PROSPECTUS SUPPLEMENT
(To prospectus dated March 14, 2007)

427,915 Shares

Tortoise Energy Infrastructure Corporation

Common Stock

We are offering 427,915 shares of our common stock. We seek to provide our stockholders with an efficient vehicle to invest in a portfolio of publicly traded master limited partnerships (MLPs) in the energy infrastructure sector. Our investment objective is to seek a high level of total return with an emphasis on current distributions paid to stockholders. We are a nondiversified, closed-end management investment company. This prospectus supplement, together with the accompanying prospectus dated March 14, 2007, sets forth the information that you should know before investing.

Our currently outstanding shares of common stock are, and the shares offered in this prospectus supplement and accompanying prospectus will be, listed on the New York Stock Exchange under the symbol TYG. The last reported sale price of our common stock on March 27, 2007 was $37.16 per share. The net asset value per share of our common stock at the close of business on March 27, 2007 was $36.56.

Investing in our common stock involves risks that are described in the Risk Factors section beginning on page 27 of the accompanying prospectus.

	Per Share	Total
Public offering price	$ 37.160	$ 15,901,321
Placement agent s fee	$ 0.557	$ 238,520
Proceeds, before offering expenses, to us(1)	$ 36.603	$ 15,662,801

(1) The aggregate offering expenses are estimated to be $115,060, all of which will be borne by us.

Neither the Securities and Exchange Commission nor any State Securities Commission has approved or disapproved of these securities or determined if this prospectus supplement or accompanying prospectus is

truthful or complete. Any representation to the contrary is a criminal offense.

The shares will be ready for delivery to purchasers on or about March 30, 2007.

Stifel Nicolaus
Placement Agent

The date of this prospectus supplement is March 27, 2007.

TABLE OF CONTENTS

You should rely only on the information contained or incorporated by reference in this prospectus supplement, the accompanying prospectus and in the statement of additional information. We have not, and the placement agent has not, authorized anyone to provide you with different information. We are not making an offer of

these securities where the offer is not permitted. The information appearing in this prospectus supplement, the accompanying prospectus and in the statement of additional information is accurate only as of the dates on their respective covers. Our business, financial condition and prospects may have changed since such dates. We will advise investors of any material changes to the extent required by applicable law.

Table of Contents

CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus supplement, the accompanying prospectus and the statement of additional information contain forward-looking statements. Forward-looking statements can be identified by the words may, will, intend, expect, estimate, continue, plan, anticipate, and similar terms and the negative of such terms. Such forward-looking statements may be contained in this prospectus supplement as well as in the accompanying prospectus. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect our actual results are the performance of the portfolio of securities we hold, the conditions in the U.S. and international financial, petroleum and other markets, the price at which our shares will trade in the public markets and other factors discussed in our periodic filings with the Securities and Exchange Commission (the SEC).

Although we believe that the expectations expressed in our forward-looking statements are reasonable, actual results could differ materially from those projected or assumed in our forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to change and are subject to inherent risks and uncertainties, such as those disclosed in the Risk Factors section of the prospectus accompanying this prospectus supplement. All forward-looking statements contained or incorporated by reference in this prospectus supplement or the accompanying prospectus are made as of the date of this prospectus supplement or the accompanying prospectus, as the case may be. Except for our ongoing obligations under the federal securities laws, we do not intend, and we undertake no obligation, to update any forward-looking statement. The forward-looking statements contained in this prospectus supplement and the accompanying prospectus are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended (the 1933 Act).

Currently known risk factors that could cause actual results to differ materially from our expectations include, but are not limited to, the factors described in the Risk Factors section of the prospectus accompanying this prospectus supplement. We urge you to review carefully that section for a more complete discussion of the risks of an investment in our common stock.

Table of Contents

PROSPECTUS SUPPLEMENT SUMMARY

This summary contains basic information about us but does not contain all of the information that is important to your investment decision. You should read this summary together with the more detailed information contained elsewhere in this prospectus supplement and accompanying prospectus and in the statement of additional information, especially the information set forth under the heading Risk Factors beginning on page 27 of the accompanying prospectus.

The Company

We seek to provide our stockholders with an efficient vehicle to invest in a portfolio of publicly traded MLPs in the energy infrastructure sector. Our investment objective is to seek a high level of total return with an emphasis on current distributions paid to stockholders. For purposes of our investment objective, total return includes capital appreciation of, and all distributions received from, securities in which we invest regardless of the tax character of the distributions. Similar to the tax characterization of distributions made by MLPs to unitholders, a significant portion of our distributions have been and are expected to continue to be treated as a return of capital to stockholders.

We are a nondiversified, closed-end management investment company. We commenced operations in February 2004 following our initial public offering. We were the first publicly traded investment company offering access to a portfolio of energy infrastructure MLPs. Since that time, we completed three additional offerings of common stock in December 2004, August 2006 and December 2006. As of the date of this prospectus supplement, we have two series of Money Market Cumulative Preferred (MMP®) Shares (MMP Shares) and three series of Auction Rate Senior Notes (Tortoise Notes) outstanding. We may borrow from time to time using our unsecured credit facility. We have a fiscal year ending November 30.

We expect to distribute substantially all of our distributable cash flow (DCF) to holders of common stock through quarterly distributions. DCF is the amount we receive as cash or paid-in-kind distributions from MLPs or their affiliates, and interest payments received on debt securities owned by us, less current or anticipated operating expenses, taxes on our taxable income, and leverage costs paid by us (including leverage costs of the Tortoise Notes and MMP Shares). Our Board of Directors adopted a policy to target distributions to common stockholders in an amount of at least 95% of DCF on an annual basis.

Investment Adviser

Tortoise Capital Advisors, L.L.C. (the Adviser) serves as our investment adviser. The Adviser specializes in managing portfolios of investments in MLPs and other energy infrastructure companies. The Adviser was formed in October 2002 to provide portfolio management services to institutional and high-net-worth investors seeking professional management of their MLP investments. As of November 30, 2006, the Adviser had approximately $2 billion of client assets under management. The Adviser s investment committee is comprised of five portfolio managers. See Management of the Company in the accompanying prospectus.

The Adviser also serves as the investment adviser to Tortoise Energy Capital Corporation (TYY), Tortoise North American Energy Corporation (TYN) and Tortoise Capital Resources Corporation (TTO), which are also publicly traded, closed-end management investment companies. TYY, which commenced operations on May 31, 2005, invests primarily in equity securities of MLPs and their affiliates in the energy infrastructure sector. TYN, which commenced operations on October 31, 2005, invests primarily in equity securities of companies in the energy sector whose primary operations are in North America. TTO, which commenced operations on December 8, 2005, invests primarily in privately held and micro-cap public companies operating in the midstream and downstream segments, and to a lesser extent the upstream segment, of the energy infrastructure sector. TTO has elected to be regulated as a business development company under the Investment Company Act of 1940.

The principal business address of the Adviser is 10801 Mastin Boulevard, Suite 222, Overland Park, Kansas 66210.

Table of Contents

The Offering

Common stock offered by the Company	427,915 shares
Shares outstanding after the offering	18,700,689 shares
Use of proceeds	We estimate that our net proceeds from this offering after expenses will be approximately $15,547,741. We intend to use these net proceeds to retire a portion of our short-term debt outstanding under our credit facility and incurred in connection with the acquisition of equity portfolio securities in pursuit of our investment objective and policies and for working capital purposes. See Use of Proceeds.
Risk factors	See Risk Factors and other information included in the accompanying prospectus for a discussion of factors you should carefully consider before deciding to invest in shares of our common stock.
NYSE symbol	TYG
Stockholder Transaction Expense	
Placement agent s fee (as a percentage of offering price)	1.50%
Offering expenses borne by us (as a percentage of offering price)	0.72%

Recent Developments

On March 22, 2007, we entered into a new unsecured credit facility that allows us to borrow up to $150 million. The new credit facility replaces our previous credit facility and the outstanding balance on our previous credit facility was transferred to the new credit facility.

Under the terms of the new credit facility, U.S. Bank, N.A. will serve as a lender and the lending syndicate agent on behalf of other lenders participating in the credit facility. Outstanding balances under the new credit facility generally will accrue interest at a variable annual rate equal to one-month LIBOR plus 0.75%. The new credit facility expires on March 21, 2008 and we may draw on the credit facility from time to time to invest in accordance with our investment policies and for working capital purposes.

On March 27, 2007, we issued an aggregate principal amount of $70 million of our Tortoise Notes (the Series D Notes). The Series D Notes were issued without coupons in denominations of $25,000 and are due and payable on March 27, 2047. We used all of the net proceeds (approximately $69.1 million) of the issuance of the Series D Notes to retire a portion of the outstanding balance under our new credit facility. As of the date of this prospectus supplement, we had approximately $46.3 million outstanding under our new credit facility.

We expect to offer an additional series (Series III) of auction rate preferred stock (referred to as Money Market Cumulative Preferred Shares or MMP Shares) in a separate offering. We expect to offer the Series III MMP Shares with a liquidation preference of $25,000 per share.

Table of Contents

USE OF PROCEEDS

We estimate that we will receive net proceeds from this offering of approximately $15.5 million, after deducting our estimated offering expenses.

We intend to use the net proceeds of this offering to retire a portion of our short-term debt outstanding under our new credit facility. Outstanding balances under the new credit facility generally accrue interest at a variable annual rate equal to one-month LIBOR plus 0.75%. As of the date of this prospectus supplement, the current rate is 6.07%. The new credit facility remains in effect through March 21, 2008, and we may draw on the facility from time to time to invest in accordance with our investment policies and for working capital purposes. As of the date of this prospectus supplement, we had approximately $46.3 million outstanding under our new credit facility.

Table of Contents

Capitalization

The following table sets forth our capitalization: (i) as of November 30, 2006, (ii) pro forma to reflect the use of both our previous and new credit facility through March 27, 2007, the issuance of 1,500,000 shares of our common stock on December 18, 2006 in an underwritten public offering, the issuance of 40,709 shares of our common stock on March 1, 2007 pursuant to our automatic dividend reinvestment plan and the issuance of the Series D Notes on March 27, 2007; and (iii) pro forma as adjusted to give effect to the issuance of the common shares offered hereby. As indicated below, common stockholders will bear the offering costs associated with this offering.

	Actual	Pro Forma(2) (Unaudited)	Pro Forma as Adjusted (Unaudited)
Short-Term Debt:			
Unsecured credit facility: $150,000,000 available(1)	$ 32,450,000	$ 46,300,000	30,752,259
Long-Term Debt:			
Tortoise Notes, denominations of $25,000 or any multiple thereof(2)	$ 165,000,000	$ 235,000,000	$ 235,000,000
Preferred Stock:			
MMP Shares, $25,000 stated value per share at liquidation; 10,000,000 shares authorized/2,800 shares issued(2)	$ 70,000,000	$ 70,000,000	$ 70,000,000
Common Stockholders Equity:			
Common Stock, $.001 par value per share; 100,000,000 shares authorized; 16,732,065 (18,272,774 pro forma; 18,700,689 pro forma as adjusted) shares outstanding(3)	$ 16,732	$ 18,273(4)	$ 18,701(4)
Additional paid-in capital	$ 335,685,469	$ 387,308,264(5)	$ 402,855,577(5)(6)
Accumulated net investment loss, net of deferred tax benefit	$ (8,705,900)	$ (8,705,900)	$ (8,705,900)
Undistributed realized gain, net of deferred tax expense	$ 9,400,335	$ 9,400,335	$ 9,400,335
Net unrealized gain on investments and interest rate swap contracts, net of deferred tax expense	$ 196,036,729	$ 196,036,729	$ 196,036,729
Net assets applicable to common stock	$ 532,433,365	$ 584,057,701	$ 599,605,442

(1) As of November 30, 2006 we had an unsecured credit facility with U.S. Bank N.A. that allowed us to borrow up to $60,000,000. Effective February 27, 2007, the amount we could borrow under that credit facility was increased to $120,000,000. Effective March 22, 2007, we entered into a new unsecured credit facility with U.S. Bank, N.A. and a lending syndicate that allows us to borrow up to $150,000,000 and which expires on March 21, 2008. The new credit facility replaces our previous credit facility and the outstanding balance on our previous credit facility was transferred to the new credit facility.

(2)

Reflects the application of proceeds from our issuance of 1,500,000 shares of common stock on December 18, 2006 in an underwritten public offering, the subsequent increase in borrowing under both our previous and new credit facility through March 27, 2007 and our issuance of an aggregate principal amount of $70,000,000 of Series D Notes on March 27, 2007 to retire a portion of our short-term debt.

(3) None of these outstanding shares/notes are held by us or for our account.

(4) Reflects the issuance of 1,500,000 shares of our common stock (aggregate par value $1,500) on December 18, 2006 and the issuance of 40,709 shares of our common stock (aggregate par value $41) on March 1, 2007 pursuant to our automatic dividend reinvestment plan.

(5) Reflects the issuance of 1,500,000 shares of our common stock on December 18, 2006 ($50,206,426) less $0.001 par value per share ($1,500), and the issuance of 40,709 shares of common stock on March 1, 2007 ($1,417,910) less $0.001 par value per share ($41).

Table of Contents

(6) Pro forma as adjusted additional paid-in capital reflects the proceeds of the issuance of the common shares offered hereby ($15,901,321), less $.001 par value per share common stock ($428), the placement agent s fee ($238,520) and less the estimated offering expenses borne by us ($115,060) related to the issuance of the common shares.

PLAN OF DISTRIBUTION

Stifel, Nicolaus & Company, Incorporated (the placement agent), has entered into a placement agency agreement with us in which they have agreed to act as placement agent in connection with this offering. The placement agent is not purchasing or selling any of the shares being offered by this prospectus supplement and the accompanying prospectus. Rather, they have agreed to use reasonable efforts to arrange for the sale of all of the shares offered hereby.

The placement agency agreement provides that the obligations of the placement agent are subject to certain conditions precedent, including the absence of any material adverse change in our business and the receipt of certain certificates and opinions from us and our counsel.

The placement agents propose to arrange for the sale to one or more purchasers of the shares of common stock offered pursuant to this prospectus supplement and the accompanying prospectus through direct purchase agreements between the purchasers and us. Our obligation to issue and sell shares to the purchasers is subject to the conditions set forth in the purchase agreements, which may be waived by us in our discretion. A purchaser s obligation to purchase shares also is subject to conditions set forth in the purchase agreement, which also may be waived.

We have agreed to indemnify the placement agent against certain liabilities, including liabilities under the 1933 Act, or to contribute to payments the placement agent may be required to make in respect of those liabilities; provided that such indemnification shall not extend to any liability or action resulting from the gross negligence or willful misconduct of the placement agent.

Commissions and Discounts

We have agreed to pay the placement agent a fee equal to 1.50% of the proceeds of this offering and to reimburse the placement agent for reasonable expenses incurred in connection with this offering. The following table shows the per share and total fees we will pay to the placement agent in connection with the sale of the shares being offered pursuant to this prospectus supplement and the accompanying prospectus, assuming the purchase of all the shares offered hereby.

Per share placement agent s fee	$	0.557
Total placement agent s fee	$	238,520

We estimate that the total expenses of this offering that will be payable by us, excluding the placement agent s fee and the reimbursement of the placement agent for other reasonable expenses incurred in connection with this offering, will be approximately $115,060.

New York Stock Exchange Listing

Our currently outstanding shares of common stock are, and the shares of common stock sold pursuant to this prospectus supplement and the accompanying prospectus will be, listed on the New York Stock Exchange under the symbol TYG.

Other Relationships

The placement agent and its affiliates have engaged in, and may in the future engage in, investment banking and other commercial dealings in the ordinary course of business with us. They have received customary fees and commissions for these transactions.

Table of Contents

The address of the placement agent is Stifel, Nicolaus & Company, Incorporated, 501 North Broadway, St. Louis, Missouri 63102.

LEGAL MATTERS

Certain legal matters in connection with the securities offered hereby will be passed upon for us by Blackwell Sanders Peper Martin, LLP (Blackwell Sanders), Kansas City, Missouri. Certain legal matters in connection with the securities offered hereby will be passed upon for the placement agent by Kaye Scholer LLP (Kaye Scholer), New York, New York. Blackwell Sanders and Kaye Scholer may rely on the opinion of Venable LLP, Baltimore, Maryland, on certain matters of Maryland law.

WHERE YOU CAN FIND MORE INFORMATION

We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended and the Investment Company Act of 1940, as amended, and are required to file reports, including annual and semi-annual reports, proxy statements and other information with the SEC. We voluntarily file quarterly shareholder reports. Our most recent shareholder report filed with the SEC is for the period ended November 30, 2006 and is incorporated by reference into our registration statement. These documents are available on the SEC s EDGAR system and can be inspected and copied for a fee at the SEC s public reference room, 100 F Street, N.E., Room 1580, Washington, D.C. 20549. Additional information about the operation of the public reference room facilities may be obtained by calling the SEC at (202) 551-5850.

This prospectus supplement and the accompanying prospectus do not contain all of the information in our registration statement, including amendments, exhibits, and schedules. Statements in this prospectus supplement and the accompanying prospectus about the contents of any contract or other document are not necessarily complete and in each instance reference is made to the copy of the contract or other document filed as an exhibit to the registration statement, each such statement being qualified in all respects by this reference.

