, by paying us for the ability to reduce demand when needed, the utility can avoid investing in additional generating capacity and transmission and distribution equipment. It can also reduce its need to purchase power in the wholesale spot market where prices for power sometimes exceed the amount it can charge its customers. The use of our equipment can also mitigate the risk of brown out or black out, when for whatever reason the utility cannot produce, deliver and/or purchase for resale all the power that its customers need.

In addition to our EnergySaver system, we also provide, through our subsidiary, Great Lakes Controlled Energy Corporation, a Delaware corporation (Great Lakes), integrated building and environmental control solutions for commercial and industrial facilities. Building and environmental control systems are networks of sensors and actuators controlled by a central computer. The sensors monitor building environmental conditions, such as temperature, humidity and light levels and will turn on and off heating units, chillers, pumps, lights, or other equipment as needed to maintain environmental conditions within a desired range. The systems also report to the central operator when there is a problem with any of the equipment on the network or when any of the monitored conditions fall outside of preset limits.

On May 3, 2005 we acquired Maximum Performance Group, Inc. (MPG), a technology based provider of energy and asset management products and services. MPG currently manufactures and markets its eMAC line of controllers for HVAC and lighting applications. The eMAC line of controllers provide intelligent control and continuous monitoring of HVAC and lighting equipment via wireless paging technology to reduce energy usage and improve system reliability. We hope to integrate the eMAC line of HVAC controllers into our VNPP offering, thereby allowing us to control additional electric load from new and existing customers. In order to include the eMAC in our VNPP, we will have to make some modifications to its software and perhaps to its hardware. We hope to have a new version of the eMAC available for use in the VNPP before the end of 2005.

Until June 1, 2003, we also manufactured custom electrical switchgear through Switchboard Apparatus Inc. (Switchboard), a wholly owned subsidiary located in Broadview, Illinois. In an effort to refocus our resources and shed the continuing losses from the switchgear business, we sold the operating assets of Switchboard to a group of investors, including the President of Switchboard, effective as of May 31, 2003.

Our EnergySaver product line is manufactured at our facilities in Elk Grove Village, Illinois, with manufacturing and assembly scaled to order demand. Building and environmental control services and solutions provided by Great Lakes are based out of a separate facility also located in Elk Grove Village, Illinois. Maximum Performance Group has offices in College Point, New York and San Diego, California, but contracts for the manufacturing of its hardware products with third party contract manufacturers.

Giorgio Reverberi has patented in the United States and Italy certain technologies underlying the EnergySaver products. We have entered into a license agreement and series of agreements with Mr. Reverberi and our founder, Mr. Joseph Marino, relating to the license of the EnergySaver technology in the United States and certain other markets. We own all the patents and trademarks related to MPG's products.

**Table of Contents**

We are pursuing a multi-channel marketing and sales distribution strategy to bring our energy saving products to market. Our multi-channel approach includes the use of a direct sales force, distributors and manufacturers representatives.

**The Offering**

Securities Offered. The selling stockholders are offering up to 14,369,457 shares of our Common Stock.

Terms of the Offering. We have agreed to use our best efforts to keep this registration statement effective until the earlier of (a) the date on which all the shares of the selling stockholders registered under this registration statement have been sold by the selling shareholders and (b) the later of November 3, 2007 or the date on which all the shares of the selling stockholders registered under this registration statement may be sold without volume restrictions pursuant to Rule 144(k) under the Securities Act.

Use of Proceeds. We will not receive any of the proceeds from any sale of the shares offered by this prospectus by the selling stockholders. To the extent the selling stockholders exercise their warrants we intend to use the proceeds we receive from such exercise(s) for general corporate purposes.

American Stock Exchange Symbol. ELC

**RISK FACTORS**

The following disclosure of risk factors includes all material risks known to us at this time. Additional risks we are not presently aware of or that we currently believe are immaterial may prove to impair our business and financial performance. Our business could be harmed by any of these risks, whether stated or unstated. We operate in a continually changing business environment and may as a result enter into new businesses and product lines. We cannot predict new risk factors that may arise in the future, and we cannot assess the impact, if any, of these new risk factors on our businesses or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those projected in any forward-looking statements. Accordingly, you should not rely on forward-looking statements as a prediction of actual results. In addition, our estimates of future operating results are based on our current complement of businesses, which is subject to change as we continue to assess and refine our business strategy. If any of the following risks actually occur, our business, results of operations, and financial condition could be adversely affected in a material manner and could negatively affect the value of your investment.

**Table of Contents**

**Risks Related to Our Business**

***We have a limited operating history upon which to evaluate our potential for future success.***

We were formed in December 1997. To date, we have generated limited revenues from the sale of our products and do not expect to generate significant revenues until we sell a significantly larger number of our products. Accordingly, we have only a limited operating history upon which you can base an evaluation of our business and prospects. The likelihood of our success must be considered in light of the risks and uncertainties frequently encountered by early stage companies like ours in an evolving market. If we are unsuccessful in addressing these risks and uncertainties, our business will be materially harmed.

