Table of Contents**Applica Incorporated and Subsidiaries****Notes to Consolidated Financial Statements****1. SUMMARY OF ACCOUNTING POLICIES****Interim Reporting**

The accompanying unaudited consolidated financial statements include the accounts of Applica Incorporated and its subsidiaries (Applica). All significant intercompany transactions and balances have been eliminated. The unaudited consolidated financial statements have been prepared in conformity with Rule 10-01 of Regulation S-X of the Securities and Exchange Commission and therefore do not include information or footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America. However, all adjustments (consisting of normal recurring accruals), which, in the opinion of management, are necessary for a fair presentation of the financial statements, have been included. Operating results for the period ended March 31, 2005 are not necessarily indicative of the results that may be expected for the future fiscal quarters in 2005 or the full year ending December 31, 2005 due to seasonal fluctuations in Applica s business, changes in economic conditions and other factors. For further information, please refer to the Consolidated Financial Statements and Notes thereto contained in Applica s Annual Report on Form 10-K for the year ended December 31, 2004.

Reclassifications

Certain prior period amounts have been reclassified for comparability.

Cooperative Advertising and Slotting Fees

Effective January 1, 2005, Applica modified its accounting treatment for cooperative advertising and slotting fees it provides to its customers. The modification was necessitated by the fact that Applica will no longer use the services of an unrelated third party to verify performance and determine the fair value of the benefits Applica receives. In accordance with Emerging Issues Task Force (EITF) 01-9, Accounting for Consideration Given By a Vendor To a Customer (Including a Reseller of the Vendor s Products) , which addresses the income statement classification of slotting fees and cooperative advertising arrangements with trade customers. Given the change referred to above, these considerations should be accounted for as a reduction of selling price and netted against sales. Prior to January 1, 2005, Applica classified these considerations as selling, general and administrative expenses in its consolidated statement of operations. This modification reduced each of net sales, gross profit and selling, general and administrative expenses by \$3.3 million and \$4.0 million for the three months ending March 31, 2005 and 2004, respectively. Because the modification resulted solely in reclassification within the consolidated statement of operations, there was no impact on Applica s financial condition, operating income or net earnings for any of the periods presented.

Inventories

Inventories are stated at the lower of cost or market; cost is determined by the first-in, first-out method. Inventories are comprised of the following:

March	December
31,	31,
2005	2004

	(In thousands)	
Raw materials	\$ 6,217	\$ 4,528
Work in process	199	280
Finished goods	106,783	126,695
	\$ 113,199	\$ 131,503

Table of Contents

Applica Incorporated
Notes to Consolidated Financial Statements Continued

Stock Based Compensation

At March 31, 2005, Applica had four active stock based compensation plans. Applica accounts for stock-based compensation using the intrinsic value method. Accordingly, compensation expense for stock options issued is measured as the excess, if any, of the fair value of Applica's common stock at the date of grant over the exercise price of the options. Applica's net earnings (loss) and earnings (loss) per share would have been changed to the pro forma amounts indicated below had compensation expense for the stock option plans and non-qualified options issued to employees been determined based on the fair value of the options at the grant dates consistent with the method of Statement of Financial Accounting Standards (SFAS) No. 123.

	For the Three Months Ended March 31,	
	2005	2004
	(In thousands, except per share data)	
Net loss, as reported	\$ (22,955)	\$ (4,479)
Add: Stock-based employee compensation expense included in net loss		
Deduct: Total stock-based employee compensation expense determined under fair value based method	(304)	(102)
Pro forma net loss	\$ (23,259)	\$ (4,581)
Loss per share:		
Basic as reported	\$ (0.95)	\$ (0.19)
Basic pro forma	\$ (0.96)	\$ (0.19)
Diluted as reported	\$ (0.95)	\$ (0.19)
Diluted pro forma	\$ (0.96)	\$ (0.19)

The above pro forma disclosures may not be representative of the effects on reported net earnings (loss) for future periods as options vest over several years and Applica may continue to grant options to employees.

In accordance with the requirements of SFAS 123, the fair value of each option grant was estimated on the date of grant using a binomial option-pricing model with the following weighted-average assumptions:

	For the Three Months Ended March 31,	
	2005	2004
Expected dividend yield	00.0%	00.0%
Expected price volatility	24.2%	64.1% - 82.7%
Risk-free interest rate	3.15%	3.0%
Expected life of options in years	4	4

Comprehensive Loss

The components of other comprehensive loss, net of tax, were as follows:

	March 31, 2005	March 31, 2004
	(In thousands)	
Loss	\$ (22,955)	\$ (4,479)
Foreign currency translation adjustment	(295)	(200)
Change in market value of derivatives	604	106
	\$ (22,646)	\$ (4,573)

Table of Contents

Applica Incorporated
Notes to Consolidated Financial Statements Continued

Recent Accounting Pronouncements

In the fourth quarter of 2004, the FASB issued Statement No. 123 (revised 2004), or SFAS No. 123R, Share-Based Payment, which replaces Statement No. 123 Accounting for Stock-Based Compensation, and supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees. SFAS No. 123R eliminates the alternative to use APB Opinion 25's intrinsic value method of accounting that was provided in Statement No. 123 as originally issued. After a phase-in period for Statement No. 123R, pro forma disclosure will no longer be allowed. In the first quarter of 2005, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 107 which provided further clarification on the implementation of SFAS No. 123R.

Alternative phase-in methods are allowed under Statement No. 123R, which was to be effective as of the beginning of the first interim or annual reporting period that begins after June 15, 2005. The SEC announced in the second quarter of 2005 that it would extend this phase-in period and, therefore, Applica's effective date for implementation of SFAS 123R is January 1, 2006. Applica does not believe that any of the alternative phase-in methods would have a materially different effect on Applica's consolidated statement of operations or balance sheet.

2. SHAREHOLDERS' EQUITY**Loss Per Share**

Weighted average basic shares for the three-month periods ended March 31, 2005 and 2004 were 24,136,545 and 23,718,256, respectively.

The following table shows potential common stock equivalents outstanding to purchase shares of common stock that were excluded in the computation of diluted loss per share. All common stock equivalents have been excluded from the diluted per share calculations in the three-month periods ended March 31, 2005 and 2004, because their inclusion would have been anti-dilutive.

