The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED SEPTEMBER 19, 2007

PROSPECTUS

Time Warner Cable Inc.

OFFER TO EXCHANGE

$1,500,000,000 in aggregate principal amount of 5.40% Notes due 2012, which have been registered under the Securities Act of 1933, as amended, for any and all outstanding 5.40% Notes due 2012.

$2,000,000,000 in aggregate principal amount of 5.85% Notes due 2017, which have been registered under the Securities Act of 1933, as amended, for any and all outstanding 5.85% Notes due 2017.

$1,500,000,000 in aggregate principal amount of 6.55% Debentures due 2037, which have been registered under the Securities Act of 1933, as amended, for any and all outstanding 6.55% Debentures due 2037.

The exchange debt securities will be fully and unconditionally guaranteed on a senior unsecured basis by our subsidiaries Time Warner Entertainment Company, L.P. and TW NY Cable Holding Inc.

We are conducting the exchange offer in order to provide you with an opportunity to exchange your unregistered outstanding debt securities for freely tradeable exchange debt securities that have been registered under the Securities Act of 1933.

The Exchange Offer

We will exchange all outstanding debt securities that are validly tendered and not validly withdrawn for an equal principal amount of exchange debt securities that are freely tradeable.

You may withdraw tenders of outstanding debt securities at any time prior to the expiration date of the exchange offer.

The exchange offer expires at 5:00 p.m., New York City time, on   , 2007, unless we extend it.

The exchange of outstanding debt securities for exchange debt securities in the exchange offer will not be a taxable event for U.S. federal income tax purposes.

The terms of the exchange debt securities to be issued in the exchange offer are substantially identical to the outstanding debt securities, except that the exchange debt securities will be registered under the Securities Act of 1933, as amended, and will not have any transfer restrictions, registration rights or rights to additional interest.

No public market exists for the initial debt securities or exchange debt securities. We do not intend to apply for listing of the exchange debt securities or to arrange for them to be quoted on a quotation system.

We will not receive any proceeds from the exchange offer.

You should carefully consider the Risk Factors beginning on page 14 of this prospectus before participating in the exchange offer.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the exchange debt securities to be distributed in the exchange offer or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

The date of this prospectus is , 2007.

SUMMARY

Except as the context otherwise requires, references in this prospectus to TWC, the Company, we, our or us are Time Warner Cable Inc. and references to Time Warner are to our parent corporation, Time Warner Inc. This summary is qualified in its entirety by, and should be read in conjunction with, the more detailed information and financial statements (including the notes thereto) appearing elsewhere in this prospectus. This summary does not contain all of the information that you should consider before making an investment. You should read the entire prospectus carefully. Please see Forward-Looking Statements for more information regarding these statements.

Except as the context otherwise requires, references to information being pro forma or on a pro forma basis assume that the transactions with Adelphia Communications Corporation (Adelphia) and its affiliates and subsidiaries and Comcast Corporation (Comcast) and its affiliates and the dissolution of Texas and Kansas City Cable Partners, L.P. (TKCCP), including the distribution of TKCCP s cable systems in Kansas City, south and west Texas and New Mexico (the Kansas City Pool), occurred on January 1, 2006, as described in our unaudited pro forma condensed combined financial statements contained herein. See Unaudited Pro Forma Condensed Combined Financial Information. Certain of the subscriber data contained in this prospectus includes subscribers in the Kansas City Pool for all periods presented. Prior to January 1, 2007, we managed, but did not consolidate the financial results of, the Kansas City Pool.

The term initial debt securities refers to the 5.40% Notes due 2012 (the 2012 initial notes), the 5.85% Notes due 2017 (the 2017 initial notes) and the 6.55% Debentures due 2037 (the 2037 initial debentures) that were issued on April 9, 2007 in an offering pursuant to Rule 144A and Regulation S under the Securities Act of 1933, as amended (the Securities Act). The term exchange debt securities refers to the 5.40% Notes due 2012 (the 2012 exchange notes and, together with the 2012 initial notes, the 2012 notes), the 5.85% Notes due 2017 (the 2017 exchange notes and, together with the 2017 initial notes, the 2017 notes) and the 6.55% Debentures due 2037 (the 2037 exchange debentures and, together with the 2037 initial debentures, the 2037 debentures) offered with this prospectus. The term debt securities refers to the initial debt securities and the exchange debt securities, collectively. The term 2007 Bond Offering refers to the issuance of the initial debt securities.

Our Company

We, together with our subsidiaries, are the second-largest cable operator in the U.S. and are an industry leader in developing and launching innovative video, data and voice services. At June 30, 2007, we had cable systems that passed approximately 26 million U.S. homes in well-clustered locations and had approximately 14.7 million customer relationships. Approximately 85% of these homes passed were located in one of five principal geographic areas: New York state, the Carolinas, Ohio, southern California and Texas. As of June 30, 2007, we were the largest cable system operator in a number of large cities, including New York City and Los Angeles.

As part of our strategy to expand our cable footprint and improve the clustering of our cable systems, on July 31, 2006, a subsidiary of ours, Time Warner NY Cable LLC (TW NY), and Comcast completed their respective acquisitions of assets comprising in the aggregate substantially all of the cable systems of Adelphia. TW NY paid approximately $8.9 billion in cash (after giving effect to certain purchase price adjustments) and shares of our Class A common stock, par value $.01 per share (Class A common stock), representing approximately 16% of our outstanding common stock for the portion of the Adelphia assets it acquired. Immediately prior to the Adelphia acquisition, we and our subsidiary, Time Warner Entertainment Company, L.P. (TWE), redeemed Comcast s interests in us (the TWC Redemption) and TWE (the TWE Redemption and, together with the TWC Redemption, the Redemptions), respectively, with the result that Comcast no longer had an interest in either company. In addition, TW NY exchanged certain cable systems with subsidiaries of Comcast (the Exchange). As a result of the closing of these transactions

(referred to generally herein as the Transactions), we acquired systems with approximately 4.0 million basic video subscribers and disposed of systems with approximately 0.8 million basic video subscribers that were transferred to Comcast

1

Table of Contents

in connection with the Redemptions and the Exchange for a net gain of approximately 3.2 million basic video subscribers.

In addition, effective January 1, 2007, we began consolidating the results of the Kansas City Pool we received upon the distribution of the assets of TKCCP to us and Comcast. Prior to January 1, 2007, our interest in TKCCP was reported as an equity method investment. TKCCP was formally dissolved on May 15, 2007.

For the presentation of subscriber information, cable systems we acquired in and retained after the Transactions are referred to herein as the Acquired Systems, and systems we owned before and retained after the Transactions, as well as the Kansas City Pool, are referred to herein as the Legacy Systems. For the presentation of financial information, however, Legacy Systems refers only to those systems that the Company owned both before and after the Transactions and does not include the Kansas City Pool. The Acquired Systems have the same definition as above.

On February 13, 2007, Adelphia s Chapter 11 reorganization plan became effective and, under applicable securities law regulations and provisions of the U.S. bankruptcy code, we became a public company subject to the requirements of the Securities Exchange Act of 1934, as amended (the Exchange Act). Under the terms of the reorganization plan, most of the 155,913,430 shares of our Class A common stock that Adelphia received in the Adelphia acquisition (representing approximately 16% of our outstanding common stock) are being distributed to Adelphia s creditors. As of June 30, 2007, approximately 91% of these shares had been distributed to Adelphia s creditors. The remaining shares are expected to be distributed during the coming months as the remaining disputes are resolved by the bankruptcy court. On March 1, 2007, our Class A common stock began trading on the New York Stock Exchange (the NYSE) under the symbol TWC.

Time Warner currently owns approximately 84.0% of our common stock (representing a 90.6% voting interest). The financial results of our operations are consolidated by Time Warner.

As the marketplace for basic video services has matured, the cable industry has responded by introducing new services, including enhanced video services like high definition television (HDTV) and video-on-demand (VOD), high-speed Internet access and Internet protocol (IP)-based telephony. As of June 30, 2007, approximately 7.7 million (or 58%) of our 13.4 million basic video customers subscribed to digital video services, 7.2 million (or 28%) of high-speed data service-ready homes subscribed to a residential high-speed data service such as our Road Runner service and 2.3 million (or 12%) of voice service-ready homes subscribed to Digital Phone. We launched Digital Phone broadly in the Legacy Systems during 2004 and as of June 30, 2007, it was available to over 40% of the homes passed in the Acquired Systems. As of June 30, 2007, in the Legacy Systems, approximately 59% of our 9.6 million basic video customers subscribed to digital video services and over 32% of high-speed data service-ready homes subscribed to a residential high-speed data service.

Table of Contents

SUMMARY OF THE EXCHANGE OFFER

We are offering to exchange (i) $1,500,000,000 aggregate principal amount of our 2012 exchange notes for a like aggregate principal amount of our 2012 initial notes, (ii) $2,000,000,000 aggregate principal amount of our 2017 exchange notes for a like aggregate principal amount of our 2017 initial notes and (iii) $1,500,000,000 aggregate principal amount of our 2037 exchange debentures for a like aggregate principal amount of our 2037 initial debentures. In order to exchange your initial debt securities, you must properly tender them and we must accept your tender. We will exchange all outstanding initial debt securities that are validly tendered and not validly withdrawn.

Exchange Offer	We will exchange our exchange debt securities for a like aggregate principal amount at maturity of our initial debt securities.
Expiration Date	This exchange offer will expire at 5:00 p.m., New York City time, on , 2007, unless we extend it.
Conditions to the Exchange Offer	We will complete this exchange offer only if: the exchange offer does not violate applicable law or any applicable interpretation of the staff of the Securities and Exchange Commission (the SEC); no action or proceeding shall have been instituted or threatened in any court or by any governmental agency which might materially impair our ability to proceed with the exchange offer, and no material adverse development shall have occurred in any existing action or proceeding with respect to us; and we obtain all the governmental approvals we deem necessary to complete this exchange offer. Please refer to the section in this prospectus entitled The Exchange Offer Conditions to the Exchange Offer.
Procedures for Tendering Initial Debt Securities	To participate in this exchange offer, you must complete, sign and date the letter of transmittal or its facsimile and transmit it, together with your initial debt securities to be exchanged and all other documents required by the letter of transmittal, to The Bank of New York, as exchange agent, at its address indicated under The Exchange Offer Exchange Agent. In the alternative, you can tender your initial debt securities by book-entry delivery following the procedures described in this prospectus. For more information on tendering your initial debt securities, please refer to the section in this prospectus entitled The Exchange Offer Procedures for Tendering Initial Debt Securities.
Special Procedures for Beneficial Owners	If you are a beneficial owner of initial debt securities that are registered in the name of a broker, dealer, commercial bank, trust company or other nominee and you wish to tender your initial debt securities in the exchange offer, you should contact the registered holder promptly and instruct that person to tender on your behalf.

Guaranteed Delivery Procedures	If you wish to tender your initial debt securities and you cannot get the required documents to the exchange agent on time, you may tender your initial debt securities by using the guaranteed delivery procedures described under the section of this prospectus entitled

	The Exchange Offer Procedures for Tendering Initial Debt Securities Guaranteed Delivery Procedure.
Withdrawal Rights	You may withdraw the tender of your initial debt securities at any time before 5:00 p.m., New York City time, on the expiration date of the exchange offer. To withdraw, you must send a written or facsimile transmission notice of withdrawal to the exchange agent at its address indicated under The Exchange Offer Exchange Agent before 5:00 p.m., New York City time, on the expiration date of the exchange offer.
Acceptance of Initial Debt Securities and Delivery of Exchange Debt Securities	If all the conditions to the completion of this exchange offer are satisfied, we will accept any and all initial debt securities that are properly tendered in this exchange offer on or before 5:00 p.m., New York City time, on the expiration date. We will return to you any initial debt security that we do not accept for exchange without expense promptly after the expiration date. We will deliver the exchange debt securities to you promptly after the expiration date and acceptance of your initial debt securities for exchange. Please refer to the section in this prospectus entitled The Exchange Offer Acceptance of Initial Debt Securities for Exchange; Delivery of Exchange Debt Securities.
Federal Income Tax Considerations Relating to the Exchange Offer	Exchanging your initial debt securities for exchange debt securities will not be a taxable event to you for United States federal income tax purposes. Please refer to the section of this prospectus entitled Certain Material U.S. Federal Income Tax Consequences.
Exchange Agent	The Bank of New York is serving as exchange agent in the exchange offer.
Fees and Expenses	We will pay all expenses related to this exchange offer. Please refer to the section of this prospectus entitled The Exchange Offer Fees and Expenses.
Use of Proceeds	We will not receive any proceeds from the issuance of the exchange debt securities. We are making this exchange offer solely to satisfy certain of our obligations under a registration rights agreement entered into among our company, the guarantors and the initial purchasers of the debt securities (the Registration Rights Agreement) in connection with the issuance of the initial debt securities.
Consequences to Holders Who Do Not Participate in the Exchange Offer	If you do not participate in this exchange offer: except as set forth in the next paragraph, you will not be able to require us to register your initial debt securities under the Securities Act; you will not be able to resell, offer to resell or otherwise transfer your initial debt securities unless they are registered under the Securities Act or unless you resell, offer to resell or otherwise transfer them under an exemption from the registration

4

Table of Contents

requirements of, or in a transaction not subject to, the Securities Act; and

the trading market for your initial debt securities will become more limited to the extent other holders of initial debt securities participate in the exchange offer.

You will not be able to require us to register your initial debt securities under the Securities Act unless:

changes in applicable law or the interpretations of the staff of the SEC do not permit us to effect the exchange offer;

for any reason the exchange offer is not consummated by January 4, 2008;

any holder notifies us prior to the 30th day following consummation of this exchange offer that it is prohibited by law or SEC policy from participating in the exchange offer;

in the case of any holder who participates in the exchange offer, such holder notifies us prior to the 30th day following the consummation of the exchange offer that it did not receive exchange debt securities that may be sold without restriction under state and federal securities laws (other than due solely to the status of such holder as an affiliate of ours within the meaning of the Securities Act); or

any initial purchaser of the debt securities so requests with respect to initial debt securities that have, or that are reasonably likely to be determined to have, the status of unsold allotments in an initial distribution.

In these cases, the Registration Rights Agreement requires us to file a registration statement for a continuous offering in accordance with Rule 415 under the Securities Act for the benefit of the holders of the initial debt securities described in this paragraph. We do not currently anticipate that we will register under the Securities Act any initial debt securities that remain outstanding after completion of the exchange offer.

Please refer to the section of this prospectus entitled The Exchange Offer Your Failure to Participate in the Exchange Offer Will Have Adverse Consequences.

Resales

It may be possible for you to resell the debt securities issued in the exchange offer without compliance with the registration and prospectus delivery provisions of the Securities Act, subject to the conditions described under Obligations of Broker-Dealers below.

To tender your initial debt securities in this exchange offer and resell the exchange debt securities without compliance with the registration and

prospectus delivery requirements of the Securities Act, you must make the following representations:

you are authorized to tender the initial debt securities and to acquire exchange debt securities, and that we will acquire good and unencumbered title to the initial debt securities,

the exchange debt securities acquired by you are being acquired in the ordinary course of business,

you have no arrangement or understanding with any person to participate in a distribution of the exchange debt securities and are not participating in, and do not intend to participate in, the distribution of such exchange debt securities,

you are not an affiliate, as defined in Rule 405 under the Securities Act, of ours, or you will comply with the registration and prospectus delivery requirements of the Securities Act to the extent applicable,

if you are not a broker-dealer, you are not engaging in, and do not intend to engage in, a distribution of exchange debt securities, and

if you are a broker-dealer, initial debt securities to be exchanged were acquired by you as a result of market-making or other trading activities and you will deliver a prospectus in connection with any resale, offer to resell or other transfer of such exchange debt securities.

Please refer to the sections of this prospectus entitled The Exchange Offer Procedure for Tendering Initial Debt Securities Proper Execution and Delivery of Letters of Transmittal, Risk Factors Risks Relating to the Exchange Offer Some persons who participate in the exchange offer must deliver a prospectus in connection with resales of the exchange debt securities and Plan of Distribution.

Obligations of Broker-Dealers

If you are a broker-dealer (1) that receives exchange debt securities, you must acknowledge that you will deliver a prospectus in connection with any resales of the exchange debt securities, (2) who acquired the initial debt securities as a result of market-making or other trading activities, you may use the exchange offer prospectus as supplemented or amended, in connection with resales of the exchange debt securities, or (3) who acquired the initial debt securities directly from the issuers in the initial offering and not as a result of market-making and trading activities, you must, in the absence of an exemption, comply with the registration and prospectus delivery requirements of the Securities Act in connection with resales of the exchange debt securities.

Table of Contents

Summary of Terms of the Exchange Debt Securities

The following summary is not intended to be complete. For a more detailed description of the debt securities, see Description of the Debt Securities and the Guarantees.

Issuer	Time Warner Cable Inc.
Exchange Debt Securities	$1,500,000,000 aggregate principal amount of 5.40% Notes due 2012; $2,000,000,000 aggregate principal amount of 5.85% Notes due 2017; and $1,500,000,000 aggregate principal amount of 6.55% Debentures due 2037. The forms and terms of the exchange debt securities are substantially identical to the forms and terms of the initial debt securities except that the exchange debt securities will be registered under the Securities Act, will not bear legends restricting their transfer and will not be entitled to registration rights under the Registration Rights Agreement or additional interest. The exchange debt securities will evidence the same debt as the initial debt securities, and both the initial debt securities and the exchange debt securities will be governed by the same indenture.
Maturity	2012 notes: July 2, 2012 2017 notes: May 1, 2017 2037 debentures: May 1, 2037
Interest Payment Dates	Interest on the 2012 notes is payable semi-annually in arrears on January 2 and July 2 of each year, beginning on July 2, 2007. Interest on the 2017 notes and the 2037 debentures is payable semi-annually in arrears on May 1 and November 1 of each year, beginning on November 1, 2007. Interest began to accrue from April 9, 2007.
Guarantors	Our subsidiaries, TWE and TW NY Cable Holding Inc. (TW NY Holding and, together with TWE, the guarantors).
Guarantees	The debt securities are fully, irrevocably and unconditionally guaranteed by the guarantors.
Ranking	The debt securities are our unsecured senior obligations and rank equally with our other unsecured and unsubordinated obligations. The guarantees are unsecured senior obligations of the guarantors and rank equally with other unsecured and unsubordinated obligations of the guarantors. The debt securities and the guarantees effectively rank junior in right of payment to any obligations, including trade payables, of all of our other subsidiaries that do not guarantee the debt securities. Please read Description of the Debt Securities and the Guarantees Ranking and Description of the Debt Securities and the Guarantees Guarantees in this prospectus for a discussion of the structural subordination of the debt securities with respect to the assets of certain of our subsidiaries.

Optional Redemption	We may redeem some or all of the debt securities at any time or from time to time, at our option, at the redemption prices described in this prospectus. See Description of the Debt Securities and the Guarantees Optional Redemption.

Absence of Public Market for the Exchange Debt Securities	The exchange debt securities are new securities with no established market for them. We cannot assure you that a market for these exchange debt securities will develop or that this market will be liquid.
Form of the Exchange Debt Securities	The exchange debt securities will be represented by one or more permanent global securities in registered form deposited on behalf of The Depository Trust Company with The Bank of New York, as custodian. You will not receive exchange debt securities in certificated form unless one of the events described in the section of this prospectus entitled Book-Entry, Delivery and Form Exchange of Book-Entry Notes for Certificated Debt Securities occurs. Instead, beneficial interests in the exchange debt securities will be shown on, and transfers of these exchange debt securities will be effected only through, records maintained in book-entry form by The Depository Trust Company with respect to its participants.
No Listing	We do not intend to apply for the listing of the debt securities on any securities exchange or for the quotation of the debt securities in any dealer quotation system.
Governing Law	New York.
Risk Factors	Investing in the debt securities involves risk. You should carefully consider the risks, uncertainties and assumptions discussed under the section Risk Factors in this prospectus, together with all the other information contained in this prospectus.

Corporate Information

Although we and our predecessors have been in the cable business for over 30 years in various legal forms, Time Warner Cable Inc. was incorporated as a Delaware corporation in March 2003. Our principal executive offices are located at One Time Warner Center, North Tower, New York, New York 10019. Our telephone number is (212) 364-8200 and our corporate website is www.timewarnercable.com. Information included on or accessible through our website does not constitute a part of this prospectus.