Additional information about us can be found on our Advisor s website at www.tortoiseadvisors.com and in our registration statement (including amendments, exhibits, and schedules) on Form N-2 filed with the SEC. Information included on our Advisor s website does not form part of this prospectus supplement. The SEC maintains a web site (http://www.sec.gov) that contains our registration statement, other documents incorporated by reference, and other information we have filed electronically with the SEC, including proxy statements and reports filed under the Exchange Act.

Base Prospectus

$350,000,000
Tortoise Energy Infrastructure Corporation
Common Stock
Preferred Stock
Debt Securities

Tortoise Energy Infrastructure Corporation (the Company, we or our) is a nondiversified, closed-end management investment company. Our investment objective is to seek a high level of total return with an emphasis on current distributions paid to stockholders. We seek to provide our stockholders with an efficient vehicle to invest in a portfolio of publicly traded master limited partnerships (MLPs) in the energy infrastructure sector. Under normal circumstances, we invest at least 90% of our total assets (including assets obtained through leverage) in securities of energy infrastructure companies and invest at least 70% of our total assets in equity securities of MLPs. We cannot assure you that we will achieve our investment objective. Unlike most investment companies, we have not elected to be treated as a regulated investment company under the Internal Revenue Code.

We may offer, on an immediate, continuous or delayed basis, up to $350,000,000 aggregate initial offering price of our common stock ($0.001 par value per share), preferred stock ($0.001 par value per share) or debt securities, which we refer to in this prospectus collectively as our securities, in one or more offerings. We may offer our common stock, preferred stock and debt securities separately or together, in amounts, at prices and on terms set forth in a prospectus supplement to this prospectus. In addition, from time to time, certain of our stockholders may offer our common stock in one or more offerings. The sale of such stock by certain of our stockholders may involve shares of common stock that were issued to the stockholders in one or more private transactions and will be registered by us for resale. The identity of any selling stockholder, the number of shares of our common stock to be offered by such selling stockholder, the price and terms upon which our shares of common stock are to be sold from time to time by such selling stockholder, and the percentage of common stock held by any selling stockholder after the offering, will be set forth in a prospectus supplement to this prospectus. You should read this prospectus and the related prospectus supplement carefully before you decide to invest in any of our securities.

We may offer our securities, or certain of our stockholders may offer our common stock, directly to one or more purchasers, through agents that we or they designate from time to time, or to or through underwriters or dealers. The prospectus supplement relating to the particular offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee, commission or discount arrangement between us or any selling stockholder and such agents or underwriters or among the underwriters or the basis upon which such amount may be calculated. For more information about the manner in which we may offer our securities, or a selling stockholder may offer our common stock, see Plan of Distribution and Selling Stockholders. Our securities may not be sold through agents, underwriters or dealers without delivery of a prospectus supplement.

Our common stock is listed on the New York Stock Exchange under the symbol TYG. As of March 14, 2007, the last reported sale price for our common stock was $36.77.

Investing in our securities involves certain risks. You could lose some or all of your investment. See Risk Factors beginning on page 27 of this prospectus. You should consider carefully these risks together with all of the other information contained in this prospectus and any prospectus supplement before making a decision to purchase our securities.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Prospectus dated March 14, 2007

Table of Contents

This prospectus, together with any prospectus supplement, sets forth concisely the information that you should know before investing. You should read the prospectus and prospectus supplement, which contain important information, before deciding whether to invest in our securities. You should retain the prospectus and prospectus supplement for future reference. A statement of additional information, dated March 14, 2007, as supplemented from time to time, containing additional information, has been filed with the Securities and Exchange Commission (SEC) and is incorporated by reference in its entirety into this prospectus. You may request a free copy of the statement of additional information, the table of contents of which is on page 61 of this prospectus, request a free copy of our annual, semi-annual and quarterly reports, request other information or make stockholder inquiries, by calling toll-free 1-866-362-9331 or by writing to us at 10801 Mastin Boulevard, Suite 222, Overland Park, Kansas 66210. Our annual, semi-annual and quarterly reports and the statement of additional information also are available on our investment adviser s website at www.tortoiseadvisors.com. Information included on our website does not form part of this prospectus. You can review and copy documents we have filed at the SEC s Public Reference Room in Washington, D.C. Call 1-202-551-5850 for information. The SEC charges a fee for copies. You can get the same information free from the SEC s website (http://www.sec.gov). You may also e-mail requests for these documents to publicinfo@sec.gov or make a request in writing to the SEC s Public Reference Section, 100 F. Street, N.E., Room 1580, Washington, D.C. 20549.

Our securities do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution and is not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

TABLE OF CONTENTS

You should rely only on the information contained or incorporated by reference in this prospectus and any related prospectus supplement in making your investment decisions. We have not authorized any other person to provide you with different or inconsistent information. If anyone provides you with different or inconsistent information, you should not rely on it. This prospectus and any prospectus supplement do not constitute an offer to sell or solicitation of an offer to buy any securities in any jurisdiction where the offer or sale is not permitted. The information appearing in this prospectus and in any prospectus supplement is accurate only as of the dates on their covers. Our business, financial condition and prospects may have changed since such dates. We will advise investors of any material changes to the extent required by applicable law.

CAUTIONARY NOTICE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus, any accompanying prospectus supplement and the statement of additional information contain forward-looking statements. Forward-looking statements can be identified by the words may, will, intend, expect, estimate, continue, plan, anticipate, and similar terms and the negative of such terms. Such forward-looking statements may be contained in this prospectus as well as in any accompanying prospectus supplement. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect our actual results are the performance of the portfolio of securities we hold, the conditions in the U.S. and international financial, petroleum and other markets, the price at which our shares will trade in the public markets and other factors discussed in our periodic filings with the Securities and Exchange Commission (the SEC).

Although we believe that the expectations expressed in our forward-looking statements are reasonable, actual results could differ materially from those projected or assumed in our forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to change and are subject to inherent risks and uncertainties, such as those disclosed in the Risk Factors section of this prospectus. All forward-looking statements contained or incorporated by reference in this prospectus or any accompanying prospectus supplement are made as of the date of this prospectus or the accompanying prospectus supplement, as the case may be. Except for our ongoing obligations under the federal securities laws, we do not intend, and we undertake no obligation, to update any forward-looking statement. The forward-looking statements contained in this prospectus and any accompanying prospectus supplement are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended (the 1933 Act).

Currently known risk factors that could cause actual results to differ materially from our expectations include, but are not limited to, the factors described in the Risk Factors section of this prospectus. We urge you to review carefully that section for a more detailed discussion of the risks of an investment in our securities.

PROSPECTUS SUMMARY

The following summary contains basic information about us and our securities. It is not complete and may not contain all of the information you may want to consider. You should review the more detailed information contained in this prospectus and in any related prospectus supplement and in the statement of additional information, especially the information set forth under the heading Risk Factors beginning on page 27 of this prospectus.

The Company

We seek to provide our stockholders with an efficient vehicle to invest in a portfolio of publicly traded master limited partnerships (MLPs) in the energy infrastructure sector. Our investment objective is to seek a high level of total return with an emphasis on current distributions paid to stockholders. For purposes of our investment objective, total return includes capital appreciation of, and all distributions received from, securities in which we invest regardless of the tax character of the distributions. Similar to the tax characterization of distributions made by MLPs to unitholders, a significant portion of our distributions have been and are expected to continue to be treated as a return of capital to stockholders.

We are a nondiversified, closed-end management investment company. We commenced operations in February 2004 following our initial public offering. We were the first publicly traded investment company offering access to a portfolio of MLPs. Since that time, we completed three additional offerings of common stock in December 2004, August 2006 and December 2006. As of the date of this prospectus, we have $70 million of Money Market Cumulative Preferred (MMP®) Shares (MMP Shares) and $165 million of Auction Rate Senior Notes (Tortoise Notes) outstanding and have entered into an unsecured revolving credit facility with U.S. Bank N.A., which currently allows us to borrow up to $120,000,000. Our fiscal year ends on November 30.

Investment Adviser

Tortoise Capital Advisors, L.L.C. (the Adviser) serves as our investment adviser. The Adviser specializes in managing portfolios of investments in MLPs and other energy infrastructure companies. The Adviser was formed in October 2002 to provide portfolio management services to institutional and high-net-worth investors seeking professional management of their MLP investments. As of November 30, 2006, the Adviser had approximately $2.0 billion of client assets under management. The Adviser s investment committee is comprised of five portfolio managers. See Management of the Company .

The Adviser also serves as the investment adviser to Tortoise Energy Capital Corporation (TYY) and Tortoise North American Energy Corporation (TYN), which are also publicly traded, closed-end management investment companies. TYY, which commenced operations on May 31, 2005, invests primarily in equity securities of MLPs and their affiliates in the energy infrastructure sector. TYN, which commenced operations on October 31, 2005, invests primarily in equity securities of companies in the energy sector whose primary operations are in North America. The Adviser also serves as the investment adviser to Tortoise Capital Resources Corporation (TTO), a non-diversified closed-end management investment company that has elected to be regulated as a business development company (a BDC) under the Investment Company Act of 1940 (the 1940 Act). TTO, which commenced operations on December 8, 2005, invests primarily in privately held and micro-cap public energy companies operating in the midstream and downstream segments, and to a lesser extent the upstream segment.

The principal business address of the Adviser is 10801 Mastin Boulevard, Suite 222, Overland Park, Kansas 66210.

The Offering

We may offer, on an immediate, continuous or delayed basis, up to $350,000,000 of our securities, or certain of our stockholders who purchased shares from us in private placement transactions may offer our common stock, on terms to be determined at the time of the offering. Our securities will be offered at prices and on terms to be set forth in one or more prospectus supplements to this prospectus. Subject to certain conditions, we may offer our common stock at prices below our net asset value (NAV). Preferred stock and debt securities (collectively, senior securities) may be auction rate securities, in which case the senior securities will not be listed on any exchange or automated quotation system. Rather, investors generally may only buy and sell senior securities through an auction conducted by an auction agent and participating broker-dealers.

While the number and amount of securities we may issue pursuant to this registration statement is limited to $350,000,000 of securities, our board of directors (the Board of Directors or the Board) may, without any action by the stockholders, amend our Charter from time to time to increase or decrease the aggregate number of shares of stock or the number of shares of stock of any class or series that we have authority to issue under our Charter or the 1940 Act.

We may offer our securities, or certain of our stockholders may offer our common stock, directly to one or more purchasers, through agents that we or they designate from time to time, or to or through underwriters or dealers. The prospectus supplement relating to the offering will identify any agents or underwriters involved in the sale of our securities, and will set forth any applicable purchase price, fee, commission or discount arrangement between us or any selling stockholder and such agents or underwriters or among underwriters or the basis upon which such amount may be calculated. See Plan of Distribution and Selling Stockholders. Our securities may not be sold through agents, underwriters or dealers without delivery of a prospectus supplement describing the method and terms of the offering of our securities.

Use of Proceeds

Unless otherwise specified in a prospectus supplement, we intend to use the net proceeds from the sale of our securities primarily to invest in energy infrastructure companies in accordance with our investment objective and policies within approximately three months of receipt of such proceeds. We also may use sale proceeds to retire all or a portion of any short-term debt, and for working capital purposes, including the payment of distributions, interest and operating expenses, although there is currently no intent to issue securities primarily for this purpose. We will not receive any of the proceeds from a sale of our common stock by any selling stockholder.

Tax Status of Company

Unlike most investment companies, we have not elected to be treated as a regulated investment company under the U.S. Internal Revenue Code of 1986, as amended (the Internal Revenue Code). Therefore, we are obligated to pay federal and applicable state corporate taxes on our taxable income. On the other hand, we are not subject to the Internal Revenue Code s diversification rules limiting the assets in which regulated investment companies can invest. Under current federal income tax law, these rules limit the amount that regulated investment companies may invest directly in the securities of MLPs to 25% of the value of their total assets. We invest a substantial portion of our assets in MLPs. Although MLPs generate taxable income to us, we expect the MLPs to pay cash distributions in excess of the taxable income reportable by us. Similarly, we expect to distribute substantially all of our distributable cash flow (DCF) to our common stockholders. DCF is the amount we receive as cash or paid-in-kind distributions from MLPs or affiliates of MLPs in which we invest, and interest payments received on debt securities owned by us, less current or anticipated operating expenses, taxes on our taxable income, and leverage costs paid by us (including leverage costs of the Tortoise Notes and MMP Shares and borrowings under our unsecured credit facility). However, unlike regulated investment companies, we are not effectively required by the Internal Revenue Code to distribute substantially all of our income and capital gains. See Certain Federal Income Tax Matters.

Distributions

We expect to distribute substantially all of our DCF to holders of common stock through quarterly distributions. Our Board of Directors adopted a policy to target distributions to common stockholders in an amount of at least 95% of DCF on an annual basis. We will pay distributions on our common stock each fiscal quarter out of DCF, if any. As of the date of this prospectus, we have paid distributions every quarter since the completion of our first full fiscal quarter ended on May 31, 2004, most of which have been characterized as returns of capital for federal income tax purposes. There is no assurance that we will continue to make regular distributions. If distributions paid to holders of our common and preferred stock exceed the current and accumulated earnings and profit allocated to the particular shares held by a stockholder, the excess of such distribution will constitute a tax-free return of capital to the extent of the stockholder s basis and capital gain thereafter. A return of capital reduces the basis of the shares held by a stockholder, which may increase the amount of gain recognized upon the sale of such shares. Our preferred stock and debt securities will pay dividends and interest, respectively, in accordance with their terms. So long as we have preferred stock and debt securities outstanding, we may not declare dividends on common or preferred stock unless we meet applicable asset coverage tests.

Principal Investment Policies

Under normal circumstances, we invest at least 90% of our total assets (including assets we obtain through leverage) in securities of energy infrastructure companies and invest at least 70% of our total assets in equity securities of MLPs. Energy infrastructure companies engage in the business of transporting, processing, storing, distributing or marketing natural gas, natural gas liquids (primarily propane), coal, crude oil or refined petroleum products, or exploring, developing, managing or producing such commodities. We invest solely in energy infrastructure companies organized in the United States. All publicly traded companies in which we invest have an equity market capitalization greater than $100 million.

Although we also may invest in equity and debt securities of energy infrastructure companies that are organized and/or taxed as corporations, it is likely that any such investments will be in debt securities because the dividends from equity securities of such corporations typically do not meet our investment objective. We also may invest in securities of general partners or other affiliates of MLPs and private companies operating energy infrastructure assets.

We have adopted the following additional nonfundamental investment policies:

We may invest up to 30% of our total assets in restricted securities, primarily through direct placements. Subject to this policy, we may invest without limitation in illiquid securities. The types of restricted securities that we may purchase include securities of private energy infrastructure companies and privately issued securities of publicly traded energy infrastructure companies. Restricted securities, whether issued by public companies or private companies, are generally considered illiquid. Investments in private companies that do not have any publicly traded shares or units are limited to 5% of total assets.

We may invest up to 25% of our total assets in debt securities of energy infrastructure companies, including securities rated below investment grade (commonly referred to as junk bonds). Below investment grade debt securities will be rated at least B3 by Moody s Investors Service, Inc. (Moody s) and at least B- by Standard & Poor s Ratings Group (S&P) at the time of purchase, or comparably rated by another statistical rating organization or if unrated, determined to be of comparable quality by the Adviser.

We will not invest more than 10% of total assets in any single issuer.

We will not engage in short sales.

We may change our nonfundamental investment policies without stockholder approval and will provide notice to stockholders of material changes (including notice through stockholder reports); provided, however, that a change in the policy of investing at least 90% of our total assets in energy infrastructure companies requires at least 60 days prior written notice to stockholders. Unless otherwise stated, these investment restrictions apply at the time of purchase and we will not be required to reduce a position due solely to market value fluctuations. The term total assets includes assets obtained through leverage for the purpose of each investment restriction.

Under adverse market or economic conditions, we may invest up to 100% of our total assets in securities issued or guaranteed by the U.S. Government or its instrumentalities or agencies, short-term debt securities, certificates of deposit, bankers acceptances and other bank obligations, commercial paper rated in the highest category by a rating agency or other liquid fixed income securities deemed by the Adviser to be consistent with a defensive posture (collectively, short-term securities), or we may hold cash. To the extent we invest in short-term securities or cash for defensive purposes, such investments are inconsistent with, and may result in us not achieving, our investment objective.

We also may invest in short-term securities or cash pending investment of offering proceeds to meet working capital needs including, but not limited to, for collateral in connection with certain investment techniques, to hold a reserve pending payment of distributions, and to facilitate the payment of expenses and settlement of trades. The yield on such securities may be lower than the returns on MLPs or yields on lower rated fixed income securities.

Use of Leverage by the Company

The borrowing of money and the issuance of preferred stock and debt securities represents the leveraging of our common stock. The issuance of additional common stock will enable us to increase the aggregate amount of our leverage. Currently, we are using leverage and anticipate continuing to use leverage to represent approximately 33% of our total assets, including the proceeds of such leverage. However, we reserve the right at any time, if we believe that market conditions are appropriate, to use financial leverage to the extent permitted by the 1940 Act (50% of total assets for preferred stock and 331/3% of total assets for debt). On July 24, 2006, our Board of Directors approved a policy permitting temporary increases in the amount of leverage we may use from 33% of our total assets to up to 38% of our total assets at the time of incurrence, provided that (i) such leverage is consistent with the limits set forth in the 1940 Act, and (ii) such increased leverage is reduced over time in an orderly fashion. The timing and terms of any leverage transactions will be determined by our Board of Directors.