	For the Three Months Ended March 31,	
	2005	2004
Number of shares	2,616,617	2,337,128
Range of exercise price	\$ 3.63-31.69	\$ 3.63-31.69

3. COMMITMENTS AND CONTINGENCIES

Applica is subject to legal proceedings, product liability claims and other claims that arise in the ordinary course of our business. In the opinion of management, the amount of ultimate liability with respect to such matters, if any, in excess of applicable insurance coverage, is not likely to have a material effect on Applica's business, financial condition, results of operations or liquidity. However, as the outcome of litigation or other claims is difficult to predict, significant changes in the estimated exposures could occur.

4. COST OF GOODS SOLD

Included in cost of sales for the first quarter of 2005 are inventory write-downs of approximately \$9.4 million related to lower-than-anticipated consumer demand for two of our products. Also, included in cost of sales for the

three months ended March 31, 2005 are restructuring charges of \$0.9 million related to our decision to move the production of Home Café single cup coffee maker from Mexico to third party manufacturers in China. The restructuring charges consist of \$0.3 million in severance charges and \$0.6 million in the acceleration of the depreciation of machinery and equipment used in the manufacturing process. Included in cost of sales for the three months ended March 31, 2004 are restructuring charges of \$0.9 million primarily related to the downsizing of our Hong-Kong based manufacturing facilities. The Hong Kong based manufacturing operations were sold in July 2004.

Table of Contents

Applica Incorporated
Notes to Consolidated Financial Statements Continued

The inventory write-downs relate to the Household Products reportable segment. All restructuring charges relate to the Manufacturing reportable segment.

5. PROPERTY, PLANT AND EQUIPMENT

The following is a summary of property, plant and equipment:

	Useful Lives	March 31, 2005	December 31, 2004
(Dollars in thousands)			
Building	20 years	\$ 7,430	\$ 7,430
Computer equipment	3 - 5 years	32,232	31,635
Equipment and other	3 - 8 years	61,253	66,985
Leasehold improvements*	8 - 10 years	3,399	4,379
Land and land improvements**	20 years	1,069	1,069
Total		105,383	111,498
Less accumulated depreciation		69,410	73,171
		\$ 35,973	\$ 38,327

* Shorter of remaining term of lease or useful life

** Only improvements are depreciated

At March 31, 2005, Applica completed the implementation of a major upgrade of its information technology infrastructure, including the installation of a new enterprise resource planning system. As of March 31, 2005 and December 31, 2004, approximately \$12.4 million and \$11.8 million, respectively, of capitalized expenditures associated with the information technology upgrade were included in property, plant and equipment as assets not yet placed in service.

6. RESTRUCTURING AND OTHER CHARGES

For the three months ended March 31, 2005, the activity relating to the accrued restructuring and other charges was as follows:

Amount Accrued at Dec. 31,	2005	Amount Accrued at March 31,

	2004	Payments	2005
	(In thousands)		
Back-office consolidation	\$ 2,536	\$ (526)	\$ 2,010

The amounts accrued in connection with the restructuring and other charges were reflected in accrued expenses in the accompanying consolidated balance sheets.

7. INTANGIBLE ASSETS

The components of Applica's intangible assets subject to amortization are as follows:

		March 31, 2005		December 31, 2004	
		Gross		Gross	
		Carrying	Accumulated	Carrying	Accumulated
	Average	Amount	Amortization	Amount	Amortization
	Life	(In thousands)			
	(Years)				
Licenses	4.0	\$ 3,000	\$ (1,337)	\$ 3,000	\$ (1,055)
Contract-Based	6.4	5,988	(3,636)	5,988	(3,440)
		\$ 8,988	\$ (4,973)	\$ 8,988	\$ (4,495)

Table of Contents

Applica Incorporated
Notes to Consolidated Financial Statements Continued

Amortization expense for intangible assets during the three months ended March 31, 2005 and 2004 was \$0.5 million and \$0.4 million, respectively.

8. PRODUCT WARRANTY OBLIGATIONS

Estimated future warranty obligations related to certain products are provided by charges to operations in the period in which the related revenue is recognized. Accrued product warranties as of March 31, 2005 and December 31, 2004 were as follows:

	(In thousands)
Balance at December 31, 2004	\$ 7,183
Additions to accrued product warranties	7,499
Reductions of accruals payments and credits issued	(10,371)
 Balance at March 31, 2005	 \$ 4,311

9. SHORT-TERM DEBT**Revolving Credit Facility**

Applica has a revolving credit facility with a syndicate of banks that provides for borrowings on a revolving basis of up to \$175 million with a \$10 million sublimit for letters of credit (the "credit facility"). The credit facility has a maturity date of November 2009. Advances under the credit facility are governed by Applica's collateral value, which is based upon percentages of eligible accounts receivable and inventories. If Applica does not maintain a minimum fixed charge coverage ratio of 1.0 to 1.0, Applica must maintain a minimum daily availability under its borrowing base of \$20 million and a minimum average daily availability of \$30 million. If Applica maintains a fixed charge coverage ratio of greater than 1.0 to 1.0, but less than 2.0 to 1.0, there is no availability requirement, however there is an availability block of \$10 million. If Applica maintains a fixed charge coverage ratio of greater than 2.0 to 1.0, there is no availability requirement and no availability block.

As of March 31, 2005, Applica's fixed charge coverage ratio was less than 1.0 to 1.0. During the three months ended March 31, 2005, Applica maintained daily availability greater than \$20 million and average daily availability greater than \$30 million.

As of March 31, 2005, Applica was borrowing approximately \$57.1 million under the credit facility and had approximately \$49.9 million of availability for future cash borrowings. Also, as March 31, 2005, Applica had letters of credit of \$1.5 million outstanding under its credit facility.

At Applica's option, interest accrues on the loans made under the credit facility at either:

LIBOR (adjusted for any reserves), plus a specified margin (determined by Applica's Fixed Charge Coverage Ratio and set at 2.25% at March 31, 2005), which was 5.12% at March 31, 2005; or

the Base Rate (which is Bank of America's prime rate), plus a specified margin (determined based upon Applica's Fixed Charge Coverage Ratio and was zero at March 31, 2005), which was 5.75% at March 31, 2005.