Table of Contents

Summary Financial and Subscriber Data

Our summary financial and subscriber data are set forth on the following tables. The summary historical balance sheet data as of December 31, 2005 and 2006 and statement of operations data for each of the years ended December 31, 2004, 2005 and 2006 have been derived from our audited financial statements included elsewhere in this prospectus. The summary historical balance sheet data as of December 31, 2004 have been derived from our audited financial statements not included in this prospectus. The summary balance sheet data as of June 30, 2007 and the statement of operations data for the six months ended June 30, 2006 and 2007 have been derived from our unaudited consolidated financial statements contained elsewhere in this prospectus. The summary historical balance sheet data as of June 30, 2006 have been derived from our unaudited financial statements not included in this prospectus. In the opinion of management, the unaudited financial data reflect all adjustments, consisting of normal and recurring adjustments, necessary for a fair statement of our results of operations for those periods. Our results of operations for the six months ended June 30, 2007 are not necessarily indicative of the results that can be expected for the full year or for any future period.

The summary unaudited pro forma statement of operations data set forth below give effect to the Transactions, the dissolution of TKCCP, including TKCCP s distribution of the Kansas City Pool to us, and the other matters described under Unaudited Pro Forma Condensed Combined Financial Information, as if the Transactions and the dissolution of TKCCP occurred on January 1, 2006. The unaudited pro forma information does not purport to represent what our results of operations or financial position would have been if the Transactions, the dissolution of TKCCP and such other matters had occurred as of the dates indicated or what those results will be for future periods.

The subscriber data set forth below covers cable systems serving 13.4 million basic video subscribers as of June 30, 2007. Subscriber numbers for all periods presented have been recast to include the subscribers in the Kansas City Pool and to exclude the subscribers that were transferred to Comcast in connection with the Transactions.

The following information should be read in conjunction with Unaudited Pro Forma Condensed Combined Financial Information, Capitalization, Use of Proceeds, Management s Discussion and Analysis of Results of Operations and Financial Condition, our consolidated financial statements and related notes, Adelphia s consolidated financial statements and related notes and Comcast s special purpose combined carve-out financial statements of the former Comcast Los Angeles, Dallas and Cleveland cable system operations and related notes, each of which is included elsewhere in this prospectus.

(1) Our 2006 and 2007 financial and subscriber results include the impact of the Transactions for periods subsequent to the closing of the Transactions on July 31, 2006. Our 2007 financial results include the impact of the consolidation of the Kansas City Pool on January 1, 2007.

(2) Pro forma voice revenues include revenues of $71 million and $38 million for the year ended December 31, 2006 and the six months ended June 30, 2006, respectively, associated with subscribers acquired from Comcast who receive traditional, circuit-switched telephone service (approximately 106,000 and 136,000 subscribers at December 31, 2006 and June 30, 2006, respectively). Additionally, voice revenues for the year ended December 31, 2006 and the six months ended June 30, 2007 include approximately $27 million and $25 million, respectively, of revenues associated with approximately 106,000 subscribers and 74,000 subscribers as of December 31, 2006 and June 30, 2007, respectively, receiving traditional, circuit-switched telephone service. We continue to provide traditional, circuit-switched services to some of those subscribers and, in some areas, have begun the process of discontinuing the circuit-switched offering in accordance with regulatory requirements. In those areas where the circuit-switched offering is discontinued, Digital Phone will be the only voice service we provide.

(3) Operating Income before Depreciation and Amortization (OIBDA) is a financial measure not calculated and presented in accordance with U.S. generally accepted accounting principles (GAAP). We define OIBDA as Operating Income before depreciation of tangible assets and amortization of intangible assets. Management utilizes OIBDA, among other measures, in evaluating the performance of our business because OIBDA eliminates the uneven effect across our business of considerable amounts of depreciation of tangible assets and amortization of intangible assets recognized in business combinations. Additionally, management utilizes OIBDA because it believes this measure provides valuable insight into the underlying performance of our individual cable systems by removing the effects of items that are not within the control of local personnel charged with managing these systems such as income tax provision, other income (expense), net, minority interest expense, net, income from equity investments, net, and interest expense, net. In this regard, OIBDA is a significant measure used in our annual incentive compensation programs. OIBDA also is a metric used by our parent, Time Warner, to evaluate our performance and is an important measure in the Time Warner reportable segment disclosures. Management also uses OIBDA because it believes it provides an indication of our ability to service debt and fund capital expenditures, as OIBDA removes the impact of depreciation and amortization. A limitation of this measure, however, is that it does not reflect the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in our business. To compensate for this limitation, management evaluates the investments in such tangible and intangible assets through other financial measures, such as capital expenditure budget variances, investment spending levels and return on capital analyses. Another limitation of this measure is that it does not reflect the significant costs borne by us for income taxes, debt servicing costs, the share of OIBDA related to the minority ownership, the results of our equity investments or other non-operational income or expense. Management compensates for this limitation through other financial measures such as a review of net income and earnings per share. Additionally, OIBDA should be considered in addition to, and not as a substitute for, Operating Income, net income and other measures of financial performance reported in accordance with GAAP and may not be comparable to similarly titled measures used by other companies.

The following is a reconciliation of Net income and Operating Income to OIBDA:

	Year Ended December 31,			Six Months Ended June 30,	
	2004	2005	2006	2006	2007
			(in millions)		
Net income	$ 726	$ 1,253	$ 1,976	$ 530	$ 548
Reconciling items:					
Discontinued operations, net of tax	(95)	(104)	(1,038)	(64)	
Cumulative effect of accounting change, net of tax			(2)	(2)	
Income tax provision	454	153	620	307	359

Interest expense, net	465	464	646	225	454
Operating Income	1,554	1,786	2,179	996	1,290
Depreciation	1,329	1,465	1,883	768	1,318
Amortization	72	72	167	37	143
OIBDA	$ 2,955	$ 3,323	$ 4,229	$ 1,801	$ 2,751

The following is a reconciliation of pro forma Income before discontinued operations and cumulative effect of accounting change and pro forma Operating Income to pro forma OIBDA:

	Pro Forma Year Ended December 31, 2006	Pro Forma Six Months Ended June 30, 2006
	(in millions)	
Income before discontinued operations and cumulative effect of accounting change	$ 861	$ 411
Reconciling items:		
Income tax provision	579	280
Other expense, net	4	4
Minority interest expense, net	122	51
Interest expense, net	909	451
Operating Income	2,475	1,197

Depreciation		2,360		1,144
Amortization		317		157
OIBDA	$	5,152	$	2,498

(4) Total debt and preferred equity includes debt due within one year of $2 million at June 30, 2007 (none at June 30, 2006) and $4 million and $1 million at December 31, 2006 and December 31, 2004, respectively (none at December 31, 2005), long-term debt, mandatorily redeemable preferred membership units issued by a subsidiary and mandatorily redeemable preferred equity issued by a subsidiary.

(5) Free Cash Flow is a non-GAAP financial measure. We define Free Cash Flow as cash provided by operating activities (as defined under GAAP) plus excess tax benefits from the exercise of stock options, less cash provided by (used by) discontinued operations, capital expenditures, partnership distributions and principal payments on capital leases. Management uses Free Cash Flow to evaluate our business. It is also a significant component of our annual incentive compensation programs. We believe this measure is an important indicator of our liquidity, including our ability to reduce net debt (defined as total debt less cash and equivalents) and make strategic investments, because it reflects our operating cash flow after considering the significant capital expenditures required to operate our business. A limitation of this measure, however, is that it does not reflect payments made in connection with investments and acquisitions, which reduce liquidity. To compensate for this limitation, management evaluates such expenditures through other financial measures such as return on investment analyses. Free Cash Flow should not be considered as an alternative to net cash provided by operating activities as a measure of liquidity, and may not be comparable to similarly titled measures used by other companies.

The following is a reconciliation of Cash provided by operating activities to Free Cash Flow:

	Year Ended December 31,			Six Months Ended June 30,	
	2004	2005	2006	2006	2007
			(in millions)		
Cash provided by operating activities	$ 2,661	$ 2,540	$ 3,595	$ 1,541	$ 2,204
Reconciling items:					
Discontinued operations, net of tax	(95)	(104)	(1,038)	(64)	
Adjustments relating to the operating cash flow of discontinued operations	(145)	(133)	926	(55)	(46)
Cash provided by continuing operating activities	2,421	2,303	3,483	1,422	2,158
Add: Excess tax benefit from exercise of stock options			4		5
Less:					
Capital expenditures from continuing operations	(1,559)	(1,837)	(2,718)	(1,018)	(1,551)
Partnership tax distributions, stock option distributions and principal payments on capital leases of continuing operations	(11)	(31)	(34)	(16)	(21)
Free Cash Flow	$ 851	$ 435	$ 735	$ 388	$ 591

(6) As a result of the closing of the Transactions, we acquired systems with approximately 4.0 million basic video subscribers and disposed of systems with approximately 0.8 million basic video subscribers that were transferred to Comcast in connection with the Redemptions and the Exchange for a net gain of approximately 3.2 million basic video subscribers.

(7) Customer relationships represent the number of subscribers that receive at least one level of service, including circuit-switched telephone service, encompassing video, high-speed data and voice services, without regard to the service(s) purchased. For example, a subscriber who purchases only high-speed data service and no video service will count as one customer relationship, and a subscriber who purchases both video and high-speed data services will also count as only one customer relationship.

(8) Revenue generating units represent the total of all basic video, digital video, high-speed data, Digital Phone and circuit-switched telephone service customers. Therefore, a subscriber who purchases basic video, digital video, high-speed data and Digital Phone services will count as four revenue generating units.

(9) Homes passed represent the estimated number of service-ready single residence homes, apartment and condominium units and commercial establishments passed by our cable systems without further extending our transmission lines.

(10) Basic video subscriber numbers reflect billable subscribers who receive basic video service.

(11) Basic video penetration represents basic video subscribers as a percentage of homes passed.

(12) Digital video subscriber numbers reflect billable subscribers who receive any level of video service via digital technology.

(13) Digital video penetration represents digital video subscribers as a percentage of basic video subscribers.

(14) High-speed data service-ready homes passed represent the estimated number of high-speed data service-ready single residence homes, apartment and condominium units and commercial establishments passed by our cable systems without further extending our transmission lines.

(15) High-speed data subscriber numbers reflect billable subscribers who receive Road Runner high-speed data service or any of the other high-speed data services offered by us.

(16) Residential high-speed data penetration represents residential high-speed data subscribers as a percentage of high-speed data service-ready homes passed.

(17) Voice service-ready homes passed represent the estimated number of voice service-ready single residence homes, apartment and condominium units and commercial establishments passed by our cable systems without further extending our transmission lines.

(18) Voice subscriber numbers reflect billable subscribers who receive IP-based telephony service and exclude subscribers acquired from Comcast who receive traditional, circuit-switched telephone service (approximately 106,000 and 74,000 subscribers at December 31, 2006 and June 30, 2007, respectively).

(19) Voice penetration represents voice subscribers as a percentage of voice service-ready homes passed.

Table of Contents

RISK FACTORS

You should carefully consider the risks described below and the other information in this prospectus before deciding to invest in these debt securities. If any of the following risks or uncertainties actually occur, our business, financial condition and operating results would likely suffer. Certain statements in Risk Factors are forward-looking statements. See Forward-Looking Statements.

Risks Related to Competition

We face a wide range of competition, which could affect our future results of operations.

Our industry is and will continue to be highly competitive. Some of our principal competitors in particular, direct broadcast satellite operators and incumbent local telephone companies either offer or are making significant capital investments that will allow them to offer services that provide directly comparable features and functions to those we offer, and they are aggressively seeking to offer them in bundles similar to ours.

Incumbent local telephone companies have recently increased their efforts to provide video services. The two major incumbent local telephone companies AT&T Inc. (AT&T) and Verizon Communications Inc. (Verizon) have both announced that they intend to make fiber upgrades of their networks, although each is using a different architecture. AT&T is expected to utilize one of a number of fiber architectures, including fiber-to-the-node (FTTN), and Verizon utilizes a fiber architecture known as fiber-to-the-home (FTTH). Some upgraded portions of these networks are or will be capable of carrying video services that are technically comparable to ours, high-speed data services that operate at speeds as high or higher than those we make available to customers in these areas and digital voice services that are similar to ours. In addition, these companies continue to offer their traditional phone services as well as bundles that include wireless voice services provided by them or affiliated companies. In areas where they have launched video services, these parties are aggressively marketing video, voice and data bundles.

Our video business faces intense competition from direct broadcast satellite providers. These providers compete with us based on aggressive promotional pricing and exclusive programming (e.g., NFL Sunday Ticket, which is not available to cable operators). Direct broadcast satellite services are comparable in many respects to our analog and digital video services, including our digital video recorder (DVR) service. In addition, the two largest direct broadcast satellite providers are launching DVR services intended to provide a VOD-like user experience, and they offer some interactive programming features. These providers are working to increase the number of HDTV channels they offer in order to differentiate their service from services offered by cable operators.

In some areas, incumbent local telephone companies and direct broadcast satellite operators have entered into co-marketing arrangements that allow both parties to offer synthetic bundles (i.e., video services provided principally by the direct broadcast satellite operator, and digital subscriber line (DSL) and traditional phone service offered by the telephone companies). From a consumer standpoint, the synthetic bundles appear similar to our bundles and result in a single bill. AT&T is offering a service in some areas that utilizes direct broadcast satellite video but in an integrated package with AT&T s DSL product, which enables an Internet-based return path that allows the user to order a video-on-demand-like product and other services that we provide using our two-way network.

We operate our cable systems under non-exclusive franchises granted by state or local authorities. The existence of more than one cable system operating in the same territory is referred to as an overbuild. In some of our operating areas, other operators have overbuilt our systems and offer video, data and/or voice services in competition with us.

In addition to these competitors, we face competition on individual services from a range of competitors. For instance, our video service faces competition from providers of paid television services (such as satellite master antenna services) and from video delivered over the Internet. Our high-speed data service faces competition from, among others, incumbent local telephone companies utilizing their newly-upgraded fiber networks and/or DSL lines, Wi-Fi, Wi-Max and 3G wireless broadband services provided by mobile carriers

14

such as Verizon Wireless, broadband over power line providers, municipal Wi-Fi services and from providers of traditional dial-up Internet access. Our voice service faces competition for voice customers from incumbent local telephone companies, cellular telephone service providers, Internet phone providers, such as Vonage, and others.

Any inability to compete effectively or an increase in competition with respect to video, voice or high-speed data services could have an adverse effect on our financial results and return on capital expenditures due to possible increases in the cost of gaining and retaining subscribers and lower per subscriber revenue, could slow or cause a decline in our growth rates, reduce our revenues, reduce the number of our subscribers or reduce our ability to increase penetration rates for services. As we expand and introduce new and enhanced products and services, we may be subject to competition from other providers of those products and services, such as telecommunications providers, Internet service providers (ISP) and consumer electronics companies, among others. We cannot predict the extent to which this competition will affect our future financial results or return on capital expenditures.

Future advances in technology, as well as changes in the marketplace and in the regulatory and legislative environments, may result in changes to the competitive landscape. For additional information regarding the regulatory and legal environment, see Risks Related to Government Regulation and Business Regulatory Matters.

We operate our cable systems under franchises that are non-exclusive. State and local franchising authorities can grant additional franchises and foster additional competition.

Our cable systems are constructed and operated under non-exclusive franchises granted by state or local governmental authorities. Federal law prohibits franchising authorities from unreasonably denying requests for additional franchises. Consequently, competing operators may build systems in areas in which we hold franchises. In the past, competing operators most of them relatively small have obtained such franchises and offered competing services in some areas in which we hold franchises. More recently, incumbent local telephone companies with significant resources, particularly Verizon and AT&T, have obtained or have sought to obtain such franchises in connection with or in preparation for offering of video, high-speed data and digital voice services in some of our service areas. See We face a wide range of competition, which could affect our future results of operations above. The existence of more than one cable system operating in the same territory is referred to as an overbuild.

We face competition from incumbent local telephone companies and other overbuilders in many of the areas we serve, including within each of our five major geographic operating areas. In New York City, we face competition from Verizon and another overbuilder, RCN Corporation (RCN). In upstate New York, overbuild activity is focused primarily in the Binghamton and Rochester areas, where competitors include Delhi Telephone in Binghamton and Empire Video Corporation and Frontier in Rochester. In the Carolinas, a number of local telephone companies, including Horry Telephone Cooperative, Southern Coastal Cable and Knology, are offering competing services, principally in South Carolina. Our Ohio operations face competition from local telephone companies such as Cincinnati Bell, New Knoxville Telephone Company, Wide Open West, Telephone Service Company and Columbus Grove Telephone Company. Recently, AT&T was granted franchises in the Cleveland, Columbus and Milwaukee areas. There is also local telephone company and other overbuild competition in our Texas region in the areas of Dallas, San Antonio, Waco, Austin and other areas in south and west Texas that we serve. Competing providers include FISION, Grande Communications, Wide Open West, and Western Integrated Networks. AT&T and Verizon have also been granted state-issued franchises in Texas. In southern California, we face competition from RCN, AT&T and Verizon. Verizon also has a statewide franchise in California.

Additional overbuild situations may occur in these and our other operating areas. In particular, Verizon and AT&T have both indicated that they will continue to upgrade their networks to enable the delivery of video and high-speed data services, in addition to their existing telephone services. In addition, companies that traditionally have not provided cable services and that have substantial financial resources may also decide to obtain franchises and seek to

provide competing services.

Table of Contents

Increased competition from any source, including overbuilders, could require us to charge lower prices for existing or future services than we otherwise might or require us to invest in or otherwise obtain additional services more quickly or at higher costs than we otherwise might. These actions, or the failure to take steps to allow us to compete effectively, could adversely affect our growth, financial condition and results of operations.

We face risks relating to competition for the leisure and entertainment time of audiences, which has intensified in part due to advances in technology.

In addition to the various competitive factors discussed above, our business is subject to risks relating to increasing competition for the leisure and entertainment time of consumers. Our business competes with all other sources of entertainment and information delivery, including broadcast television, movies, live events, radio broadcasts, home video products, console games, print media and the Internet. Technological advancements, such as VOD, new video formats, and Internet streaming and downloading, many of which have been beneficial to our business, have nonetheless increased the number of entertainment and information delivery choices available to consumers and intensified the challenges posed by audience fragmentation. The increasing number of choices available to audiences could negatively impact not only consumer demand for our products and services, but also advertisers willingness to purchase advertising from us. If we do not respond appropriately to further increases in the leisure and entertainment choices available to consumers, our competitive position could deteriorate, and our financial results could suffer.

Our competitive position could suffer if we are unable to develop a compelling wireless offering.

We offer high-quality information, entertainment and communication services over sophisticated broadband cable networks. We believe these networks currently provide the most efficient means to provide such services to consumers homes. However, consumers are increasingly interested in accessing information, entertainment and communication services outside the home as well.

We are exploring various means by which we can offer our customers mobile services but there can be no assurance that we will be successful in doing so or that any such services we offer will appeal to consumers. In November 2005, we and several other cable operators, together with Sprint Nextel Corporation (Sprint), announced the formation of a joint venture that would develop integrated cable and wireless products that the venture s owners could offer to customers bundled with cable services. In 2006, we began offering under the Pivot brand name a service bundle that includes Sprint wireless voice service in limited operating areas and will continue to roll this product out in 2007. There can be no assurance that these offerings will be accepted by consumers or, even if accepted, that the offerings will be profitable. A separate joint venture formed by the same cable operators was the winning bidder of 137 licenses in the Federal Communications Commission (FCC) Auction 66 for Advanced Wireless Spectrum. The FCC awarded these licenses to the venture on November 29, 2006. There can be no assurance that the venture will successfully develop mobile voice and related wireless services or otherwise benefit from the acquired spectrum.

Until recently, our telephone competitors have only been able to include mobile services in their offerings through co-marketing relationships with affiliated wireless providers, which we do not believe have proven particularly compelling to consumers. However, we anticipate that, in the future, our competitors will either gain greater ownership of, or enter into more effective marketing arrangements with, these wireless providers. For instance, AT&T has acquired 100% ownership of Cingular Wireless, LLC, a wireless provider of which it previously owned only 60%. In addition, if our competitors begin to expand their service bundles to include compelling mobile features before we have developed and rolled out an equivalent or more compelling offering, we may not be in a position to provide a competitive product offering and our business and financial results could suffer.