The use of leverage creates an opportunity for increased income and capital appreciation for common stockholders, but at the same time, it creates special risks that may adversely affect common stockholders. Because the Adviser s fee is based upon a percentage of our Managed Assets (as defined below), the Adviser s fee is higher when we are leveraged. Therefore, the Adviser has a financial incentive to use leverage, which will create a conflict of interest between the Adviser and our common stockholders, who will bear the costs of our leverage. There can be no assurance that a leveraging strategy will be successful during any period in which it is used. The use of leverage involves risks, which can be significant. See Leverage and Risk Factors Additional Risks to Common Stockholders Leverage Risk.

We currently use, and may in the future use, interest rate transactions for hedging purposes only, in an attempt to reduce the interest rate risk arising from our leveraged capital structure. We do not intend to hedge the interest rate risk of our portfolio holdings. Interest rate transactions that we may use for hedging purposes may expose us to certain risks that differ from the risks associated with our portfolio holdings. See Leverage Hedging Transactions and Risk Factors Company Risks Hedging Strategy Risk.

Conflicts of Interest

Conflicts of interest may arise from the fact that the Adviser and its affiliates carry on substantial investment activities for other clients, in which we have no interest. The Adviser or its affiliates may have financial incentives to favor certain of these accounts over us. Any of their proprietary accounts or other customer accounts may compete with us for specific trades. The Adviser or its affiliates may give advice and recommend securities to, or buy or sell securities for, other accounts and customers, which advice or securities recommended may differ from advice given to, or securities recommended or bought or sold for, us, even though their investment objectives may be the same as, or similar to, our objectives.

Situations may occur when we could be disadvantaged because of the investment activities conducted by the Adviser and its affiliates for their other accounts. Such situations may be based on, among other things, the following: (1) legal or internal restrictions on the combined size of positions that may be taken for us or the other accounts, thereby limiting the size of our position; (2) the difficulty of liquidating an investment for us or the other accounts where the market cannot absorb the sale of the combined position; or (3) limits on co-investing in private placement securities under the 1940 Act. Our investment opportunities may be limited by affiliations of the Adviser

or its affiliates with energy infrastructure companies. See Investment Objective and Principal Investment Strategies Conflicts of Interest.

Company Risks

Our NAV, our ability to make distributions, our ability to service debt securities and preferred stock, and our ability to meet asset coverage requirements depends on the performance of our investment portfolio. The performance of our investment portfolio is subject to a number of risks, including the following:

Concentration Risk. Under normal circumstances, we concentrate our investments in the energy infrastructure sector, with an emphasis on securities issued by MLPs. The primary risks inherent in the energy infrastructure industry include the following: (1) the performance and level of distributions of MLPs can be affected by direct and indirect commodity price exposure, (2) a decrease in market demand for natural gas or other energy commodities could adversely affect MLP revenues or cash flows, (3) energy infrastructure assets deplete over time and must be replaced, and (4) a rising interest rate environment could increase an MLP s cost of capital.

Industry Specific Risk. Energy infrastructure companies also are subject to risks specific to the industry they serve. For risks specific to the pipeline, processing, propane and coal industries, see Risk Factors Company Risks Industry Specific Risk.

MLP Risk. We invest primarily in equity securities of MLPs. As a result, we are subject to the risks associated with an investment in MLPs, including cash flow risk and tax risk. Cash flow risk is the risk that MLPs will not make distributions to holders (including us) at anticipated levels or that such distributions will not have the expected tax character. MLPs also are subject to tax risk, which is the risk that MLPs might lose their partnership status for tax purposes.

Equity Securities Risk. MLP common units and other equity securities can be affected by macro-economic and other factors affecting the stock market in general, expectations of interest rates, investor sentiment toward MLPs or the energy sector, changes in a particular issuer s financial condition, or unfavorable or unanticipated poor performance of a particular issuer (in the case of MLPs, generally measured in terms of DCF). Prices of common units of individual MLPs and other equity securities also can be affected by fundamentals unique to the partnership or company, including size, earnings power, coverage ratios and characteristics and features of different classes of securities. See Risk Factors Company Risks Equity Securities Risk.

Hedging Strategy Risk. We currently use, and may in the future use, interest rate transactions for hedging purposes only, in an attempt to reduce the interest rate risk arising from our leveraged capital structure. Interest rate transactions that we may use for hedging purposes, such as swaps, caps and floors, will expose us to certain risks that differ from the risks associated with our portfolio holdings. See Risk Factors Company Risks Hedging Strategy Risk.

Competition Risk. At the time we completed our initial public offering in February 2004, we were the only publicly traded investment company offering access to a portfolio of energy infrastructure MLPs. Since that time a number of alternative vehicles for investment in a portfolio of energy infrastructure MLPs, including other publicly traded investment companies and private funds, have emerged. In addition, tax law changes have increased the ability of regulated investment companies or other institutions to invest in MLPs. These competitive conditions may adversely impact our ability to meet our investment objective, which in turn could adversely impact our ability to make interest or dividend payments.

Restricted Security Risk. We may invest up to 30% of total assets in restricted securities, primarily through direct placements. Restricted securities are less liquid than securities traded in the open market because of statutory and contractual restrictions on resale. Such securities are, therefore, unlike securities that are traded in the open market, which can be expected to be sold immediately if the market is adequate. This lack of liquidity creates special risks for us. See Risk Factors Company Risks Restricted Security Risk.

Liquidity Risk. Certain MLP securities may trade less frequently than those of other companies due to their smaller capitalizations. Investments in securities that are less actively traded or over time experience decreased trading volume may be difficult to dispose of when we believe it is desirable to do so, may restrict our ability to take advantage of other opportunities, and may be more difficult to value.

Valuation Risk. We may invest up to 30% of total assets in restricted securities, which are subject to restrictions on resale. The value of such investments ordinarily will be based on fair valuations determined by the Adviser pursuant to procedures adopted by the Board of Directors. Restrictions on resale or the absence of a liquid secondary market may affect adversely our ability to determine NAV. The sale price of securities that are restricted or otherwise are not readily marketable may be higher or lower than our most recent valuations.

Nondiversification Risk. We are a nondiversified investment company under the 1940 Act and we are not a regulated investment company under the Internal Revenue Code. Accordingly, there are no limits under the 1940 Act or Internal Revenue Code with respect to the number or size of issuers held by us and we may invest more assets in fewer issuers as compared to a diversified fund.

Management Risk. The Adviser was formed in October 2002 to provide portfolio management services to institutional and high net worth investors seeking professional management of their MLP investments. The Adviser has been managing our portfolio since we began operations in February 2004. The Adviser relies in part on the officers, employees, and resources of its affiliate, Fountain Capital Management, L.L.C. (Fountain Capital), for certain functions. These services are provided pursuant to an informal arrangement between the parties.

See Risk Factors Company Risks for a more detailed discussion of these and other risks of investing in our securities.

Additional Risks to Common Stockholders

Leverage Risk. We are currently leveraged and intend to continue to use leverage primarily for investment purposes. Leverage, which is a speculative technique, could cause us to lose money and can magnify the effect of any losses. There is no assurance that a leveraging strategy will be successful. Currently, we anticipate using leverage to represent approximately 33% of our total assets, including the proceeds from such leverage. However, we reserve the right at any time, if we believe that market conditions are appropriate, to use financial leverage to the extent permitted by the 1940 Act (50% for preferred stock and 331/3% for debt). Common stockholders bear the cost of leverage. On July 24, 2006, our Board of Directors approved a policy permitting temporary increases in the amount of leverage we may use from 33% of our total assets to up to 38% of our total assets at the time of incurrence, provided that (i) such leverage is consistent with the limits set forth in the 1940 Act, and (ii) such increased leverage is reduced over time in an orderly fashion.

Market Impact Risk. The sale of our common stock (or the perception that such sales may occur) may have an adverse effect on prices in the secondary market for our common stock by increasing the number of shares available, which may put downward pressure on the market price for our common stock. Our ability to sell shares of common stock below NAV may increase this pressure. These sales also might make it more difficult for us to sell additional equity securities in the future at a time and price we deem appropriate.

Dilution Risk. The voting power of current stockholders will be diluted to the extent that such stockholders do not purchase shares in any future common stock offerings or do not purchase sufficient shares to maintain their percentage interest. In addition, if we sell shares of common stock below NAV, our NAV will fall immediately after such issuance. See Description of Securities Common Stock Issuance of Additional Shares which includes a table reflecting the dilutive effect of selling our common stock below NAV.

If we are unable to invest the proceeds of such offering as intended, our per share distribution may decrease and we may not participate in market advances to the same extent as if such proceeds were fully invested as planned.

Market Discount Risk. Our common stock has a limited trading history and has traded both at a premium and at a discount in relation to NAV. We cannot predict whether our shares will trade in the future at a premium or discount to NAV.

See Risk Factors Additional Risks to Common Stockholders for a more detailed discussion of these risks.

Additional Risks to Senior Security Holders

Additional risks of investing in senior securities, which will likely be auction rate securities, include the following:

Interest Rate Risk. To the extent that senior securities trade through an auction, such securities pay dividends or interest based on short-term interest rates. If short-term interest rates rise, dividends or interest on the auction rate senior securities may rise so that the amount of dividends or interest due to holders of auction rate senior securities would exceed the cash flow generated by our portfolio securities. This might require that we sell portfolio securities at a time when we would otherwise not do so, which may affect adversely our future ability to generate cash flow. In addition, rising market interest rates could impact negatively the value of our investment portfolio, reducing the amount of assets serving as asset coverage for the senior securities.

Senior Leverage Risk. Our preferred stock will be junior in liquidation and with respect to distribution rights to our debt securities and any other borrowings. Senior securities representing indebtedness may constitute a substantial lien and burden on preferred stock by reason of their prior claim against our income and against our net assets in liquidation. We may not be permitted to declare dividends or other distributions with respect to any series of our preferred stock unless at such time we meet applicable asset coverage requirements and the payment of principal or interest is not in default with respect to the Tortoise Notes or any other borrowings.

Ratings and Asset Coverage Risk. To the extent that senior securities are rated, a rating does not eliminate or necessarily mitigate the risks of investing in our senior securities, and a rating may not fully or accurately reflect all of the credit and market risks associated with that senior security. A rating agency could downgrade the rating of our shares of preferred stock or debt securities, which may make such securities less liquid at an auction or in the secondary market, though probably with higher resulting interest rates. If a rating agency downgrades the rating assigned to a senior security, we may alter our portfolio or redeem the senior security. We may voluntarily redeem a senior security under certain circumstances.

Inflation Risk. Inflation is the reduction in the purchasing power of money resulting from an increase in the price of goods and services. Inflation risk is the risk that the inflation adjusted or real value of an investment in preferred stock or debt securities or the income from that investment will be worth less in the future. As inflation occurs, the real value of the preferred stock or debt securities and the dividend payable to holders of preferred stock or debt securities declines.

Auction Risk. To the extent that senior securities trade through an auction, there are certain risks associated with participating in an auction and certain risks if you try to sell senior securities outside of an auction in the secondary market. These risks will be described in more detail in an applicable prospectus supplement if we issue senior securities pursuant to this registration statement.

Decline in Net Asset Value Risk. A material decline in our NAV may impair our ability to maintain required levels of asset coverage for our preferred stock or debt securities.

See Risk Factors Additional Risks to Senior Security Holders for a more detailed discussion of these risks.

SUMMARY OF COMPANY EXPENSES

The following table and example contain information about the costs and expenses that common stockholders will bear directly or indirectly. In accordance with SEC requirements, the table below shows our expenses, including leverage costs, as a percentage of our net assets as of November 30, 2006, and not as a percentage of gross assets or Managed Assets. By showing expenses as a percentage of net assets, expenses are not expressed as a percentage of all of the assets we invest. The table and example are based on our capital structure as of November 30, 2006. As of that date, we had $235 million in senior securities outstanding (MMP Shares with an aggregate liquidation preference of $70 million and Tortoise Notes in an aggregate principal amount of $165 million) and approximately $32.45 million outstanding under our unsecured credit facility. Such senior securities and borrowings under our unsecured credit facility represent 28.8% of total assets as of November 30, 2006.

Stockholder Transaction Expense

Sales Load (as a percentage of offering price)	(1)
Offering Expenses Borne by the Company (as a percentage of offering price)	(1)
Dividend Reinvestment and Cash Purchase Plan Fees(2)	None

Annual Expenses	**Percentage of Net Assets Attributable to Common Stockholders**
Management Fee	1.65%
Leverage Costs(3)	2.82%
Other Expenses(4)	0.26%
Total Annual Expenses (excluding current and deferred income tax expenses)(5)	4.73%
Less Fee and Expense Reimbursement (through 2/28/09)(6)	(0.17)%
Net Annual Expenses (excluding current and deferred income tax expenses)	4.56%
Current Income Tax Expense	0.09%
Deferred Income Tax Expense(7)	13.37%
Net Annual Expenses (including current and deferred income tax expenses)(7)	18.02%

Example:

The following example illustrates the expenses that common stockholders would pay on a $1,000 investment in common stock, assuming (1) net annual expenses (excluding current and deferred income tax expenses) of 4.56% of net assets attributable to common shares in years 1 and 2 and increasing to 4.73% in years 3 through 10; (2) a 5% annual return; and (iii) all distributions are reinvested at NAV:(8)

	1 Year	3 Years	5 Years	10 Years
Total Expenses Paid by Common Stockholders(9)	$ 46	$ 140	$ 236	$ 478

The example should not be considered a representation of future expenses. Actual expenses may be greater or less than those assumed. Moreover, our actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

(1) If the securities to which this prospectus relates are sold to or through underwriters, the prospectus supplement will set forth any applicable sales load and the estimated offering expenses borne by us.

(2) Stockholders will pay a transaction fee plus brokerage charges if they direct the Plan Agent to sell common stock held in a Plan account. See Automatic Dividend Reinvestment and Cash Purchase Plan.

(3) Leverage Costs in the table reflect the weighted average cost of dividends payable on MMP Shares and the interest payable on Tortoise Notes and borrowings under our unsecured credit facility, expressed as a percentage of net assets. However, Tortoise Notes and MMP Shares were fully hedged under swap agreements as of November 30, 2006, which, as of that date, effectively reduced our Leverage Costs to 2.38%. In

Table of Contents

the future, our use of swap agreements may effectively reduce, increase or have no effect on, our Leverage Costs. For a more detailed discussion of our use of swap agreements, see Leverage Hedging Transactions and Effects of Leverage.

(4) Other Expenses are based on estimated amounts for the current fiscal year.

(5) The table presented in this footnote presents certain of our annual expenses as a percentage of Managed Assets as of November 30, 2006, and takes into account the effect of interest rate swap agreements.

Annual Expenses	**Percentage of Managed Assets**
Management Fee	0.95%
Leverage Costs[a]	1.36%
Other Expenses (excluding current and deferred income tax expenses)[b]	0.15%
Total Annual Expenses (excluding current and deferred income tax expenses)	2.46%
Less Fee and Expense Reimbursement (through 2/28/09)[c]	(0.10)%
Net Annual Expenses (excluding current and deferred income tax expenses)	2.36%

(a) Leverage Costs are calculated as described in Note 3 above except that they are based on the swap rates in effect as of November 30, 2006.

(b) Other Expenses are based on estimated amounts for the current fiscal year.

(c) Through February 28, 2009, the Adviser has contractually agreed to reimburse us for expenses in an amount equal to 0.10% of our average monthly Managed Assets.

(6) Through February 28, 2009, the Adviser has contractually agreed to reimburse us for expenses in an amount equal to 0.10% of our average monthly Managed Assets, which represents 0.17% of our net assets as of November 30, 2006. The management fee and reimbursement are expressed as a percentage of net assets in the table. Because holders of preferred stock and debt securities do not bear management fees and other expenses, the cost to common stockholders increases as leverage increases.

(7) For our fiscal year ended November 30, 2006, we accrued $71,190,049 in net deferred tax expense related to our net investment loss and realized and unrealized gains. Deferred income tax expense represents an estimate of our potential tax liability if we were to recognize the unrealized appreciation of our portfolio assets accumulated during our fiscal year ended November 30, 2006, based on the market value and tax basis of our assets as of November 30, 2006. Actual income tax expense (if any) will be incurred over many years, depending on if and when investment gains are realized, the then-current tax basis of assets, the level of net loss carryforwards and other factors.

(8) The example does not include the potential impact of current and deferred income tax expense. For the fiscal years ended November 30, 2006, 2005 and 2004, we accrued current and deferred income tax expense of

$71,661,802, $24,659,420 and $30,330,018, respectively, which represented $4.28, $1.65 and $2.39 per outstanding share of common stock as of the respective fiscal year end.

(9) The example does not include sales load or estimated offering costs.

The purpose of the table and the example above is to help investors understand the fees and expenses that they, as common stockholders, would bear directly or indirectly. For additional information with respect to our expenses, see Management of the Company.