***We have incurred significant operating losses since inception and may not achieve or sustain profitability in the future.***

We have experienced operating losses and negative cash flow from operations since our inception and we currently have an accumulated deficit. These factors raise substantial doubt about our ability to continue as a going concern. Our ability to continue as a going concern is ultimately dependent on our ability to obtain additional funding and increase sales to a level that will allow us to operate profitably and sustain positive operating cash flows. We are continuing our efforts to improve profitability through expansion of our business in both current and new markets. We must overcome significant manufacturing hurdles, including gearing up to produce large quantities of product or arranging to outsource the production of our products, and marketing hurdles, including market acceptance, in order to sell large quantities of our products. In addition, we may be required to reduce the prices of our products in order to increase sales. If we reduce product prices, we may not be able to reduce product costs sufficiently to achieve acceptable profit margins. As we strive to grow our business, we expect to spend significant funds (1) for general corporate purposes, including working capital, marketing, recruiting and hiring additional personnel; and (2) for research and development. To the extent that our revenues do not increase as quickly as these costs and expenditures, our results of operations and liquidity will be materially adversely affected. If we experience slower than anticipated revenue growth or if our operating expenses exceed our expectations, we may not achieve profitability. Even if we achieve profitability in the future, we may not be able to sustain it.

Our auditors have modified their opinion to our audited financial statements for the year ended December 31, 2004 to include an emphasis paragraph, stating that our continuing losses and negative cash flow from operations raise substantial doubt about our ability to continue as a going concern. Our management has developed a plan that includes among other things, raising additional capital to fund operations until our sales and internally generated cash flow can support our ongoing operations. If we are unsuccessful in raising additional capital our ability to continue to operate as a going concern could be in doubt.

***Our independent registered public accountants have issued a going concern opinion raising doubt about our financial viability.***

As a result of our continuing losses and negative cash flows, our independent registered public accounting firm, BDO Seidman, LLP, issued a going concern opinion in connection with their audit of our financial statements for the year ended December 31, 2004. This opinion expressed substantial doubt as to our ability to continue as a going concern. The going concern opinion could have an adverse impact on our ability to execute our business plan, result in the reluctance on the part of certain suppliers to do business with us, or result in the the inability to obtain new business due to potential customers concern about our ability to deliver product.

**Table of Contents*****The loss of any significant customer could materially and adversely affect our results of operations and financial condition.***

We have historically derived a significant portion of our annual revenue from a limited number of customers. With our new focus on utility programs our dependence on a small number of customers for our revenue may become even greater. During the year ended December 31, 2004 two customers accounted for 46% and 11% of the Company's consolidated revenue, respectively. Four customers accounted for 26%, 15%, 12% and 10% of the Company's consolidated revenue, respectively, during the year ended December 31, 2003, and four customers accounted for 22%, 16%, 11% and 10% of the Company's consolidated revenue, respectively, during the year ended December 31, 2002. Of the customers accounting for more than 10% of the Company's consolidated sales in 2004, one also accounted for more than 10% of consolidated sales in 2003, and of the customers accounting for more than 10% of the Company's consolidated sales in 2003, one also accounted for more than 10% of consolidated sales in 2002. The loss of a significant customer could have a significant negative effect on our results of operations and financial condition.

***A decrease in electric retail rates could lessen demand for our EnergySaver products.***

Our principal products, our EnergySaver and eMAC products, have the greatest profit potential in areas where commercial electric rates are relatively high. However, retail electric rates for commercial establishments in the United States may not remain at their current levels. Due to a potential overbuilding of power generating stations in certain regions of the United States, wholesale power prices may decrease in the future. Because the price of commercial retail electric power is largely attributed to the wholesale cost of power, it is reasonable to expect that commercial retail rates may decrease as well. In addition, much of the wholesale cost of power is directly related to the price of certain fuels, such as natural gas, oil and coal. If the prices of those fuels decrease, the prices of the wholesale cost of power may also decrease. This could result in lower electric retail rates and reduced demand for energy saving devices such as our EnergySaver products.

***We have a license under certain patents and our ability to sell our products may be adversely impacted if the license expires or is terminated.***

We have entered into a license agreement with Messrs. Giorgio Reverberi and Joseph Marino with regard to the core technology used in our EnergySaver product. Mr. Reverberi holds a U.S. patent and has applied for several patents in other countries. Pursuant to the terms of the license, we have been granted the exclusive right to manufacture and sell products containing the load reduction technology claimed under Mr. Reverberi's U.S. patent or any other related patent held by him in the U.S., the remainder of North America, parts of South America and parts of Africa. However, the exclusive rights that we received may not have any value in territories where Mr. Reverberi does not have or does not obtain protectable rights. The term of the license expires when the last of these patents expires. We expect that these patents will expire around November 2017. The license agreement may be terminated if we materially breach its terms and fail to cure the breach within 180 days after we are notified of the breach. If our license is terminated it could impact our ability to manufacture, sell or otherwise commercialize products in those countries where Mr. Reverberi holds valid patents relating to our products, including the United States.