Swing loans up to \$15.0 million bear interest at the Base Rate plus a specified margin (determined based on Applica's leverage ratio and was zero at March 31, 2005), which was 5.75% at March 31, 2005.

The credit facility contains a number of significant covenants that, among other things, restrict the ability of Applica to dispose of assets, incur additional indebtedness, prepay other indebtedness, pay dividends, repurchase or redeem capital stock, enter into certain investments or create new subsidiaries, enter into sale and lease-back transactions, make certain acquisitions, engage in mergers or consolidations, create liens, or engage in certain transactions with affiliates, and that otherwise restrict corporate and business activities. As of March 31, 2005, Applica was in compliance with all covenants under the credit facility.

Table of Contents

Applica Incorporated
Notes to Consolidated Financial Statements Continued

Although the credit facility expires in November 2009, Applica has classified the borrowings thereunder as a current liability in accordance with Emerging Issues Task Force (EITF) 95-22 Balance Sheet Classifications of Borrowings Outstanding under Revolving Credit Agreements That Include Both a Subjective Acceleration Clause and a Lock-Box Arrangement.

Notes and Acceptance Payable

Certain of Applica's foreign subsidiaries have approximately \$1.3 million in trade finance lines of credit, payable on demand, which are secured by the subsidiaries' tangible and intangible property and a guarantee by the parent company, Applica Incorporated. As of March 31, 2005, there was \$0.4 million outstanding under the working capital lines and \$0.9 million outstanding under the letter of credit lines.

10. BUSINESS SEGMENTS

Applica currently manages its operations through three business segments: Household Products, Professional Personal Care Products and Manufacturing. Segment information for the three months ended March 31, 2005 and 2004 was as follows:

	Household Products	Professional Personal Care Products	Manufacturing	Total
	(In thousands)			
Three Months Ended March 31, 2005:				
Net sales	\$ 98,814	\$ 14,669	\$ 18,126	\$ 131,610
Intersegment sales	1,034		18,126	19,160
Operating (loss) earnings	(17,376)	111	(2,098)	(19,363)

11. CONDENSED CONSOLIDATING FINANCIAL INFORMATION

Applica's domestic subsidiaries are guarantors of Applica's 10% Senior Subordinated Notes due 2008. The following condensed consolidating financial information presents the results of operations, financial position and cash flows of Applica Incorporated (on a stand alone basis), the guarantor subsidiaries (on a combined basis), the non-guarantor subsidiaries (on a combined basis) and the eliminations necessary to arrive at the consolidated results of Applica. The results of operations and cash flows presented below assume that the guarantor subsidiaries were in place for all periods presented. Applica and guarantor subsidiaries have accounted for investments in their respective subsidiaries on an unconsolidated basis using the equity method of accounting. The guarantor subsidiaries are wholly owned subsidiaries of Applica and have fully and unconditionally guaranteed the notes on a joint and several basis. The notes contain certain covenants which, among other things, restrict the ability of the guarantor subsidiaries to make distributions to Applica Incorporated. Applica has not presented separate financial statements and other disclosures concerning the guarantor subsidiaries and non-guarantor subsidiaries because it has determined they would not be material to investors.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

As used in this Quarterly Report on Form 10-Q, we, our, us, the Company and Applica refer to Applica Incorporated and its subsidiaries, unless the context otherwise requires.

The following discussion and analysis and the related financial data present a review of the consolidated operating results and financial condition of Applica for the three month periods ended March 31, 2005 and 2004. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements and Notes thereto contained in Applica's Annual Report on Form 10-K for the year ended December 31, 2004.

General

Applica is a marketer and distributor of a broad range of branded small household appliances. Applica markets and distributes kitchen products, home products, pest control products, pet care products and personal care products. Applica markets products under licensed brand names, such as Black & Decker®, and its own brand names, such as Windmere®, LitterMaid®, Belson® and Applica®. Applica's customers include mass merchandisers, specialty retailers and appliance distributors primarily in North America, Latin America and the Caribbean. Applica also operates a manufacturing facility in Mexico.

The small household appliance sector of the consumer goods industry is a mature industry characterized by intense competition based on price, quality, retail shelf space, product design, trade names, new product introduction, marketing and distribution approaches. Applica competes with both domestic and international distributors and manufacturers primarily at mid-tier price points.

We continuously have to balance the cost of our products, without compromising quality, with the price constraints from our customers. The prices of raw materials such as copper, steel and plastics have significantly increased in recent years and are expected to continue to be high in the foreseeable future. This has negatively impacted our gross margins by increasing the price we pay for our products and is expected to continue to negatively impact our margins during the remainder of 2005.

We have been focused on making changes to combat the margin pressures resulting from the combination of the inflation of raw materials prices and the deflationary pressures from the retail environment. Steps we have taken include:

the downsizing and ultimate sale of our Hong Kong-based manufacturing operations;

the downsizing of our manufacturing operations in Mexico; and

the establishment of strategic sourcing partners and joint product development relationships.

We are also continuing to focus on innovative products with proprietary technologies, design and higher margins. As part of our focus on new products introductions and brand development, we search for other growth opportunities within and beyond our existing businesses. We believe that the markets and industry in which we compete may provide growth opportunities through strategic acquisitions or mergers. We review these prospects for strategic transactions as they become available.

We continue to rationalize our Mexican manufacturing operations. In 2004, we shifted a significant amount of production from Mexico to third parties in China. As part of the rationalization, we also plan to sell the building housing our factory in Mexico. In 2004, we began to reduce our Mexican manufacturing capacity to reflect only the volume needed for the Mexican marketplace, which will continue throughout 2005.

Additionally, in late 2004, we initiated an annual product and customer profitability review. Through this process, management identifies products sold to customers that do not meet Applica's product profitability threshold. Once those products are identified, management either requests a price increase from the applicable customer or cost reductions from the applicable supplier. If the combination of price increases and cost reductions does not increase the product's profitability to meet the threshold, Applica will not offer such product to the customer. This initiative will significantly reduce the number of products we offer. As a result, we expect our sales volume to continue to decrease in 2005; however, this process is expected to result in higher gross margin percentages.

Table of Contents

Applica currently manages its operations through three business segments: Household Products, Professional Personal Care Products and Manufacturing.