Table of Contents

FINANCIAL HIGHLIGHTS

Information contained in the table below under the heading Per Common Share Data and Supplemental Data and Ratios shows our per common share operating performance. The information in this table is derived from our financial statements audited by Ernst & Young LLP, whose report on such financial statements is contained in our 2006 Annual Report and incorporated by reference into the statement of additional information, both of which are available from us.

	Year Ended November 30, 2006	Year Ended November 30, 2005	Period from February 27, 2004[1] through November 30, 2004
Per Common Share Data[2]			
Net Asset Value, beginning of period	$ 27.12	$ 26.53	$
Public offering price			25.00
Underwriting discounts and offering costs on initial public offering			(1.17)
Underwriting discounts and offering costs on issuance of preferred shares		(0.02)	(0.06)
Premiums less underwriting discounts and offering costs on secondary offering[3]			
Underwriting discounts and offering costs on shelf offering of common stock[4]	(0.14)		
Income (loss) from Investment Operations:			
Net investment loss[5]	(0.32)	(0.16)	(0.03)
Net realized and unrealized gain on investments[5]	7.41	2.67	3.77

Ratio of expenses (excluding current and deferred income tax expense) to average net assets before waiver:(7)(8)(9)(10)		3.97%		3.15%		2.01%

	Year Ended November 30, 2006	Year Ended November 30, 2005	Period from February 27, 2004[1] through November 30, 2004
Ratio of expenses (excluding current and deferred income tax expense) to average net assets after waiver:[7][8][9][10]	3.75%	2.78%	1.73%
Ratio of expenses (excluding current and deferred income tax expense), without regard to non-recurring organizational expenses, to average net assets before waiver:[7][8][9][10]	3.97%	3.15%	1.90%
Ratio of expenses (excluding current and deferred income tax expense), without regard to non-recurring organizational expenses, to average net assets after waiver:[7][8][9][10]	3.75%	2.78%	1.62%
Ratio of net investment loss to average net assets before waiver:[7][8][10]	(2.24)%	(1.42)%	(0.45)%
Ratio of net investment loss to average net assets after waiver:[7][8][10]	(2.02)%	(1.05)%	(0.17)%
Ratio of net investment loss to average net assets after current and deferred income tax expense, before waiver:[7][8][9]	(18.31)%	(7.37)%	(13.37)%
Ratio of net investment loss to average net assets after current and deferred income tax expense, after waiver:[7][8][9]	(18.09)%	(7.00)%	(13.65)%
Portfolio turnover rate[7]	2.18%	4.92%	1.83%
Tortoise Auction Rate Senior Notes, end of period (000 s)	$ 165,000	$ 165,000	$ 110,000
Tortoise Preferred Shares, end of period (000 s)	$ 70,000	$ 70,000	$ 35,000
Per common share amount of auction rate senior notes outstanding at end of period	$ 9.86	$ 11.07	$ 8.67
Per common share amount of net assets, excluding auction rate senior notes, at end of period	$ 41.68	$ 38.19	$ 35.21
Asset coverage, per $1,000 of principal amount of auction rate senior notes and short-term borrowings[11]	$ 4,051	$ 3,874	$ 4,378
Asset coverage ratio of auction rate senior notes and short-term borrowings[11]	405%	387%	438%
Asset coverage, per $25,000 liquidation value per share of preferred shares[12]	$ 215,155	$ 169,383	$ 265,395
Asset coverage ratio of preferred shares[13]	299%	272%	332%

(1) Commencement of Operations.

(2) Information presented relates to a share of common stock outstanding for the entire period.

(3) The amount is less than $0.01 per share, and represents the premium on the secondary offering of $0.14 per share, less the underwriting discounts and offering costs of $0.14 per share for the year ended November 30, 2005.

(4) Represents the dilution per common share from underwriting and other offering costs.

(5) The per common share data for the periods ended November 30, 2005 and 2004, do not reflect the change in estimate of investment income and return of capital, for the respective period. See Note 2C to the financial statements for further disclosure.

(6) Not annualized for periods less than a year. Total investment return is calculated assuming a purchase of common stock at the market price on the first day and a sale at the current market price on the last day of the period reported. The calculation also assumes reinvestment of dividends at actual prices pursuant to the Company s dividend reinvestment plan. Total investment return does not reflect brokerage commissions.

(7) Annualized for periods less than one full year.

Table of Contents

(8) The expense ratios and net investment loss ratios do not reflect the effect of dividend payments to preferred stockholders.

(9) The Company accrued $71,661,802, $24,659,420 and $30,330,018 for years ended November 30, 2006 and 2005 and for the period from February 27, 2004 through November 30, 2004, respectively, for current and deferred income tax expense.

(10) The ratio excludes the impact of current and deferred income taxes.

(11) Represents value of total assets less all liabilities and indebtedness not represented by auction rate senior notes, short-term borrowings and preferred shares at the end of the period divided by auction rate senior notes and short-term borrowings outstanding at the end of the period.

(12) Represents value of total assets less all liabilities and indebtedness not represented by preferred shares at the end of the period divided by preferred shares outstanding at the end of the period, assuming the retirement of all auction rate senior notes and short-term borrowings.

(13) Represents value of total assets less all liabilities and indebtedness not represented by auction rate senior notes, short-term borrowings and preferred shares at the end of the period divided by auction rate senior notes, short-term borrowings and preferred shares outstanding at the end of the period.

SENIOR SECURITIES

The following table sets forth information about our outstanding senior securities as of each fiscal year ended November 30 since our inception:

Year	Title of Security	Total Principal Amount/Liquidation Preference Outstanding	Asset Coverage Per $1,000 of Principal Amount	Asset Coverage Per Share ($25,000 Liquidation Preference)	Average Fair Value Per $25,000 Denomination or Per Share Amount[1]
2004	Tortoise Notes Series A and B	$ 110,000,000	$ 4,378		$ 25,000
	MMP Shares Series I (1,400 shares)	$ 35,000,000		$ 83,026	$ 25,000
		$ 145,000,000			
2005	Tortoise Notes (Series A, B and C)	$ 165,000,000	$ 3,874		$ 25,000
	MMP Shares (Series I and II) (2,800 shares)	$ 70,000,000		$ 68,008	$ 25,000
		$ 235,000,000			
2006	Tortoise Notes Series A, B and C	$ 165,000,000	$ 4,051		$ 25,000
		$ 70,000,000		$ 74,769	$ 25,000

MMP Shares Series I and II (2,800 shares)				
Borrowings Unsecured Revolving Credit Facility(2)	$	32,450,000	$	4,051
	$	267,450,000		

(1) Fair value of the Tortoise Notes and MMP Shares approximates the principal amount and liquidation preference, respectively, because the interest and dividend rates payable on Tortoise Notes and MMP Shares are determined at auctions and fluctuate with changes in prevailing market interest rates.

(2) We have an unsecured credit facility with U.S. Bank N.A which, as of November 30, 2006, allowed us to borrow up to $60,000,000. Effective February 27, 2007, we may borrow up to $120,000,000 under the credit facility. The credit facility expires on June 13, 2007.

Table of Contents

MARKET AND NET ASSET VALUE INFORMATION

Our common stock is listed on the New York Stock Exchange (NYSE) under the symbol TYG. Shares of our common stock commenced trading on the NYSE on February 25, 2004.

Our common stock has a limited trading history and has traded both at a premium and at a discount in relation to NAV. We cannot predict whether our shares will trade in the future at a premium or discount to NAV. The provisions of the 1940 Act generally require that the public offering price of common stock (less any underwriting commissions and discounts) must equal or exceed the NAV per share of a company s common stock (calculated within 48 hours of pricing). However, at our Annual Meeting of Stockholders held on April 15, 2005, our common stockholders granted to us the authority to sell a limited number of shares of our common stock for less than NAV, subject to certain conditions. We expect to resubmit the matter for stockholder approval at our Annual Meeting of Stockholders scheduled for April 13, 2007. Our issuance of common stock may have an adverse effect on prices in the secondary market for our common stock by increasing the number of shares of common stock available, which may put downward pressure on the market price for our common stock. The continued development of alternatives as vehicles for investing in a portfolio of energy infrastructure MLPs, including other publicly traded investment companies and private funds, may reduce or eliminate any tendency of our shares of common stock to trade at a premium in the future. Shares of common stock of closed-end investment companies frequently trade at a discount from NAV. See Risk Factors Additional Risks to Common Stockholders Market Discount Risk.

The following table sets forth for each of the periods indicated the high and low closing market prices for our shares of common stock on the NYSE, the NAV per share and the premium or discount to NAV per share at which our shares of common stock were trading. NAV is generally determined on the last business day of each calendar month. See Determination of Net Asset Value for information as to the determination of our NAV.

Month Ended	Market Price(1) High	Market Price(1) Low	Net Asset Value(2)	Premium/(Discount) to Net Asset Value(3) High	Premium/(Discount) to Net Asset Value(3) Low

Source: Bloomberg Financial and Fund Accounting Records.

(1) Based on high and low closing market price for the respective month.

(2) Based on the NAV calculated on the close of business on the last business day of each prior calendar month.

(3) Calculated based on the information presented. Percentages are rounded.

The last reported sale price, NAV per share and percentage premium to NAV per share of our common stock on March 14, 2007 were $36.77, $35.55 and 3.4%, respectively. As of March 14, 2007, we had 18,272,774 shares of our common stock outstanding and net assets of approximately $649,632,310.

USE OF PROCEEDS

Unless otherwise specified in a prospectus supplement, we will invest the net proceeds of any sales of securities in accordance with our investment objective and policies as described under Investment Objective and Principal Investment Strategies within approximately 3 months of receipt of such proceeds. We may also use proceeds from the sale of our securities to retire all or a portion of any short-term debt we incur in pursuit of our investment objective and policies, and for working capital purposes, including the payment of distributions, interest and operating expenses, although there is currently no intent to issue securities primarily for this purpose. Our investments may be delayed if suitable investments are unavailable at the time or for other reasons. Such investments may be delayed if suitable investments are unavailable at the time or for other reasons. Pending such investment, we anticipate that we will invest the proceeds in securities issued by the U.S. Government or its agencies or instrumentalities or in high quality, short-term or long-term debt obligations. A delay in the anticipated use of proceeds could lower returns, reduce our distribution to common stockholders and reduce the amount of cash available to make dividend and interest payments on preferred stock and debt securities, respectively. We will not receive any of the proceeds from a sale of our common stock by any selling stockholder.

Table of Contents

THE COMPANY

We are a nondiversified, closed-end management investment company registered under the 1940 Act. We were organized as a corporation on October 30, 2003, pursuant to a charter (the Charter) governed by the laws of the State of Maryland. Our fiscal year ends on November 30. In our initial public offering on February 27, 2004, and the exercise of subsequent overallotment options, we raised aggregate gross proceeds of $315,000,000. We completed three additional offerings of common stock in December 2004, August 2006 and December 2006. As of February 28, 2007, we had net assets of approximately $635,000,000 attributable to our common stock. Our common stock is listed on the NYSE under the symbol TYG. As of the date of this prospectus, we have issued three series of Tortoise Notes and two series of MMP Shares. The outstanding Tortoise Notes are rated Aaa and AAA by Moody s Investors Service Inc. (Moody s) and Fitch Ratings (Fitch), respectively. The outstanding MMP Shares are rated Aa2 and AA by Moody s and Fitch, respectively.

The following table provides information about our outstanding securities as of February 28, 2007:

Title of Class	Amount Authorized	Amount Held by the Company or for its Account	Amount Outstanding
Common Stock	100,000,000	0	18,232,065
Tortoise Notes			
Series A	$ 60,000,000	0	$ 60,000,000
Series B	$ 50,000,000	0	$ 50,000,000
Series C	$ 55,000,000	0	$ 55,000,000
Preferred Stock	10,000,000(1)		
Series I MMP Shares	1,400(2)	0	1,400
Series II MMP Shares	1,400(2)	0	1,400

(1) Includes 2,800 shares of preferred stock designated as MMP Shares as set forth below.

(2) Each share has a liquidation preference of $25,000 ($35,000,000 in the aggregate for each of Series I and Series II MMP Shares).

INVESTMENT OBJECTIVE AND PRINCIPAL INVESTMENT STRATEGIES

Investment Objective

Our investment objective is to seek a high level of total return with an emphasis on current distributions paid to stockholders. For purposes of our investment objective, total return includes capital appreciation of, and all distributions received from, securities in which we invest regardless of the tax character of the distributions. We seek to provide our stockholders with an efficient vehicle to invest in a portfolio of publicly traded MLPs in the energy infrastructure sector. Similar to the federal income tax characterization of cash distributions made by MLPs to its unit holders, we believe that our common stockholders will have relatively high levels of return of capital associated with cash distributions made by us to stockholders.

Energy Infrastructure Industry

We concentrate our investments in the energy infrastructure sector. We pursue our objective by investing principally in a portfolio of equity securities issued by MLPs. MLP common units historically have generated higher average total returns than domestic common stock (as measured by the S&P 500) and fixed income securities. A more detailed description of investment policies and restrictions and more detailed information about portfolio investments are contained in the Statement of Additional Information.

Energy Infrastructure Companies. For purposes of our policy of investing 90% of total assets in securities of energy infrastructure companies, an energy infrastructure company is one that derives each year at least 50% of its revenues from Qualifying Income under Section 7704 of the Internal Revenue Code or one that derives at least 50% of its revenues from the provision of services directly related to the generation of Qualifying

Income. Qualifying Income is defined as including any income and gains from the exploration, development, mining or production, processing, refining, transportation (including pipelines transporting gas, oil or products thereof), or the marketing of any mineral or natural resource (including fertilizer, geothermal energy, and timber).

Energy infrastructure companies (other than most pipeline MLPs) do not operate as public utilities or local distribution companies, and therefore are not subject to rate regulation by state or federal utility commissions. However, energy infrastructure companies may be subject to greater competitive factors than utility companies, including competitive pricing in the absence of regulated tariff rates, which could cause a reduction in revenue and which could adversely affect profitability. Most pipeline MLPs are subject to government regulation concerning the construction, pricing and operation of pipelines. Pipeline MLPs are able to set prices (rates or tariffs) to cover operating costs, depreciation and taxes, and provide a return on investment. These rates are monitored by the Federal Energy Regulatory Commission (FERC) which seeks to ensure that consumers receive adequate and reliable supplies of energy at the lowest possible price while providing energy suppliers and transporters a just and reasonable return on capital investment and the opportunity to adjust to changing market conditions.

Master Limited Partnerships. Under normal circumstances, we invest at least 70% of our total assets in equity securities of MLPs that each year derive at least 90% of their gross income from Qualifying Income and are organized as partnerships, thereby eliminating federal income tax at the entity level. An MLP generally has two classes of partners, the general partner, and the limited partners. The general partner is usually a major energy company, investment fund or the direct management of the MLP. The general partner normally controls the MLP through a 2% equity interest plus units that are subordinated to the common (publicly traded) units for at least the first five years of the partnership s existence and then only converting to common if certain financial tests are met.

As a motivation for the general partner to successfully manage the MLP and increase cash flows, the terms of most MLP partnership agreements typically provide that the general partner receives a larger portion of the net income as distributions reach higher target levels. As cash flow grows, the general partner receives a greater interest in the incremental income compared to the interest of limited partners. The general partner s incentive compensation typically increases to up to 50% of incremental income. Nevertheless, the aggregate amount of distributions to limited partners will increase as MLP distributions reach higher target levels. Given this incentive structure, the general partner has an incentive to streamline operations and undertake acquisitions and growth projects in order to increase distributions to all partners.

Energy infrastructure MLPs in which we invest generally can be classified in the following categories:

> *Pipeline MLPs*. Pipeline MLPs are common carrier transporters of natural gas, natural gas liquids (primarily propane, ethane, butane and natural gasoline), crude oil or refined petroleum products (gasoline, diesel fuel and jet fuel). Pipeline MLPs also may operate ancillary businesses such as storage and marketing of such products. Revenue is derived from capacity and transportation fees. Historically, pipeline output has been less exposed to cyclical economic forces due to its low cost structure and government-regulated nature. In addition, pipeline MLPs do not have direct commodity price exposure because they do not own the product being shipped.
>
> *Processing MLPs*. Processing MLPs are gatherers and processors of natural gas, as well as providers of transportation, fractionation and storage of natural gas liquids (NGLs). Revenue is derived from providing services to natural gas producers, which require treatment or processing before their natural gas commodity can be marketed to utilities and other end user markets. Revenue for the processor is fee based, although it is not uncommon to have some participation in the prices of the natural gas and NGL commodities for a portion of revenue.

Propane MLPs. Propane MLPs are distributors of propane to homeowners for space and water heating. Revenue is derived from the resale of the commodity on a margin over wholesale cost. The ability to maintain margin is a key to profitability. Propane serves approximately 3% of the household energy needs in the United States, largely for homes beyond the geographic reach of natural gas distribution pipelines. Approximately 70% of annual cash flow is earned during the winter heating season (October

Table of Contents

through March). Accordingly, volumes are weather dependent, but have utility type functions similar to electricity and natural gas.

Coal MLPs. Coal MLPs own, lease and manage coal reserves. Revenue is derived from production and sale of coal, or from royalty payments related to leases to coal producers. Electricity generation is the primary use of coal in the United States. Demand for electricity and supply of alternative fuels to generators are the primary drivers of coal demand. Coal MLPs are subject to operating and production risks, such as: the MLP or a lessee meeting necessary production volumes; federal, state and local laws and regulations which may limit the ability to produce coal; the MLP s ability to manage production costs and pay mining reclamation costs; and the effect on demand that the Clean Air Act standards have on coal end-users.