If we pursue wireless strategies intended to provide us with a competitive response to offerings such as those described above, there can be no assurance that such strategies will succeed. For instance, we could, in pursuing such

a strategy, select technologies, products and services that fail to appeal to consumers. In addition, we could incur significant costs in gaining access to, developing and marketing, such services. If we

Table of Contents

incurred such costs, and the resulting products and services were not competitive with other parties products or appealing to our customers, our business and financial results could suffer.

Additional Risks of our Operations

Our business is characterized by rapid technological change, and if we do not respond appropriately to technological changes, our competitive position may be harmed.

We operate in a highly competitive, consumer-driven and rapidly changing environment and are, to a large extent, dependent on our ability to acquire, develop, adopt and exploit new and existing technologies to distinguish our services from those of our competitors. This may take long periods of time and require significant capital investments. In addition, we may be required to anticipate far in advance which technologies and equipment we should adopt for new products and services or for future enhancements of or upgrades to our existing products and services. If we choose technologies or equipment that are less effective, cost-efficient or attractive to our customers than those chosen by our competitors, or if we offer products or services that fail to appeal to consumers, are not available at competitive prices or that do not function as expected, our competitive position could deteriorate, and our business and financial results could suffer.

Our competitive position also may be adversely affected by various timing factors, such as the ability of our competitors to acquire or develop and introduce new technologies, products and services more quickly than we do. Furthermore, advances in technology, decreases in the cost of existing technologies or changes in competitors product and service offerings also may require us in the future to make additional research and development expenditures or to offer at no additional charge or at a lower price certain products and services we currently offer to customers separately or at a premium. In addition, the uncertainty of the costs for obtaining intellectual property rights from third parties could impact our ability to respond to technological advances in a timely manner.

The combination of increased competition, more technologically advanced platforms, products and services, the increasing number of choices available to consumers and the overall rate of change in media and entertainment industries requires companies such as us to become more responsive to consumer needs and to adapt more quickly to market conditions than has been necessary in the past. We could have difficulty managing these changes while at the same time maintaining our rates of growth and profitability.

We face certain challenges relating to the integration of the systems acquired in the Transactions into our existing systems and we may not realize the anticipated benefits of the Transactions.

The Transactions have combined cable systems that were previously owned and operated by three different companies. The successful integration of the Acquired Systems will depend primarily on our ability to manage the combined operations and integrate into our operations the Acquired Systems (including management information, marketing, purchasing, accounting and finance, sales, billing, customer support and product distribution infrastructure, personnel, payroll and benefits, regulatory compliance and technology systems). The integration of these systems, including the upgrade of certain portions of the Acquired Systems, requires significant capital expenditures and may require us to use financial resources we would otherwise devote to other business initiatives, including marketing, customer care, the development of new products and services and the expansion of our existing cable systems. While we have planned for certain capital expenditures for, among other things, improvements to plant and technical performance and upgrading system capacity of the Acquired Systems, we may be required to spend more than anticipated for those purposes. Furthermore, these integration efforts may require more attention from our management and impose greater strains on our technical resources than anticipated. If we fail to successfully integrate the Acquired Systems, it could limit our ability to introduce our advanced services, which we believe is critical to improving the performance of certain of the Acquired Systems, and could have a material adverse effect on our

business and financial results.

Additionally, to the extent we encounter significant difficulties in integrating systems or other operations, our customer care efforts may be hampered. For instance, we may experience higher-than-normal call volumes under such circumstances, which might interfere with our ability to take orders, assist customers not impacted

by the integration difficulties, and conduct other ordinary course activities. In addition, depending on the scope of the difficulties, we may be the subject of negative press reports or customer perception.

We have transitional services arrangements with Comcast under which Comcast has agreed to assist us by providing certain services to applicable Acquired Systems as we integrate those systems into our existing systems. Any failure by Comcast to perform under our agreements may cause the integration of the applicable Acquired Systems to be delayed and may increase the amount of time and money we need to devote to the integration of the applicable Acquired Systems.

We expect that we will realize cost savings and other financial and operating benefits as a result of the Transactions. However, due to the complexity of and risks relating to the integration of these systems, among other factors, we cannot predict with certainty when these cost savings and benefits will occur or the extent to which they actually will be achieved, if at all.

We face risks inherent to our voice services business.

We may encounter unforeseen difficulties as we introduce our voice services in new operating areas, including the Acquired Systems, and/or increase the scale of our voice service offerings in areas in which they have already been launched. First, we face heightened customer expectations for the reliability of voice services as compared with our video and high-speed data services. We have undertaken significant training of customer service representatives and technicians, and we will continue to need a highly trained workforce. To ensure reliable service, we may need to increase our expenditures, including spending on technology, equipment and personnel. If the service is not sufficiently reliable or we otherwise fail to meet customer expectations, our voice services business could be adversely affected. Second, the competitive landscape for voice services is intense; we face competition from providers of Internet phone services, as well as incumbent local telephone companies, cellular telephone service providers and others. See Risks Related to Competition We face a wide range of competition, which could affect our future results of operations. Third, our voice services depend on interconnection and related services provided by certain third parties. As a result, our ability to implement changes as the service grows may be limited. Finally, we expect advances in communications technology, as well as changes in the marketplace and the regulatory and legislative environment. Consequently, we are unable to predict the effect that ongoing or future developments in these areas might have on our voice services business and operations.

In addition, our launch of voice services in the Acquired Systems may pose certain risks. We will be unable to provide our voice services in some of the Acquired Systems without first upgrading the facilities. Additionally, we may need to obtain certain services from third parties prior to deploying voice services in the Acquired Systems. If we encounter difficulties or significant delays in launching voice services in the Acquired Systems, our business and financial results may be adversely affected.

Significant increases in the use of bandwidth-intensive Internet-based services could increase our costs.

The rising popularity of bandwidth-intensive Internet-based services poses special risks for our high-speed data business. Examples of such services include peer-to-peer file sharing services, gaming services, the delivery of video via streaming technology and by download, as well as Internet phone services. If heavy usage of bandwidth-intensive services grows beyond our current expectations, we may need to invest more capital than currently anticipated to expand the bandwidth capacity of our systems or our customers may have a suboptimal experience when using our high-speed data service. In addition, in order to continue to provide quality service at attractive prices, we need the continued flexibility to develop and refine business models that respond to changing consumer uses and demands, to manage bandwidth usage efficiently and to make upgrades to our broadband facilities. Our ability to do these things could be restricted by legislative efforts to impose so-called net neutrality requirements on cable operators. See Risks

Related to Government Regulation Our business is subject to extensive governmental regulation, which could adversely affect our business.

Our ability to attract new basic video subscribers is dependent in part on growth in new housing in our service areas.

Providing basic video services is an established and highly penetrated business. As a result, our ability to achieve incremental growth in basic video subscribers is dependent in part on growth in new housing in our service areas, which is influenced by various factors outside of our control, including both national and local economic conditions. If growth in new housing falls or if there are population declines in our operating areas, opportunities to gain new basic subscribers will decrease, which may have a material adverse effect on our growth, business and financial results or financial condition.

We rely on network and information systems and other technology, and a disruption or failure of such networks, systems or technology as a result of computer viruses, misappropriation of data or other malfeasance, as well as outages, natural disasters, accidental releases of information or similar events, may disrupt our business.

Because network and information systems and other technologies are critical to our operating activities, network or information system shutdowns caused by events such as computer hacking, dissemination of computer viruses, worms and other destructive or disruptive software, denial of service attacks and other malicious activity, as well as power outages, natural disasters, terrorist attacks and similar events, pose increasing risks. Such an event could have an adverse impact on us and our customers, including degradation of service, service disruption, excessive call volume to call centers and damage to equipment and data. Such an event also could result in large expenditures necessary to repair or replace such networks or information systems or to protect them from similar events in the future. Significant incidents could result in a disruption of our operations, customer dissatisfaction, or a loss of customers and revenues.

Furthermore, our operating activities could be subject to risks caused by misappropriation, misuse, leakage, falsification and accidental release or loss of information maintained in our information technology systems and networks, including customer, personnel and vendor data. We could be exposed to significant costs if such risks were to materialize, and such events could damage our reputation and credibility. We also could be required to expend significant capital and other resources to remedy any such security breach. As a result of the increasing awareness concerning the importance of safeguarding personal information, the potential misuse of such information and legislation that has been adopted or is being considered regarding the protection and security of personal information, information-related risks are increasing, particularly for businesses like ours that handle a large amount of personal customer data.

If we are unable to retain senior executives and attract and retain other qualified employees, our growth might be hindered, which could impede our ability to run our business and potentially reduce our revenues and profitability.

Our success depends in part on our ability to attract, hire, train and retain qualified managerial, sales, customer service and marketing personnel. We face significant competition for these types of personnel. We may be unsuccessful in attracting and retaining the required personnel to conduct and expand our operations successfully and, in such an event, our revenues and profitability could decline. Our success also depends to a significant extent on the continued service of our senior management team, including Messrs. Britt and Hobbs, with whom we have employment agreements. The loss of any member of our senior management team or other qualified employees could impair our ability to execute our business plan and growth strategy, cause us to lose subscribers and reduce our net sales, or lead to employee morale problems and/or the loss of key employees. In addition, key personnel may leave us and compete against us.

Our business may be adversely affected if we cannot continue to license or enforce the intellectual property rights on which our business depends.

We rely on patent, copyright, trademark and trade secret laws and licenses and other agreements with our employees, customers, suppliers, and other parties, to establish and maintain our intellectual property rights in technology and the products and services used in our operations. However, any of our intellectual property

rights could be challenged or invalidated, or such intellectual property rights may not be sufficient to permit us to take advantage of current industry trends or otherwise to provide competitive advantages, which could result in costly redesign efforts, discontinuance of certain product or service offerings or other competitive harm. Additionally, from time to time we receive notices from others claiming that we infringe their intellectual property rights, and the number of these claims could increase in the future. Claims of intellectual property infringement could require us to enter into royalty or licensing agreements on unfavorable terms, incur substantial monetary liability or be enjoined preliminarily or permanently from further use of the intellectual property in question, which could require us to change our business practices and limit our ability to compete effectively. Even if we believe that the claims are without merit, the claims can be time-consuming and costly to defend and divert management s attention and resources away from our businesses. Also, because of the rapid pace of technological change, we rely on technologies developed or licensed by third parties, and we may not be able to obtain or continue to obtain licenses from these third parties on reasonable terms, if at all. See also Risks Related to our Relationship with Time Warner We are party to agreements with Time Warner governing the use of our brand names, including the Time Warner Cable brand name, that may be terminated by Time Warner if we fail to perform our obligations under those agreements or if we undergo a change of control.

The accounting treatment of goodwill and other identified intangibles could result in future asset impairments, which would be recorded as operating losses.

Financial Accounting Standards Board (FASB) Statement No. 142, *Goodwill and Other Intangible Assets* (FAS 142) requires that goodwill, including the goodwill included in the carrying value of investments accounted for using the equity method of accounting, and other intangible assets deemed to have indefinite useful lives, such as franchise agreements, cease to be amortized. FAS 142 requires that goodwill and certain intangible assets be tested at least annually for impairment. If we find that the carrying value of goodwill or a certain intangible asset exceeds its fair value, it will reduce the carrying value of the goodwill or intangible asset to the fair value, and we will recognize an impairment loss. Any such impairment losses are required to be recorded as noncash operating losses.

Our 2006 annual impairment analysis, which was performed during the fourth quarter, did not result in an impairment charge. For one reporting unit, the 2006 estimated fair value was within 10% of the respective book value. Applying a hypothetical 10% decrease to the fair value of this reporting unit would result in a greater book value than fair value for cable franchises in the amount of approximately $20 million. Other intangible assets not subject to amortization are tested for impairment annually, or more frequently if events or circumstances indicate that the asset might be impaired. See Management s Discussion and Analysis of Results of Operations and Financial Condition Critical Accounting Policies Asset Impairments Goodwill and Indefinite-lived Intangible Assets and Finite-lived Intangible Assets.

The impairment tests require us to make an estimate of the fair value of intangible assets, which is primarily determined using discounted cash flow methodologies, research analyst estimates, market comparisons and a review of recent transactions. Since a number of factors may influence determinations of fair value of intangible assets, including those set forth in this discussion of Risk Factors, we are unable to predict whether impairments of goodwill or other indefinite-lived intangibles will occur in the future. Any such impairment would result in us recognizing a corresponding operating loss.

The IRS and state and local tax authorities may challenge the tax characterizations of the Adelphia acquisition, the Redemptions and the Exchange, or our related valuations, and any successful challenge by the IRS or state or local tax authorities could materially adversely affect our tax profile, significantly increase our future cash tax payments and significantly reduce our future earnings and cash flow.

The Adelphia acquisition was designed to be a fully taxable asset sale, the TWC Redemption was designed to qualify as a tax-free split-off under section 355 of the Internal Revenue Code of 1986, as amended (the Tax Code), the TWE

Redemption was designed as a redemption of Comcast s partnership interest in TWE, and the Exchange was designed as an exchange of designated cable systems. There can be no assurance, however, that the Internal Revenue Service (the IRS) or state or local tax authorities (collectively with the

Table of Contents

IRS, the Tax Authorities) will not challenge one or more of such characterizations or our related valuations. Such a successful challenge by the Tax Authorities could materially adversely affect our tax profile (including our ability to recognize the intended tax benefits from the Transactions), significantly increase our future cash tax payments and significantly reduce our future earnings and cash flow. The tax consequences of the Adelphia acquisition, the Redemptions and the Exchange are complex and, in many cases, subject to significant uncertainties, including, but not limited to, uncertainties regarding the application of federal, state and local income tax laws to various transactions and events contemplated therein and regarding matters relating to valuation.

As a result of the indebtedness incurred in connection with the Transactions, we will be required to use an increased amount of the cash provided by our operating activities to service our debt obligations, which could limit our flexibility to grow our business and take advantage of new business opportunities.

As a result of our funding needs for the Transactions, our obligations to make principal and interest payments related to our indebtedness have increased. Our increased amount of indebtedness and debt servicing obligations will require us to dedicate a larger amount of our cash flow from operations to making payments on our indebtedness than we have in the past. This reduces the availability of our cash flow to fund working capital and capital expenditures and for other general corporate purposes, may increase our vulnerability to general adverse economic and industry conditions, may limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate, may limit our ability to make strategic acquisitions or pursue other business opportunities and may limit our ability to borrow additional funds and may increase the cost of any such borrowings.

Risks Related to Dependence on Third Parties

Increases in programming costs could adversely affect our operations, business or financial results.

Video programming costs represent a major component of our expenses and are expected to continue to increase, reflecting contractual rate increases, subscriber growth and the expansion of service offerings, and it is expected that our video service margins will decline over the next few years as programming cost increases outpace growth in video revenues.

In addition, increased demands by owners of some broadcast stations for carriage of other services or payments to those broadcasters for retransmission consent could further increase our programming costs. Federal law allows commercial television broadcast stations to make an election between must-carry rights and an alternative retransmission-consent regime. When a station opts for the latter, cable operators are not allowed to carry the station s signal without the station s permission. We currently have multi-year agreements with most of the retransmission consent stations that we carry. In some cases, we carry stations under short-term arrangements while we attempt to negotiate new long-term retransmission agreements. If negotiations with these programmers prove unsuccessful, they could require us to cease carrying their signals, possibly for an indefinite period. Any loss of stations could make our video service less attractive to subscribers, which could result in less subscription and advertising revenue. In retransmission-consent negotiations, broadcasters often condition consent with respect to one station on carriage of one or more other stations or programming services in which they or their affiliates have an interest. Carriage of these other services may increase our programming expenses and diminish the amount of capacity we have available to introduce new services, which could have an adverse effect on our business and financial results.

Current and future programming providers that provide content that is desirable to our subscribers may enter into exclusive affiliation agreements with our cable and non-cable competitors and may be unwilling to enter into affiliation agreements with us on acceptable terms, if at all.

We may not be able to obtain necessary hardware, software and operational support.

We depend on third party suppliers and licensors to supply some of the hardware, software and operational support necessary to provide some of our services. We obtain these items from a limited number of vendors, some of which do not have a long operating history. Some of our hardware, software and

Table of Contents

operational support vendors represent our sole source of supply or have, either through contract or as a result of intellectual property rights, a position of some exclusivity. If demand exceeds these vendors capacity or if these vendors experience operating or financial difficulties, our ability to provide some services might be materially adversely affected, or the need to procure or develop alternative sources of the affected materials might delay the provision of services. These events could materially and adversely affect our ability to retain and attract subscribers, and have a material negative impact on our operations, business, financial results and financial condition.

A limited number of vendors of key technologies can lead to less product innovation and higher costs. For these reasons, we generally endeavor to establish alternative vendors for materials we consider critical, but may not be able to establish these relationships or be able to obtain required materials on favorable terms. For example, each of our systems currently purchase set-top boxes from a limited number of vendors. This is due to the fact that each of our cable systems use one of two proprietary conditional access security schemes, which allows us to regulate subscriber access to some services, such as premium channels. We believe that the proprietary nature of these conditional access schemes makes other manufacturers reluctant to produce set-top boxes. Future innovation in set-top boxes may be restricted until these issues are resolved. In addition, we believe that the general lack of compatibility among set-top box operating systems has slowed the industry s development and deployment of digital set-top box applications. We have developed a user interface and interactive programming guide, designed to operate across different manufacturers set-top boxes and other devices, that we expect to introduce during 2007. No assurance can be given that our user interface and guide will operate correctly, will be popular with consumers or will be compatible with other products and services that our customers value.

In addition, we have agreements with Verizon and Sprint under which these companies assist us in providing Digital Phone service to customers by routing voice traffic to the public switched network, delivering enhanced 911 service and assisting in local number portability and long distance traffic carriage. In July 2006, we agreed to expand our multi-year relationship with Sprint, selecting Sprint as our primary provider of these services, including in the Acquired Systems. Our transition to and reliance on a single provider for the bulk of these services may render us vulnerable to service disruptions and other operational difficulties, which could have an adverse effect on our business and financial results.

We may encounter substantially increased pole attachment costs.

Under federal law, we have the right to attach cables carrying video services to telephone and similar poles of investor-owned utilities at regulated rates. However, because these cables carry services other than video services, such as high-speed data services or new forms of voice services, some utility pole owners have sought to impose additional fees for pole attachment. The U.S. Supreme Court has rejected the efforts of some utility pole owners to make cable attachments carrying Internet traffic ineligible for regulatory protection. Pole owners have, however, made arguments in other areas of pole regulation that, if successful, could significantly increase our costs. In addition, our pole attachment rates may increase insofar as our systems are providing voice services.

Some of the poles we use are exempt from federal regulation because they are owned by utility cooperatives and municipal entities. These entities may not renew our existing agreements when they expire, and they may require us to pay substantially increased fees. A number of these entities are currently seeking to impose substantial rate increases. Any inability to secure continued pole attachment agreements with these cooperatives or municipal utilities on commercially reasonable terms could cause our business, financial results or financial condition to suffer.

The adoption of, or the failure to adopt, certain consumer electronics devices or computers may negatively impact our offerings of new and enhanced services.

Customer acceptance and use of new and enhanced services depend, to some extent, on customers having ready access and exposure to these services. One of the ways this access is facilitated is through the user interface included in our digital set-top boxes. The consumer electronics industry s provision of cable ready and digital cable ready televisions and other devices, as well as the IT industry s provision of computing

Table of Contents

devices capable of tuning, storing and displaying cable video signals, means customers owning these devices may use a different user interface from the one we provide and/or may not be able to access services requiring two-way transmission capabilities unless they also have a set-top box. Accordingly, customers using these devices without set-top boxes may have limited exposure and access to our advanced video services, including our interactive program guide and VOD and subscription-video-on-demand (SVOD). If such devices attain wide consumer acceptance, our revenue from equipment rental and two-way transmission-based services could decrease, and there could be a negative impact on our ability to sell advanced services to customers. We cannot predict the extent to which different interfaces will affect our future business and operations. See Business Regulatory Matters Communications Act and FCC Regulation.