Forward Looking Statement Disclosure

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. Such statements are indicated by words or phrases such as anticipates, projects, management believes, Applica believes, intends, expects, and similar words or phrases. forward-looking statements are subject to certain risks, uncertainties or assumptions and may be affected by certain other factors, including the specific factors set forth below.

You should carefully consider the following risk factors, together with the other information contained in our annual report on Form 10-K for the year ended December 31, 2004, in evaluating us and our business before making an investment decision regarding our securities:

We purchase a large number of products from one supplier. Transition issues and production-related risks with this supplier could jeopardize our ability to realize anticipated sales and profits.

We depend on third party suppliers for the manufacturing of most of our products which subjects us to additional risks.

Increases in costs of raw materials, such as plastics, steel, aluminum and copper, could result in increases in the costs of our products, which will reduce our profitability.

We depend on purchases from several large customers and any significant decline in these purchases or pressure from these customers to reduce prices could have a negative effect on our business.

Our future success requires us to develop new and innovative products on a consistent basis in order to increase revenues and we may not be able to do so.

Our business can be adversely affected by lower-than-anticipated customer or consumer demand for the products we develop and introduce in the marketplace.

Our debt agreements contain covenants that restrict our ability to take certain actions. We could face liquidity and working capital constraints should we violate any of these covenants.

Our ability to generate accurate financial information on a timely basis could be adversely affected by unforeseen complications resulting from our newly implemented ERP system.

Our business is very sensitive to the strength of the U.S. retail market and weakness in this market could adversely affect our business.

Our business could be adversely affected by currency fluctuations in our international operations.

Our business involves the potential for product recalls and product liability claims against us.

The bankruptcy or financial difficulty of any major customer or fluctuations in the financial condition of the retail industry could adversely affect our business.

Our business could be adversely affected by retailer inventory management.

If we are unable to renew the Black & Decker® trademark license agreement, our business could be adversely affected.

Our business could be adversely affected by changes in trade relations with China.

The infringement or loss of our proprietary rights could have an adverse effect on our business.

Table of Contents

Our operating results are affected by seasonality.

We compete with other large companies that produce similar products.

Our business can be adversely affected by newly acquired businesses or product lines.

Government regulations could adversely impact our operations.

Should one or more of these risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results, performance, or achievements of Applica may vary materially from any future results, performance or achievements expressed or implied by the forward-looking statements. All subsequent written and oral forward-looking statements attributable to Applica or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements in this paragraph. You are cautioned not to place undue reliance on forward-looking statements. Applica undertakes no obligation to publicly revise any forward-looking statements to reflect events or circumstances that arise after the filing of this Quarterly Report on Form 10-Q.

Outlook

Applica has made a policy change with regard to providing future earnings guidance. Starting this quarter and in the future, we will no longer provide any quarterly or annual earnings per share guidance. Further, we will not update our outlook for full year earnings per share expectations for 2005 as the year progresses. In the future, we will continue to provide investors with our perspective on trends in our industry and operations, our strategic initiatives and those factors critical to understanding our business and operating environment.

Results of Operations

Three Months Ended March 31, 2005 Compared To Three Months Ended March 31, 2004

Net Sales. Consolidated net sales decreased by \$16.1 million to \$112.5 million, a decrease of 12.5% from the first quarter of 2004.

Sales for the Household Product segment, net of intersegment sales of \$1.0 million, decreased \$8.7 million to \$97.8 million. For the quarter ended March 31, 2005:

sales of Black & Decker® branded products decreased by \$2.6 million to \$86.1 million; and

sales of other branded products decreased by \$10.9 million to \$0.5 million.

These decreases were partially offset by increases in sales of Littermaid® branded products of \$4.8 million to \$11.2 million.

We expect that sales of Black & Decker® branded products will continue to decrease, primarily as the result of the elimination of sales of certain products identified in our product and customer review. In the first quarter of 2005, sales of home environment products, such as fans and heaters, decreased significantly as a result of such review.

Sales for the Professional Personal Care segment decreased by \$1.9 million to \$14.7 million for the first quarter of 2005. This decrease was primarily the result of the sale of the Jerdon hotel and hospitality business in October 2004. Sales of products by the Jerdon division totaled \$3.1 million in the first quarter of 2004. The decrease was offset by higher sales of the Belson® branded products. We expect sales in the Professional Personal Care segment to be lower in 2005 compared to 2004 as the result of the sale of the Jerdon hotel and hospitality business.

Sales for the Manufacturing segment decreased \$34.8 million to \$18.1 million. During the period, intersegment sales decreased \$29.3 million to \$18.1 million. Contract manufacturing sales decreased \$5.5 million to zero. These decreases are the result of the sale of our Hong Kong-based manufacturing operations in July 2004. We

Table of Contents

expect sales for the Manufacturing segment to be lower in 2005 compared to 2004 as the result of the sale of our Hong-Kong-based manufacturing operation and the downsizing of our manufacturing operations in Mexico.

Gross Profit. Applica's gross profit margin decreased to 16.7% for the three months ended March 31, 2005 as compared to 26.1% for the same period in 2004. The gross profit margin decrease was primarily attributed to:

inventory write-downs of \$9.4 million related to lower-than-anticipated consumer demand for two of our products;

higher product warranty returns and related expenses of \$3.3 million; and

higher unabsorbed overhead and inefficiencies of \$2.1 million at our Mexican manufacturing operations as the result of reduced production associated with our downsizing activities during 2004 and the first quarter of 2005.

The majority of the inventory write-downs related to the Tide Buzz Ultrasonic Stain Remover. Sales of the first generation of this product were lower than we had anticipated. The size of the product and the price were the main reasons given by consumers for not purchasing the product. Based on this information, we decided to close out the first generation of the Tide Buzz and accelerate the introduction of the next generation. We believe that we have addressed both those factors in the next generation of the Tide Buzz Ultrasonic Stain Remover.

Additionally, the inventory write-down included the Home Café single cup coffee maker. Our Home Café sales plan for 2005 was based on promotional campaigns by our alliance partner that did not fully materialize. This resulted in lower-than-anticipated consumer demand for the Home Café coffee maker, which resulted in excess inventory. We expect to sell the first generation units in the second half of 2005. The next generation of Home Café is scheduled to be launched in the fourth quarter of 2005.

The Tide Buzz and the Home Café represented approximately 3.7% of consolidated net sales in 2004.