**Table of Contents**

***If we are not able to protect our intellectual property rights against infringement, or if others obtain intellectual property rights relating to energy management technology, we could lose our competitive advantage in the energy management market.***

We regard our intellectual property rights, such as patents, licenses of patents, trademarks, copyrights and trade secrets, as important to our success. Although we entered into confidentiality and rights to inventions agreements with our non-union employees and consultants during March 2001 (and non-union employees hired since March 2001 have also signed these agreements), the steps we have taken to protect our intellectual property rights may not be adequate. Third parties may infringe or misappropriate our intellectual property rights or we may not be able to detect unauthorized use and take appropriate steps to enforce our rights. Failure to take appropriate protective steps could materially adversely affect any competitive advantage we may have in the energy management market. Furthermore, our license to use Mr. Reverber's patents may have little or no value to us if Mr. Reverber's patents are not valid. In addition, patents held by third parties may limit our ability to manufacture, sell or otherwise commercialize products and could result in the assertion of claims of patent infringement against us. If that were to happen, we could try to modify our products to be non-infringing, but we might not be successful or such modifications might not avoid infringing on the intellectual property rights of third parties.

Claims of patent infringement against us, regardless of merit, could result in the expenditure of significant financial and managerial resources by us. We may be forced to seek to enter into license agreements with third parties (other than Mr. Reverber) to resolve claims of infringement by our products of the intellectual property rights of third parties. These licenses may not be available on acceptable terms or at all. The failure to obtain such licenses on acceptable terms could have a negative effect on our business.

***The loss of key personnel may harm our ability to obtain and retain customers, manage our growth and compete effectively.***

Our future success will depend significantly upon the continued contributions of certain members of our senior management, including John P. Mitola, our Chief Executive Officer, because we believe he is critical to obtaining and retaining customers, managing our growth and the future development of our VNPP concept. Our future success will also depend upon our ability to attract and retain highly qualified technical, operating and marketing personnel. We believe that there is intense competition for qualified personnel in the energy management industry. If we cannot hire, train and retain qualified personnel or if a significant number of our current employees depart, we may be unable to successfully manufacture and market our products.

***If we are unable to manage our growth, it will adversely affect our business, the quality of our products and our ability to attract and retain key personnel.***

We are subject to the risks inherent in the expansion and growth of a business enterprise. Growth in our business will place a strain on our operational and administrative resources and increase the level of responsibility for our existing and new management personnel. To manage our growth effectively, we will need to:

    further develop and improve our operating, information, accounting, financial and other internal systems and controls on a timely basis;

    improve our business development, marketing and sales capabilities; and

    expand, train, motivate and manage our employee base.

**Table of Contents**

Our current senior management has limited experience managing a publicly traded company. Our systems currently in place may not be adequate if we continue to grow and may need to be modified and enhanced. The skills of management currently in place may not be adequate if we experience significant growth.

***If our management fails to properly identify companies to acquire and to effectively negotiate the terms of these acquisition transactions, our growth may be impaired.***

As part of our growth strategy we intend to seek to acquire companies with complementary technologies, products and/or services. Our management, including our Board of Directors, will have discretion in identifying and selecting companies to be acquired by us and in structuring and negotiating these acquisitions. In general, our Common Stockholders may not have the opportunity to approve these acquisitions. (The holders of Series E Convertible Preferred Stock have certain rights to approve acquisitions.) In addition, in making acquisition decisions, we will rely, in part, on financial projections developed by our management and the management of potential target companies. These projections will be based on assumptions and subjective judgments. The actual operating results of any acquired company or the combination of us and an acquired company may fall significantly short of projections.

We may be unable to acquire companies that we identify as targets for various reasons, including:  
our inability to interest such companies in a proposed transaction;

our inability to agree on the terms of an acquisition;

incompatibility between our management and management of a target company; and

our inability to obtain required approvals of the holders of the Series E Convertible Preferred Stock.

If we cannot consummate acquisitions on a timely basis or agree on terms at all, or if we cannot continue to acquire companies with complementary technologies, products and/or services on terms acceptable to us, our future growth may be impaired.