We and other cable operators are involved in various efforts to ensure that consumer electronics and IT industry devices are capable of utilizing our two-way services, including: direct arrangements with a handful of consumer electronics companies that will lead to the deployment of a limited number of two-way capable televisions and other devices; continuing efforts (unsuccessful to date) to negotiate two-way interoperability standards with the broad consumer electronics industry; the development of an open software architecture layer that such devices could use to accept two-way applications; and an effort to develop a downloadable security system for consumer electronics devices. No assurances can be given that these or other efforts will be successful or that, if successful, consumers will widely adopt devices utilizing these technologies.

Risks Related to Government Regulation

Our business is subject to extensive governmental regulation, which could adversely affect our business.

Our video and voice services are subject to extensive regulation at the federal, state, and local levels. In addition, the federal government also has been exploring possible regulation of high-speed data services. Additional regulation, including regulation relating to rates, equipment, technologies, programming, levels and types of services, taxes and other charges, could have an adverse impact on our services. Among the regulatory risks, if Congress or regulators were to disallow the use of certain technologies we use today or to mandate the implementation of other technologies, our services and results of operations could suffer. We expect that legislative enactments, court actions, and regulatory proceedings will continue to clarify and in some cases change the rights of cable companies and other entities providing video, data and voice services under the Communications Act of 1934, as amended (the Communications Act) and other laws, possibly in ways that we have not foreseen. The results of these legislative, judicial, and administrative actions may materially affect our business operations in areas such as:

> *Cable Franchising.* At the federal level, various provisions have been introduced in connection with broader Communications Act reform that would streamline the video franchising process to facilitate entry by new competitors. To date, no such measures have been adopted by the United States Congress (Congress). In December 2006, the FCC adopted an order in which the agency concluded that the current franchise approval process constitutes an unreasonable barrier to entry that impedes the development of cable competition and broadband deployment. As a result, the agency adopted new rules intended to limit the ability of county- and municipal-level franchising authorities to delay or refuse the grant of competitive franchises. Among other things, the new rules: establish deadlines for franchising authorities to act on applications; prohibit franchising authorities from placing unreasonable build-out demands on applicants; specify that certain fees, costs, and other compensation to franchising authorities will count towards the statutory five-percent cap on franchise fees; prohibit franchising authorities from requiring applicants to undertake certain obligations concerning the provision of public, educational, and governmental access programming and institutional networks; and preempt local level-playing-field regulations, and similar provisions, to the extent they impose restrictions on applicants greater than those in the FCC s new rules.

At the state level, several states, including California, New Jersey, North Carolina, South Carolina and Texas, have enacted statutes intended to streamline entry by additional video competitors. Some of these statutes provide more favorable treatment to new entrants than to existing providers. Similar bills are pending or may be enacted in additional states. To the extent federal or state laws or regulations

facilitate additional competitive entry or create more favorable regulatory treatment for new entrants, our operations could be materially and adversely affected. The FCC is currently considering whether, and to what extent, to adopt similar rules for incumbent cable operators.

A la carte Video Services. There has from time to time been federal legislative interest in requiring cable operators to offer historically bundled programming services on an à la carte basis. Currently, no such legislation is pending. In November 2004, the FCC released a study concluding that à la carte would raise costs for consumers and reduce programming choices. In February 2006, the FCC s Media Bureau issued a revised report that concluded, contrary to the findings of the earlier study, that à la carte could be beneficial in some instances. There are no pending proceedings related to à la carte at the FCC.

Carriage Regulations. In 2005, the FCC reaffirmed its earlier decision rejecting multi-casting (i.e., carriage of more than one program stream per broadcaster) requirements with respect to carriage of broadcast signals pursuant to must-carry rules. Certain parties filed petitions for reconsideration. To date, no action has been taken on these reconsideration petitions, and we are unable to predict what requirements, if any, the FCC might adopt. On September 11, 2007, the FCC adopted an order that will require cable operators to provide to subscribers both analog and digital feeds of must-carry broadcast stations beginning February 18, 2009. This obligation, subject to FCC review, will end after three years. In addition, the FCC has launched proceedings related to leased access and program carriage. With respect to leased access, the FCC is seeking comment on how leased access is being used in the marketplace, and whether any rule changes are necessary to better effectuate statutory objectives. With respect to program carriage, the FCC is re-examining both its substantive and procedural rules. We are unable to predict whether any such proceedings will lead to any changes in existing regulations.

Voice Communications. Traditional providers of voice services generally are subject to significant regulations. It is unclear to what extent those regulations (or other regulations) apply to providers of nontraditional voice services, including ours. In 2004, the FCC broadly inquired how Voice-over Internet Protocol should be classified for purposes of the Communications Act, and how it should be regulated. To date, however, the FCC has not issued an order comprehensively resolving that inquiry. Instead, the FCC has addressed certain individual issues on a piecemeal basis. In particular, the FCC declared in 2004 that certain nontraditional voice services are not subject to state certification or tariffing obligations. The full extent of this preemption is unclear. In orders over the past several years, the FCC subjected nontraditional voice service providers to a number of obligations applicable to traditional voice service, including to provide 911 emergency service, to accommodate law enforcement requests for information and wiretapping, to contribute to the federal universal service fund and to comply with customer privacy rules. We were already operating in accordance with these requirements when they were adopted. To the extent that the FCC (or Congress) imposes additional burdens, our operations could be adversely affected. See Business Regulatory Matters Regulation of Telephony.

Net neutrality legislation or regulation could limit our ability to operate our high-speed data business profitably, to manage our broadband facilities efficiently and to make upgrades to those facilities sufficient to respond to growing bandwidth usage by our high-speed data customers.

Several disparate groups have adopted the term net neutrality in connection with their efforts to persuade Congress and regulators to adopt rules that could limit the ability of broadband providers to manage their networks efficiently and profitably. Although the positions taken by these groups are not well defined and are sometimes inconsistent with one another, most would directly or indirectly limit the ability of broadband providers to apply differential pricing or network management policies to different uses of the Internet. Proponents of such regulation also seek to prohibit broadband providers from recovering the costs of rising bandwidth usage from any parties other than retail customers. The average bandwidth usage of our high-speed data customers has been increasing significantly in recent years as the

amount of high-bandwidth content and the number of applications available on the Internet continues to grow. In order to continue to provide quality service at attractive prices, we need the continued flexibility to develop and refine business models that respond to changing consumer uses and demands, to manage bandwidth usage efficiently and to make

upgrades to our broadband facilities. As a result, depending on the form it might take, net neutrality legislation or regulation could impact our ability to operate our high-speed data network profitably and to undertake the upgrades that may be needed to continue to provide high quality high-speed data services. We are unable to predict the likelihood that such regulatory proposals will be adopted. For a description of current regulatory proposals, see Business Regulatory Matters Communications Act and FCC Regulation.

Rate regulation could materially adversely impact our operations, business, financial results or financial condition.

Under current FCC regulations, rates for basic video service and associated equipment are permitted to be regulated. In many localities, we are not subject to basic video rate regulation, either because the local franchising authority has not asked the FCC for permission to regulate rates or because the FCC has found that there is effective competition. Also, there is currently no rate regulation for our other services, including high-speed data services. It is possible, however, that the FCC or Congress will adopt more extensive rate regulation for our video services or regulate other services, such as high-speed data and voice services, which could impede our ability to raise rates, or require rate reductions, and therefore could cause our business, financial results or financial condition to suffer.

Changes in carriage regulations could impose significant additional costs on us.

Although we would likely choose to carry almost all local full power analog broadcast signals voluntarily, so called must carry rules require us to carry video programming that we might not otherwise carry, including some local broadcast television signals on some of our cable systems. In addition, we are required to carry unaffiliated commercial leased access video programming and, under some of our franchises, public, educational and government access video programming. These regulations require us to use a substantial part of our capacity for this video programming and, for the most part, we must carry this programming without payment or compensation from the programmer.

Our carriage burden might increase due to changes in regulation in connection with the transition to digital broadcasting, which is scheduled for February 17, 2009. FCC regulations require most television broadcast stations to broadcast in digital format as well as in analog format during the transition period leading up to that date. The FCC has concluded that, during the transition period, cable operators will not be required to carry the digital signals of broadcasters that are broadcasting in both analog and digital format. The few stations that broadcast solely in digital format are entitled to carriage of a single digital program stream during the transition period. Some broadcast parties have asked that the FCC reconsider these determinations. If the FCC does so and changes the decision, our carriage burden could become more onerous.

If our carriage burden becomes more onerous, we could be compelled to carry more programming over which we are not able to assert editorial control. Consequently, our mix of programming could become less attractive to subscribers. Moreover, if the FCC adopts rules that are not competitively neutral, cable operators could be placed at a disadvantage versus other multi-channel video providers.

We may have to pay fees in connection with our cable modem service.

Local franchising authorities generally require cable operators to pay a franchise fee of five percent of revenue, which cable operators collect in turn from their subscribers. We have taken the position that under the Communications Act, local franchising authorities are allowed to impose a franchise fee only on revenue from cable services. Following the FCC s March 2002 determination that cable modem service does not constitute a cable service, we and most other multiple system operators stopped collecting and paying franchise fees on cable modem revenue.

The FCC has initiated a rulemaking proceeding to explore the consequences of its March 2002 order. If either the FCC or a court were to determine that, despite the March 2002 order, we are required to pay franchise fees on cable modem revenue, our franchise fee burden could increase going forward. We would be permitted to collect those increased fees from our subscribers, but doing so could impair our competitive position as compared to high-speed data service providers who are not required to collect and pay franchise

Table of Contents

fees. We could also become liable for franchise fees back to the time we stopped paying them. We may not be able to recover those fees from subscribers. Most courts interpreting the rules, including several involving our company, have determined that cable operators are not required to pay these fees on cable modem service. Recently, an intermediate state appellate court decided, in a case not involving our company, that cable operators can be required to pay franchise fees on cable modem service. This decision may encourage other franchise authorities to seek such fees.

Our competitors may not be required to comply with certain FCC set-top box rules to which we are subject.

Currently, many cable subscribers rent set-top boxes from us that perform both signal-reception functions and conditional-access security functions, as well as enable delivery of advanced services. In 1996, Congress enacted a statute seeking to allow cable subscribers to use set-top boxes obtained from certain third parties, including third-party retailers. Effective July 1, 2007, cable operators must offer separate equipment that provides only the security functions and not the signal-reception functions (so that cable subscribers can purchase set-top boxes or other navigational devices from third parties) and cease placing into service new set-top boxes that have integrated security and signal-reception functions. The FCC has indicated that direct broadcast satellite operators and certain telephone companies are not required to comply with certain FCC set-top box rules. We may be at a competitive disadvantage insofar as our competitors are not required to comply with the rule prohibiting set-top boxes with integrated security.

Applicable law is subject to change.

The exact requirements of applicable law are not always clear, and the rules affecting our businesses are always subject to change. For example, the FCC may interpret its rules and regulations in enforcement proceedings in a manner that is inconsistent with the judgments we have made. Likewise, regulators and legislators at all levels of government may sometimes change existing rules or establish new rules. Congress, for example, considers new legislative requirements for cable operators virtually every year, and there is always a risk that such proposals will ultimately be enacted. See Business Regulatory Matters.

Risks Related to our Relationship with Time Warner

Some of our officers and directors may have interests that diverge from ours in favor of Time Warner because of past and ongoing relationships with Time Warner and its affiliates.

Some of our officers and directors may experience conflicts of interest with respect to decisions involving business opportunities and similar matters that may arise in the ordinary course of our business or the business of Time Warner and its affiliates. One of our directors is also an executive officer of Time Warner, another is an executive officer of a subsidiary of Time Warner that is a sister company of ours and four of our directors (including Glenn A. Britt, our President and Chief Executive Officer) served as executive officers of Time Warner or its predecessors in the past. A number of our directors and all of our executive officers also have restricted shares, restricted stock units and/or options to purchase shares of Time Warner common stock. In addition, many of our directors and executive officers have invested in Time Warner common stock through their participation in Time Warner s and our savings plans. These past and ongoing relationships with Time Warner and any significant financial interest in Time Warner by these persons may present conflicts of interest that could materially adversely affect our business, financial results or financial condition. For example, these decisions could be materially related to:

- the nature, quality and cost of services rendered to us by Time Warner;
- the desirability of corporate opportunities, such as the entry into new businesses or pursuit of potential acquisitions, particularly those that might allow us to compete with Time Warner; and

employee retention or recruiting.

Our amended and restated certificate of incorporation (our Certificate of Incorporation) requires that our board of directors include independent members, subject to certain limitations, and our amended and

restated by-laws (our By-Laws) require that certain related party transactions be approved by a majority of these independent directors.

Time Warner and its affiliates may compete with us in one or more lines of business and may provide some services under the Time Warner brand or similar brand names.

Time Warner and its affiliates are engaged in a diverse range of entertainment and media-related businesses, including filmed entertainment, home video and Internet-related businesses, and these businesses may have interests that conflict with or compete in some manner with our business. Time Warner and its affiliates are generally under no obligation to share any future business opportunities available to it with us and our Certificate of Incorporation contains provisions that release Time Warner and its affiliates, including our directors who are also Time Warner s employees or executive officers, from this obligation and any liability that would result from breach of this obligation. Time Warner may deliver video, high-speed data, voice and wireless services over DSL, satellite or other means using the Time Warner brand name or similar brand names, potentially causing confusion among customers and complicating our marketing efforts. For instance, Time Warner has licensed the use of Time Warner Telecom, until July 2008, and TW Telecom and TWTC to Time Warner Telecom Inc., a former affiliate of Time Warner and a provider of managed voice and data networking solutions to enterprise organizations, which may compete with our commercial offerings. Any competition directly with Time Warner or its affiliates could materially adversely impact our business, financial results or financial condition.

We are party to agreements with Time Warner governing the use of our brand names, including the Time Warner Cable brand name that may be terminated by Time Warner if we fail to perform our obligations under those agreements or if we undergo a change of control.

Some of the agreements governing the use of our brand names may be terminated by Time Warner if we:

- commit a significant breach of our obligations under such agreements;
- undergo a change of control, even if Time Warner causes that change of control by selling some or all of its interest in us; or
- materially fail to maintain the quality standards established for the use of these brand names and the products and services related to these brand names.

We license our brand name, Time Warner Cable, and the trademark Road Runner from affiliates of Time Warner. We believe the Time Warner Cable and Road Runner brand names are valuable, and their loss could materially adversely affect our business, financial results or financial condition.

If Time Warner terminates these brand name license agreements, we would lose the goodwill associated with our brand names and be forced to develop new brand names, which would likely require substantial expenditures, and our business, financial results or financial condition would likely be materially adversely affected.

Time Warner controls approximately 90.6% of the voting power of our outstanding common stock and has the ability to elect a majority of our directors, and its interest may conflict with the interests of our other stockholders.

Time Warner indirectly holds all of our outstanding Class B common stock and approximately 82.7% of our outstanding Class A common stock. The common stock held by Time Warner represents approximately 90.6% of our combined voting power and 84.0% of the total number of shares of capital stock outstanding of all classes of our voting stock. Accordingly, Time Warner can control the outcome of most matters submitted to a vote of our

stockholders. In addition, Time Warner, because it is the indirect holder of all of our outstanding Class B common stock, and because it also indirectly holds more than a majority of our outstanding Class A common stock, is able to elect all of our directors and will continue to be able to do so as long as it owns a majority of our Class A common stock and Class B common stock. As a result of Time Warner s share ownership and representation on our board of directors, Time Warner is able to influence all of

our affairs and actions, including matters requiring stockholder approval such as the election of directors and approval of significant corporate transactions. The interests of Time Warner may differ from the interests of our other stockholders. Our Certificate of Incorporation requires that our board of directors include independent members, subject to certain limitations, and our By-Laws require that certain related party transactions be approved by a majority of these independent directors.

Time Warner s approval right over our ability to incur indebtedness may harm our liquidity and operations and restrict our growth.

Under a shareholder agreement entered into between us and Time Warner on April 20, 2005 (the Shareholder Agreement), which became effective in July 2006, until Time Warner no longer considers us to have an impact on its credit profile, we must obtain the approval of Time Warner prior to incurring additional debt or rental expense (other than with respect to certain approved leases) or issuing preferred equity, if our consolidated ratio of debt, including preferred equity, plus six times our annual rental expense to consolidated earnings before interest, taxes, depreciation and amortization (each as defined in the Shareholder Agreement) (EBITDA) plus rental expense, or EBITDAR, then exceeds, or would as a result of that incurrence exceed, 3:1, calculated without including any of our indebtedness or preferred equity held by Time Warner and its wholly owned subsidiaries. As of June 30, 2007, this ratio did not exceed 3:1. Although Time Warner has consented to ordinary course issuances of commercial paper or borrowings under our current revolving credit facility up to the limit of that credit facility, if the ratio were exceeded, any other incurrence of debt or rental expense (other than with respect to certain approved leases) or the issuance of preferred stock would require Time Warner s approval. As a result, we may in the future have a limited ability to incur future debt and rental expense (other than with respect to certain approved leases) and issue preferred equity without the consent of Time Warner, which if needed to raise additional capital, could limit our flexibility in exploring and pursuing financing alternatives and could have a material adverse effect on our liquidity and operations and restrict our growth.

Time Warner s capital markets and debt activity could adversely affect capital resources available to us.

Our ability to obtain financing in the capital markets and from other private sources may be adversely affected by future capital markets activity undertaken by Time Warner and its other subsidiaries. Capital raised by or committed to Time Warner for matters unrelated to us may reduce the supply of capital available for us as a result of increased leverage of Time Warner on a consolidated basis or reluctance in the market to incur additional credit exposure to Time Warner on a consolidated basis. In addition, our ability to undertake significant capital raising activities may be constrained by competing capital needs of other Time Warner businesses unrelated to us. As of June 30, 2007, Time Warner had unused committed capacity of $4.0 billion, including approximately $890 million of cash and equivalents, under its $7.0 billion committed credit facility, and we had approximately $3.4 billion of available borrowing capacity, including approximately $70 million of cash and equivalents, under our $14.0 billion committed credit facilities.

We are exempt from certain corporate governance requirements since we are a controlled company within the meaning of the NYSE rules and, as a result, our stockholders do not have the protections afforded by these corporate governance requirements.

Time Warner controls more than 50% of the voting power of our outstanding common stock. As a result, we are considered to be a controlled company for the purposes of the NYSE listing requirements and therefore are permitted to, and have, opted out of the NYSE listing requirements that would otherwise require our board of directors to have a majority of independent directors and our compensation and nominating and governance committees to be comprised entirely of independent directors. Accordingly, our stockholders do not have the same protections afforded to stockholders of companies that are subject to all of the NYSE corporate governance requirements. However, our

Certificate of Incorporation contains provisions requiring that independent directors constitute at least 50% of our board of directors and our By-Laws require that certain related party transactions be approved by a majority of these independent directors.

As a condition to the consummation of the Adelphia acquisition, our Certificate of Incorporation provides that this provision may not be amended, altered or repealed, and no provision inconsistent with this requirement may be adopted, until August 1, 2009 (three years following the closing of the Adelphia acquisition) without, among other things, the consent of a majority of the holders of the Class A common stock other than Time Warner and its affiliates.

Risks Related to the Exchange Offer

The issuance of the exchange debt securities may adversely affect the market for the initial debt securities.

To the extent the initial debt securities are tendered and accepted in the exchange offer, the trading market for the untendered and tendered but unaccepted initial debt securities could be adversely affected. Because we anticipate that most holders of the initial debt securities will elect to exchange their initial debt securities for exchange debt securities due to the absence of restrictions on the resale of exchange debt securities under the Securities Act, we anticipate that the liquidity of the market for any initial debt securities remaining after the completion of this exchange offer may be substantially limited. Please refer to the section in this prospectus entitled The Exchange Offer Your Failure to Participate in the Exchange Offer Will Have Adverse Consequences.

Some persons who participate in the exchange offer must deliver a prospectus in connection with resales of the exchange debt securities.

Based on interpretations of the staff of the SEC contained in Exxon Capital Holdings Corp., SEC no-action letter (April 13, 1988), Morgan Stanley & Co. Inc., SEC no-action letter (June 5, 1991) and Shearman & Sterling LLP, SEC no-action letter (July 2, 1983), we believe that you may offer for resale, resell or otherwise transfer the exchange debt securities without compliance with the registration and prospectus delivery requirements of the Securities Act. However, in some instances described in this prospectus under Plan of Distribution, you will remain obligated to comply with the registration and prospectus delivery requirements of the Securities Act to transfer your exchange debt securities. In these cases, if you transfer any exchange debt securities without delivering a prospectus meeting the requirements of the Securities Act or without an exemption from registration of your exchange debt securities under the Securities Act, you may incur liability under the Securities Act. We do not and will not assume, or indemnify you against, this liability.