Marine Shipping MLPs. Marine shipping MLPs are primarily marine transporters of natural gas, crude oil or refined petroleum products. Marine shipping MLPs derive revenue from charging customers for the transportation of these products utilizing the MLPs vessels. Transportation services are typically provided pursuant to a charter or contract, the terms of which vary depending on, for example, the length of use of a particular vessel, the amount of cargo transported, the number of voyages made, the parties operating a vessel or other factors.

Although we also may invest in equity and debt securities of energy infrastructure companies that are organized and/or taxed as corporations, it is likely that any such investments will be in debt securities because the equity dividends from such corporations typically do not meet our investment objective. We also may invest in securities of general partners or other affiliates of MLPs and private companies operating energy infrastructure assets.

Investment Process

Under normal circumstances, we invest at least 90% of our total assets (including assets obtained through leverage) in securities of energy infrastructure companies. The Adviser seeks to invest in securities that offer a combination of quality, growth and yield intended to result in superior total returns over the long run. The Adviser s securities selection process includes a comparison of quantitative, qualitative, and relative value factors. Although the Adviser uses research provided by broker-dealers and investment firms, primary emphasis is placed on proprietary analysis and valuation models conducted and maintained by the Adviser s in-house investment analysts. To determine whether a company meets its criteria, the Adviser generally looks for a strong record of distribution growth, a solid ratio of debt to equity and coverage ratio with respect to distributions to unit holders, and a proven track record, incentive structure and management team. All of the public energy infrastructure companies in which we invest have a market capitalization greater than $100 million.

Investment Policies

We seek to achieve our investment objective by investing primarily in securities of MLPs that the Adviser believes offer attractive distribution rates and capital appreciation potential. We also may invest in other securities set forth below if the Adviser expects to achieve our objective with such investments.

Our policy of investing at least 90% of our total assets (including assets obtained through leverage) in securities of energy infrastructure companies is nonfundamental and may be changed by the Board of Directors without stockholder approval, provided that stockholders receive at least 60 days prior written notice of any change.

We have adopted the following additional nonfundamental policies:

Under normal circumstances, we invest at least 70% and up to 100% of our total assets in equity securities issued by MLPs. Equity securities currently consist of common units, convertible subordinated units, and pay-in-kind units.

We may invest up to 30% of our total assets in restricted securities, primarily through direct placements. Subject to this policy, we may invest without limitation in illiquid securities. The types of restricted securities that we may purchase include securities of private energy infrastructure companies and privately issued securities of publicly traded energy infrastructure companies. Restricted securities, whether issued by public companies or private companies, are generally considered illiquid. Investments in private companies that do not have any publicly traded shares or units are limited to 5% of total assets.

We may invest up to 25% of our total assets in debt securities of energy infrastructure companies, including certain securities rated below investment grade (junk bonds). Below investment grade debt securities will be rated at least B3 by Moody s and at least B by S&P at the time of purchase, or comparably rated by another statistical rating organization or if unrated, determined to be of comparable quality by the Adviser.

We will not invest more than 10% of our total assets in any single issuer.

We will not engage in short sales.

Unless otherwise stated, these investment restrictions apply at the time of purchase and we will not be required to reduce a position due solely to market value fluctuations.

Investment Securities

The types of securities in which we may invest include, but are not limited to, the following:

Equity Securities of MLPs. Consistent with our investment objective, we may invest up to 100% of total assets in equity securities issued by energy infrastructure MLPs, including common units, convertible subordinated units, pay-in-kind units (typically, I-Shares) and common units, subordinated units and preferred units of limited liability companies (LLCs) (that are treated as MLPs for federal income tax purposes). The table below summarizes the features of these securities, and a further discussion of these securities follows.

Table of Contents

	Common Units (for MLPs taxed as partnerships)(1)	Convertible Subordinated Units (for MLPs taxed as partnerships)	I-Shares
Voting Rights	Limited to certain significant decisions; no annual election of directors	Same as common units	No direct MLP voting rights
Dividend Priority	First right to minimum quarterly distribution (MQD) specified in Partnership Agreement; arrearage rights	Second right to MQD; no arrearage rights; may be paid in additional units	Equal in priority to common units but paid in additional I-Shares at current market value of I-Shares
Dividend Rate	Minimum set in partnership agreement; participate pro rata with subordinated units after both MQDs are met	Equal in amount to common units; participate pro rata with common units above the MQD	Equal in amount to common units
Trading	Listed on NYSE, AMEX or NASDAQ National Market	Not publicly traded	Listed on NYSE
Federal Income Tax Treatment	Generally, ordinary income to the extent of taxable income allocated to holder; distributions are tax-free return of capital to extent of holder s basis; remainder as capital gain	Same as common units	Full distribution treated as return of capital; since distribution is in shares, total basis is not reduced
Type of Investor	Retail; creates unrelated business taxable income for tax-exempt investor; investment by regulated investment companies limited to 25% of total assets	Same as common units	Retail and Institutional; does not create unrelated business taxable income; qualifying income for regulated investment companies
Liquidity Priority	Intended to receive return of all capital first	Second right to return of capital; pro rata with common units thereafter	Same as common units (indirect right through I-Share issuer)
Conversion Rights	None	One-to-one ratio into common units	None

(1) Some energy infrastructure companies in which we may invest have been organized as LLCs. Such companies are generally treated in the same manner as MLPs for federal income tax purposes. Common units of LLCs have similar characteristics as those of MLP common units, except that LLC common units typically have voting rights with respect to the LLC and LLC common units held by management are not entitled to increased

percentages of cash distributions as increased levels of cash distributions are received by the LLC. The characteristics of LLCs and their common units are more fully discussed below.

MLP Common Units. MLP common units represent an equity ownership interest in a partnership, providing limited voting rights and entitling the holder to a share of the company s success through distributions and/or capital appreciation. Unlike stockholders of a corporation, common unit holders do not elect directors annually and generally have the right to vote only on certain significant events, such as mergers, a sale of substantially all of the assets, removal of the general partner or material amendments to the partnership agreement. MLPs are required by their partnership agreements to distribute a large percentage of their current operating earnings. Common unit holders generally have first right to a MQD prior to distributions to the convertible subordinated unit holders or the general partner (including incentive distributions). Common unit holders typically

19

have arrearage rights if the MQD is not met. In the event of liquidation, MLP common unit holders have first rights to the partnership s remaining assets after bondholders, other debt holders, and preferred unit holders have been paid in full. MLP common units trade on a national securities exchange or over-the-counter.

Limited Liability Company Common Units. Some energy infrastructure companies in which we may invest have been organized as LLCs. Such LLCs are generally treated in the same manner as MLPs for federal income tax purposes. Consistent with our investment objective and policies, we may invest in common units or other securities of such LLCs including preferred units, subordinated units and debt securities. LLC common units represent an equity ownership interest in an LLC, entitling the holder to a share of the LLC s success through distributions and/or capital appreciation. Similar to MLPs, LLCs typically do not pay federal income tax at the entity level and are required by their operating agreements to distribute a large percentage of their current operating earnings. LLC common unit holders generally have first right to a MQD prior to distributions to subordinated unit holders and typically have arrearage rights if the MQD is not met. In the event of liquidation, LLC common unit holders have a right to the LLC s remaining assets after bond holders, other debt holders and preferred unit holders, if any, have been paid in full. LLC common units may trade on a national securities exchange or over-the-counter.

In contrast to MLPs, LLCs have no general partner and there are no incentives that entitle management or other unit holders to increased percentages of cash distributions as distributions reach higher target levels. In addition, LLC common unit holders typically have voting rights with respect to the LLC, whereas MLP common units have limited voting rights.

MLP Convertible Subordinated Units. MLP convertible subordinated units are typically issued by MLPs to founders, corporate general partners of MLPs, entities that sell assets to MLPs, and institutional investors. The purpose of the convertible subordinated units is to increase the likelihood that during the subordination period there will be available cash to be distributed to common unit holders. We expect to purchase convertible subordinated units in direct placements from such persons. Convertible subordinated units generally are not entitled to distributions until holders of common units have received specified MQD, plus any arrearages, and may receive less in distributions upon liquidation. Convertible subordinated unit holders generally are entitled to MQD prior to the payment of incentive distributions to the general partner, but are not entitled to arrearage rights. Therefore, they generally entail greater risk than MLP common units. They are generally convertible automatically into the senior common units of the same issuer at a one-to-one ratio upon the passage of time or the satisfaction of certain financial tests. These units generally do not trade on a national exchange or over-the-counter, and there is no active market for convertible subordinated units. The value of a convertible security is a function of its worth if converted into the underlying common units. Convertible subordinated units generally have similar voting rights to MLP common units. Distributions may be paid in cash or in-kind.

MLP I-Shares. I-Shares represent an indirect investment in MLP I-units. I-units are equity securities issued to affiliates of MLPs, typically a limited liability company, that owns an interest in and manages the MLP. The I-Share issuer has management rights but is not entitled to incentive distributions. The I-Share issuer s assets consist exclusively of MLP I-units; however, the MLP does not allocate income or loss to the I-Share issuer. Distributions by MLPs to I-unit holders are made in the form of additional I-units, generally equal in amount to the cash received by common unit holders of MLPs. Distributions to I-Share holders are made in the form of additional I-Shares, generally equal in amount to the I-units received by the I-Share issuer. The issuer of the I-Share is taxed as a corporation for federal income tax purposes. Accordingly, investors receive a Form 1099, are not allocated their proportionate share of income of the MLPs and are not subject to state filing obligations.

Debt Securities. We may invest up to 25% of our total assets in debt securities of energy infrastructure companies, including securities rated below investment grade. These debt securities may have fixed or variable principal payments and all types of interest rate and dividend payment and reset terms, including fixed rate, adjustable rate, zero coupon, contingent, deferred, payment-in-kind and auction rate features. To the extent that we invest in below investment grade debt securities, such securities will be rated, at the time of investment, at least B by S&P or B3 by Moody s or a comparable rating by at least one other rating agency or, if unrated, determined by the Adviser to be of comparable quality. If a security satisfies our minimum rating criteria at the time of purchase and subsequently is downgraded below such rating, we will not be required to dispose of such security. If a downgrade occurs, the Adviser will consider what action, including the sale of such security, is in the best interest of us and our stockholders.

Because the risk of default is higher for below investment grade securities than investment grade securities, the Adviser s research and credit analysis is an especially important part of managing securities of this type. The Adviser attempts to identify those issuers of below investment grade securities whose financial condition the Adviser believes are adequate to meet future obligations or have improved or are expected to improve in the future. The Adviser s analysis focuses on relative values based on such factors as interest or dividend coverage, asset coverage, earnings prospects and the experience and managerial strength of the issuer.

Restricted Securities. We may invest up to 30% of our total assets in restricted securities, primarily through direct placements. An issuer may be willing to offer the purchaser more attractive features with respect to securities issued in direct placements because it has avoided the expense and delay involved in a public offering of securities. Adverse conditions in the public securities markets also may preclude a public offering of securities. MLP convertible subordinated units typically are purchased in private placements and do not trade on a national exchange or over-the-counter, and there is no active market for convertible subordinated units. MLP convertible subordinated units typically are purchased from affiliates of the issuer or other existing holders of convertible units rather than directly from the issuer.

Restricted securities obtained by means of direct placements are less liquid than securities traded in the open market because of statutory and contractual restrictions on resale. Such securities are, therefore, unlike securities that are traded in the open market, which are likely to be sold immediately if the market is adequate. This lack of liquidity creates special risks. However, we could sell such securities in privately negotiated transactions with a limited number of purchasers or in public offerings under the 1933 Act. MLP convertible subordinated units also convert to publicly traded common units upon the passage of time and/or satisfaction of certain financial tests.

Temporary and Defensive Investments. Pending investment of offering or leverage proceeds, we may invest such proceeds in securities issued or guaranteed by the U.S. Government or its instrumentalities or agencies, short-term debt securities, certificates of deposit, bankers acceptances and other bank obligations, commercial paper rated in the highest category by a rating agency or other liquid fixed income securities deemed by the Adviser to be of similar quality (collectively, short-term securities), or in cash or cash equivalents, all of which are expected to provide a lower yield than the securities of energy infrastructure companies. We also may invest in short-term securities or cash on a temporary basis to meet working capital needs including, but not limited to, for collateral in connection with certain investment techniques, to hold a reserve pending payment of distributions, and to facilitate the payment of expenses and settlement of trades.

Under adverse market or economic conditions, we may invest up to 100% of our total assets in short-term securities or cash. The yield on short-term securities or cash may be lower than the returns on MLPs or yields on lower rated fixed income securities. To the extent we invest in short-term securities or cash for defensive purposes, such investments are inconsistent with, and may result in us not achieving, our investment objective.

Portfolio Turnover

Our annual portfolio turnover rate may vary greatly from year to year. Although we cannot accurately predict our annual portfolio turnover rate, it is not expected to exceed 30% under normal circumstances. For the fiscal years ended November 30, 2006 and 2005, our actual portfolio turnover rate was 2.18% and 4.92%, respectively. Portfolio turnover rate is not considered a limiting factor in the execution of investment decisions for us. A higher turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that the Company bears. High portfolio turnover may result in our recognition of gains that will increase our tax liability and thereby lower the amount of our after-tax distributions. In addition, high portfolio turnover may increase our current and accumulated earnings and profits, resulting in a greater portion of our distributions being treated as taxable dividends for federal income tax purposes. See Certain Federal Income Tax Matters.

Table of Contents

Conflicts of Interest

Conflicts of interest may arise from the fact that the Adviser and its affiliates carry on substantial investment activities for other clients, in which we have no interest, some of which may have similar investment strategies as us. The Adviser or its affiliates may have financial incentives to favor certain of such accounts over us. Any of their proprietary accounts and other customer accounts may compete with us for specific trades. The Adviser or its affiliates may give advice and recommend securities to, or buy or sell securities for, us which advice or securities may differ from advice given to, or securities recommended or bought or sold for, other accounts and customers, even though their investment objectives may be the same as, or similar to, our objectives. When two or more clients advised by the Adviser or its affiliates seek to purchase or sell the same publicly traded securities, the securities actually purchased or sold will be allocated among the clients on a good faith equitable basis by the Adviser in its discretion and in accordance with the client s various investment objectives and the Adviser s procedures. In some cases, this system may adversely affect the price or size of the position we may obtain or sell. In other cases, our ability to participate in volume transactions may produce better execution for us.

The Adviser also serves as investment adviser to Tortoise Energy Capital Corporation (TYY) and Tortoise North American Energy Corporation (TYN), which are nondiversified, closed-end investment management companies, and managed accounts that invest in MLPs. TYY, which commenced operations on May 31, 2005, invests primarily in equity securities of MLPs and their affiliates in the energy infrastructure sector. TYN, which commenced operations on October 31, 2005, invests primarily in equity securities of companies in the energy sector whose primary operations are in North America. The Adviser also serves as the investment adviser to Tortoise Capital Resources Corporation (TTO), a non-diversified closed-end management investment company that has elected to be regulated as a business development company under the 1940 Act. TTO, which commenced operations on December 8, 2005, invests primarily in privately held and micro-cap public energy companies operating in the midstream and downstream segments, and to a lesser extent the upstream segment. To the extent certain MLP securities or other energy infrastructure company securities meet our investment objective and the objectives of other investment companies or accounts managed by the Adviser, we may compete with such companies or accounts for the same investment opportunities.

The Adviser will evaluate a variety of factors in determining whether a particular investment opportunity or strategy is appropriate and feasible for the relevant account at a particular time, including, but not limited to, the following: (1) the nature of the investment opportunity taken in the context of the other investments at the time; (2) the liquidity of the investment relative to the needs of the particular entity or account; (3) the availability of the opportunity (i.e., size of obtainable position); (4) the transaction costs involved; and (5) the investment or regulatory limitations applicable to the particular entity or account. Because these considerations may differ when applied to us and relevant accounts under management in the context of any particular investment opportunity, our investment activities, on the one hand, and other managed accounts, on the other hand, may differ considerably from time to time. In addition, our fees and expenses will differ from those of the other managed accounts. Accordingly, investors should be aware that our future performance and future performance of other accounts of the Adviser may vary.

Situations may occur when we could be disadvantaged because of the investment activities conducted by the Adviser and its affiliates for its other funds or accounts. Such situations may be based on, among other things, the following: (1) legal or internal restrictions on the combined size of positions that may be taken for us or the other accounts, thereby limiting the size of our position; (2) the difficulty of liquidating an investment for us or the other accounts where the market cannot absorb the sale of the combined position; or (3) limits on co-investing in negotiated transactions under the 1940 Act, as discussed further below.

Under the 1940 Act, we may be precluded from co-investing in negotiated private placements of securities with our affiliates, including other funds managed by the Adviser. We and the Adviser have applied to the SEC for exemptive relief to permit us and our affiliates to make such investments. There is no guarantee that the requested relief will be granted by SEC. Unless and until we obtain an exemptive order, we will not co-invest with our affiliates in negotiated private placement transactions. Unless we receive exemptive relief, the Adviser will observe a policy for allocating negotiated private placement opportunities among its clients that takes into account the amount of each client s available cash and its investment objectives.