***Our growth may be impaired and our current business may suffer if we do not successfully address risks associated with acquisitions.***

During our limited operating history, we have acquired three companies; Switchboard Apparatus, Great Lakes Controlled Energy and Maximum Performance Group, Inc., one of which (Switchboard Apparatus) we have subsequently sold. Our future growth may depend, in part, upon our ability to successfully acquire and operate other complementary businesses. We may encounter problems associated with such acquisitions, including the following:

difficulties in integrating acquired operations and products with our existing operations and products;

difficulties in meeting operating expectations for acquired businesses;

diversion of management's attention from other business concerns;

adverse impact on earnings of amortization or write-offs of goodwill and other intangible assets relating to acquisitions; and

issuances of equity securities that may be dilutive to existing stockholders to pay for acquisitions.

**Table of Contents**

***If our products do not achieve or sustain market acceptance, our ability to compete will be adversely affected.***

To date, we have not sold our EnergySaver or eMAC product lines in very large quantities and a sufficient market may not develop for them. Significant marketing will be required in order to establish a sufficient market for these products. The technology underlying these products may not become a preferred technology to address the energy management needs of our customers and potential customers. Failure to successfully develop, manufacture and commercialize products on a timely and cost-effective basis will have a material adverse effect on our ability to compete in the energy management market.

***Failure to meet customers' expectations or deliver expected technical performance could result in losses and negative publicity.***

Customer engagements involve the installation of energy management equipment that we design to help our clients reduce energy/power consumption. We rely on outside contractors to install our EnergySaver and eMAC products. Any defects in this equipment and/or its installation or any other failure to meet our customers' expectations could result in:

delayed or lost revenues due to adverse customer reaction;

requirements to provide additional products and/or services to a customer at no charge;

negative publicity regarding us and our products, which could adversely affect our ability to attract or retain customers; and

claims for substantial damages against us, regardless of whether we have any responsibility for such failure.

***If sufficient additional funding is not available to us, the commercialization of our products and our ability to grow may be hindered.***

Our operations have not generated positive cash flow since the inception of the Company in 1997. We have funded our operations through the issuance of common and preferred stock and secured debt. Our ability to continue to operate until our cash flow turns positive may depend on our ability to continue to raise funds through the issuance of equity or debt. If we are not successful in raising additional funds, we might have to significantly scale back or delay our growth plans, or possibly cease operations altogether. Any reduction or delay in our growth plans could materially adversely affect our ability to compete in the marketplace, take advantage of business opportunities and develop or enhance our products.

***Raising additional capital or consummation of additional acquisitions through the issuance of equity or equity-linked securities could dilute your ownership interest in us.***

It is likely that we will need to obtain additional funds in the future to grow our product development, manufacturing, marketing and sales activities at the pace that we intend, to continue to fund operating losses until our cash flow turns positive, or to fund acquisitions. If we determine that we do need to raise additional capital in the future and we are not successful in doing so, we might have to significantly scale back or delay our growth plans, reduce staff and delay planned expenditures on research and development and capital expenditures in order to continue as a going concern. Any reduction or delay in our growth plans could materially adversely affect our ability to compete in the marketplace, take advantage of business opportunities and develop or enhance our products.

**Table of Contents**

If we receive additional funds through the issuance of equity securities or convertible debt securities, our existing stockholders will likely experience dilution of their present equity ownership position and voting rights. Depending on the number of shares issued and the terms and conditions of the issuance, new equity securities could have rights, preferences, or privileges senior to those of our Common Stock. Depending on the terms, Common Stock holders may not have approval rights with respect to such issuances, although our Series E Convertible Preferred Stock may have such rights.

***Failure to effectively market our energy management products could impair our ability to sell significant quantities of these products.***

One of the challenges we face in commercializing our energy management products is demonstrating the advantages of our products over competitive products. To do this, we will need to further develop our marketing and sales force. In addition to our internal sales force, we rely on third parties to market and sell our products. We currently maintain a number of relationships and have a number of agreements with third parties regarding the marketing and distribution of our EnergySaver products and depend to some degree upon the efforts of these third parties in marketing and selling these products. Maintenance of these relationships is based primarily on an ongoing mutual business opportunity and a good overall working relationship. The current contracts associated with certain of these relationships allow the distributors to terminate the relationship upon 30 days written notice. We recently terminated two distributors for failing to meet their sales quotas. Without these relationships, our ability to market and sell our EnergySaver products could be harmed and we may need to divert even more resources to increasing our internal sales force. If we are unable to expand our internal sales force and maintain our third party marketing relationships, our ability to generate significant revenues may be harmed.

The distribution rights we have granted to third parties in specified geographic territories may make it difficult for us to grow our business in such territories if those distributors do not successfully market and support our products in those territories. We have in the past been, and may in the future be, involved in disputes with distributors that have distribution rights in specified geographic territories but are not achieving our goals. During 2000, we repurchased for cash and stock consideration the distribution rights from three distributors that were not meeting our sales goals. We recently settled a dispute with a former distributor to avoid the cost of further litigation. We may have to expend additional funds, incur debt or issue additional securities in the future to repurchase other distribution rights or pursue legal action to enforce our rights under distributor agreements that we have granted or may grant in the future.