We have recently experienced an increase in our warranty returns and related expenses. We believe that we have taken appropriate measures to combat these trends in a timely and effective manner. These measures include the contracting of an independent third party quality consultant to oversee the production process at our major suppliers in China and our manufacturing facility in Mexico.

We expect unabsorbed overhead and inefficiencies to continue at our Mexican manufacturing operations for the remainder of 2005. We also anticipate additional severance and asset write-downs as we continue to downsize our manufacturing operations. Additionally, we continue to experience increases in prices for raw materials, including plastic, steel, aluminum and copper in our Mexican manufacturing operations, as well as fuel surcharges and increased freight costs in the first quarter of 2005. We expect these trends to continue for the remainder of 2005, adversely impacting gross profit margins.

The decreases in gross profit margins were partially offset by improved product mix primarily as a result of:

increased sales of Littermaid® branded products; and

the elimination of certain products identified in our product and customer review.

We expect our gross profit margins to continue to benefit from improvements in the product mix for the remainder of 2005.

Table of Contents

Selling, General and Administrative Expenses.

Operating Expenses. Operating expenses decreased slightly by \$0.3 million to \$39.2 million for the three months ended March 31, 2005 compared to the same period in 2004. As a percentage of sales, operating expenses increased to 34.9% in the first quarter of 2005 compared to 30.8% in the 2004 period primarily as the result of lower sales in the first quarter of 2005 compared to the same period in 2004. The decrease in operating expenses was primarily attributed to:

decreases in advertising and promotions of \$1.0 million; and

decreases in legal and consulting fees of \$0.8 million.

These decreases were offset by increases in freight and distribution expenses of \$1.2 million due to higher warranty returns.

We expect year-over-year distribution expenses to decrease in the second half of 2005, primarily as the result of lower inventory levels. Inventory levels are expected to decrease as a result of the elimination of certain products that do not meet our profitability threshold and the planned sale or liquidation of slow-moving and excess inventory.

We anticipate these decreases will be offset by increases in freight expenses related to fuel surcharges.

Restructuring and Other Charges (Credits). In the first quarter of 2004, we settled an outstanding litigation matter for \$125,000 and reversed a remaining accrual of \$563,000 related to such litigation.

Interest Expense. Interest expense increased by \$0.3 million, or 15%, to \$2.4 million for the three months ended March 31, 2005, as compared to \$2.1 million for the first quarter of 2004, as the result of higher interest rates and higher debt levels. We expect interest rates to continue to increase for the remainder of 2005.

Loss On Early Extinguishment of Debt. In February 2004, Applica redeemed \$4.25 million of its 10% Senior Subordinated Notes due 2008. The notes were redeemed at prices between 103.25% and 103.33% of the principal amount, plus accrued interest. The cost of the redemption included \$187,000 in prepayment premiums and the pro-rata write-off of deferred financing costs related to the redemption.

Taxes. Applica's tax provision is based on an estimated annual aggregation of the taxes on earnings of each of its foreign and domestic operations. For the first quarter of 2005, Applica had an effective tax rate of 27% before considering an additional valuation allowance on deferred tax assets. The effective tax rate for the first quarter of 2004 was 40%.

SFAS No. 109, *Accounting for Income Taxes* requires that a valuation allowance be established when it is more likely than not that all or a portion of a deferred tax asset will not be realized. A review of all available positive and negative evidence needs to be considered, including a company's current and past performance, the market environment in which the company operates, the utilization of past tax credits and length of carryback and carryforward periods.

Forming a conclusion that a valuation allowance is not needed is difficult when there is negative objective evidence such as cumulative losses in recent years. Cumulative losses weigh heavily in the overall assessment. As a result of the review undertaken at March 31, 2005, Applica concluded that it was appropriate to record an additional net valuation allowance of \$6.5 million in the first quarter of 2005, primarily related to the loss in its U.S. operations. Applica expects to realize the benefits of the remaining net deferred tax assets of approximately \$12.0 million as of March 31, 2005, primarily from identified tax planning strategies in the U.S. and Argentina, as well as projected

taxable income from other foreign operations.

The increase in the valuation allowance in the first quarter of 2005 primarily results from losses in the U.S. operations that resulted in a tax benefit of \$6.2 million. We expect to continue to maintain a valuation allowance on future tax benefits in the U.S. until an appropriate level of profitability is reached or we are able to develop tax

Table of Contents

strategies that would enable us to conclude that it is more likely than not that a portion of our deferred tax assets would be realized.

Earnings Per Share. Weighted average basic shares for the three-month periods ended March 31, 2005 and 2004 were 24,136,545 and 23,718,256, respectively. All common stock equivalents have been excluded from the diluted per share calculations in the three-month periods ended March 31, 2005 and 2004 because their inclusion would have been anti-dilutive.

Table of Contents

Liquidity and Capital Resources

Liquidity

Operating Activities. For the three months ended March 31, 2005, Applica's operations generated \$27.7 million in cash flow, compared with the generation of cash of \$29.4 million for the three months ended March 31, 2004. The decrease in operating cash flows from the prior period was principally due to the larger operating loss offset by lower working capital due to lower sales. We experienced a larger operating loss as a result of significant non-cash write-downs of inventory and higher freight and distribution costs. We experienced lower sales mainly due to the planned elimination of certain products as a result of our customer and product review process initiatives, the sale of the Jerdon hotel and hospitality business in October 2004 and the sale of our Hong-Kong-based manufacturing operations in July 2004.

As part of our capital management, we review certain working capital metrics. For example, we evaluate our accounts receivable and inventory levels through the computation of days sales outstanding and inventory turnover ratio. The number of days sales outstanding at March 31, 2005 increased modestly from the number of days sales outstanding at March 31, 2004. Average inventory turns at March 31, 2005 decreased modestly in comparison to the same period in 2004.

During the three months ended March 31, 2005, we paid approximately \$3.8 million in cash severance and received approximately \$1.5 million in payments under the receivables from our former chairman. We expect to pay approximately \$3.0 million more in severance payments in 2005 and receive approximately \$1.5 million more in scheduled payments under the receivables from our former chairman.

In addition to the cash severance discussed above, we expect to pay approximately \$3.0 million in net severance and other benefits to employees at our Mexican manufacturing facility during 2005 as we continue the restructuring of our Mexican manufacturing operations.