Table of Contents

To the extent that the Adviser sources and structures private investments in MLPs, certain employees of the Adviser may become aware of actions planned by MLPs, such as acquisitions, that may not be announced to the public. It is possible that we could be precluded from investing in or selling securities of an MLP about which the Adviser has material, non-public information; however, it is the Adviser s intention to ensure that any material, non-public information available to certain employees of the Adviser is not shared with the employees responsible for the purchase and sale of publicly traded MLP securities. Our investment opportunities also may be limited by affiliations of the Adviser or its affiliates with energy infrastructure companies.

The Adviser and its principals, officers, employees, and affiliates may buy and sell securities or other investments for their own accounts and may have actual or potential conflicts of interest with respect to investments made on our behalf. As a result of differing trading and investment strategies or constraints, positions may be taken by principals, officers, employees, and affiliates of the Adviser that are the same as, different from, or made at a different time than positions taken for us. Further, the Adviser may at some time in the future, manage other investment funds with the same investment objective as ours.

LEVERAGE

Use of Leverage

We currently engage in leverage and intend to borrow money or issue additional debt securities, and/or issue additional preferred stock, which may be auction rate securities, to provide us with additional funds to invest. The borrowing of money and the issuance of preferred stock and debt securities represent the leveraging of our common stock. Currently, we anticipate using leverage to represent approximately 33% of our total assets, including the proceeds from such leverage. However, we reserve the right at any time, if we believe that market conditions are appropriate, to use financial leverage to the extent permitted by the 1940 Act (50% for preferred stock and 331/3% for debt). On July 24, 2006, our Board of Directors approved a policy permitting temporary increases in the amount of leverage we may use from 33% of our total assets to up to 38% of our total assets at the time of incurrence, provided that (i) such leverage is consistent with the limits set forth in the 1940 Act, and (ii) such increased leverage is reduced over time in an orderly fashion. We generally will not use leverage unless we believe that leverage will serve the best interests of our stockholders. The principal factor used in making this determination is whether the potential return is likely to exceed the cost of leverage. We will not issue additional leverage where the estimated costs of issuing such leverage and the on-going cost of servicing the payment obligations on such leverage exceed the estimated return on the proceeds of such leverage. We note, however, that in making the determination of whether to issue leverage, we must rely on estimates of leverage costs and expected returns. Actual costs of leverage vary over time depending on interest rates and other factors. Actual returns vary, of course, depending on many factors. Our Board also will consider other factors, including whether the current investment opportunities will help us achieve our investment objective and strategies.

We have established an unsecured credit facility with U.S. Bank N.A., which currently allows us to borrow up to $120,000,000. Outstanding balances under the credit facility accrue interest at a variable annual rate equal to the one-month LIBOR rate plus 0.75%. As of November 30, 2006, the current rate was 6.07%. The credit facility remains in effect through June 13, 2007 and we may draw on the facility from time to time in accordance with our investment policies. As of November 30, 2006, we had approximately $32.45 million outstanding on our credit facility.

We also may borrow up to an additional 5% of our total assets (not including the amount so borrowed) for temporary purposes, including the settlement and clearance of securities transactions, which otherwise might require untimely dispositions of portfolio holdings.

Under the 1940 Act, we are not permitted to issue preferred stock unless immediately after such issuance we have total assets (including the proceeds of such issuance) at least equal to 200% of the liquidation value of the outstanding preferred stock. Stated another way, we may not issue preferred stock that, together with outstanding preferred stock, has an aggregate liquidation value of more than 50% of our total assets (less liabilities and indebtedness), including the amount leveraged. In addition, we are not permitted to declare any cash dividend or other distribution on our common stock unless, at the time of such declaration, the total assets less liabilities and indebtedness (determined after deducting the amount of such dividend or distribution) is at least 200% of such liquidation value. We may, as a result of market conditions or otherwise, be required to purchase or redeem preferred stock, or sell a portion of our investments when it may be disadvantageous to do so, in order to maintain the required asset coverage. Common stockholders would bear the costs of issuing additional preferred stock, which may include offering expenses and the ongoing payment of dividends. Under the 1940 Act, we may only issue one class of preferred stock. So long as MMP Shares are outstanding, any preferred stock offered pursuant to this prospectus and any related prospectus supplement will rank on parity with any outstanding MMP Shares.

Under the 1940 Act, we are not permitted to issue debt securities or incur other indebtedness constituting senior securities unless immediately thereafter we have total assets (including the proceeds of the indebtedness) at least equal to 300% of the amount of the outstanding indebtedness. Stated another way, we may not borrow for investment purposes more than 331/3% of our total assets, including the amount borrowed. We also must maintain this 300% asset coverage for as long as the indebtedness is outstanding. The 1940 Act provides that we may not declare any cash dividend or other distribution on common or preferred stock, or purchase any of our shares of stock (through tender offers or otherwise), unless we would satisfy this 300% asset coverage after deducting the amount

Table of Contents

of the dividend, other distribution or share purchase price, as the case may be. If the asset coverage for indebtedness declines to less than 300% as a result of market fluctuations or otherwise, we may be required to sell a portion of our investments when it may be disadvantageous to do so. Under the 1940 Act, we may only issue one class of senior securities representing indebtedness. So long as Tortoise Notes are outstanding, any debt securities offered pursuant to this prospectus and any related prospectus supplement will be ranked on parity with any outstanding Tortoise Notes.

Hedging Transactions

In an attempt to reduce the interest rate risk arising from our leveraged capital structure, we currently use, and may in the future use, interest rate transactions such as swaps, caps and floors. The use of interest rate transactions is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio security transactions. In an interest rate swap, we would agree to pay to the other party to the interest rate swap (which is known as the counterparty) a fixed rate payment in exchange for the counterparty agreeing to pay to us a variable rate payment intended to approximate our variable rate payment obligation on any variable rate borrowings, such as Tortoise Notes and variable rate preferred shares, such as MMP Shares. The payment obligations would be based on the notional amount of the swap. In an interest rate cap, we would pay a premium to the counterparty up to the interest rate cap and, to the extent that a specified variable rate index exceeds a predetermined fixed rate of interest, would receive from the counterparty payments equal to the difference based on the notional amount of such cap. In an interest rate floor, we would be entitled to receive, to the extent that a specified index falls below a predetermined interest rate, payments of interest on a notional principal amount from the party selling the interest rate floor. Depending on the state of interest rates in general, our use of interest rate transactions could affect our ability to make required interest payments on the Tortoise Notes or dividend payments on MMP Shares. To the extent there is a decline in interest rates, the value of the interest rate transactions could decline. If the counterparty to an interest rate transaction defaults, we would not be able to use the anticipated net receipts under the interest rate transaction to offset our cost of financial leverage.

We have entered into interest rate swap transactions intended to hedge our interest and dividend payment obligations under the currently outstanding Tortoise Notes and MMP Shares, respectively, against material increases in interest rates. See Risk Factors Company Risks Hedging Strategy Risk.

Effects of Leverage

As of November 30, 2006, we were obligated to pay a rate of 5.57% on $35 million aggregate liquidation preference for Series I MMP Shares and $35 million aggregate liquidation preference for Series II MMP Shares, respectively. These rates include commissions paid to the auction agent in the amount of 0.25%. However, we have entered into interest rate swap agreements to protect ourselves from increasing dividend expense on MMP Shares resulting from increasing short-term interest rates. Under the terms of outstanding swap agreements as of November 30, 2006, we were instead obligated to pay a rate of 5.20% and 5.21%, respectively, on a notional amount of $35 million for Series I MMP Shares and a notional amount of $35 million for Series II MMP Shares.

As of November 30, 2006, we were obligated to pay a rate of 5.53%, 5.52% and 5.49% on a principal amount of $60 million for Series A Tortoise Notes, $50 million principal amount for Series B Tortoise Notes and $55 million principal amount for Series C Tortoise Notes, respectively. These rates include commissions paid to the auction agent in the amount of 0.25%. However, we have entered into interest rate swap agreements to protect ourselves from increasing interest expense on Tortoise Notes resulting from increasing short-term interest rates. Under the terms of outstanding swap agreements as of November 30, 2006, we were instead obligated to pay a rate of 3.54%, 3.56% and 4.54% on a notional amount of $60 million for Series A Tortoise Notes, $50 million notional amount for Series B Tortoise Notes and $55 million notional amount for Series C Tortoise Notes, respectively.

Assuming that the dividend rates payable on the MMP Shares and the interest rates payable on the Tortoise Notes and borrowings under our unsecured credit facility remain as described above (an average annual cost of 5.62%, based on the amount of leverage outstanding at November 30, 2006), the annual return that our portfolio must experience (net of expenses) in order to cover leverage costs would be 2.63%.

Table of Contents

The following table is designed to illustrate the effect of the foregoing level of leverage on the return to a common stockholder, assuming hypothetical annual returns (net of expenses) of our portfolio of -10% to 10%. As the table shows, the leverage generally increases the return to common stockholders when portfolio return is positive or greater than the cost of leverage and decreases the return when the portfolio return is negative or less than the cost of leverage. The figures appearing in the table are hypothetical, and actual returns may be greater or less than those appearing in the table.

Assumed Portfolio Return (net of expenses)	10%	5%	0%	5%	10%
Corresponding Common Share Return	19.4%	11.7%	4.0%	3.7%	11.3%

While we use leverage, the amount of the fees paid to the Adviser for investment advisory and management services are higher than if we did not use leverage because the fees paid are calculated based on our Managed Assets, which include assets purchased with leverage. Therefore, the Adviser has a financial incentive to use leverage, which will create a conflict of interest between the Adviser and our common stockholders. Because payments on any leverage would be paid by us at a specified rate, only our common stockholders would bear management fees and other expenses we incur.

We cannot fully achieve the benefits of leverage until we have invested the proceeds resulting from the use of leverage in accordance with our investment objective and policies. For further information about leverage, see Risk Factors Additional Risks to Common Stockholders Leverage Risk.

Table of Contents

RISK FACTORS

Investing in any of our securities involves risk, including the risk that you may receive little or no return on your investment or even that you may lose part or all of your investment. Therefore, before investing in any of our securities you should consider carefully the following risks, as well as any risk factors included in the applicable prospectus supplement.

Company Risks

We are a nondiversified, closed-end management investment company designed primarily as a long-term investment vehicle and not as a trading tool. An investment in our securities should not constitute a complete investment program for any investor and involves a high degree of risk. Due to the uncertainty in all investments, there can be no assurance that we will achieve our investment objective.

The following are the general risks of investing in our securities that affect our ability to achieve our investment objective. The risks below could lower the returns and distributions on common stock and reduce the amount of cash and net assets available to make dividend payments on preferred stock and interest payments on debt securities.

Concentration Risk. Under normal circumstances, we concentrate our investments in the energy infrastructure sector, with an emphasis on securities issued by MLPs. Risks inherent in the energy infrastructure business of these types of MLPs include the following:

> Processing and coal MLPs may be directly affected by energy commodity prices. The volatility of commodity prices can indirectly affect certain other MLPs due to the impact of prices on volume of commodities transported, processed, stored or distributed. Pipeline MLPs are not subject to direct commodity price exposure because they do not own the underlying energy commodity. While propane MLPs do own the underlying energy commodity, the Adviser seeks high quality MLPs that are able to mitigate or manage direct margin exposure to commodity price levels. The MLP sector can be hurt by market perception that MLPs performance and distributions are directly tied to commodity prices.
>
> The profitability of MLPs, particularly processing and pipeline MLPs, may be materially impacted by the volume of natural gas or other energy commodities available for transporting, processing, storing or distributing. A significant decrease in the production of natural gas, oil, coal or other energy commodities, due to a decline in production from existing facilities, import supply disruption, depressed commodity prices or otherwise, would reduce revenue and operating income of MLPs and, therefore, the ability of MLPs to make distributions to partners.
>
> A sustained decline in demand for crude oil, natural gas and refined petroleum products could adversely affect MLP revenues and cash flows. Factors that could lead to a decrease in market demand include a recession or other adverse economic conditions, an increase in the market price of the underlying commodity, higher taxes or other regulatory actions that increase costs, or a shift in consumer demand for such products. Demand may also be adversely impacted by consumer sentiment with respect to global warming and/or by any state or federal legislation intended to promote the use of alternative energy sources, such as bio-fuels.
>
> A portion of any one MLP s assets may be dedicated to natural gas reserves and other commodities that naturally deplete over time, which could have a materially adverse impact on an MLP s ability to make

distributions. Often the MLPs depend upon exploration and development activities by third parties.

MLPs employ a variety of means of increasing cash flow, including increasing utilization of existing facilities, expanding operations through new construction, expanding operations through acquisitions, or securing additional long-term contracts. Thus, some MLPs may be subject to construction risk, acquisition risk or other risk factors arising from their specific business strategies. A significant slowdown in large energy companies disposition of energy infrastructure assets and other merger and acquisition activity in the energy MLP industry could reduce the growth rate of cash flows we receive from MLPs that grow through acquisitions.

The profitability of MLPs could be adversely affected by changes in the regulatory environment. Most MLPs assets are heavily regulated by federal and state governments in diverse matters, such as the way in which certain MLP assets are constructed, maintained and operated and the prices MLPs may charge for their services. Such regulation can change over time in scope and intensity. For example, a particular byproduct of an MLP process may be declared hazardous by a regulatory agency and unexpectedly increase production costs. Moreover, many state and federal environmental laws provide for civil as well as regulatory remediation, thus adding to the potential exposure an MLP may face.

Extreme weather patterns, such as hurricane Ivan in 2004 and hurricane Katrina in 2005, could result in significant volatility in the supply of energy and power and could adversely impact the value of the securities in which we invest. This volatility may create fluctuations in commodity prices and earnings of companies in the energy infrastructure industry.

A rising interest rate environment could adversely impact the performance of MLPs. Rising interest rates could limit the capital appreciation of equity units of MLPs as a result of the increased availability of alternative investments at competitive yields with MLPs. Rising interest rates also may increase an MLP s cost of capital. A higher cost of capital could limit growth from acquisition/expansion projects and limit MLP distribution growth rates.

Since the September 11, 2001 attacks, the U.S. Government has issued public warnings indicating that energy assets, specifically those related to pipeline infrastructure, production facilities and transmission and distribution facilities, might be specific targets of terrorist activity. The continued threat of terrorism and related military activity likely will increase volatility for prices in natural gas and oil and could affect the market for products of MLPs.

Holders of MLP units are subject to certain risks inherent in the partnership structure of MLPs including (1) tax risks (described below), (2) limited ability to elect or remove management, (3) limited voting rights, except with respect to extraordinary transactions, and (4) conflicts of interest of the general partner, including those arising from incentive distribution payments.

Industry Specific Risk. Energy infrastructure companies also are subject to risks specific to the industry they serve.

Pipeline MLPs are subject to demand for crude oil or refined products in the markets served by the pipeline, sharp decreases in crude oil or natural gas prices that cause producers to curtail production or reduce capital spending for exploration activities, and environmental regulation. Demand for gasoline, which accounts for a substantial portion of refined product transportation, depends on price, prevailing economic conditions in the markets served, and demographic and seasonal factors. Pipeline MLP unit prices are primarily driven by distribution growth rates and prospects for distribution growth. Pipeline MLPs are subject to regulation by FERC with respect to tariff rates these companies may charge for pipeline transportation services. An adverse determination by FERC with respect to the tariff rates of a pipeline MLP could have a material adverse effect on the business, financial condition, results of operations and cash flows of that pipeline MLP and its ability to make cash distributions to its equity owners.

Processing MLPs are subject to declines in production of natural gas fields, which utilize the processing facilities as a way to market the gas, prolonged depression in the price of natural gas or crude oil refining, which curtails production due to lack of drilling activity and declines in the prices of natural gas liquids products and natural gas prices, resulting in lower processing margins.

Propane MLPs are subject to earnings variability based upon weather patterns in the locations where the company operates and the wholesale cost of propane sold to end customers. Propane MLP unit prices are based on safety in distribution coverage ratios, interest rate environment and, to a lesser extent, distribution growth.

Coal MLPs are subject to demand variability based on favorable weather conditions, strong or weak domestic economy, the level of coal stockpiles in the customer base, and the general level of prices of

Table of Contents

competing sources of fuel for electric generation. They also are subject to supply variability based on the geological conditions that reduce productivity of mining operations, regulatory permits for mining activities and the availability of coal that meets Clean Air Act standards. Demand and prices for coal may also be impacted by current and proposed laws, regulations and/or trends, at the federal, state or local levels, to impose limitations on chemical emissions from coal-fired power plants and other coal end-users. Any such limitations may reduce the demand for coal produced, transported or delivered by coal MLPs.

Marine shipping MLPs are subject to the demand for, and the level of consumption of, refined petroleum products, crude oil or natural gas in the markets served by the marine shipping MLPs, which in turn could affect the demand for tank vessel capacity and charter rates. These MLPs vessels and their cargoes are also subject to the risks of being damaged or lost due to marine disasters, bad weather, mechanical failures, grounding, fire, explosions and collisions, human error, piracy, and war and terrorism.

MLP Risk. We invest primarily in equity securities of MLPs. As a result, we are subject to the risks associated with an investment in MLPs, including cash flow risk, tax risk and deferred tax risk, as described in more detail below.