FORWARD-LOOKING STATEMENTS

This prospectus contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, particularly statements anticipating future growth in revenues, OIBDA, cash provided by operating activities and other financial measures. Words such as anticipates, estimates, expects, projects, intends, plans, and words and terms of similar substance used in connection with any discussion of future operating or financial performance identify forward-looking statements. These forward-looking statements are based on management s current expectations and beliefs about future events. As with any projection or forecast, they are inherently susceptible to uncertainty and changes in circumstances, and we are under no obligation to, and expressly disclaim any obligation to, update or alter our forward-looking statements whether as a result of such changes, new information, subsequent events or otherwise.

Various factors could adversely affect our operations, business or financial results in the future and cause our actual results to differ materially from those contained in the forward-looking statements, including those factors discussed in detail in Risk Factors and in our other filings made from time to time with the SEC after the date of this prospectus. In addition, we operate in a highly competitive, consumer and technology-driven and rapidly changing business. Our business is affected by government regulation, economic, strategic, political and social conditions, consumer response to new and existing products and services, technological developments and, particularly in view of new technologies, our continued ability to protect and secure any necessary intellectual property rights. Our actual results could differ materially from management s expectations because of changes in such factors.

Further, lower than expected valuations associated with our cash flows and revenues may result in our inability to realize the value of recorded intangibles and goodwill. Additionally, achieving our financial objectives could be adversely affected by the factors discussed in detail in Risk Factors above, as well as:

- economic slowdowns;
- the impact of terrorist acts and hostilities;
- changes in our plans, strategies and intentions;
- the impacts of significant acquisitions, dispositions and other similar transactions;
- the failure to meet earnings expectations; and
- decreased liquidity in the capital markets, including any reduction in our ability to access the capital markets for debt securities or bank financings.

Table of Contents

USE OF PROCEEDS

We will not receive any cash proceeds from the issuance of the exchange debt securities in exchange for the outstanding initial debt securities. We are making this exchange solely to satisfy our obligations under the Registration Rights Agreement. In consideration for issuing the exchange debt securities, we will receive initial debt securities in like aggregate principal amount. The initial debt securities surrendered in the exchange for the exchange debt securities will be cancelled and cannot be reissued. Accordingly, issuance of the exchange debt securities will not result in any change in our indebtedness.

The net proceeds from the 2007 Bond Offering were $4.955 billion, after deducting the private placement discount and our estimated offering expenses. We used the net proceeds from the 2007 Bond Offering to repay all of the outstanding indebtedness under our $4.0 billion three-year term loan facility ($2.0 billion was repaid on each of April 11, 2007 and April 13, 2007) and a portion of the outstanding indebtedness under our $4.0 billion five-year term loan facility (on April 27, 2007), each of which bore interest at a rate of LIBOR plus 0.40% as of the date of the respective repayment.

Table of Contents

CAPITALIZATION

The following table sets forth our cash position and capitalization as of June 30, 2007. You should read this information in conjunction with Summary Financial and Subscriber Data, Management s Discussion and Analysis of Results of Operations and Financial Condition and our historical financial statements and related notes, each of which is included elsewhere in this prospectus.

		June 30, 2007 (in millions)
Cash and equivalents	$	70

(1) Represents amounts borrowed under our credit facilities and commercial paper program. For more information, please see Management s Discussion and Analysis of Results of Operations and Financial Condition Financial Condition and Liquidity Bank Credit Agreements and Commercial Paper Program.

(2)

The recorded value of each series of TWE s debt securities exceeds that series face value because it includes an unamortized fair value adjustment recorded in connection with the 2001 merger of AOL LLC (formerly America Online, Inc.) (AOL) and Historic TW Inc., which is being amortized as a reduction of the weighted-average interest expense over the term of the indebtedness. The aggregate amount of the fair value adjustment for all classes of debt securities was approximately $134 million as of June 30, 2007. For more information regarding our outstanding debt, please see Management s Discussion and Analysis of Results of Operations and Financial Condition Financial Condition and Liquidity.

(3) The mandatorily redeemable preferred membership units issued by a subsidiary represent mandatorily redeemable non-voting Series A Preferred Equity Membership Units (the TW NY Series A Preferred Membership Units) issued by TW NY in connection with the Transactions, which pay quarterly cash distributions at an annual rate equal to 8.21% of the sum of the liquidation preference thereof and any accrued but unpaid dividends thereon. The TW NY Series A Preferred Membership Units mature and are redeemable on August 1, 2013.

UNAUDITED PRO FORMA CONDENSED COMBINED FINANCIAL INFORMATION

The accompanying unaudited pro forma condensed combined statement of operations of our company for the year ended December 31, 2006 and for the six months ended June 30, 2006 is presented as if the Transactions and the dissolution of TKCCP, including TKCCP s distribution to us of the Kansas City Pool, had occurred on January 1, 2006. The unaudited pro forma condensed combined financial information is presented based on information available, is intended for informational purposes only and is not necessarily indicative of and does not purport to represent what our future financial condition or operating results will be after giving effect to the Transactions and the dissolution of TKCCP and does not reflect actions that may be undertaken by management in integrating these businesses (e.g., the cost of incremental capital expenditures). Additionally, this information does not reflect financial and operating benefits we expect to realize as a result of the Transactions and the dissolution of TKCCP, including TKCCP s distribution to us of the Kansas City Pool. For additional information on the Transactions and the dissolution of TKCCP, see Summary Our Company.

Comcast s and Adelphia s independent registered public accounting firms have not examined, reviewed, compiled or applied agreed upon procedures to the unaudited pro forma condensed combined financial information presented herein and, accordingly, assume no responsibility for them. Our independent registered public accounting firm has not examined, reviewed, compiled or applied agreed upon procedures to the unaudited pro forma condensed combined financial information presented herein. The unaudited pro forma condensed combined financial information for the systems acquired by us includes certain allocated assets, liabilities, revenues and expenses. We believe such allocations are made on a reasonable basis.

The unaudited pro forma condensed combined financial information set forth below should be read in conjunction with Summary Summary Financial and Subscriber Data, the notes to these unaudited pro forma condensed combined financial statements, Management s Discussion and Analysis of Results of Operations and Financial Condition, our consolidated financial statements and the notes thereto, Adelphia s consolidated financial statements and the notes thereto and Comcast s Special Purpose Combined Carve-Out Financial Statements of the Los Angeles, Dallas & Cleveland Cable System Operations (A Carve-Out of Comcast Corporation) and the notes thereto, each of which is included elsewhere in this prospectus.

The following is a brief description of the amounts recorded under each of the column headings in the unaudited pro forma condensed combined statements of operations:

Historical TWC

This column reflects our historical operating results for the year ended December 31, 2006, which are derived from our audited financial statements, and for the six months ended June 30, 2006, which are derived from our unaudited interim financial statements, prior to any adjustments for the Transactions, the dissolution of TKCCP and TKCCP s distribution of the Kansas City Pool to us. In addition, our historical results reflect the presentation of certain cable systems transferred to Comcast in the Redemptions and the Exchange as discontinued operations, and our operating results for the year ended December 31, 2006 include five months of activity from systems acquired and retained after the Transactions.

Historical Adelphia

This column reflects Adelphia s historical operating results for the seven months ended July 31, 2006 and six months ended June 30, 2006 and represents Adelphia s unaudited interim financial statements as reported by Adelphia in its Quarterly Reports on Form 10-Q for the nine months ended September 30, 2006 and six months ended June 30, 2006,

which were prepared by Adelphia. This column includes amounts relating to systems that were not acquired and retained by us, but instead were acquired by Comcast (as part of the Adelphia acquisition or the Exchange) or that were retained by Adelphia and, thus, are excluded from our unaudited pro forma condensed combined financial information through the adjustments made in the Less Items Not Acquired column described below.

Table of Contents

Comcast Historical Systems

This column represents the historical operating results for the seven months ended July 31, 2006 and six months ended June 30, 2006 of the cable systems previously owned by Comcast in Dallas, Cleveland and Los Angeles, which were transferred to us in the Exchange (the Comcast Historical Systems). The operating results for the first six months of 2006 were derived from Comcast s unaudited interim Special Purpose Combined Carve-Out Financial Statements of the Los Angeles, Dallas & Cleveland Cable System Operations (A Carve-Out of Comcast Corporation), which were prepared by Comcast, prior to any adjustments for the Transactions. The operating results for the month ended July 31, 2006 were prepared by and provided to us by Comcast, prior to any adjustments for the Transactions. See Note 6 to our unaudited pro forma condensed combined financial information for additional information on the historical operating results for the seven months ended July 31, 2006. This column includes certain allocated assets, liabilities, revenues and expenses. This column also includes allocated amounts that were retained by Comcast and, thus, were not transferred to us in the Exchange and therefore, are excluded from our unaudited pro forma condensed combined financial information through the adjustments made in the Less Items Not Acquired column described below.

Less Items Not Acquired

This column represents the unaudited historical operating results of the Adelphia systems up to the closing of the Transactions that were (i) received by us in the Adelphia acquisition and then transferred to Comcast in the Exchange, (ii) acquired by Comcast in the Adelphia acquisition and not transferred to us in the Exchange or (iii) retained by Adelphia after the Transactions. This column also includes certain items and allocated costs that were included in the Comcast Historical Systems financial information and the Adelphia acquired systems that were not ultimately acquired by us (collectively with the items in (i), (ii) and (iii) above, the Items Not Acquired). Specifically, the following items relate to the Comcast Historical Systems and the Adelphia acquired systems that were not ultimately transferred to us and, therefore, are included as part of this column:

- Adelphia s and Comcast s parent and subsidiary interest expense;
- Intercompany management fees related to the Comcast Historical Systems;
- Adelphia investigation and re-audit related fees;
- Reorganization expenses due to the bankruptcy of Adelphia;
- Intercompany charges between Adelphia cable systems that we acquired and Adelphia cable systems that Comcast acquired that were discontinued as a result of the Transactions;
- The gain on sale recognized by Adelphia in connection with the Transactions; and
- Income tax provisions for the Historical Adelphia and Comcast Historical Systems.

For additional information on the Items Not Acquired, see Note 5 to our unaudited pro forma condensed combined financial information.

Subtotal of Net Acquired Systems

This column represents the unaudited historical operating results of the Net Acquired Systems. This column includes the operating results of Historical Adelphia and the Comcast Historical Systems less the historical operating results of

the Items Not Acquired. This column does not include our historical operating results and does not reflect the impact of pro forma adjustments.

Pro Forma Adjustments The Transactions

This column represents pro forma adjustments related to the consummation of the Transactions, as more fully described in the notes to the unaudited pro forma condensed combined financial information.

Consolidation of the Kansas City Pool/Pro Forma Adjustments TKCCP

These columns reflect the consolidation of the Kansas City Pool of TKCCP s cable systems. We began consolidating the Kansas City Pool on January 1, 2007, as a result of the distribution of these assets to us. Prior to January 1, 2007, we accounted for our interest in TKCCP under the equity method of accounting. The Consolidation of the Kansas City Pool column reflects the reversal of historical equity income and the consolidation of the operations of the Kansas City Pool. The Pro Forma Adjustments TKCCP column reflects the elimination of intercompany transactions between us and TKCCP and adjustments to depreciation and amortization based upon the preliminary allocation of purchase price. For additional information on the dissolution of TKCCP, see Note 4 to our unaudited pro forma condensed combined financial information.

Notes to Unaudited Pro Forma Condensed Combined Financial Information

Note 1: Description of the Transactions

Contractual Purchase Price

On July 31, 2006, TW NY, a subsidiary of ours, purchased certain assets and assumed certain liabilities from Adelphia for a total of $8.935 billion in cash and shares representing 17.3% of our Class A common stock and 16% of our total outstanding common stock. The 16% interest reflects 155,913,430 shares of Class A common stock issued to Adelphia, which were valued at $35.28 per share for purposes of the Adelphia acquisition. The original cash cost of $9.154 billion was preliminarily reduced at closing by $219 million as a result of contractual adjustments, which resulted in a net cash payment by TW NY of $8.935 billion for the Adelphia acquisition. A summary of the purchase price is set forth below (in millions):

Cash	$ 8,935
16% interest in TWC[1]	5,500
Total	$ 14,435

[1] The valuation of $5.5 billion for the 16% interest in us as of July 31, 2006 was determined by management using a discounted cash flow and market comparable valuation model. The discounted cash flow valuation model was based upon our estimated future cash flows derived from our business plan and utilized a discount rate consistent with the inherent risk in the business.

Redemptions

Immediately prior to the Adelphia acquisition on July 31, 2006, we and our subsidiary, TWE, respectively, redeemed Comcast s interests in us and TWE, each of which was accounted for as an acquisition of a minority interest. Specifically, in the TWC Redemption, we redeemed Comcast s 17.9% interest in us for 100% of the capital stock of a subsidiary of ours that held both cable systems serving approximately 589,000 subscribers, with an approximate fair value of $2.470 billion, as determined using a discounted cash flow and market comparable valuation model, and approximately $1.857 billion in cash. The discounted cash flow valuation model was based upon our estimated future cash flows derived from our business plan and utilized a discount rate consistent with the inherent risk in the business. In addition, in the TWE Redemption, TWE redeemed Comcast s 4.7% residual equity interest in TWE for 100% of the equity interests in a subsidiary of TWE that held both cable systems serving approximately 162,000 subscribers, with an approximate fair value of $630 million, as determined using a discounted cash flow and market comparable valuation model, and approximately $147 million in cash. The transfer of cable systems as part of the Redemptions is a sale of cable systems for accounting purposes, and a $131 million pretax gain was recognized representing the excess of the estimated fair value of these cable systems over their book value. This gain is not reflected in the accompanying unaudited pro forma condensed combined statement of operations.

Exchange

Immediately after the Adelphia acquisition on July 31, 2006, we and Comcast exchanged certain cable systems, with an estimated fair value on each side of approximately $8.7 billion, as determined using a discounted cash flow valuation model, to enhance our company s and Comcast s respective geographic clusters of subscribers. The discounted cash flow valuation model was based upon our estimated future cash flows derived from our business plan

and utilized a discount rate consistent with the inherent risk in the business. We paid Comcast a contractual closing adjustment totaling $67 million related to the Exchange. We accounted for the Exchange as a purchase of cable systems from Comcast and a sale of our cable systems to Comcast. We recorded a pretax gain of $34 million on the Exchange related to the disposition of Urban Cable Works of Philadelphia, L.P. This gain is not reflected in the accompanying unaudited pro forma condensed combined statement of operations.

ATC Contribution

On July 28, 2006, American Television and Communications Corporation (ATC), a subsidiary of Time Warner, contributed its 1% equity interest and $2.4 billion preferred equity interest in TWE to TW NY Holding, a newly created subsidiary of ours that is the parent of TW NY, in exchange for a 12.4% non-voting common equity interest in TW NY Holding having an equivalent fair value (the ATC Contribution).

Financing Arrangements

We incurred incremental debt and redeemable preferred equity of approximately $11.1 billion associated with the cash used in executing the Transactions. In connection with the dissolution of TKCCP, in October 2006, we received approximately $631 million of cash in repayment of outstanding loans we had made to TKCCP (which were allocated to the assets distributed to Comcast). The cash that was received was used to pay down amounts outstanding under our existing credit facilities.

For additional information, see Management s Discussion and Analysis of Results of Operations and Financial Condition.

Note 2: Unaudited Pro Forma Condensed Combined Statement of Operations Adjustments Year Ended December 31, 2006 The Transactions

The pro forma adjustments to the statement of operations for the year ended December 31, 2006 relating to the Transactions are as follows:

(a) The adjustments to historical depreciation and amortization expense reflect the impact of using the fair values and useful lives of the underlying assets based on a valuation analysis performed by management. The discounted cash flow approach was based upon management s estimated future cash flows from the acquired assets and utilized a discount rate consistent with the inherent risk of each of the acquired assets.

(b) The increase in interest expense reflects incremental borrowings to finance our portion of the Adelphia acquisition and the Redemptions, net of the impact of the ATC Contribution. The following tables illustrate the allocation of borrowings to various financing arrangements and the computation of incremental interest expense.

Adelphia Acquisition

	Long-term Debt (in millions)	Annual Rate	Interest Expense for the Seven Months Ended July 31, 2006 (in millions)
TW NY Series A Preferred Membership Units[1]	$ 300	8.21%	$ 14
Other debt[1]	8,822	5.74%	295
Total incremental borrowing	9,122		309
Redemption of mandatorily redeemable preferred equity	(2,400)	8.06%	(113)

Net increase in debt/redeemable preferred equity	$ 6,722	$ 196

(1) This table reflects borrowings under our revolving credit facility and term loans and the issuance of commercial paper. The interest rate utilized in the pro forma information for Other debt is a weighted-average rate based on the borrowings used to finance our portion of the Adelphia acquisition. The rates for Other debt and the TW NY Series A Preferred Membership Units are based on actual borrowing rates when the loans were made and the TW NY Series A Preferred Membership Units were issued. A 1/8% change in the annual interest rate for the Other debt noted above would change interest expense by $11 million per year.

Table of Contents

Redemptions

	Long-term Debt (in millions)	Annual Rate	Interest Expense for the Seven Months Ended July 31, 2006 (in millions)
Other debt[1]	$ 2,004	5.74%	$ 67

[1] This table reflects borrowings under our revolving credit facility and term loans and the issuance of commercial paper. The interest rate utilized in the pro forma information for Other debt is a weighted-average rate based on the borrowings under these financing arrangements. The rates for Other debt are based on actual borrowing rates when the loans were made. A 1/8% change in the annual interest rate for the Other debt noted above would change interest expense by $3 million per year.

(c) The net increase in minority interest expense reflects an adjustment to record ATC s direct non-voting common ownership interest in TW NY Holding of approximately 12.4%, the elimination of ATC s historical minority interest in TWE and the elimination of Comcast s residual equity interest in TWE.

	(in millions)
Eliminate ATC s historical minority interest in TWE	$ 9
Record ATC s minority interest in TW NY Holding	(62)
Eliminate Comcast s residual equity interest in TWE	39
Net adjustment	$ (14)

(d) The adjustment to the income tax provision is required to adjust the historical income taxes on both the Subtotal of Net Acquired Systems and the Pro Forma Adjustments The Transactions at our marginal tax rate of 40.2% and considering the impact of the non-deductible interest expense related to the TW NY Series A Preferred Membership Units.

Note 3: Unaudited Pro Forma Condensed Combined Statement of Operations Adjustments Six Months Ended June 30, 2006 The Transactions

The pro forma adjustments to the statement of operations for the six months ended June 30, 2006 relating to the Transactions are as follows:

(e) The adjustments to historical depreciation and amortization expense reflect the impact of using the fair values and useful lives of the underlying assets based on a valuation analysis performed by management. The discounted cash flow approach was based upon management s estimated future cash flows from the acquired assets and utilized a discount rate consistent with the inherent risk of each of the acquired assets.

(f) The increase in interest expense reflects incremental borrowings to finance our portion of the Adelphia acquisition and the Redemptions, net of the impact of the ATC Contribution. The following tables illustrate the allocation of borrowings to various financing arrangements and the computation of incremental interest expense.

Adelphia Acquisition

	Long-term Debt (in millions)	Annual Rate	Interest Expense for the Six Months Ended June 30, 2006 (in millions)
TW NY Series A Preferred Membership Units[1]	$ 300	8.21%	$ 12
Other debt[1]	8,822	5.74%	253
Total incremental borrowing	9,122		265
Redemption of mandatorily redeemable preferred equity	(2,400)	8.06%	(97)
Net increase in debt/redeemable preferred equity	$ 6,722		$ 168

(1) This table reflects borrowings under our revolving credit facility and term loans and the issuance of commercial paper. The interest rate utilized in the pro forma information for Other debt is a weighted-average rate based on the borrowings used to finance our portion of the Adelphia acquisition. The rates for Other debt and the TW NY Series A Preferred Membership Units are based on actual borrowing rates when the loans were made and the TW NY Series A Preferred Membership Units were issued. A 1/8% change in the annual interest rate for the Other debt noted above would change interest expense by $11 million per year.