Our results of operations for the periods discussed were negatively impacted by inflation pressures. We have not been significantly affected by foreign currency fluctuation. We generally negotiate our purchase orders with our foreign manufacturers in United States dollars. Thus, our cost under any purchase order is not subject to change after the time the order is placed due to exchange rate fluctuations. However, the weakening of the United States dollar against the foreign currencies could result in certain suppliers increasing the United States dollar prices for future product purchases. In addition, Applica uses foreign exchange contracts, which usually mature within one year, to hedge anticipated foreign currency transactions, primarily U.S. dollar inventory purchases by our foreign commercial subsidiaries in Canada and Latin America.

Investing Activities. For the three months ended March 31, 2005, investing activities generated cash of \$0.1 million compared to \$3.2 million of cash used in the three months ended March 31, 2004. The increase in cash flows from investing activities was primarily a result of lower capital expenditures in the three months ended March 31, 2005 as we sold our Hong Kong-based manufacturing operations and restructured our Mexican manufacturing operations during 2004, which resulted in less expenditures. In addition, we received \$1.5 million as a scheduled payment under the receivables from a former officer. We expect to receive approximately \$1.5 million more in scheduled payments.

Applica makes capital expenditures primarily for new product development and maintenance of its manufacturing facility and improvements in technology. Capital expenditures for the first quarter of 2005 were \$1.5 million and primarily related to the implementation of a new ERP system, which went into production in April 2005. Capital expenditures for 2005 are expected to be approximately \$13.0 million and are allocated as follows:

\$7.0 million for new products;

\$4.0 million for information technology (including \$1.2 million for the ERP implementation, \$1.1 million for information technology upgrades and \$0.9 for the installation of radio frequency identification (RFID) capabilities in our warehouses); and

\$2.0 million for other improvements.

Table of Contents

Applica plans to fund such capital expenditure with cash flow from operations and, if necessary, borrowings under its credit facility.

Financing Activities. Net cash used in financing activities was \$32.6 million in the three months ended March 31, 2005, compared to cash used of \$33.0 million in the three months ended March 31, 2004. In both periods, cash generated by operating activities was used to make payments under our lines of credit.

We will continue to have cash requirements to support seasonal working capital needs and capital expenditures, to pay interest, and to fund operating expenses. In order to meet our cash requirements, we intend to use our existing cash, internally generated funds, and borrowings under our domestic credit line. We believe that cash provided from these sources will be adequate to meet our cash requirements over the next twelve months. However, our ability to borrow under our domestic line is dependent upon Applica maintaining a minimum fixed charge coverage ratio of 1.0 to 1.0 or maintaining a minimum daily availability under its borrowing base of \$20 million and a minimum average daily availability of \$30 million. Factors impacting our ability to maintain such requirements include our ability to:

generate net earnings;

manage inventory levels effectively;

maintain or improve accounts receivables days sales outstanding; and

maintain or improve terms with our suppliers.

If we are unable to maintain such requirements or fail to obtain bank consent to waive those requirements, our liquidity will be negatively affected. We believe that we will be able to maintain such requirements or obtain bank consent to waive or amend such requirements. If necessary, we believe we will have access to other financing sources to provide the necessary liquidity to finance our short-term cash requirements, such as refinancing our existing domestic line, second-lien financing, or other similar capital markets financing. However, we may not be able to effect any needed refinancing on commercially reasonable terms.

Capital Resources

Applica's primary sources of short-term capital are its cash flow from operations and borrowings under its credit facilities. Applica's current domestic credit facility is a \$175 million asset-based senior secured revolving credit facility maturing in November 2009. Advances under the credit facility are governed by Applica's collateral value, which is based upon percentages of eligible accounts receivable and inventories. If Applica does not maintain a minimum fixed charge coverage ratio of 1.0 to 1.0, Applica must maintain a minimum daily availability under its borrowing base of \$20 million and a minimum average daily availability of \$30 million. If Applica maintains a fixed charge coverage ratio of greater than 1.0 to 1.0, there is no availability requirement; however, there is an availability block of \$10 million. If Applica maintains a fixed charge coverage ratio of greater than 2.0 to 1.0, there is no availability requirement and no availability block. The credit facility includes a \$10.0 million sublimit for the issuance of letters of credit, with approximately \$1.5 million outstanding under the limit as of April 20, 2005.

As of March 31, 2005, Applica's fixed charge coverage ratio was less than 1.0 to 1.0. During the three months ended March 31, 2005, Applica maintained daily availability greater than \$20 million and average daily availability greater than \$30 million. Applica maintained daily availability greater than \$20 million and average daily availability greater than \$30 million in April 2005. During the three months ended March 31, 2005, Applica was in compliance with all of its covenants under the credit facility.

As of March 31, 2005, Applica was borrowing approximately \$57.1 million under the facility and had approximately \$49.9 million available for future cash borrowings, based on Applica's collateral value, which is based

upon percentages of eligible accounts receivables and inventories. As of April 20, 2005, Applica was borrowing approximately \$56.6 million under the facility and had approximately \$44.0 million available for future cash borrowings.

At Applica's option, interest accrues on the loans made under the credit facility at either:

Table of Contents

LIBOR (adjusted for any reserves), plus a specified margin (determined by Applica's Fixed Charge Coverage Ratio and set at 2.25% at March 31, 2005 and 2.50% at April 20, 2005), which was 5.12% at March 31, 2005 and 5.52% at April 20, 2005; or

the Base Rate (which is Bank of America's prime rate), plus a specified margin (determined based upon Applica's Fixed Charge Coverage Ratio and was zero percent at March 31, 2005 and 0.50% at April 20, 2005), which was 5.75% at March 31, 2005 and 6.25% at April 20, 2005.

Swing loans up to \$15.0 million bear interest at the Base Rate plus a specified margin (determined based on Applica's leverage ratio and was zero percent at March 31, 2005 and 0.50% April 20, 2005), which was 5.75% at March 31, 2005 and 6.25% at April 20, 2005.

Management expects its borrowing margins to remain at 2.50% and 0.50% for LIBOR and Base Rate borrowings, respectively, for the remainder of 2005.