Cash Flow Risk. We derive substantially all of our cash flow from investments in equity securities of MLPs. The amount of cash that we have available to pay or distribute to holders of our securities depends entirely on the ability of MLPs held by us to make distributions to their partners and the tax character of those distributions. We have no control over the actions of underlying MLPs. The amount of cash that each individual MLP can distribute to its partners will depend on the amount of cash it generates from operations, which will vary from quarter to quarter depending on factors affecting the energy infrastructure market generally and on factors affecting the particular business lines of the MLP. Available cash will also depend on the MLPs level of operating costs (including incentive distributions to the general partner), level of capital expenditures, debt service requirements, acquisition costs (if any), fluctuations in working capital needs and other factors.

Tax Risk of MLPs. Our ability to meet our investment objective will depend on the level of taxable income, dividends and distributions we receive from the MLPs and other securities of energy infrastructure companies in which we invest, a factor over which we have no control. The benefit we derive from our investment in MLPs depends largely on the MLPs being treated as partnerships for federal income tax purposes. As a partnership, an MLP has no federal income tax liability at the entity level. If, as a result of a change in current law or a change in an MLP s business, an MLP were treated as a corporation for federal income tax purposes, the MLP would be obligated to pay federal income tax on its income at the corporate tax rate. If an MLP were classified as a corporation for federal income tax purposes, the amount of cash available for distribution would be reduced and the distributions we receive might be taxed entirely as dividend income. Therefore, treatment of one or more MLPs as a corporation for federal income tax purposes could affect our ability to meet our investment objective and would reduce the amount of cash available to pay or distribute to holders of our securities.

Deferred Tax Risks of MLPs. As a limited partner in the MLPs in which we invest, we will receive a pro rata share of income, gains, losses and deductions from those MLPs. Historically, a significant portion of income from such MLPs has been offset by tax deductions. We will incur a current tax liability on that portion of an MLP s income and gains that is not offset by tax deductions and losses. The percentage of an MLP s income and gains which is offset by tax deductions and losses will fluctuate over time for various reasons. A significant slowdown in acquisition activity by MLPs held in our portfolio could result in a reduction of accelerated depreciation generated by new acquisitions, which may result in increased current income tax liability to us.

We will accrue deferred income taxes for any future tax liability associated with that portion of MLP distributions considered to be a tax-deferred return of capital as well as capital appreciation of our investments. Upon the sale of an MLP security, we may be liable for previously deferred taxes. We will rely to some extent on information provided by the MLPs, which is not necessarily timely, to estimate deferred tax liability for purposes of financial statement reporting and determining our NAV. From time to time we will modify our estimates or assumptions regarding our deferred tax liability as new information becomes available.

Equity Securities Risk. MLP common units and other equity securities can be affected by macro economic and other factors affecting the stock market in general, expectations of interest rates, investor sentiment towards MLPs or the energy sector, changes in a particular issuer s financial condition, or unfavorable or unanticipated poor performance of a particular issuer (in the case of MLPs, generally measured in terms of distributable cash flow). Prices of common units of individual MLPs and other equity securities also can be affected by fundamentals unique to the partnership or company, including earnings power and coverage ratios.

Investing in securities of smaller companies may involve greater risk than is associated with investing in more established companies. Companies with smaller capitalization may have limited product lines, markets or financial resources; may lack management depth or experience; and may be more vulnerable to adverse general market or economic developments than larger more established companies.

Because MLP convertible subordinated units generally convert to common units on a one-to-one ratio, the price that we can be expected to pay upon purchase or to realize upon resale is generally tied to the common unit price less a discount. The size of the discount varies depending on a variety of factors including the likelihood of conversion, and the length of time remaining to conversion, and the size of the block purchased.

The price of I-Shares and their volatility tend to be correlated to the price of common units, although the price correlation is not precise.

Hedging Strategy Risk. We currently use, and may in the future use, interest rate transactions for hedging purposes only, in an attempt to reduce the interest rate risk arising from our leveraged capital structure. Interest rate transactions that we may use for hedging purposes will expose us to certain risks that differ from the risks associated with our portfolio holdings. There are economic costs of hedging reflected in the price of interest rate swaps, floors, caps and similar techniques, the costs of which can be significant, particularly when long-term interest rates are substantially above short-term rates. In addition, our success in using hedging instruments is subject to the Adviser s ability to predict correctly changes in the relationships of such hedging instruments to our leverage risk, and there can be no assurance that the Adviser s judgment in this respect will be accurate. Consequently, the use of hedging transactions might result in a poorer overall performance, whether or not adjusted for risk, than if we had not engaged in such transactions.

Depending on the state of interest rates in general, our use of interest rate transactions could enhance or decrease the cash available to us for payment of distributions, dividends or interest, as the case may be. To the extent there is a decline in interest rates, the value of interest rate swaps or caps could decline, and result in a decline in our net assets. In addition, if the counterparty to an interest rate transaction defaults, we would not be able to use the anticipated net receipts under the interest rate swap or cap to offset our cost of financial leverage.

Competition Risk. At the time we completed our initial public offering in February 2004, we were the only publicly traded investment company offering access to a portfolio of energy infrastructure MLPs. Since that time a number of alternatives to us as vehicles for investment in a portfolio of energy infrastructure MLPs, including other publicly traded investment companies and private funds, have emerged. In addition, tax law changes have increased the ability of regulated investment companies or other institutions to invest in MLPs. These competitive conditions may adversely impact our ability to meet our investment objective, which in turn could adversely impact our ability to make interest or dividend payments.

Restricted Security Risk. We may invest up to 30% of total assets in restricted securities, primarily through direct placements. Restricted securities are less liquid than securities traded in the open market because of statutory and contractual restrictions on resale. Such securities are, therefore, unlike securities that are traded in the open market, which can be expected to be sold immediately if the market is adequate. As discussed further below, this lack of liquidity creates special risks for us. However, we could sell such securities in privately negotiated transactions with a limited number of purchasers or in public offerings under the 1933 Act. MLP convertible subordinated units also convert to publicly-traded common units upon the passage of time and/or satisfaction of certain financial tests.

Table of Contents

Restricted securities are subject to statutory and contractual restrictions on their public resale, which may make it more difficult to value them, may limit our ability to dispose of them and may lower the amount we could realize upon their sale. To enable us to sell our holdings of a restricted security not registered under the 1933 Act, we may have to cause those securities to be registered. The expenses of registering restricted securities may be negotiated by us with the issuer at the time we buy the securities. When we must arrange registration because we wish to sell the security, a considerable period may elapse between the time the decision is made to sell the security and the time the security is registered so that we could sell it. We would bear the risks of any downward price fluctuation during that period.

Liquidity Risk. Although common units of MLPs trade on the NYSE, AMEX, and the NASDAQ National Market, certain MLP securities may trade less frequently than those of larger companies due to their smaller capitalizations. In the event certain MLP securities experience limited trading volumes, the prices of such MLPs may display abrupt or erratic movements at times. Additionally, it may be more difficult for us to buy and sell significant amounts of such securities without an unfavorable impact on prevailing market prices. As a result, these securities may be difficult to dispose of at a fair price at the times when we believe it is desirable to do so. Investment of our capital in securities that are less actively traded or over time experience decreased trading volume may restrict our ability to take advantage of other market opportunities or to dispose of securities. This also may affect adversely our ability to make required interest payments on the debt securities and dividend distributions on the preferred stock, to redeem such securities, or to meet asset coverage requirements.

Valuation Risk. Market prices generally will not be available for MLP convertible subordinated units, or securities of private companies, and the value of such investments ordinarily will be determined based on fair valuations determined by the Adviser pursuant to procedures adopted by the Board of Directors. Similarly, common units acquired through direct placements will be valued based on fair value determinations because of their restricted nature; however, the Adviser expects that such values will be based on a discount from publicly available market prices. Restrictions on resale or the absence of a liquid secondary market may adversely affect our ability to determine our NAV. The sale price of securities that are not readily marketable may be lower or higher than our most recent determination of their fair value. Additionally, the value of these securities typically requires more reliance on the judgment of the Adviser than that required for securities for which there is an active trading market. Due to the difficulty in valuing these securities and the absence of an active trading market for these investments, we may not be able to realize these securities true value, or may have to delay their sale in order to do so. This may affect adversely our ability to make required interest payments on the debt securities and dividend distributions on the preferred stock, to redeem such securities, or to meet asset coverage requirements.

Nondiversification Risk. We are a nondiversified, closed-end management investment company under the 1940 Act and are not treated as a regulated investment company under the Internal Revenue Code. Accordingly, there are no regulatory limits under the 1940 Act or the Internal Revenue Code on the number or size of securities that we hold and we may invest more assets in fewer issuers as compared to a diversified fund. There currently are approximately 54 companies presently organized as MLPs and only a limited number of those companies operate energy infrastructure assets. We select MLP investments from this small pool of issuers. We may invest in non-MLP securities issued by energy infrastructure companies to a lesser degree, consistent with our investment objective and policies.

Interest Rate Risk. Generally, when market interest rates rise, the values of debt securities decline, and vice versa. Our investment in such securities means that the NAV and market price of our common stock will tend to decline if market interest rates rise. During periods of declining interest rates, the issuer of a security may exercise its option to prepay principal earlier than scheduled, forcing us to reinvest in lower yielding securities. This is known as call or prepayment risk. Lower grade securities frequently have call features that allow the issuer to repurchase the security prior to its stated maturity. An issuer may redeem a lower grade obligation if the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer.

Below Investment Grade Securities Risk. Investing in lower grade debt instruments involves additional risks than investment grade securities. Adverse changes in economic conditions are more likely to lead to a weakened capacity of a below investment grade issuer to make principal payments and interest payments than an investment grade issuer. An economic downturn could adversely affect the ability of highly leveraged issuers to service their obligations or to repay their obligations upon maturity. Similarly, downturns in profitability in the energy infrastructure industry could adversely affect the ability of below investment grade issuers in that industry to meet their obligations. The market values of lower quality securities tend to reflect individual developments of the issuer to a greater extent than do higher quality securities, which react primarily to fluctuations in the general level of interest rates.

The secondary market for below investment grade securities may not be as liquid as the secondary market for more highly rated securities. There are fewer dealers in the market for below investment grade securities than investment grade obligations. The prices quoted by different dealers may vary significantly, and the spread between the bid and asked price is generally much larger than for higher quality instruments. Under adverse market or economic conditions, the secondary market for below investment grade securities could contract further, independent of any specific adverse change in the condition of a particular issuer, and these instruments may become illiquid. As a result, it may be more difficult to sell these securities or we may be able to sell the securities only at prices lower than if such securities were widely traded. This may affect adversely our ability to make required dividend or interest payments on our outstanding senior securities. Prices realized upon the sale of such lower-rated or unrated securities, under these circumstances, may be less than the prices used in calculating our NAV.

Because investors generally perceive that there are greater risks associated with lower quality securities of the type in which we may invest a portion of our assets, the yields and prices of such securities may tend to fluctuate more than those for higher rated securities. In the lower quality segments of the debt securities market, changes in perceptions of issuers creditworthiness tend to occur more frequently and in a more pronounced manner than do changes in higher quality segments of the debt securities market, resulting in greater yield and price volatility.

Factors having an adverse impact on the market value of below investment grade securities may have an adverse effect on our NAV and the market value of our common stock. In addition, we may incur additional expenses to the extent we are required to seek recovery upon a default in payment of principal or interest on our portfolio holdings. In certain circumstances, we may be required to foreclose on an issuer s assets and take possession of its property or operations. In such circumstances, we would incur additional costs in disposing of such assets and potential liabilities from operating any business acquired.

Counterparty Risk. We may be subject to credit risk with respect to the counterparties to certain derivative agreements entered into by us. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, we may experience significant delays in obtaining any recovery under the derivative contract in a bankruptcy or other reorganization proceeding. We may obtain only a limited recovery or may obtain no recovery in such circumstances.

Effects of Terrorism. The U.S. securities markets are subject to disruption as a result of terrorist activities, such as the terrorist attacks on the World Trade Center on September 11, 2001; the war in Iraq and its aftermath; other hostilities; and other geopolitical events. Such events have led, and in the future may lead, to short-term market volatility and may have long-term effects on the U.S. economy and markets.

Anti-Takeover Provisions. Our Charter and Bylaws include provisions that could delay, defer or prevent other entities or persons from acquiring control of us, causing us to engage in certain transactions or modifying our structure. These provisions may be regarded as anti-takeover provisions. Such provisions could limit the ability of common stockholders to sell their shares at a premium over the then- current market prices by discouraging a third party from seeking to obtain control of us. See Certain Provisions in the Company s Charter and Bylaws.

Management Risk. The Adviser was formed in October 2002 to provide portfolio management to institutional and high-net worth investors seeking professional management of their MLP investments. The Adviser has been managing investments in portfolios of MLP investments since that time, including since February 2004, management of our investments, and management of the investments of TYY since May 2005 and of TYN since October 2005. TYY is a non-diversified, closed-end management investment company that commenced operations on May 31, 2005 and invests primarily in MLPs and their affiliates in the energy infrastructure sector. TYN is a non-diversified, closed-end management investment company, that commenced operations on October 31, 2005 and invests primarily in Canadian royalty trusts and income trusts and publicly traded United States MLPs. The Adviser also serves as the investment adviser to TTO, a non-diversified closed-end management investment company that has elected to be regulated as a business development company under the 1940 Act. TTO, which commenced operations on December 8, 2005, invests primarily in privately held and micro-cap public energy companies operating in the midstream and downstream segments, and to a lesser extent the upstream segment. Our investments and those of TYY, TYN and TTO are managed by the Adviser s investment committee. We share the same officers as TYY, TYN and TTO. As of November 30, 2006, the Adviser had client assets under management of approximately $2.0 billion, including our assets and those of TYY, TYN and TTO. The Adviser relies in part on the officers, employees, and resources of Fountain Capital for certain functions. These services are provided pursuant to an informal arrangement between the parties. To the extent that the Adviser s assets under management continue to grow, the Adviser may have to hire additional personnel and to the extent it is unable to hire qualified individuals its operations may be adversely affected. Three (of the five) members of the investment committee are affiliates of, but not employees of, the Adviser, and have other significant responsibilities with Fountain Capital. Fountain Capital conducts business and activities of its own in which the Adviser has no economic interest. If these separate activities become significantly greater than the Adviser s activities, there could be material competition for the efforts of key personnel.

Additional Risks to Common Stockholders

Leverage Risk. Our use of leverage through the issuance of MMP Shares and Tortoise Notes along with the issuance of any additional preferred stock or debt securities, and any additional borrowings or other transactions involving indebtedness (other than for temporary or emergency purposes) are or would be considered senior securities for purposes of the 1940 Act and create risks. Leverage is a speculative technique that may adversely affect common stockholders. If the return on securities acquired with borrowed funds or other leverage proceeds does not exceed the cost of the leverage, the use of leverage could cause us to lose money. Successful use of leverage depends on the Adviser s ability to predict or hedge correctly interest rates and market movements, and there is no assurance that the use of a leveraging strategy will be successful during any period in which it is used. Because the fee paid to the Adviser will be calculated on the basis of Managed Assets, the fees will increase when leverage is utilized, giving the Adviser an incentive to utilize leverage.

Our issuance of senior securities involves offering expenses and other costs, including interest payments, which are borne indirectly by our common stockholders. Fluctuations in interest rates could increase interest or dividend payments on our senior securities, and could reduce cash available for dividends on common stock. Increased operating costs, including the financing cost associated with any leverage, may reduce our total return to common stockholders.

The 1940 Act and/or the rating agency guidelines applicable to senior securities impose asset coverage requirements, dividend limitations, voting right requirements (in the case of the senior equity securities), and restrictions on our portfolio composition and our use of certain investment techniques and strategies. The terms of any senior securities or other borrowings may impose additional requirements, restrictions and limitations that are more stringent than those currently required by the 1940 Act, and the guidelines of the rating agencies that rate outstanding senior securities. These requirements may have an adverse effect on us and may affect our ability to pay distributions on common stock and preferred stock. To the extent necessary, we intend to redeem our senior securities to maintain the required asset coverage. Doing so may require that we liquidate portfolio securities at a time when it would not otherwise be desirable to do so. Nevertheless, it is not anticipated that the 1940 Act requirements, the terms of any senior securities or the rating agency guidelines will impede the Adviser in managing our portfolio in accordance with our investment objective and policies. See Leverage Use of Leverage.

Market Impact Risk. The sale of our common stock (or the perception that such sales may occur) may have an adverse effect on prices in the secondary market for our common stock. An increase in the number of common shares available may put downward pressure on the market price for our common stock. Our ability to sell shares of common stock below NAV may increase this pressure. These sales also might make it more difficult for us to sell additional equity securities in the future at a time and price we deem appropriate.

Dilution Risk. The voting power of current stockholders will be diluted to the extent that current stockholders do not purchase shares in any future common stock offerings or do not purchase sufficient shares to maintain their percentage interest. In addition, if we sell shares of common stock below NAV, our NAV will fall immediately after such issuance. See Description of Securities Common Stock Issuance of Additional Shares which includes a table reflecting the dilutive effect of selling our common stock below NAV.