Redemptions

	Long-term Debt (in millions)	Annual Rate	Interest Expense for the Six Months Ended June 30, 2006 (in millions)
Other debt[1]	$ 2,004	5.74%	$ 58

(1) This table reflects borrowings under our revolving credit facility and term loans and the issuance of commercial paper. The interest rate utilized in the pro forma information for Other debt is a weighted-average rate based on the borrowings under these financing arrangements. The rates for Other debt are based on actual borrowing rates when the loans were made. A 1/8% change in the annual interest rate for the Other debt noted above would change interest expense by $3 million per year.

(g) The net increase in minority interest expense reflects an adjustment to record ATC s direct non-voting common ownership interest in TW NY Holding of approximately 12.4%, the elimination of ATC s historical minority interest in TWE and the elimination of Comcast s residual equity interest in TWE.

	(in millions)	
Eliminate ATC s historical minority interest in TWE	$	8
Record ATC s minority interest in TW NY Holding		(53)
Eliminate Comcast s residual equity interest in TWE		37
Net adjustment	$	(8)

(h) The adjustment to the income tax provision is required to adjust the historical income taxes on both the Subtotal of Net Acquired Systems and the Pro Forma Adjustments The Transactions at our marginal tax rate of 40.2% and considering the impact of the non-deductible interest expense related to the TW NY Series A Preferred Membership Units.

Note 4: TKCCP Dissolution

On January 1, 2007, TKCCP distributed its assets to us and Comcast. Comcast received TKCCP s cable systems in Houston (the Houston Pool) and we received the Kansas City Pool and we began consolidating the financial results of the Kansas City Pool on that date. All debt of TKCCP (inclusive of debt provided by us and Comcast) was allocated to the Houston Pool and became the responsibility of Comcast. We accounted for the distribution of the assets of TKCCP as a sale of our 50% equity interest in the Houston Pool in exchange for acquiring an additional 50% equity interest in the Kansas City Pool. We recorded a gain based on the difference between the carrying value and the fair value of our 50% investment in the Houston Pool

surrendered in connection with the dissolution of TKCCP. This pretax gain of approximately $146 million is not reflected in the accompanying unaudited pro forma condensed combined statement of operations.

(i) Prior to the distribution of its assets, we accounted for our investment in TKCCP under the equity method of accounting. The adjustments to the unaudited pro forma condensed combined statement of operations reflect the reversal of historical equity income and the consolidation of the operations of the Kansas City Pool.

(j) The adjustments to the unaudited pro forma condensed combined statement of operations reflect the elimination of intercompany transactions between TKCCP and Historical TWC, primarily the provision of Road Runner services to TKCCP and management fees received by Historical TWC for management functions provided to TKCCP.

(k) The adjustments to historical depreciation and amortization expense reflect the impact of using the fair values and useful lives of the underlying assets based on a valuation analysis performed by management. The discounted cash flow approach was based upon management s estimated future cash flows from the acquired assets and utilized a discount rate consistent with the inherent risk of each of the acquired assets. The purchase price allocation with respect to the acquisition of Comcast s 50% equity interest in the Kansas City Pool is preliminary.

(l) The adjustment to the income tax provision is required to adjust the historical income taxes on the dissolution of TKCCP at our marginal tax rate of 40.2%.

Note 5: Items Not Acquired

The following table represents the unaudited historical operating results of the Adelphia systems up to the closing of the Transactions that were (i) received by TW NY in the Adelphia acquisition and then transferred to Comcast in the Exchange, (ii) acquired by Comcast in the Adelphia acquisition and not transferred to us in the Exchange or (iii) retained by Adelphia after the Transactions. The Other Adjustments columns include certain items and allocated costs that were included in the Comcast Historical Systems financial information and the Adelphia acquired systems that were not acquired by us. Specifically, the following items relate to the Comcast Historical Systems and the Adelphia acquired systems that were not transferred to us and, therefore, are included as part of the Other Adjustments columns:

- Adelphia s and Comcast s parent and subsidiary interest expense;
- Intercompany management fees related to the Comcast Historical Systems;
- Adelphia investigation and re-audit related fees;
- Reorganization expenses due to the bankruptcy of Adelphia;
- Intercompany charges between Adelphia cable systems that we acquired and Adelphia cable systems that Comcast acquired that will be discontinued as a result of the Transactions;
- The gain on sale recognized by Adelphia in connection with the Transactions; and
- Income tax provisions for the Historical Adelphia and Comcast Historical Systems.

SELECTED FINANCIAL INFORMATION

Our selected financial information is set forth in the following tables. The balance sheet data as of December 31, 2002 and the statement of operations data for the year ended December 31, 2002 have been derived from our unaudited consolidated financial statements for such periods not included in this prospectus. The balance sheet data as of December 31, 2003 and 2004 and the statement of operations data as of December 31, 2003 have been derived from our audited financial statements not included in this prospectus. The balance sheet data as of December 31, 2005 and 2006 and the statement of operations data for the years ended December 31, 2004, 2005 and 2006 have been derived from our audited consolidated financial statements, which are included elsewhere in this prospectus.

The balance sheet data as of June 30, 2007 and the statement of operations data for the six months ended June 30, 2006 and 2007 have been derived from our unaudited consolidated financial statements included elsewhere in this prospectus. The balance sheet data as of June 30, 2006 have been derived from our unaudited financial statements not included in this prospectus. In the opinion of management, the unaudited financial data reflect all adjustments, consisting of normal and recurring adjustments, necessary for a fair statement of our results of operations for those periods. Our results of operations for the six months ended June 30, 2007 are not necessarily indicative of the results that can be expected for the full year or for any future period.

Ratio of earnings to fixed charges[(e)]	$ (8,894)	2.5x	3.0x	3.3x	3.1x	3.6x	3.1x
Ratio of earnings to combined fixed charges and preferred dividends[(e)]	$ (8,894)	2.5x	3.0x	3.3x	3.1x	3.6x	3.1x

(a) Includes merger-related costs and restructuring costs of $16 million and $21 million in the six months ended June 30, 2007 and 2006, respectively, and $56 million, $42 million and $15 million in the years ended December 31, 2006, 2005 and 2003, respectively (none in 2004 and 2002). Includes a $9.210 billion goodwill impairment charge and a $6 million gain related to the sale of a cable system at TWE in 2002.

(b) Includes a pretax gain of $146 million in the six months ended June 30, 2007 related to the sale of our 50% equity interest in the Houston Pool of TKCCP. Includes a charge of $420 million in 2002 to reflect the other than temporary declines in the value of certain unconsolidated cable television system joint ventures.

(c) Includes a benefit of $2 million in the six months ended June 30, 2006 and the year ended December 31, 2006 related to the cumulative effect of a change in accounting principle in connection with the adoption of Financial Accounting Standards Board (FASB) Statement No. 123 (revised 2004), *Share-Based Payment*, and a charge of $28.031 billion in 2002 related to the cumulative effect of a change in accounting principle in connection with the adoption of FASB Statement No. 142, *Goodwill and Other Intangible Assets*.

(d) Includes debt due within one year of $2 million at June 30, 2007 (none at June 30, 2006) and $4 million, $1 million, $4 million and $8 million at December 31, 2006, 2004, 2003 and 2002, respectively (none at December 31, 2005), long-term debt, TW NY Series A Preferred Membership Units and mandatorily redeemable preferred equity issued by a subsidiary.

(e) For purposes of computing the ratio of earnings to fixed charges and the ratio of earnings to combined fixed charges and preferred stock dividends, earnings were calculated by adding: (i) pretax income, (ii) interest expense, (iii) preferred stock dividend requirements of majority-owned companies, (iv) minority interest in the income of majority-owned subsidiaries that have fixed charges, and (v) the amount of undistributed losses (earnings) of our less than 50%-owned companies. Fixed charges consist of interest expense. Combined fixed charges and preferred stock dividends include the fixed charges mentioned above and the amount of pretax income necessary to cover any preferred stock dividend requirements.

Earnings as defined include significant noncash charges for depreciation and amortization primarily relating to the amortization of intangible assets recognized in business combinations.

For periods in which earnings before fixed charges were insufficient to cover fixed charges (or combined fixed charges and preferred dividends), the dollar amount of coverage deficiency (in millions), instead of the ratio, is

disclosed.

MANAGEMENT S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

You should read the following discussion in conjunction with Selected Financial Information, Unaudited Pro Forma Condensed Combined Financial Information and our historical financial statements and related notes, Adelphia s consolidated financial statements and related notes and Comcast s special purpose combined carve-out financial statements of the former Comcast Los Angeles, Dallas and Cleveland cable system operations and related notes, each of which is included elsewhere in this prospectus. Some of the statements in the following discussion are forward-looking statements. For more information, please see Forward-Looking Statements. The following discussion and analysis of our results of operations includes periods prior to the consummation of the Transactions and the consolidation of the Kansas City Pool. Accordingly, our historical results of operations are not indicative of what our future results of operations will be.

Overview

We are the second-largest cable operator in the U.S. and are an industry leader in developing and launching innovative video, data and voice services. At June 30, 2007, we had approximately 13.4 million basic video subscribers in technologically advanced, well-clustered systems located mainly in five geographic areas New York state, the Carolinas, Ohio, southern California and Texas. As of June 30, 2007, we were the largest cable operator in a number of large cities, including New York City and Los Angeles.

On July 31, 2006, a subsidiary of ours, TW NY, and Comcast completed the acquisition of substantially all of the cable assets of Adelphia and related transactions. In addition, effective January 1, 2007, we began consolidating the results of the Kansas City Pool upon the distribution of the assets of TKCCP to us and Comcast. Prior to January 1, 2007, our interest in TKCCP was reported as an equity method investment. Refer to Recent Developments for further details.

Time Warner currently owns approximately 84.0% of our common stock (representing a 90.6% voting interest). The financial results of our operations are consolidated by Time Warner.

We principally offer three services video, high-speed data and voice, which have been primarily targeted to residential customers. Video is our largest service in terms of revenues generated. We expect to continue to increase video revenues through the offering of advanced digital video services such as VOD, SVOD, HDTV and set-top boxes equipped with DVRs, as well as through price increases and subscriber growth. Our digital video subscribers provide a broad base of potential customers for additional advanced services. Providing basic video services is a competitive and highly penetrated business, and, as a result, we expect slower incremental growth in the number of basic video subscribers compared to the growth in our advanced service offerings. Video programming costs represent a major component of our expenses and are expected to continue to increase, reflecting contractual rate increases, subscriber growth and the expansion of service offerings, and it is expected that our video service margins will decline over the next few years as programming cost increases outpace growth in video revenues.

High-speed data has been one of our fastest-growing services over the past several years and is a key driver of our results. As of June 30, 2007, we had approximately 7.2 million residential high-speed data subscribers. We expect continued strong growth in residential high-speed data subscribers and revenues for the foreseeable future; however, the rate of growth of both subscribers and revenues is expected to slow over time as high-speed data services become increasingly well-penetrated. In addition, as narrowband Internet users continue to migrate to broadband connections, we anticipate that an increasing percentage of our new high-speed data customers will elect to purchase our entry-level high-speed data service, which is generally less expensive than our flagship service. As a result, over time,

our average high-speed data revenue per subscriber may decline reflecting this shift in mix. We also offer commercial high-speed data services and had approximately 263,000 commercial high-speed data subscribers as of June 30, 2007.

Approximately 2.3 million subscribers received Digital Phone service, our voice service, as of June 30, 2007. Under our primary calling plan, for a monthly fixed fee, Digital Phone customers typically receive the following services: an unlimited local, in-state and U.S., Canada and Puerto Rico calling plan, as well as call waiting, caller ID and E911 services. We are also currently deploying lower-priced calling plans to serve those customers that do

not use interstate and/or long-distance calling plans extensively and intend to offer additional plans with a variety of calling options in the future. Digital Phone enables us to offer our customers a convenient package, or bundle, of video, high-speed data and voice services, and to compete effectively against bundled services available from our competitors. We expect strong increases in Digital Phone subscribers and revenues for the foreseeable future. We have begun to introduce Business Class Phone, a commercial Digital Phone service, to small- and medium-sized businesses and will continue to roll out this service during the remainder of 2007 in most of the Legacy Systems. We are also introducing this service in some of the Acquired Systems.

In November 2005, we and several other cable companies, together with Sprint, announced the formation of a joint venture to develop integrated wireline and wireless video, data and voice services. In 2006, we began offering under the Pivot brand name a bundle that includes Sprint wireless service (with some of our unique features) in limited operating areas and we will continue to roll out this service during the remainder of 2007.

Some of our principal competitors, in particular, direct broadcast satellite operators and incumbent local telephone companies, either offer or are making significant capital investments that will allow them to offer services that provide features and functions comparable to the video, data and/or voice services that we offer and they are aggressively seeking to offer them in bundles similar to ours. We expect that the availability of these bundled service offerings will continue to intensify competition.

In addition to the subscription services described above, we also earn revenues by selling advertising time to national, regional and local businesses.

As of July 31, 2006, the date the transactions with Adelphia and Comcast closed, the penetration rates for basic video, digital video and high-speed data services were generally lower in the Acquired Systems than in the Legacy Systems. Furthermore, certain advanced services were not available in some of the Acquired Systems, and an IP-based telephony service was not available in any of the Acquired Systems. To increase the penetration of these services in the Acquired Systems, we are in the midst of a significant integration effort that includes upgrading the capacity and technical performance of these systems to levels that will allow the delivery of these advanced services and features. Such integration-related efforts are expected to be largely complete by the end of 2007. As of June 30, 2007, Digital Phone was available to over 40% of the homes passed in the Acquired Systems. We expect to continue to roll out Digital Phone service across the Acquired Systems during the remainder of 2007.

Improvement in the financial and operating performance of the Acquired Systems depends in part on the completion of these initiatives and the subsequent availability of our bundled advanced services in the Acquired Systems. In addition, due to various operational and competitive challenges, we expect that the acquired systems located in Los Angeles, CA and Dallas, TX will continue to require more time and resources than the other acquired systems to stabilize and then meaningfully improve their financial and operating performance. As of June 30, 2007, the Los Angeles and Dallas acquired systems together served approximately 1.9 million basic video subscribers (about 50% of the basic video subscribers served by the Acquired Systems). We believe that by upgrading the plant and integrating the Acquired Systems into our operations, there is a significant opportunity over time to increase service penetration rates, and improve Subscription revenues and OIBDA in the Acquired Systems.

Recent Developments

Time Warner s Interest in TW NY Holding

Time Warner has recently expressed interest in a transaction pursuant to which our subsidiary, TW NY Holding, would redeem a significant portion of Time Warner s 12.43% non-voting, equity interest in it. On September 13, 2007, our board of directors appointed a special committee of independent directors and authorized it to consider any

proposal Time Warner may make in this regard and negotiate with Time Warner regarding the terms of such a transaction. No assurance can be given that Time Warner will make a proposal that will result in an agreement for us to redeem a portion of its interest in TW NY Holding or, if an agreement is reached, that a redemption transaction will be consummated. In April 2005, in connection with the announcement of the Transactions, we valued this interest (as if the Transactions had occurred at that time)

at approximately $2.9 billion. This valuation is not necessarily indicative of the fair value of the interest as of the date of this prospectus. If a redemption transaction takes place, we would expect to finance the transaction through available borrowing capacity under our existing committed revolving credit facility or by accessing the bank credit or debt capital markets. If a redemption transaction is completed, it will not change the 84% ownership interest Time Warner has in our common stock.

2007 Bond Offering

On April 9, 2007, in the 2007 Bond Offering, we issued $5.0 billion in aggregate principal amount of senior unsecured notes and debentures consisting of $1.5 billion principal amount of 2012 initial notes, $2.0 billion principal amount of 2017 initial notes, and $1.5 billion principal amount of 2037 initial debentures pursuant to Rule 144A and Regulation S under the Securities Act. We used the net proceeds from this issuance to repay all of the outstanding indebtedness under our $4.0 billion three-year term loan facility and a portion of the outstanding indebtedness under our $4.0 billion five-year term loan facility. See Financial Condition and Liquidity Debt Securities for further details.

TKCCP Joint Venture

TKCCP was a 50-50 joint venture between a consolidated subsidiary of ours (Time Warner Entertainment-Advance/Newhouse Partnership (TWE-A/N)) and Comcast. In accordance with the terms of the TKCCP partnership agreement, on July 3, 2006, Comcast notified us of its election to trigger the dissolution of the partnership and its decision to allocate all of TKCCP s debt, which totaled approximately $2 billion, to the Houston Pool. On August 1, 2006, we notified Comcast of our election to receive the Kansas City Pool. On October 2, 2006, we received approximately $630 million from Comcast due to the repayment of debt owed by TKCCP to TWE-A/N that had been allocated to the Houston Pool. From July 1, 2006 through December 31, 2006, we were entitled to 100% of the economic interest in the Kansas City Pool (and recognized such interest pursuant to the equity method of accounting), and we were not entitled to any economic benefits of ownership from the Houston Pool.

On January 1, 2007, TKCCP distributed its assets to us and Comcast. We received the Kansas City Pool, which served approximately 788,000 basic video subscribers as of December 31, 2006, and Comcast received the Houston Pool, which served approximately 795,000 basic video subscribers as of December 31, 2006. We began consolidating the results of the Kansas City Pool on January 1, 2007. TKCCP was formally dissolved on May 15, 2007. For accounting purposes, we have treated the distribution of TKCCP s assets as a sale of our 50% equity interest in the Houston Pool and as an acquisition of Comcast s 50% equity interest in the Kansas City Pool. As a result of the sale of our 50% equity interest in the Houston Pool, we recorded a pretax gain of approximately $146 million in the first quarter of 2007, which is included as a component of other income, net, in the consolidated statement of operations for the six months ended June 30, 2007.

Adelphia Acquisition

On July 31, 2006, TW NY and Comcast completed their respective acquisitions of assets comprising in the aggregate substantially all of the cable assets of Adelphia. At the closing of the Adelphia acquisition, TW NY paid approximately $8.9 billion in cash, after giving effect to certain purchase price adjustments, and shares representing 17.3% of our Class A common stock (approximately 16% of our outstanding common stock) for the portion of the Adelphia assets it acquired. In addition, on July 28, 2006, in the ATC Contribution, ATC contributed its 1% common equity interest and $2.4 billion preferred equity interest in TWE to TW NY Holding, in exchange for an approximately 12.4% non-voting common stock interest in TW NY Holding.

On February 13, 2007, Adelphia s Chapter 11 reorganization plan became effective and, under applicable securities law regulations and provisions of the U.S. bankruptcy code, we became a public company subject to the requirements

of the Exchange Act. Under the terms of the reorganization plan, most of the 155,913,430 shares of our Class A common stock that Adelphia received in the Adelphia acquisition (representing approximately 16% of our outstanding common stock) are being distributed to Adelphia s creditors. As of June 30, 2007, approximately 91% of these shares of our Class A common stock had been distributed to Adelphia s creditors.

The remaining shares are expected to be distributed during the coming months as the remaining disputes are resolved by the bankruptcy court. On March 1, 2007, our Class A common stock began trading on the NYSE under the symbol TWC.

The Redemptions

On July 31, 2006, immediately before the closing of the Adelphia acquisition, Comcast s interests in us and TWE were redeemed. Specifically, in the TWC Redemption, Comcast s 17.9% interest in us was redeemed in exchange for 100% of the capital stock of a subsidiary of ours holding both cable systems serving approximately 589,000 subscribers and approximately $1.857 billion in cash. In addition, in the TWE Redemption, Comcast s 4.7% interest in TWE was redeemed in exchange for 100% of the equity interests of a subsidiary of TWE holding both cable systems serving approximately 162,000 subscribers and approximately $147 million in cash. The TWC Redemption was designed to qualify as a tax free split off under section 355 of the Tax Code. For accounting purposes, the Redemptions were treated as an acquisition of Comcast s minority interests in us and TWE and a disposition of the cable systems that were transferred to Comcast. The purchase of the minority interests resulted in a reduction of goodwill of $738 million related to the excess of the carrying value of the Comcast minority interests over the total fair value of the Redemptions. In addition, the disposition of the cable systems resulted in an after-tax gain of $945 million, included in discontinued operations for the year ended December 31, 2006, which is comprised of a $131 million pretax gain (calculated as the difference between the carrying value of the systems acquired by Comcast in the Redemptions totaling $2.969 billion and the estimated fair value of $3.100 billion) and a net tax benefit of $814 million, including the reversal of historical deferred tax liabilities of approximately $838 million that had existed on systems transferred to Comcast in the TWC Redemption.