***If our Virtual Negawatt Power Plan concept is unsuccessful, distribution of our EnergySaver product line may be impaired and our growth could suffer.***

During 2001, we announced our Virtual Negawatt Power Plan concept. The VNPP is intended to allow a utility to remotely control commercial, industrial and government lighting systems over a managed and secure IP network. Through the use of the EnergySaver/ GlobalCommander system, a utility will be able to reduce electric demand requirements during periods of peak demand, providing nearly instantaneous control, measurement and verification of load reduction. The successful implementation of the VNPP concept could significantly increase the sales and profitability of our EnergySaver product line and perhaps our eMAC product line. In 2003, we announced an agreement with Commonwealth Edison to implement a 50-Megawatt VNPP system in northern Illinois. A VNPP agreement was executed with ComEd during the third quarter of 2003 and we began installing product under the program in late 2003, but we have not yet recognized revenue under this program.

**Table of Contents**

While we have made progress in implementing this program with ComEd, we still have a number of hurdles to clear related to this program, including securing long term financing for the program and enrolling sufficient customer hosts to provide the targeted curtailment. If we fail to recruit enough customers to participate in the program we may not be able to deliver 50MW of demand curtailment, which would result in less revenue from the program than we expect. If our attempts to advance the VNPP concept are unsuccessful, our plans to significantly increase the distribution of our products may not develop and our growth may be impaired.

***If we do not successfully compete with others in the very competitive energy management market, we may not achieve profitability.***

In the energy management market, we compete with other manufacturers of energy management products that are currently used by our potential customers. Many of these companies have substantially greater financial resources, larger research and development staffs and greater manufacturing and marketing capabilities than us. Our competitors may provide energy management products at lower prices and/or with superior performance. If we are unable to successfully compete with conventional and new technologies our business may be materially harmed.

***Product liability claims could result in losses and could divert our management's time and resources.***

The manufacture and sale of our products creates a risk of product liability claims. Any product liability claims, with or without merit, could result in costly litigation and reduced sales, cause us to incur significant expenses and divert our management's time, attention and resources. We do have product liability insurance coverage; however, there is no assurance that such insurance is adequate to cover all potential claims. The successful assertion of any such claim against us could materially harm our liquidity and operating results.

***Our current internal manufacturing capacity is limited and if demand for our products increases significantly and we are unable to increase our capacity quickly and efficiently our business could suffer.***

Our EnergySaver products are manufactured at our facilities. To be financially successful, we must manufacture our products, including our EnergySaver products, in substantial quantities, at acceptable costs and on a timely basis. While we have produced approximately 1,300 EnergySaver units over the past six years, we have never approached what we believe is our production capacity. To produce larger quantities of our EnergySaver products at competitive prices and on a timely basis, we will have to further develop our processing, production control, assembly, testing and quality assurance capabilities. If our production requirements exceed our internal capacity we plan to contract with outside manufacturers to produce individual components and/or entire EnergySaver units. Since the manufacturing process that we are currently performing only involves the assembly of components manufactured by others, we believe there are many contract manufacturers located across the country that could assemble our EnergySaver product for us with relatively little lead time. We have had discussions with several potential contract manufacturers and they have produced units on a trial basis, but their ability to deliver significant quantities of product in a timely manner with acceptable quality is still unproven. We may be unable to manufacture our EnergySaver products in sufficient volume and may incur substantial costs and expenses in connection with manufacturing larger quantities of our EnergySaver products. If we are unable to make the transition to large-scale commercial production successfully, our business will be negatively affected. We could encounter substantial difficulties if we decide to outsource the manufacturing of our products, including delays in manufacturing and poor production quality.

**Table of Contents**

**Risks Related to this Offering**

***Due to the current market price of our Common Stock, in conjunction with the fact that we are a relatively small company with a history of operating losses, the future trading market for our stock may not be active on a consistent basis, which may make it difficult for you to sell your shares.***

The trading volume of our stock in the future will depend in part on our ability to increase our revenue and reduce or eliminate our operating losses, which should increase the attractiveness of our stock as an investment, thereby leading to a more liquid market for our stock on a consistent basis. If an active and liquid trading market does not exist for our Common Stock, you may have difficulty selling your shares.