Applica has classified the borrowings under the credit facility as a current liability in accordance with Emerging Issues Task Force (EITF) 95-22 Balance Sheet Classifications of Borrowings Outstanding under Revolving Credit Agreements That Include Both a Subjective Acceleration Clause and a Lock-Box Arrangement. Despite such classification, Applica has the ability and the intent to maintain these obligations for longer than one year.

Certain of Applica's foreign subsidiaries have approximately \$1.3 million in trade finance lines of credit, payable on demand, which are secured by the subsidiaries' tangible and intangible property and a guarantee by the parent company, Applica Incorporated. As of March 31, 2005, there was \$0.4 million outstanding under the working capital lines and \$0.9 million outstanding under the letter of credit lines. As of April 20, 2005, \$1.1 million was outstanding under the working capital lines and \$0.1 million under the letter of credit lines.

In addition, Applica has senior subordinated notes bearing interest at a rate of 10%, payable semiannually, and maturing in July 2008. The notes are general unsecured obligations of Applica Incorporated and rank subordinate in right of payment to all senior debt of Applica and rank pari passu in right of payment to all future subordinated indebtedness of Applica. The notes may be redeemed at the option of Applica, in whole or in part, at various redemption prices. As of March 31, 2005, the outstanding principal balance was \$60.8 million.

At December 31, 2004, Applica ended its credit insurance agreement with CIT Group/Commercial Services and entered into a comprehensive credit insurance agreement with Great American Insurance Company (GAIC). The agreement allows Applica to transfer to GAIC, without recourse, approved receivables of specified customers under certain circumstances, including the bankruptcy of covered customers. Under the agreement with GAIC, Applica remains the servicer of the approved receivables and pays a flat annual fee. These arrangements are strictly for the purpose of insuring selected receivables. At March 31, 2005, and 2004, \$12.8 million and \$9.4 million, respectively, of accounts receivable were insured under these arrangements.

At March 31, 2005, debt as a percent of total capitalization was 57.8%, as compared to 58.0% at December 31, 2004.

Applica's ability to make scheduled payments of principal of, or to pay the interest on, or to refinance, its indebtedness, or to fund planned capital expenditures, and marketing expenses will depend on its future performance. Based upon the current level of operations and cash flow from operations, we believe that we have adequate capital resources to service our debt and fund our liquidity needs for the next year. However, the current level of operations may deteriorate, our business may not generate sufficient cash flow from operations, and future borrowings may not be available under the credit facility in an amount sufficient to enable us to service our indebtedness, including the outstanding 10% notes, or to fund our other liquidity needs. In addition, we may not be able to effect any needed

refinancing on commercially reasonable terms or at all.

Use of Estimates and Critical Accounting Policies

The preparation of Applica s financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported

Table of Contents

amounts of assets and liabilities at the date of the financial statements and revenues and expenses during the period. Future events and their effects cannot be determined with absolute certainty; therefore, the determination of estimates requires the exercise of judgment. Actual results inevitably will differ from those estimates, and such differences may be material to our financial statements. Management continually evaluates its estimates and assumptions, which are based on historical experience and other factors that are believed to be reasonable under the circumstances. These estimates and Applica's actual results are subject to the risk factors listed in Forward Looking Statement Disclosure above.

Management believes that the following may involve a higher degree of judgment or complexity:

Income Taxes. Applica is subject to income tax laws in many countries. Judgment is required in assessing the future tax consequences of events that have been recognized in Applica's financial statements and tax returns. Significant management judgment is required in developing Applica's provision for income taxes, including the determination of foreign tax liabilities, deferred tax assets and liabilities and any valuation allowances that might be required to be applied against the deferred tax assets. Applica evaluates its ability to realize its deferred tax assets on a quarterly basis and adjusts the amount of its valuation allowance, if necessary. Applica operates within multiple taxing jurisdictions and is subject to audit in those jurisdictions. Because of the complex issues involved, any claims can require an extended period to resolve. In management's opinion, adequate provisions for income taxes have been made.

Applica records a valuation allowance to reduce its deferred tax assets to the amount that Applica believes will more likely than not be realized. While Applica considers future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance, in the event it was to determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to tax expense in the period such determination is made. Likewise, should Applica determine that it would be able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment to the deferred tax assets would increase net income in the period such determination is made.

We believe that our estimates for the valuation allowances reserved against the deferred tax assets are appropriate based on current facts and circumstances. However, it is possible that other people applying reasonable judgment to the same facts and circumstances could develop a different valuation allowance.

Collectibility of Accounts Receivable. Applica records allowances for estimated losses resulting from the inability of its customers to make required payments on their balances. Applica assesses the credit worthiness of its customers based on multiple sources of information and analyzes factors including:

Applica's historical bad debt experiences;

publicly available information regarding its customers and the inherent credit risk related to them;

information from subscription-based credit reporting companies;

trade association data and reports;

current economic trends; and

changes in customer payment terms or payment patterns.

This assessment requires significant judgment. If the financial condition of Applica's customers were to worsen, additional write-offs may be required. Such write-offs may not be included in the allowance for doubtful accounts at

March 31, 2005, resulting in a charge to income in the period such determination is made. Conversely, if the financial condition of Applica's customers were to improve or its judgment regarding their financial condition was to change positively, a reduction in the allowances may be required resulting in an increase in income in the period such determination is made.

Inventory. Applica values inventory at the lower of cost or market, using the first-in, first-out (FIFO) method, and regularly reviews the book value of discontinued product lines and stock keeping units (SKUs) to determine if these items are properly valued. If market value is less than cost, Applica writes down the related inventory to the estimated net realizable value. Applica regularly evaluates the composition of inventory to identify slow-moving and obsolete inventories to determine if additional write-downs are required. This valuation requires significant judgment from management as to the saleability of its inventory based on forecasted sales. It is

Table of Contents

particularly difficult to judge the potential sales of new products. Should the forecasted sales not materialize, it would have a significant impact on Applica's result of operations and the valuation of its inventory, resulting in a charge to income in the period such determination is made.

Product Liability Claims and Litigation. Applica is subject to lawsuits and other claims related to product and other matters that are being defended and handled in the ordinary course of business. Applica maintains accruals for such costs that may be incurred, which are determined on a case-by-case basis, taking into consideration the likelihood of adverse judgments or outcomes, as well as the potential range of probable loss. The accruals are monitored on an ongoing basis and are updated for new developments or new information as appropriate. With respect to product liability claims, Applica estimates the amount of ultimate liability in excess of applicable insurance coverage based on historical claims experience and current claim estimates, as well as other available facts and circumstances. In addition, we have accrued for product liability claims, incurred but not received, to the extent we can formulate a reasonable estimate of their costs.