The Exchange

Following the Redemptions and the Adelphia acquisition, on July 31, 2006, TW NY and Comcast swapped certain cable systems, most of which were acquired from Adelphia, in order to enhance our and Comcast s respective geographic clusters of subscribers, and TW NY paid Comcast approximately $67 million for certain adjustments related to the Exchange. The systems exchanged by TW NY included Urban Cable Works of Philadelphia, L.P. (Urban Cable) and systems acquired from Adelphia. We did not record a gain or loss on systems TW NY acquired from Adelphia and transferred to Comcast in the Exchange because such systems were recorded at fair value in the Adelphia acquisition. We did, however, record a pretax gain of $34 million ($20 million net of tax) on the Exchange related to the disposition of Urban Cable, which is included in discontinued operations for the year ended December 31, 2006.

The results of the systems acquired in connection with the Transactions have been included in our consolidated statement of operations since the closing of the Transactions. The systems previously owned by us that were transferred to Comcast in connection with the Redemptions and the Exchange (the Transferred Systems), including the gains discussed above, have been reflected as discontinued operations in the consolidated financial statements for all periods presented.

As a result of the closing of the Transactions, we acquired systems with approximately 4.0 million basic video subscribers and disposed of the Transferred Systems, with approximately 0.8 million basic video subscribers, for a net gain of approximately 3.2 million basic video subscribers. As of June 30, 2007, Time Warner owned approximately 84.0% of our outstanding common stock (including 82.7% of our outstanding Class A common stock and all outstanding shares of our Class B common stock), as well as an approximately 12.4% non-voting common stock interest in TW NY Holding. As a result of the Redemptions, Comcast no longer had an interest in us or TWE.

Tax Benefits from the Transactions

The Adelphia acquisition was designed to be a taxable acquisition of assets that would result in a tax basis in the acquired assets equal to the purchase price paid. The depreciation and amortization deductions resulting from this step-up in the tax basis of the assets would reduce future net cash tax payments and thereby increase our future cash flows. We believe that most cable operators have a tax basis that is below the fair

market value of their cable systems and, accordingly, we have viewed a portion of our tax basis in the acquired assets as incremental value above the amount of basis more generally associated with cable systems. The tax benefit of such incremental step-up would reduce net cash tax payments by more than $300 million per year, assuming the following: (i) incremental step-up relating to 85% of a $14.4 billion purchase price (which assumes that 15% of the fair market value of cable systems represents a typical amount of basis), (ii) straight-line amortization deductions over 15 years, (iii) sufficient taxable income to utilize the amortization deductions, and (iv) a 40% effective tax rate. The IRS or state or local tax authorities might challenge the anticipated tax characterizations or related valuations, and any successful challenge could materially adversely affect our tax profile (including our ability to recognize the intended tax benefits from the Transactions), significantly increase our future cash tax payments and significantly reduce our future earnings and cash flow.

Also, the TWC Redemption was designed to qualify as a tax-free split-off under section 355 of the Tax Code. If the IRS were successful in challenging the tax-free characterization of the TWC Redemption, an additional cash liability on account of taxes of up to an estimated $900 million could become payable by us.

Financial Statement Presentation

Revenues

Our revenues consist of Subscription and Advertising revenues. Subscription revenues consist of revenues from video, high-speed data and voice services.

Video revenues include monthly fees for basic, standard and digital services from both residential and commercial subscribers, together with related equipment rental charges, including charges for set-top boxes, and charges for premium programming and SVOD services. Video revenues also include installation, pay-per-view and VOD charges and franchise fees relating to video charges collected on behalf of local franchising authorities. Several ancillary items are also included within video revenues, such as commissions earned on the sale of merchandise by home shopping services and rental income earned on the leasing of antenna attachments on our transmission towers. In each period presented, these ancillary items constitute less than 2% of video revenues.

High-speed data revenues include monthly subscriber fees from both residential and commercial subscribers, along with related equipment rental charges, home networking fees and installation charges. High-speed data revenues also include fees received from third-party internet service providers, certain cable systems owned by a subsidiary of TWE-A/N and managed by the Advance/Newhouse Partnership (A/N) and, in 2006, fees received from TKCCP.

Voice revenues include monthly subscriber fees principally from voice subscribers, including Digital Phone subscribers and approximately 74,000 circuit-switched subscribers (as of June 30, 2007) acquired from Comcast in the Exchange, along with related installation charges. We continue to provide traditional, circuit-switched services to some of those subscribers and, in some areas, have begun the process of discontinuing the circuit-switched offering in accordance with regulatory requirements. In those areas where the circuit-switched offering is discontinued, Digital Phone will be the only voice service we provide.

Advertising revenues include the fees charged to local, regional and national advertising customers for advertising placed on our video and high-speed data services. Nearly all Advertising revenues are attributable to our video service.

Costs and Expenses

Costs of revenues include: video programming costs (including fees paid to the programming vendors net of certain amounts received from the vendors); high-speed data connectivity costs; Digital Phone network costs; other service-related expenses, including non-administrative labor costs directly associated with the delivery of services to subscribers; maintenance of our delivery systems; franchise fees; and other related expenses. Our programming agreements are generally multi-year agreements that provide for us to make payments to the programming vendors at agreed upon rates based on the number of subscribers to which we provide the service.

Selling, general and administrative expenses include amounts not directly associated with the delivery of services to subscribers or the maintenance of our delivery systems, such as administrative labor costs, marketing expenses, billing charges, non-plant repair and maintenance costs, management fees paid to Time Warner and other administrative overhead costs, net of management fees received from TKCCP. Effective August 1, 2006, we no longer receive management fees from TKCCP.

Use of Operating Income before Depreciation and Amortization and Free Cash Flow

OIBDA is a non-GAAP financial measure. We define OIBDA as Operating Income before depreciation of tangible assets and amortization of intangible assets. Management utilizes OIBDA, among other measures, in evaluating the performance of our business because OIBDA eliminates the uneven effect across our business of considerable amounts of depreciation of tangible assets and amortization of intangible assets recognized in business combinations. Additionally, management utilizes OIBDA because it believes this measure provides valuable insight into the underlying performance of our individual cable systems by removing the effects of items that are not within the control of local personnel charged with managing these systems such as income tax provision, other income (expense), net, minority interest expense, net, income from equity investments, net, and interest expense, net. In this regard, OIBDA is a significant measure used in our annual incentive compensation programs. OIBDA also is a metric used by our parent, Time Warner, to evaluate our performance and is an important measure in the Time Warner reportable segment disclosures. Management also uses OIBDA because it believes it provides an indication of our ability to service debt and fund capital expenditures, as OIBDA removes the impact of depreciation and amortization. A limitation of this measure, however, is that it does not reflect the periodic costs of certain capitalized tangible and intangible assets used in generating revenues in our business. To compensate for this limitation, management evaluates the investments in such tangible and intangible assets through other financial measures, such as capital expenditure budget variances, investment spending levels and return on capital analyses. Another limitation of this measure is that it does not reflect the significant costs borne by us for income taxes, debt servicing costs, the share of OIBDA related to the minority ownership, the results of our equity investments or other non-operational income or expense. Management compensates for this limitation through other financial measures such as a review of net income and earnings per share.

Free Cash Flow is a non-GAAP financial measure. We define Free Cash Flow as cash provided by operating activities (as defined under GAAP) plus excess tax benefits from the exercise of stock options, less cash provided by (used by) discontinued operations, capital expenditures, partnership distributions and principal payments on capital leases. Management uses Free Cash Flow to evaluate our business. It is also a significant component of our annual incentive compensation programs. We believe this measure is an important indicator of our liquidity, including our ability to reduce net debt and make strategic investments, because it reflects our operating cash flow after considering the significant capital expenditures required to operate our business. A limitation of this measure, however, is that it does not reflect payments made in connection with investments and acquisitions, which reduce liquidity. To compensate for this limitation, management evaluates such expenditures through other financial measures such as return on investment analyses.

Both OIBDA and Free Cash Flow should be considered in addition to, not as a substitute for, our Operating Income, net income and various cash flow measures (e.g., cash provided by operating activities), as well as other measures of financial performance and liquidity reported in accordance with GAAP, and may not be comparable to similarly titled measures used by other companies. A reconciliation of OIBDA to Operating Income is presented under Results of Operations. A reconciliation of Free Cash Flow to cash provided by operating activities is presented under Financial Condition and Liquidity.

Results Of Operations

Changes in Basis of Presentation

Consolidation of Kansas City Pool

On January 1, 2007, we began consolidating the results of the Kansas City Pool we received upon the distribution of the assets of TKCCP to us and Comcast. The results of operations for the Kansas City Pool have been presented below separately from the results of the Legacy Systems.

Discontinued Operations

We have reflected the operations of the Transferred Systems as discontinued operations for all periods presented.

Reclassifications

Certain reclassifications have been made to the prior years financial information to conform to the June 30, 2007 presentation.

Stock-based Compensation

Historically, our employees were granted equity awards under Time Warner s equity plans. When we became a public company, Time Warner ceased making equity awards under its equity plans to our employees. We have established the Time Warner Cable Inc. 2006 Stock Incentive Plan (the 2006 Plan). Through March 31, 2007, our financial statements reflect equity awards under Time Warner s equity plans and all future grants of equity awards to our employees will be made under our equity plans. Our employees who have outstanding equity awards under Time Warner s equity plans will retain any rights under those Time Warner equity awards pursuant to their terms regardless of their participation in our equity plans.

We have adopted the provisions of FAS 123R as of January 1, 2006. The provisions of FAS 123R require that a company measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost is recognized in the statement of operations over the period during which an employee is required to provide service in exchange for the award. FAS 123R also amends FASB Statement No. 95, *Statement of Cash Flows*, to require that excess tax benefits, as defined, realized from the exercise of stock options be reported as a financing cash inflow rather than as a reduction of taxes paid in cash flow from operations.

Prior to the adoption of FAS 123R, we had followed the provisions of FASB Statement No. 123, *Accounting for Stock-Based Compensation* (FAS 123), which allowed us to follow the intrinsic value method set forth in Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and disclose the pro forma effects on net income (loss) had the fair value of the equity awards been expensed. In connection with adopting FAS 123R, we elected to adopt the modified retrospective application method provided by FAS 123R and, accordingly, financial statement amounts for all prior periods presented herein reflect results as if the fair value method of expensing had been applied from the original effective date of FAS 123 (see Note 1 to our consolidated financial statements for the year ended December 31, 2006 for a discussion on the impact of the adoption of FAS 123R).

Prior to the adoption of FAS 123R, we recognized stock-based compensation expense for awards with graded vesting by treating each vesting tranche as a separate award and recognizing compensation expense ratably for each tranche. For equity awards granted subsequent to the adoption of FAS 123R, we treat such awards as a single award and recognize stock-based compensation expense on a straight-line basis (net of estimated forfeitures) over the employee service period. Stock-based compensation expense is recorded in costs of revenues or selling, general and administrative expense depending on the employee s job function.

When recording compensation cost for equity awards, FAS 123R requires companies to estimate the number of equity awards granted that are expected to be forfeited. Prior to the adoption of FAS 123R, for disclosure purposes, we recognized forfeitures when they occurred, rather than using an estimate at the grant date and subsequently adjusting the estimated forfeitures to reflect actual forfeitures. We recorded a benefit of $2 million, net of tax, as the cumulative effect of a change in accounting principle upon the adoption of FAS 123R in the first quarter of 2006, to recognize the effect of estimating the number of awards granted prior to January 1, 2006 that are not ultimately expected to vest.

Total equity-based compensation expense (which includes expense recognized related to Time Warner stock options, restricted stock and restricted stock units, as well as our stock options and restricted stock units) recognized during the six months ended June 30, 2007 and 2006 was $38 million and $21 million, respectively, and during the years ended December 31, 2006, 2005 and 2004 was $33 million, $53 million and $70 million, respectively.

Table of Contents

Employers Accounting for Defined Benefit Pension and Other Postretirement Plans

On December 31, 2006, we adopted the provisions of FASB Statement No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Benefits* (FAS 158). FAS 158 addresses the accounting for defined benefit pension plans and other postretirement benefit plans (plans). Specifically, FAS 158 requires companies to recognize an asset for a plan s overfunded status or a liability for a plan s underfunded status as of the end of the company s fiscal year, the offset of which is recorded, net of tax, as a component of accumulated other comprehensive income (loss) in shareholders equity. As a result of adopting FAS 158, on December 31, 2006, we reflected the funded status of our plans by reducing our net pension asset by approximately $208 million to reflect actuarial and investment losses that had been deferred pursuant to prior pension accounting rules and recording a corresponding deferred tax asset of approximately $84 million and a net after-tax charge of approximately $124 million in accumulated other comprehensive loss, net, in shareholders equity.

Accounting for Sabbatical Leave and Other Similar Benefits

On January 1, 2007, we adopted the provisions of Emerging Issues Task Force (EITF) Issue No. 06-02, *Accounting for Sabbatical Leave and Other Similar Benefits* (EITF 06-02), related to certain sabbatical leave and other employment arrangements that are similar to a sabbatical leave. EITF 06-02 provides that an employee s right to a compensated absence under a sabbatical leave or similar benefit arrangement in which the employee is not required to perform any duties during the absence is an accumulating benefit. Therefore, such arrangements should be accounted for as a liability with the cost recognized over the service period during which the employee earns the benefit. Adoption of this guidance resulted in a decrease in retained earnings of $62 million ($37 million, net of tax) on January 1, 2007. The resulting change in the accrual for the six months ended June 30, 2007 was not material.

Income Statement Classification of Taxes Collected from Customers

In June 2006, the EITF reached a consensus on EITF Issue No. 06-03, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation)* (EITF 06-03). EITF 06-03 provides that the presentation of taxes assessed by a governmental authority that is directly imposed on a revenue-producing transaction between a seller and a customer on either a gross basis (included in revenues and costs) or on a net basis (excluded from revenues) is an accounting policy decision that should be disclosed. The provisions of EITF 06-03 became effective for us as of January 1, 2007. EITF 06-03 did not have a material impact on our consolidated financial statements.

Accounting for Uncertainty in Income Taxes

On January 1, 2007, we adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109* (FIN 48), which clarifies the accounting for uncertainty in income tax positions. This interpretation requires us to recognize in our consolidated financial statements only those tax positions determined to be more likely than not of being sustained upon examination, based on the technical merits of the positions. Upon adoption, we recognized a $3 million reduction of previously recorded tax reserves, which was accounted for as an increase to the retained earnings balance as of January 1, 2007.

Quantifying Effects of Prior Years Misstatements in Current Year Financial Statements

In September 2006, the SEC issued Staff Accounting Bulletin (SAB) No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 requires that registrants quantify errors using both a balance sheet and statement of operations approach and evaluate whether

either approach results in a misstated amount that, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 became effective for us in the fourth quarter of 2006 and did not have a material impact on our consolidated financial statements.

Table of Contents

Recent Accounting Standards

Consideration Given by a Service Provider to Manufacturers or Resellers of Equipment

In September 2006, the EITF reached a consensus on EITF Issue No. 06-01, *Accounting for Consideration Given by a Service Provider to Manufacturers or Resellers of Equipment Necessary for an End-Customer to Receive Service from the Service Provider* (EITF 06-01). EITF 06-01 provides that consideration provided to the manufacturers or resellers of specialized equipment should be accounted for as a reduction of revenue if the consideration provided is in the form of cash and the service provider directs that such cash be provided directly to the customer. Otherwise, the consideration should be recorded as an expense. EITF 06-01 will be effective for us as of January 1, 2008 and is not expected to have a material impact on our consolidated financial statements.

Fair Value Measurements

In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurements* (FAS 157). FAS 157 establishes a single authoritative definition of fair value, sets out a framework for measuring fair value, and expands on required disclosures about fair value measurement. FAS 157 is effective for us on January 1, 2008 and will be applied prospectively. The provisions of FAS 157 are not expected to have a material impact on our consolidated financial statements.

Six months ended June 30, 2007 compared to six months ended June 30, 2006

Revenues. Revenues by major category were as follows (in millions):

	Six Months Ended June 30,		
	2007[(a)]	**2006[(b)]**	**% Change**
Subscription:			
Video	$ 5,083	$ 3,199	59%
High-speed data	1,818	1,169	56%
Voice	549	297	85%
Total Subscription	7,450	4,665	60%
Advertising	415	242	71%
Total	$ 7,865	$ 4,907	60%

(a) Revenues for the six months ended June 30, 2007 include the results of the Legacy Systems, the Acquired Systems and the Kansas City Pool as reported in the table below.

(b) Revenues for the six months ended June 30, 2006 consist only of the results of the Legacy Systems.

Revenues, including the components of Subscription revenues, for the Legacy Systems, the Acquired Systems, the Kansas City Pool and the Total Systems were as follows for the six months ended June 30, 2007 (in millions):

	Legacy	**Acquired**	**Kansas**	**Total**

	Systems	Systems	City Pool	Systems
Subscription:				
Video	$ 3,403	$ 1,407	$ 273	$ 5,083
High-speed data	1,314	404	100	1,818
Voice	475	34	40	549
Total Subscription	5,192	1,845	413	7,450
Advertising	257	140	18	415
Total	$ 5,449	$ 1,985	$ 431	$ 7,865

Subscriber numbers were as follows (in thousands):

	Consolidated Subscribers[a] as of June 30,			Managed Subscribers[a] as of June 30,		
	2007	2006	% Change	2007	2006	% Change
Basic video[b]	13,391	8,680	54%	13,391	9,469	41%
Digital video[c]	7,732	4,649	66%	7,732	4,971	56%
Residential high-speed data[d]	7,188	4,308	67%	7,188	4,649	55%
Commercial high-speed data[d]	263	183	44%	263	199	32%
Digital Phone[e]	2,335	1,350	73%	2,335	1,462	60%

(a) Historically, managed subscribers included our consolidated subscribers and subscribers in the Kansas City Pool of TKCCP, which we received on January 1, 2007 in the TKCCP asset distribution. Beginning January 1, 2007, subscribers in the Kansas City Pool are included in both managed and consolidated subscriber results as a result of the consolidation of the Kansas City Pool.

(b) Basic video subscriber numbers reflect billable subscribers who receive basic video service.

(c) Digital video subscriber numbers reflect billable subscribers who receive any level of video service via digital technology.

(d) High-speed data subscriber numbers reflect billable subscribers who receive our Road Runner high-speed data service or any of the other high-speed data services offered by us.

(e) Digital Phone subscriber numbers reflect billable subscribers who receive IP-based telephony service. Digital Phone subscribers exclude subscribers acquired from Comcast in the Exchange who receive traditional, circuit-switched telephone service (which totaled approximately 74,000 consolidated subscribers at June 30, 2007).

Subscription revenues increased for the six months ended June 30, 2007 as a result of increases in video, high-speed data and voice revenues. The increase in video revenues was primarily due to the impact of the Acquired Systems, the consolidation of the Kansas City Pool, the continued penetration of digital video services, video price increases and growth in basic video subscriber levels in the Legacy Systems. Aggregate revenues associated with our digital video services, including digital tiers, digital pay channels, pay-per-view, VOD, SVOD and DVRs, increased 70% to $1.172 billion for the six months ended June 30, 2007 from $689 million for the six months ended June 30, 2006.

High-speed data revenues for the six months ended June 30, 2007 increased primarily due to the impact of the Acquired Systems, the consolidation of the Kansas City Pool and growth in high-speed data subscribers in the Legacy Systems. Commercial high-speed data revenues increased to $207 million for the six months ended June 30, 2007 from $144 million for the six months ended June 30, 2006. Strong growth rates for high-speed data service revenues are expected to continue during the remainder of 2007.

The increase in voice revenues for the six months ended June 30, 2007 was primarily due to growth in Digital Phone subscribers in the Legacy Systems and the consolidation of the Kansas City Pool. Voice revenues associated with the Acquired Systems also included approximately $25 million for the six months ended June 30, 2007 of revenues associated with subscribers acquired from Comcast who received traditional, circuit-switched telephone service. Strong growth rates for voice revenues are expected to continue during the remainder of 2007.