If we are unable to invest the proceeds of such offering as intended, our per share distribution may decrease and we may not participate in market advances to the same extent as if such proceeds were fully invested as planned.

Market Discount Risk. Our common stock has a limited trading history and has traded both at a premium and at a discount in relation to NAV. We cannot predict whether our shares will trade in the future at a premium or discount to NAV. Shares of closed-end investment companies frequently trade at a discount from NAV, but in some cases have traded above NAV. Continued development of alternatives as a vehicle for investment in MLP securities may contribute to reducing or eliminating any premium or may result in our shares trading at a discount. The risk of the shares of common stock trading at a discount is a risk separate from the risk of a decline in our NAV as a result of investment activities. Our NAV will be reduced immediately following an offering of our common or preferred stock, due to the offering costs for such stock, which are borne entirely by us. Although we also bear the offering costs of debt securities, such costs are amortized over time and therefore do not impact our NAV immediately following an offering.

Whether stockholders will realize a gain or loss upon the sale of our common stock depends upon whether the market value of the common shares at the time of sale is above or below the price the stockholder paid, taking into account transaction costs for the common shares, and is not directly dependent upon our NAV. Because the market value of our common stock will be determined by factors such as the relative demand for and supply of the shares in the market, general market conditions and other factors beyond our control, we cannot predict whether our common stock will trade at, below or above NAV, or at, below or above the public offering price for common stock.

Additional Risks to Senior Security Holders

Generally, an investment in preferred stock or debt securities (collectively, senior securities) is subject to the following risks:

Interest Rate Risk. Auction rate senior securities pay dividends or interest based on short-term interest rates. If short-term interest rates rise, dividends or interest on the auction rate senior securities may rise so that the amount of dividends or interest due to holders of auction rate senior securities would exceed the cash flow generated by our portfolio securities. This might require us to sell portfolio securities at a time when we would otherwise not do so, which may affect adversely our future ability to generate cash flow. In addition, rising market interest rates could impact negatively the value of our investment portfolio, reducing the amount of assets serving as asset coverage for the senior securities.

Senior Leverage Risk. Preferred stock will be junior in liquidation and with respect to distribution rights to debt securities and any other borrowings. Senior securities representing indebtedness may constitute a substantial lien and burden on preferred stock by reason of their prior claim against our income and against our net assets in liquidation. We may not be permitted to declare dividends or other distributions with respect to any series of preferred stock unless at such time we meet applicable asset coverage requirements and the payment of principal or interest is not in default with respect to the Tortoise Notes or any other borrowings.

Ratings and Asset Coverage Risk. To the extent that senior securities are rated, a rating does not eliminate or necessarily mitigate the risks of investing in our senior securities, and a rating may not fully or accurately reflect all of the credit and market risks associated with a security. A rating agency could downgrade the rating of our shares of preferred stock or debt securities, which may make such securities less liquid at an auction or in the secondary market, though probably with higher resulting interest rates. If a rating agency downgrades the rating assigned to a senior security, we may alter our portfolio or redeem the senior security. We may voluntarily redeem a senior security under certain circumstances.

Inflation Risk. Inflation is the reduction in the purchasing power of money resulting from an increase in the price of goods and services. Inflation risk is the risk that the inflation adjusted or real value of an investment in preferred stock or debt securities or the income from that investment will be worth less in the future. As inflation occurs, the real value of the preferred stock or debt securities and the dividend payable to holders of preferred stock or interest payable to holders of debt securities declines. In an inflationary period, however, it is expected that, through the auction process, dividend or interest rates would increase, tending to offset this risk.

Auction Risk. To the extent that senior securities trade through an auction, there are certain risks associated with participating in an auction and certain risks if you try to sell senior securities outside of an auction in the secondary market. These risks will be described in more detail in an applicable prospectus supplement if we issue senior securities pursuant to this registration statement.

Decline in Net Asset Value Risk. A material decline in our NAV may impair our ability to maintain required levels of asset coverage for our preferred stock or debt securities.

MANAGEMENT OF THE COMPANY

Directors and Officers

Our business and affairs are managed under the direction of our Board of Directors. Accordingly, our Board of Directors provides broad supervision over our affairs, including supervision of the duties performed by the Adviser. Our officers are responsible for our day-to-day operations. The names and business addresses of our directors and officers, together with their principal occupations and other affiliations during the past five years, are set forth in the statement of additional information. The Board of Directors consists of a majority of directors who are not interested persons (as defined in the 1940 Act) of the Adviser or its affiliates.

Investment Adviser

Pursuant to an advisory agreement, the Adviser provides us with investment research and advice and furnishes us with an investment program consistent with our investment objective and policies, subject to the supervision of the Board. The Adviser determines which portfolio securities will be purchased or sold, arranges for the placing of orders for the purchase or sale of portfolio securities, selects brokers or dealers to place those orders, maintains books and records with respect to our securities transactions and reports to the Board on our investments and performance.

The Adviser is located at 10801 Mastin Boulevard, Suite 222, Overland Park, Kansas 66210. The Adviser specializes in managing portfolios of investments in MLPs and other energy infrastructure companies. The Adviser was formed in October 2002 to provide portfolio management services to institutional and high net worth investors seeking professional management of their MLP investments. As of November 30, 2006, the Adviser had approximately $2.0 billion of client assets under management. The Adviser s investment committee is comprised of five seasoned portfolio managers.

Fountain Capital and Kansas City Equity Partners LC (KCEP) control our Advisor through their equity ownership and management rights in our Advisor. Fountain Capital was formed in 1990 and is focused primarily on providing investment advisory services to institutional investors with respect to below investment grade debt. Fountain Capital had approximately $1.7 billion of client assets under management as of November 30, 2006, of which approximately $237 million was in energy industry investments. KCEP was formed in 1993 and until recently, managed KCEP Ventures II, L.P. (KCEP II), a private equity fund with committed capital of $55 million invested in a variety of companies in diverse industries. KCEP II wound up its operations in late 2006, has no remaining portfolio investments and has distributed proceeds to its partners. KCEP Ventures I, L.P. (KCEP I), a start-up and early-stage venture capital fund launched in 1994 and previously managed by KCEP, also recently completed the process of winding down. As a part of that process, KCEP I entered into a consensual order of receivership, which was necessary to allow KCEP I to distribute its remaining $1.3 million of assets to creditors and the Small Business Association (SBA). The consensual order acknowledged a capital impairment condition and the resulting nonperformance by KCEP I of its agreement with the SBA, both of which were violations of the provisions requiring repayment of capital under the Small Business Investment Act of 1958 and the regulations thereunder.

The Adviser relies in part on the officers, employees and resources of its affiliate, Fountain Capital, for certain functions. These services are provided pursuant to an informal arrangement between the parties. Three of the five members of the investment committee of the Adviser are affiliates of, but not employees of, the Adviser, and have other significant responsibilities with Fountain Capital. Fountain Capital conducts business and activities of its own in which the Adviser has no economic interest. If these separate activities are significantly greater than the Adviser s activities, there could be material competition for the efforts of key personnel.

The investment management of our portfolio is the responsibility of the Adviser s investment committee. The investment committee s members are H. Kevin Birzer, Zachary A. Hamel, Kenneth P. Malvey, Terry C. Matlack and David J. Schulte, all of whom share responsibility for such investment management. It is the policy of the investment committee that any one member can require the Adviser to sell a security and any one member can veto the committee s decision to invest in a security. Each committee member has been a portfolio manager since we commenced operations in February 2004.

Table of Contents

H. Kevin Birzer. Mr. Birzer has been a Managing Director of the Adviser since 2002 and also is a Partner with Fountain Capital. Mr. Birzer is also a Director of TYY, TYN and TTO. Mr. Birzer, who joined Fountain Capital in 1990, has 22 years of investment experience including 19 in high-yield securities. Mr. Birzer began his career with Peat Marwick. His subsequent experience includes three years working as a Vice President for F. Martin Koenig & Co., focusing on equity and option investments, and three years at Drexel Burnham Lambert, where he was a Vice President in the Corporate Finance Department. Mr. Birzer graduated with a Bachelor of Business Administration degree from the University of Notre Dame and holds a Master of Business Administration degree from New York University. He earned his CFA designation in 1988.

Zachary A. Hamel. Mr. Hamel has been a Managing Director of the Adviser since 2002 and also is a Partner with Fountain Capital. Mr. Hamel joined Fountain Capital in 1997. He covers energy, chemicals and utilities. Prior to joining Fountain Capital, Mr. Hamel worked for the Federal Deposit Insurance Corporation (FDIC) for eight years as a Bank Examiner and a Regional Capital Markets Specialist. Mr. Hamel graduated from Kansas State University with a Bachelor of Science in Business Administration. He also attained a Master in Business Administration from the University of Kansas School of Business. He earned his CFA designation in 1998.

Kenneth P. Malvey. Mr. Malvey has been a Managing Director of the Adviser since 2002 and also is a Partner with Fountain Capital. Prior to joining Fountain Capital in 2002, Mr. Malvey was one of three members of the Global Office of Investments for GE Capital s Employers Reinsurance Corporation. Most recently he was the Global Investment Risk Manager for a portfolio of approximately $24 billion of fixed-income, public equity and alternative investment assets. Prior to joining GE Capital in 1996, Mr. Malvey was a Bank Examiner and Regional Capital Markets Specialist with the FDIC for nine years. Mr. Malvey graduated with a Bachelor of Science degree in Finance from Winona State University, Winona, Minnesota. He earned his CFA designation in 1996.

Terry C. Matlack. Mr. Matlack has been a Managing Director of the Adviser since 2002 and also is a Managing Director of KCEP. Mr. Matlack is also a Director of TYY, TYN and TTO. Prior to joining KCEP in 2001, Mr. Matlack was President of GreenStreet Capital and its affiliates in the telecommunications service industry. Prior to 1995, he was Executive Vice President and a member of the board of directors of W.K. Communications, Inc., a cable television acquisition company, and Chief Operating Officer of W.K. Cellular, a cellular rural service area operator. He also has served as a specialist in corporate finance with George K. Baum & Company, and as Executive Vice President of Corporate Finance at B.C. Christopher Securities Company. Mr. Matlack graduated with a Bachelor of Science in Business Administration from Kansas State University and holds a Masters of Business Administration and a Juris Doctorate from the University of Kansas. He earned his CFA designation in 1985.

David J. Schulte. Mr. Schulte has been a Managing Director of the Adviser since 2002 and also is a Managing Director of KCEP. While a Managing Director of KCEP, he led private financing for two growth MLPs in the energy infrastructure sector. Since February 2004, Mr. Schulte has been an employee of the Adviser. Prior to joining KCEP in 1993, Mr. Schulte had over five years of experience completing acquisition and public equity financings as an investment banker at the predecessor of Oppenheimer & Co, Inc. From 1986 to 1989, he was a securities law attorney. Mr. Schulte holds a Bachelor of Science degree in Business Administration from Drake University and a Juris Doctorate degree from the University of Iowa. He passed the CPA examination in 1983, earned his CFA designation in 1992.

The statement of additional information provides additional information about the compensation structure of, the other accounts managed by, and the ownership of our securities by the portfolio managers listed above.

Compensation and Expenses

Under the advisory agreement, we pay the Adviser quarterly, as compensation for the services rendered by it, a fee equal on an annual basis to 0.95% of our average monthly Managed Assets. Managed Assets means our total assets (including any assets attributable to leverage that may be outstanding) minus accrued liabilities other than (1) deferred taxes, (2) debt entered into for the purpose of leverage and (3) the aggregate liquidation preference of any outstanding preferred stock. Because the fee paid to the Adviser is determined on the basis of our Managed Assets, the Adviser s interest in determining whether we should incur additional leverage will conflict with our interests. Our average monthly Managed Assets are determined for the purpose of calculating the management fee by taking the average of the monthly determinations of Managed Assets during a given calendar quarter. The fees are payable for each calendar quarter within five days after the end of that quarter. The Adviser has contractually agreed to reimburse us for fees and expenses, including the investment advisory fee and other expenses in the amount of 0.10% of average monthly Managed Assets through February 28, 2009.

The advisory agreement has a term ending on December 31st of each year. The advisory agreement was most recently approved by the Board of Directors in November 2006. A discussion regarding the basis of the Board of Directors decision to approve the renewal of the advisory agreement is available in our Annual Report to stockholders for the fiscal year ended November 30, 2006.

We bear all expenses not specifically assumed by the Adviser incurred in our operations and will bear the expenses of all future offerings. Expenses we bear include, but are not limited to, the following: (1) expenses of maintaining and continuing our existence and related overhead, including, to the extent services are provided by personnel of the Adviser or its affiliates, office space and facilities and personnel compensation, training and benefits; (2) registration under the 1940 Act; (3) commissions, spreads, fees and other expenses connected with the acquisition, holding and disposition of securities and other investments, including placement and similar fees in connection with direct placements in which we participate; (4) auditing, accounting and legal expenses; (5) taxes and interest; (6) governmental fees; (7) expenses of listing our shares with a stock exchange, and expenses of the issue, sale, repurchase and redemption (if any) of our interests, including expenses of conducting tender offers for the purpose of repurchasing our interests; (8) expenses of registering and qualifying us and our shares under federal and state securities laws and of preparing and filing registration statements and amendments for such purposes; (9) expenses of communicating with stockholders, including website expenses and the expenses of preparing, printing and mailing press releases, reports and other notices to stockholders and of meetings of stockholders and proxy solicitations therefor; (10) expenses of reports to governmental officers and commissions; (11) insurance expenses; (12) association membership dues; (13) fees, expenses and disbursements of custodians and subcustodians for all services to us (including without limitation safekeeping of funds, securities and other investments, keeping of books, accounts and records, and determination of NAV); (14) fees, expenses and disbursements of transfer agents, dividend paying agents, stockholder servicing agents and registrars for all services to us; (15) compensation and expenses of our directors who are not members of the Adviser s organization; (16) pricing and valuation services employed by us; (17) all expenses incurred in connection with leveraging of our assets through a line of credit, or issuing and maintaining notes or preferred stock; (18) all expenses incurred in connection with the offerings of our common and preferred stock and debt securities; and (19) such non-recurring items as may arise, including expenses incurred in connection with litigation, proceedings and claims and our obligation to indemnify our directors, officers and stockholders with respect thereto.

CLOSED-END COMPANY STRUCTURE

We are a nondiversified closed-end management investment company and as such our stockholders will not have the right to cause us to redeem their shares. Instead, our common stock will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), NAV, call protection, dividend stability, portfolio credit quality, relative demand for and supply of such shares in the market, general market and economic conditions and other factors.

Shares of common stock of closed-end companies frequently trade at a discount to their NAV. This characteristic of shares of closed-end management investment companies is a risk separate and distinct from the risk that our NAV may decrease as a result of investment activities. To the extent that our common stock does trade at a discount, the Board of Directors may from time to time engage in open-market repurchases or tender offers for shares after balancing the benefit to stockholders of the increase in the NAV per share resulting from such purchases against the decrease in our assets and potential increase in the expense ratio of our expenses to assets and the decrease in asset coverage with respect to any outstanding senior securities. The Board of Directors believes that in addition to the beneficial effects described above, any such purchases or tender offers may result in the temporary narrowing of any discount but will not have any long-term effect on the level of any discount. There is no guarantee or assurance that the Board of Directors will decide to engage in any of these actions. There is also no guarantee or

Table of Contents

assurance that such actions, if undertaken, would result in the shares trading at a price equal or close to NAV per share. Any stock repurchases or tender offers will be made in accordance with the requirements of the Securities Exchange Act of 1934, as amended (the Exchange Act), the 1940 Act and the principal stock exchange on which the common stock is traded. Conversion to an open-end mutual fund is extremely unlikely and would require stockholder approval of an amendment to our Charter.

CERTAIN FEDERAL INCOME TAX MATTERS

The following is a general summary of certain federal income tax considerations affecting us and our security holders. This discussion does not purport to be complete or to deal with all aspects of federal income taxation that may be relevant to stockholders in light of their particular circumstances or who are subject to special rules, such as banks, thrift institutions and certain other financial institutions, real estate investment trusts, regulated investment companies, insurance companies, brokers and dealers in securities or currencies, certain securities traders, tax-exempt investors, individual retirement accounts, certain tax-deferred accounts, and foreign investors. Tax matters are very complicated, and the tax consequences of an investment in and holding of our securities will depend on the particular facts of each investor s situation. Investors are advised to consult their own tax advisors with respect to the application to their own circumstances of the general federal income taxation rules described below and with respect to other federal, state, local or foreign tax consequences to them before making an investment in our securities. Unless otherwise noted, this discussion assumes that the investors are U.S. persons and hold our securities as capital assets. More detailed information regarding the federal income tax consequences of investing in our securities is in the Statement of Additional Information.

Pursuant to U.S. Treasury Department Circular 230, we are informing you that (1) this discussion is not intended to be used, was not written to be used, and cannot be used, by any taxpayer for the purpose of avoiding penalties under the U.S. federal tax laws, (2) this discussion was written by us in connection with the registration of our securities and our promotion or marketing, and (3) each taxpayer should seek advice based on his, her or its particular circumstances from an independent tax advisor.

Company Federal Income Taxation

We are treated as a corporation for federal and state income tax purposes. Thus, we are obligated to pay federal and state income tax on our taxable income. We invest our assets primarily in MLPs, which generally a