Management believes that the amount of ultimate liability of Applica's current claims and litigation matters, if any, is not likely to have a material effect on its business, financial condition, results of operations or liquidity. However, as the outcome of litigation is difficult to predict, unfavorable significant changes in the estimated exposures could occur resulting in a charge to income in the period such determination is made. Conversely, if favorable changes in the estimated exposures occur, a reduction in the accruals may be required resulting in an increase in income in the period such determination is made.

Long-Lived Assets. Applica reviews long-lived assets and certain identifiable intangibles held and used for possible impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In evaluating the fair value and future benefits of its intangible assets, management performs an analysis of the anticipated undiscounted future net cash flows of the individual assets over the remaining amortization period. Applica recognizes an impairment loss if the carrying value of the asset exceeds the expected future cash flows.

Other Estimates. During the years, Applica has made significant estimates in connection with specific events affecting its expectations. These have included accruals relating to the consolidation of its operations, plant closings, reduction in employees and product recalls. Applica makes a number of other estimates in the ordinary course of business relating to sales returns and allowances, warranty accruals, and accruals for promotional incentives. Historically, past changes to these estimates have not had a material impact on Applica's financial condition but have significantly affected operations from time to time. However, circumstances could change which may alter future expectations.

Item 3. Quantitative and Qualitative Disclosures About Market Risk**Interest Rate Risk Management**

Applica is exposed to the impact of interest rate changes. Applica's objective is to manage the impact of interest rate changes on earnings and cash flows and on the market value of its borrowings. Applica maintains fixed rate debt as a percentage of its net debt between a minimum and maximum percentage, which is set by policy. It is Applica's policy to enter into interest rate risk management transactions only to the extent considered necessary to meet its objectives as set forth above. Applica does not enter into interest rate risk management transactions for speculative purposes.

Outstanding as of March 31, 2005 were interest rate management contracts on approximately \$30 million notional principal amount with a negative fair value of approximately \$346,000. The market value represents the amount Applica would pay upon exiting the contracts at March 31, 2005 and was determined based on market quotes. The market value related to the fair value of interest rate risk management contracts is included as other long-term liabilities and a decrease in long-term debt. The market value related to the cash flow interest rate risk management contracts is included as an offset to prepaid asset and other comprehensive income. Applica does not intend to exit these contracts at this time.

Table of Contents

Significant interest rate risk management instruments held by Applica as of March 31, 2005 included pay-floating swaps. The pay-floating swap effectively converts medium term fixed-rate obligations to LIBOR-rate indexed variable-rate instruments. All swaps have maturity dates that mirror the maturity date of the underlying hedged transaction. For the period ending March 31, 2005, Applica did not discontinue any hedges due to the probability that the original underlying forecasted transaction would not occur. The impact of interest rate risk management activities on pre-tax income during the quarter ended March 31, 2005 was not material.

Foreign Exchange Risk Management

Applica transacts business globally and is subject to risks associated with changing foreign exchange rates. Applica's objective is to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow management to focus attention on core business issues and challenges. By policy, Applica maintains hedge coverage between minimum and maximum percentages of its forecasted foreign exchange exposures for periods not to exceed 18 months. The gains and losses on these contracts offset changes in the value of the related exposures. It is Applica's policy to enter into foreign currency transactions only to the extent considered necessary to meet its objectives as set forth above. Applica does not enter into foreign currency transactions for speculative purposes.

Outstanding as of March 31, 2005 were \$4.9 million notional principal amount of contracts to purchase and/or sell foreign currency forward with a negative fair market value of approximately \$321,000. The market value represents the amount Applica would pay upon exiting the contracts at March 31, 2005 and was determined based on market quotes. This amount is included in other long-term liabilities and accumulated other comprehensive income as of March 31, 2005. Applica does not intend to exit these contracts at this time.

Applica enters into various contracts that change in value as foreign exchange rates change to protect the value of its existing foreign currency assets and liabilities, commitments and forecasted foreign currency revenues.

Applica uses option strategies and forward contracts that provide for the sale of foreign currencies to hedge forecasted revenues and expenses. Applica also uses forward contracts to hedge foreign currency assets and liabilities. While these hedging instruments are subject to fluctuations in value, such fluctuations are offset by changes in the value of the underlying exposures being hedged. The principal currencies hedged are the Mexican peso and Canadian dollar.

Additional Information

For additional information, see Item 7A. Quantitative and Qualitative Disclosures About Market Risk in Applica's Annual Report on Form 10-K for the year ended December 31, 2004.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures. Applica has carried out an evaluation under the supervision of management, including the President and Chief Executive Officer (CEO) and the Senior Vice President and Chief Financial Officer (CFO), of the effectiveness of the design and operation of its disclosure controls and procedures. Based on that evaluation, Applica's CEO and CFO have concluded that, as of March 31, 2005, Applica's disclosure controls and procedures were effective to ensure that information required to be disclosed by Applica in the reports filed or submitted by it under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and include controls and procedures designed to ensure that information required to be disclosed by Applica in such reports is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding

required disclosures.

Since the evaluation date by Applica's management of its internal controls over financial reporting, there have not been any changes in Applica's internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect Applica's internal controls over financial reporting.

Limitations on the Effectiveness of Controls. Applica's management, including the CEO and CFO, does not expect that our disclosure or internal controls will prevent all errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control

Table of Contents

system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Despite these limitations, Applica s CEO and CFO have concluded that our disclosure controls and procedures (1) are designed to provide reasonable assurance of achieving their objectives and (2) do provide reasonable assurance of achieving their objectives.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Applica is subject to legal proceedings, products liability claims and other claims that arise in the ordinary course of our business. In the opinion of management, the amount of ultimate liability, if any, in excess of applicable insurance coverage, is not likely to have a material effect on the financial condition, results of operations or liquidity of Applica. However, as the outcome of litigation or other claims is difficult to predict, significant changes in the estimated exposures could occur.

Item 6. Exhibits.

(a) Exhibits:

31.1 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