***The need to raise additional capital will most likely be dilutive to our current stockholders and could result in new investors receiving rights that are superior to those of existing stockholders.***

Since September 2001, we have issued shares of our preferred stock (including shares issued as dividends) that are currently convertible into 22,933,300 shares of our Common Stock. These shares of preferred stock are currently accruing dividends at the rate of 6% per year, though prior to March 22, 2004 they were accruing at the rate of 10% per year. To date we have issued shares of convertible preferred stock in satisfaction of accrued dividends convertible into 7,139,000 shares of Common Stock. The preferred stockholders all have rights that are superior to the rights of our common stockholders, including:

- § a liquidation preference of \$200 per share (under our Series E Preferred which was issued on March 22, 2004 in a 1 for 10 exchange for the outstanding Series A, C and D Preferred shares);
- § special approval rights in respect of certain actions by the Company, including any issuance of shares of capital stock by the Company that would have the right to receive dividends or the right to participate in any distribution upon liquidation which will be senior to or equal to the rights of the Series E Preferred (other than to pay dividends on the Series E Preferred and under certain other limited exceptions such as conversion of outstanding convertible securities) and any acquisition, sale, merger, joint venture, consolidation or reorganization involving the Company or any of its subsidiaries;
- § a conversion price that may be below the market price of our Common Stock;
- § the right to elect up to four directors;
- § the right to vote with the holders of Common Stock on an as converted basis on all matters on which holders of our Common Stock are entitled to vote, except with respect to the election of directors (if more than 19,999 shares of Series E Preferred are outstanding) or as otherwise provided by law;
- § a right of first offer on the sale of equity by the Company in a private transaction; and
- § anti-dilution protection that would adjust the conversion price on their preferred shares and the exercise price on their related warrants in the event we issue equity at a price which is less than the conversion price or exercise price of their securities.

These rights associated with our preferred stock are substantially different than the rights of our common stockholders and may materially decrease the value of our Common Stock.

**Table of Contents**

***Due to the concentration of holdings of our stock, three investors may be able to control matters requiring common stockholder approval or could cause our stock price to decline through future sales because they beneficially own a large percentage of our Common Stock.***

There are 53,323,211 shares of our Common Stock outstanding as of September 30, 2005, of which Joseph C. Marino beneficially owns approximately 14%, Richard Kiphart beneficially owns approximately 16% and Security Benefit beneficially owns approximately 14% (each of the aforementioned percentages includes stock options and warrants that are currently exercisable and in the case of Mr. Kiphart include stock issuable upon conversion of Series E Convertible Preferred Stock). As a result of their significant ownership, Mr. Marino, Mr. Kiphart and Security Benefit may have the ability to exercise a controlling influence over our business and corporate actions requiring common stockholder approval, including the election of our directors (other than those directors to be chosen by the holders of our preferred stock), a sale of substantially all of our assets, a merger between us and another entity or an amendment to our certificate of incorporation. This concentration of ownership could delay, defer or prevent a change of control and could adversely affect the price investors might be willing to pay in the future for shares of our Common Stock. Also, in the event of a sale of our business, Mr. Marino and Mr. Kiphart and Security Benefit could elect to receive a control premium to the exclusion of other common stockholders.

A significant percentage of the outstanding shares of our Common Stock, including the shares beneficially owned by Mr. Marino, Mr. Kiphart or Security Benefit, can be sold in the public market from time to time, subject to limitations imposed by Federal securities laws, and in the case of Mr. Kiphart, by trading agreements entered into with us. The market price of our Common Stock could decline as a result of sales of a large number of our presently outstanding shares of Common Stock by Mr. Marino, Mr. Kiphart, Security Benefit or other stockholders in the public market or due to the perception that these sales could occur. This could also make it more difficult for us to raise funds through future offerings of our equity securities.

***Provisions of our charter and by-laws, in particular our blank check preferred stock, could discourage an acquisition of our company that would benefit our stockholders.***

Provisions of our charter and by-laws may make it more difficult for a third party to acquire control of our company, even if a change in control would benefit our stockholders. In particular, shares of our preferred stock have been issued and may be issued in the future without further stockholder approval and upon those terms and conditions, and having those rights, privileges and preferences, as our Board of Directors may determine (subject to certain approval rights of our Series E Preferred). The rights of the holders of our Common Stock will be subject to, and may be adversely affected by, the rights of the holders of any of our preferred stock which is currently outstanding or which may be issued in the future. The issuance of our preferred stock, while providing desirable flexibility in pursuing possible additional equity financings and other corporate purposes, could have the effect of making it more difficult for a third party to acquire control of us. This could limit the price that certain investors might be willing to pay in the future for shares of our Common Stock and discourage these investors from acquiring a majority of our Common Stock. In addition, the price that future investors may be willing to pay for our Common Stock may be lower due to the conversion price and exercise price granted to investors in any such private financing.

**Table of Contents**

**USE OF PROCEEDS**

We will not receive any of the proceeds from any sale of the shares offered by this prospectus by the selling stockholders. If and when the selling stockholders exercise their Common Stock warrants, we will receive up to \$3,291,250 from the issuance of shares of Common Stock to those selling stockholders. Under such warrants, the selling stockholders have exercise prices ranging from \$1.00 to \$1.05 per common share. Any cash received as a result of the exercise of any of the warrants will be used by the Company for general corporate purposes.

**PLAN OF DISTRIBUTION**

We have agreed to register for public resale shares of our Common Stock which have been issued to the selling stockholders or may be issued in the future to selling stockholders upon the exercise of warrants. We have agreed to use our best efforts to keep this registration statement effective until the earlier of (a) the date on which all the shares of the selling stockholders registered under this registration statement have been sold by the selling shareholders and (b) the later of November 3, 2007 or the date on which all the shares of the selling stockholders registered under this registration statement may be sold without volume restrictions pursuant to Rule 144(k) under the Securities Act. The aggregate proceeds to the selling stockholders from the sale of shares offered pursuant to this prospectus will be the prices at which such securities are sold, less any commissions. The selling stockholders may choose not to sell any or all of the shares of our Common Stock offered pursuant to this prospectus.

The selling stockholders may, from time to time, sell all or a portion of the shares of our Common Stock at fixed prices, at market prices prevailing at the time of sale, at prices related to such market prices or at negotiated prices. The selling stockholders may offer their shares of our Common Stock at various times in one or more of the following transactions:

on any securities exchange, market or trading facility on which our Common Stock may be listed at the time of sale;

in an over-the counter market in which the shares are traded;

through block trades in which the broker or dealer so engaged will attempt to sell the shares as agent, but may purchase and resell a portion of the block as principal to facilitate the transaction;

through purchases by a broker or dealer as principal and resale by such broker or dealer for its account pursuant to this prospectus;

in ordinary brokerage transactions and transactions in which the broker solicits purchasers;

through options, swaps or derivatives;

in privately negotiated transactions;

in transactions to cover short sales; and

through a combination of any such methods of sale.

**Table of Contents**

The selling stockholders may also sell their shares of our Common Stock in accordance with Rule 144 under the Securities Act, rather than pursuant to this prospectus. The selling shareholders shall have the sole and absolute discretion not to accept any purchase offer or make any sale of shares if they deem the purchase price to be unsatisfactory at any particular time.

The selling stockholders may sell their shares of our Common Stock directly to purchasers or may use brokers, dealers, underwriters or agents to sell such shares. In effecting sales, brokers and dealers engaged by the selling stockholders may arrange for other brokers or dealers to participate. Brokers or dealers may receive commissions, discounts or concessions from a selling stockholder or, if any such broker-dealer acts as agent for the purchaser of such shares, from a purchaser, in amounts to be negotiated. Such compensation may, but is not expected to, exceed that which is customary for the types of transactions involved. Broker-dealers may agree with a selling stockholder to sell a specified number of such shares at a stipulated price per share, and, to the extent a broker-dealer is unable to do so acting as agent for a selling stockholder, to purchase as principal any unsold shares at the price required to fulfill the broker-dealer commitment to the selling stockholder. Broker-dealers who acquire shares as principal may thereafter resell such shares from time to time in transactions which may involve block transactions and sales to and through other broker-dealers, including transactions of the nature described above, in the over-the-counter market or otherwise, at prices and on terms then prevailing at the time of sale, at prices then related to the then-current market price or in negotiated transactions. In connection with such resales, broker-dealers may pay to or receive from the purchasers of such shares commissions as described above.

From time to time the selling stockholders may engage in short sales (i.e., the sale of our stock when the seller does not own our stock by borrowing shares from someone who does), short sales against the box (i.e. the sale of shares borrowed from another shareholder while continuing to hold an equivalent number of shares), puts, calls and other hedging transactions in our securities, and may sell and deliver their shares of our Common Stock in connection with such transactions or in settlement of securities loans. These transactions may be entered into with broker-dealers or other financial institutions. In addition, from time to time a selling stockholder may pledge its shares pursuant to the margin provisions of its customer agreements with its broker-dealer. Upon default by a selling stockholder, the broker-dealer or financial institution may offer and sell such pledged shares from time to time.

The selling stockholders and any broker-dealer participating in the distribution of the shares of Common Stock may be deemed to be underwriters within the meaning of the Securities Act, and any commissions paid, or any discounts or concessions allowed to any such broker-dealer may be deemed to be underwriting commissions or discounts under the Securities Act. At the time a particular offering of the shares of Common Stock is made, a prospectus supplement, if required, will be distributed which will set forth the aggregate amount of shares of Common Stock being offered and the terms of the offering, including the name or names of any broker-dealers or agents, any discounts, commissions and other terms constituting compensation from the selling stockholders and any discounts, commissions or concessions allowed or reallocated or paid to broker-dealers.

Under the securities laws of some states, the shares of Common Stock may be sold in such states only through registered or licensed brokers or dealers. In addition, in most states the shares of Common Stock may not be sold unless such shares have been registered or qualified for sale in such state or an exemption from registration or qualification is available and is complied with.

**Table of Contents**

There can be no assurance that any selling stockholders will sell any or all of the shares of Common Stock registered pursuant to the registration statement of which this prospectus forms a part.

The selling stockholders and any other person participating in such distribution will be subject to applicable provisions of the Exchange Act and the rules and regulations thereunder, including, without limitation, Regulation M of the Exchange Act, which may limit the timing of purchases and sales of any of the shares of Common Stock by the selling stockholders and any other participating person.

Regulation M may also restrict the ability of any person engaged in the distribution of the shares of Common Stock to engage in market-making activities with respect to the shares of Common Stock. All of the foregoing may affect the marketability of the shares of Common Stock and the ability of any person or entity to engage in market-making activities with respect to the shares of Common Stock.

A portion of the shares of Common Stock which are being registered hereunder may be issued upon exercise of warrants which we have issued to the selling stockholders. This prospectus does not cover the sale or transfer of any such warrants. If the selling stockholders transfer any of those warrants prior to exercise thereof, the transferee(s) may not sell the shares of Common Stock issuable upon exercise of such warrants under the terms of this prospectus unless we first amend or supplement this prospectus to cover such shares and such sellers.

We are required to pay all fees and expenses incident to the registration of the shares of our Common Stock offered hereby (other than broker-dealer discounts and commissions) which we estimate to be \$12,836 in total, including, without limitation, Securities and Exchange Commission filing fees, expenses of compliance with state securities or blue sky laws, legal fees and transfer agent fees relating to sales pursuant to this prospectus; provided, however, that the selling stockholders will pay all underwriting discounts and selling commissions, if any. We have agreed to indemnify the selling stockholders against certain losses, claims, damages and liabilities, including liabilities under the Securities Act of 1933, as amended.

Once sold under the registration statement of which this prospectus forms a part, the shares of Common Stock will be freely tradable in the hands of persons other than our affiliates.

**Table of Contents****SELLING STOCKHOLDERS**

The shares of Common Stock being offered by the selling stockholders represent 3,135,000 shares that have been issued or are issuable upon exercise of warrants owned by the selling stockholders. We are registering the shares of Common Stock so that the selling stockholders may offer the shares for resale from time to time, subject to the terms of specific stock trading agreements to which certain selling stockholders are parties.

Securities which have been acquired directly from the Company in a transaction not involving any public offering are usually considered restricted securities. The sale of restricted securities is generally restricted by the Securities Act of 1933, as amended. Rule 144 under the Securities Act of 1933 provides certain conditions under which restricted securities may be sold or any sales by our affiliates may be made. During any 90 day period the sale of restricted securities, or the sale of any securities by those shareholders who are deemed to be affiliates of the Company, is limited by Rule 144 to the greater of one percent (1%) of the outstanding shares of the Company's Common Stock, or the average weekly trading volume of the Company's Common Stock during the preceding four week period. The term affiliate is defined in Rule 144 as a person that directly or indirectly controls, is controlled by, or is under common control with, the issuer. In addition, for any sale of restricted securities, the securities must have been held by the selling stockholder for at least one year and they must be sold in brokers transactions (as defined in Rule 144). The trading restrictions of Rule 144 continue to apply to affiliates for a period of three months following the date on which the shareholder no longer is considered an affiliate of the Company. All of the shares of Common Stock being offered are restricted securities, but Rule 144 permits sales after the restricted securities have been held for one year, subject to certain restrictions. Rule 144(k) permits sales without such restrictions if the securities have been held two years or more and the seller is not and has not been an affiliate for at least three months. Once the registration statement of which this prospectus forms a part is declared effective, the selling stockholders will be able to sell the shares covered hereby without complying with Rule 144, provided that the current prospectus is delivered as required by SEC rules and the Securities Act of 1933. If any selling shareholder is an affiliate of the Company at the time of any sale, the restrictions under Rule 144 relating to sales by affiliates will continue to apply provided, however, that any buyer which is an affiliate of the Company at the time it sells any of our securities will be subject to the restrictions under Rule 144 relating to sales by affiliates.

In addition to the trading restriction of Rule 144, the owners of a majority of the shares being registered herein are parties to various trading agreements which are generally more restrictive than the restrictions imposed by Rule 144 by limiting the amount of shares they may sell in any publicly traded transaction on any given day and within certain longer periods of time. The trading restrictions imposed by Rule 144 and the trading agreements with respect to sales in publicly traded transactions do not transfer to a buyer under this prospectus of the securities being offered.

The table below lists the selling stockholders and other information regarding the beneficial ownership of the Common Stock by each of the selling stockholders. The first column lists, for each selling stockholder, the number of shares of Common Stock held by such stockholder including shares issuable (pursuant to options, warrants or conversion of Series E Preferred Stock) to such stockholder. The second column lists the shares of Common Stock (including shares issued or issuable upon exercise of warrants) being offered by this prospectus by each selling stockholder. The column titled Ownership After Offering assumes the sale of all of the shares offered by each selling stockholder, although each selling stockholder may sell all, some or none of his or its shares in this offering.