Average monthly subscription revenue (which includes video, high-speed data and voice revenues) per basic video subscriber (subscription ARPU) increased approximately 3% to $93 for the six months ended June 30, 2007 from

approximately $90 for the six months ended June 30, 2006, primarily as a result of the increased penetration of advanced services (including digital video, high-speed data and Digital Phone) in the Legacy Systems and higher video prices, as discussed above, partially offset by lower penetration of advanced services in both the Acquired Systems and the Kansas City Pool.

For the six months ended June 30, 2007, Advertising revenues increased due to a $151 million increase in local advertising and a $22 million increase in national advertising, primarily due to the impact of the Acquired Systems and, to a lesser extent, the consolidation of the Kansas City Pool and growth in the Legacy Systems.

Costs of revenues. The major components of costs of revenues were as follows (in millions):

	Six Months Ended June 30,		
	2007	2006	% Change
Video programming	$ 1,762	$ 1,041	69%
Employee	1,078	605	78%
High-speed data	83	70	19%
Voice	223	131	70%
Other	609	355	72%
Total	$ 3,755	$ 2,202	71%

Costs of revenues increased 71%, and, as a percentage of revenues, were 48% for the six months ended June 30, 2007 compared to 45% for the six months ended June 30, 2006. The increase in costs of revenues was primarily related to the impact of the Acquired Systems and the consolidation of the Kansas City Pool, as well as increases in video programming, employee, voice and other costs. The increase in costs of revenues as a percentage of revenues reflects the lower margins in the Acquired Systems.

The increase in video programming costs was due primarily to the impact of the Acquired Systems and the consolidation of the Kansas City Pool, as well as contractual rate increases, the increase in video subscribers and the expansion of service offerings in the Legacy Systems. Video programming costs for the six months ended June 30, 2006 also included an $11 million benefit reflecting an adjustment in the amortization of certain launch support payments. Video programming costs in the Acquired Systems and the Kansas City Pool totaled $513 million and $101 million, respectively, for the six months ended June 30, 2007. Average per subscriber programming costs increased 9%, to $21.89 per month in 2007 from $20.06 per month in 2006.

Employee costs increased primarily due to the impact of the Acquired Systems, the consolidation of the Kansas City Pool, higher headcount resulting from the continued roll-out of advanced services and salary increases. Additionally, employee costs for the six months ended June 30, 2006 included a benefit of approximately $16 million (with an additional benefit of approximately $5 million included in selling, general and administrative expenses) due to changes in estimates related to prior period medical benefit accruals.

High-speed data service costs consist of the direct costs associated with the delivery of high-speed data services, including network connectivity and certain other costs. High-speed data service costs increased due to the impact of the Acquired Systems, the consolidation of the Kansas City Pool and subscriber growth, offset partially by a decrease in per subscriber connectivity costs.

Voice costs consist of the direct costs associated with the delivery of voice services, including network connectivity costs. Voice costs increased primarily due to growth in Digital Phone subscribers and the consolidation of the Kansas City Pool, offset partially by a decline in per subscriber connectivity costs.

Other costs increased primarily due to the impact of the Acquired Systems and the consolidation of the Kansas City Pool, as well as revenue-driven increases in fees paid to local franchise authorities and increases in other costs associated with the continued roll-out of advanced services in the Legacy Systems. Additionally, other costs for the six months ended June 30, 2006 included a benefit of $10 million related to third-party maintenance support payment

fees, reflecting the resolution of terms with an equipment vendor.

Selling, general and administrative expenses. The major components of selling, general and administrative expenses were as follows (in millions):

	Six Months Ended June 30,		
	2007	**2006**	**% Change**
Employee	$ 546	$ 400	37%
Marketing	255	166	54%
Other	542	317	71%
Total	$ 1,343	$ 883	52%

Selling, general and administrative expenses increased as a result of higher employee, marketing and other costs. Employee costs increased primarily due to the impact of the Acquired Systems, the consolidation of the Kansas City Pool, increased headcount resulting from the continued roll-out of advanced services, salary increases and an increase in equity-based compensation. Marketing costs increased as a result of the Acquired Systems and higher costs associated with the continued roll-out of advanced services. Other costs increased primarily due to the impact of the Acquired Systems, the consolidation of the Kansas City Pool and increases in administrative costs associated with the increase in headcount discussed above. Other costs for the six months ended June 30, 2006 also included an $11 million charge (with an additional $2 million charge included in costs of revenues) reflecting an adjustment to prior period facility rent expense.

Merger-related and restructuring costs. We expensed non-capitalizable merger-related costs associated with the Transactions of $7 million and $11 million for the six months ended June 30, 2007 and 2006, respectively. In addition, the results included restructuring costs of $9 million and $10 million for the six months ended June 30, 2007 and 2006, respectively. Our restructuring activities are part of our broader plans to simplify our organizational structure and enhance our customer focus. We are in the process of executing these initiatives and expect to incur additional costs as these plans continue to be implemented throughout 2007.

Reconciliation of Operating Income to OIBDA. The following table reconciles Operating Income to OIBDA. In addition, the table provides the components from Operating Income to net income for purposes of the discussions that follow (in millions):

	Six Months Ended June 30,		
	2007	2006	% Change
Net income	$ 548	$ 530	3%
Discontinued operations, net of tax		(64)	(100)%
Cumulative effect of accounting change, net of tax		(2)	(100)%
Income before discontinued operations and cumulative effect of accounting change	548	464	18%
Income tax provision	359	307	17%
Income before income taxes, discontinued operations and cumulative effect of accounting change	907	771	18%
Interest expense, net	454	225	102%
Income from equity investments, net	(7)	(42)	(83)%
Minority interest expense, net	79	43	84%
Other income, net	(143)	(1)	NM
Operating Income	1,290	996	30%
Depreciation	1,318	768	72%
Amortization	143	37	286%
OIBDA	$ 2,751	$ 1,801	53%

NM Not meaningful.

OIBDA. OIBDA increased for the six months ended June 30, 2007 principally due to revenue growth, partially offset by higher costs of revenues and selling, general and administrative expenses, as discussed above.

Depreciation expense. Depreciation expense increased for the six months ended June 30, 2007 primarily due to the impact of the Acquired Systems, the consolidation of the Kansas City Pool and demand-driven increases in recent years of purchases of customer premise equipment, which generally has a significantly shorter useful life compared to the mix of assets previously purchased.

Amortization expense. Amortization expense increased for the six months ended June 30, 2007 primarily as a result of the amortization of intangible assets related to customer relationships associated with the Acquired Systems. This was partially offset by a decrease due to the absence during the second quarter of

2007 of amortization expense associated with customer relationships recorded in connection with the restructuring of TWE in 2003, which were fully amortized at the end of the first quarter of 2007.

Operating Income. Operating Income increased for the six months ended June 30, 2007 primarily due to the increase in OIBDA, partially offset by increases in both depreciation and amortization expense, as discussed above.

We anticipate that OIBDA and Operating Income will continue to increase during the second half of 2007 as compared to the similar period in the prior year, although the full year rates of growth are expected to be lower than those experienced in the first half of 2007 because the last five months of 2006 also included contributions from the Acquired Systems.

Interest expense, net. Interest expense, net, increased for the six months ended June 30, 2007 primarily due to an increase in long-term debt and mandatorily redeemable preferred membership units issued by a subsidiary in connection with the Transactions, partially offset by a decrease in mandatorily redeemable preferred equity issued by a subsidiary as a result of the ATC Contribution.

Income from equity investments, net. Income from equity investments, net, decreased for the six months ended June 30, 2007 primarily due to our no longer treating TKCCP as an equity method investment. Refer to Overview Recent Developments TKCCP Joint Venture for additional information.

Minority interest expense, net. Minority interest expense, net, increased for the six months ended June 30, 2007 primarily reflecting the change in the ownership structure of our company and TWE as a result of the ATC Contribution and the Redemptions.

Other income, net. We recorded a pretax gain of approximately $146 million for the six months ended June 30, 2007 as a result of the distribution of TKCCP s assets, which was treated as a sale of our 50% equity interest in the Houston Pool. Refer to Overview Recent Developments TKCCP Joint Venture for additional information.

Income tax provision. Our income tax provision has been prepared as if we operated as a stand-alone taxpayer for all periods presented. For the six months ended June 30, 2007 and 2006, we recorded income tax provisions of $359 million and $307 million, respectively. The effective tax rate was approximately 40% for both the six months ended June 30, 2007 and 2006.

Income before discontinued operations and cumulative effect of accounting change. Income before discontinued operations and cumulative effect of accounting change was $548 million for the six months ended June 30, 2007 compared to $464 million for the six months ended June 30, 2006. Basic and diluted income per common share before discontinued operations and cumulative effect of accounting change were $0.56 for the six months ended June 30, 2007 compared to $0.47 for the six months ended June 30, 2006. These increases were primarily due to increases in Operating Income and other income, net, partially offset by increases in interest expense, net, income tax provision and minority interest expense, net, and a decrease in income from equity investments, net.

Discontinued operations, net of tax. Discontinued operations, net of tax, reflect the impact of treating the Transferred Systems as discontinued operations. For the six months ended June 30, 2006, we recognized pretax income applicable to these systems of $107 million ($64 million, net of tax).

Cumulative effect of accounting change, net of tax. For the six months ended June 30, 2006, we recorded a benefit of $2 million, net of tax, as the cumulative effect of a change in accounting principle upon the adoption of FAS 123R to recognize the effect of estimating the number of Time Warner equity-based awards granted to our employees prior to January 1, 2006 that are not ultimately expected to vest.

Net income and net income per common share. Net income was $548 million for the six months ended June 30, 2007 compared to $530 million for the six months ended June 30, 2006. Basic and diluted net income per common share were $0.56 for the six months ended June 30, 2007 compared to $0.53 for the six months ended June 30, 2006.

Full year 2006 compared to full year 2005

Revenues. Revenues by major category were as follows (in millions):

	Year Ended December 31,		
	2006	2005	% Change
Subscription:			
Video	$ 7,632	$ 6,044	26%
High-speed data	2,756	1,997	38%
Voice	715	272	163%
Total Subscription	11,103	8,313	34%
Advertising	664	499	33%
Total	$ 11,767	$ 8,812	34%

As previously reported, Adelphia and Comcast employed methodologies that differed slightly from those used by us to determine subscriber numbers. As of September 30, 2006, we had converted subscriber numbers for most of the Acquired Systems to our methodology. During the fourth quarter of 2006, we completed the conversion of such data, which resulted in a reduction of approximately 46,000 basic video subscribers in the Acquired Systems. Subscriber numbers were as follows (in thousands):

	Consolidated Subscribers as of December 31,			Managed Subscribers[a] as of December 31,		
	2006	2005	% Change	2006	2005	% Change
Basic video[b]	12,614	8,603	47%	13,402	9,384	43%
Digital video[c]	6,938	4,294	62%	7,270	4,595	58%
Residential high-speed data[d]	6,270	3,839	63%	6,644	4,141	60%
Commercial high-speed data[d]	230	169	36%	245	183	34%
Digital Phone[e]	1,719	913	88%	1,860	998	86%

(a) Managed subscribers include consolidated subscribers and subscribers in the Kansas City Pool of TKCCP, which we received on January 1, 2007 in the TKCCP asset distribution. Since January 1, 2007, subscribers in the Kansas City Pool have been included in consolidated subscriber results.

(b) Basic video subscriber numbers reflect billable subscribers who receive basic video service.

(c) Digital video subscriber numbers reflect billable subscribers who receive any level of video service via digital technology.

(d) High-speed data subscriber numbers reflect billable subscribers who receive our Road Runner high-speed data service or any of the other high-speed data services offered by us.

(e) Digital Phone subscriber numbers reflect billable subscribers who receive IP-based telephony service. Digital Phone subscribers exclude subscribers acquired from Comcast in the Exchange who receive traditional, circuit-switched telephone service (which totaled approximately 106,000 consolidated subscribers at

December 31, 2006).

Subscription revenues increased in 2006 as a result of increases in video, high-speed data and Digital Phone revenues. The increase in video revenues in 2006 was primarily due to the impact of the Acquired Systems, the continued penetration of digital video services and video price increases and growth in basic video subscriber levels in the Legacy Systems. Video revenues in the Acquired Systems totaled $1.165 billion in 2006. Aggregate revenues associated with our digital video services, including digital tiers, Pay-Per-View, VOD, SVOD and DVRs, increased 41% to $1.027 billion in 2006 from $727 million in 2005.

High-speed data revenues in 2006 increased primarily due to the Acquired Systems and growth in high-speed data subscribers. High-speed data revenues in the Acquired Systems totaled $321 million in 2006. Consolidated commercial high-speed data revenues increased to $318 million in 2006 from $241 million in 2005. Consolidated residential high-speed data penetration, expressed as a percentage of service-ready homes, was 26.1% at both December 31, 2006 and December 31, 2005 as a result of strong growth in the Legacy Systems offset by lower penetration rates in the Acquired Systems.

The increase in voice revenues in 2006 was primarily due to growth in Digital Phone subscribers. Voice revenues in 2006 also included approximately $27 million of revenues associated with subscribers acquired from Comcast who received traditional, circuit-switched telephone service. As of December 31, 2006, Digital Phone service was only available in some of the Acquired Systems on a limited basis. Consolidated Digital

Table of Contents

Phone penetration, expressed as a percentage of service-ready homes, increased to 11.3% at December 31, 2006 from 7.0% at December 31, 2005.

Subscription ARPU increased approximately 11% to $90 in 2006 from approximately $81 in 2005 as a result of the increased penetration in advanced services and higher video rates, as discussed above.

Advertising revenues increased primarily due to a $136 million increase in local advertising and a $29 million increase in national advertising in 2006, primarily attributable to the Acquired Systems. Advertising revenues in the Acquired Systems totaled $137 million in 2006. Excluding the results of the Acquired Systems, Advertising revenues increased slightly as a result of an increase in political advertising revenues in 2006.

Costs of revenues. The major components of costs of revenues were as follows (in millions):

	Year Ended December 31,		
	2006	**2005**	**% Change**
Video programming	$ 2,523	$ 1,889	34%
Employee	1,505	1,156	30%
High-speed data	156	102	53%
Voice	309	122	153%
Other	863	649	33%
Total	$ 5,356	$ 3,918	37%

Costs of revenues increased 37%, and, as a percentage of revenues, were 46% in 2006 compared to 44% in 2005. The increase in costs of revenues is primarily related to the impact of the Acquired Systems, as well as increases in video programming costs, employee costs and Digital Phone costs. The increase in costs of revenues as a percentage of revenues reflects the items noted above and lower margins for the Acquired Systems.

The increase in video programming costs was due primarily to the impact of the Acquired Systems, higher sports network programming costs, the increase in video subscribers and non-sports-related contractual rate increases. Video programming costs in the Acquired Systems were $409 million in 2006. Per subscriber programming costs increased 11%, to $20.33 per month in 2006 from $18.35 per month in 2005. The increase in per subscriber programming costs was primarily due to higher sports network programming costs and non-sports-related contractual rate increases. Video programming costs in both 2006 and 2005 also benefited from comparable amounts of adjustments related to changes in programming estimates and the settlement of terms with program vendors.

Employee costs increased primarily due to the impact of the Acquired Systems, salary increases and higher headcount resulting from the roll-out of advanced services. These increases were partially offset by a benefit of approximately $32 million related to both changes in estimates and a correction of prior period medical benefit accruals.

High-speed data service costs consist of the direct costs associated with the delivery of high-speed data services, including network connectivity and certain other costs. High-speed data service costs increased due to the Acquired Systems, subscriber growth and an increase in per subscriber connectivity costs.

Voice costs consist of the direct costs associated with the delivery of Digital Phone services, including network connectivity and certain other costs. Voice costs increased primarily due to the growth in Digital Phone subscribers.

Other costs increased due to revenue-driven increases in fees paid to local franchise authorities, as well as increases in other costs associated with the continued roll-out of advanced services, including Digital Phone.

Selling, general and administrative expenses. The major components of selling, general and administrative expenses were as follows (in millions):

	Year Ended December 31,		
	2006	2005	% Change
Employee	$ 872	$ 678	29%
Marketing	414	306	35%
Other	840	545	54%
Total	$ 2,126	$ 1,529	39%

Selling, general and administrative expenses increased as a result of higher employee, marketing and other costs. Employee costs increased primarily due to the impact of the Acquired Systems, increased headcount resulting from the continued roll-out of advanced services and salary increases, partially offset by a benefit of approximately $8 million related to both changes in estimates and a correction of prior period medical benefit accruals. Marketing costs increased as a result of the Acquired Systems and higher costs associated with the roll-out of advanced services. Other costs increased primarily due to the impact of the Acquired Systems and increases in administrative costs associated with the increase in headcount discussed above.

Merger-related and restructuring costs. In 2006 and 2005, we expensed $38 million and $8 million, respectively, of non-capitalizable merger-related costs associated with the Transactions. These merger-related costs are related primarily to consulting fees concerning integration planning for the Transactions and other costs incurred in connection with notifying new customers of the change in cable providers. In addition, the results for 2006 include $18 million of restructuring costs. The results for 2005 included $35 million of restructuring costs, primarily associated with the early retirement of certain senior executives and the closing of several local news channels, partially offset by a $1 million reduction in restructuring charges, reflecting changes to previously established restructuring accruals. Our restructuring activities are part of our broader plans to simplify our organizational structure and enhance our customer focus.

Reconciliation of Operating Income to OIBDA. The following table reconciles Operating Income to OIBDA. In addition, the table provides the components from Operating Income to net income for purposes of the discussions that follow (in millions):

	Year Ended December 31,		
	2006	2005	% Change
Net income	$ 1,976	$ 1,253	58%
Discontinued operations, net of tax	(1,038)	(104)	NM
Cumulative effect of accounting change, net of tax	(2)		NM
Income before discontinued operations and cumulative effect of accounting change	936	1,149	(19)%
Income tax provision	620	153	305%

Income before income taxes, discontinued operations and cumulative effect of accounting change	1,556	1,302	20%
Interest expense, net	646	464	39%
Income from equity investments, net	(129)	(43)	200%
Minority interest expense, net	108	64	69%
Other income, net	(2)	(1)	100%
Operating Income	2,179	1,786	22%
Depreciation	1,883	1,465	29%
Amortization	167	72	132%
OIBDA	$ 4,229	$ 3,323	27%

NM Not meaningful.

OIBDA. OIBDA increased to $4.229 billion in 2006 from $3.323 billion in 2005. This increase was attributable to the impact of the Acquired Systems and revenue growth (particularly growth in high margin high-speed data revenues), partially offset by higher costs of revenues and selling, general and administrative expenses, as discussed above.

Depreciation expense. Depreciation expense increased to $1.883 billion in 2006 from $1.465 billion in 2005 primarily due to the impact of the Acquired Systems and demand-driven increases in recent years of purchases of customer premise equipment, which generally has a significantly shorter useful life compared to the mix of assets previously purchased.

Amortization expense. Amortization expense increased to $167 million in 2006 from $72 million in 2005 as a result of the amortization of intangible assets associated with customer relationships acquired as part of the Transactions.

Operating Income. Operating Income increased to $2.179 billion in 2006 from $1.786 billion in 2005 primarily due to the increase in OIBDA, partially offset by the increase in depreciation and amortization expense, as discussed above.

Interest expense, net. Interest expense, net, increased to $646 million in 2006 from $464 million in 2005 primarily due to an increase in debt levels attributable to the Transactions.

Income from equity investments, net. Income from equity investments, net, increased to $129 million in 2006 from $43 million in 2005. This increase was primarily due to an increase in the profitability of TKCCP, as well as changes in the economic benefit of TWE s partnership interest in TKCCP due to the then pending dissolution of the partnership triggered by Comcast on July 3, 2006. Beginning in the third quarter of 2006, the income from TKCCP reflects 100% of the operations of the Kansas City Pool and does not reflect any of the economic benefits of the Houston Pool. In addition, income from equity investments, net reflects the benefit from the allocation of all the TKCCP debt to the Houston Pool, which reduced interest expense for the Kansas City Pool. We received the Kansas City Pool on January 1, 2007 in the TKCCP asset distribution and began consolidating our results on that date.

Minority interest expense, net. Minority interest expense, net, increased to $108 million in 2006 from $64 million in 2005. This increase primarily reflects a change in the ownership structure of us and TWE. At December 31, 2005, ATC, a subsidiary of Time Warner, and Comcast had residual equity ownership interests in TWE of 1% and 4.7%, respectively. On July 28, 2006, ATC contributed its 1% common equity interest (as well as its $2.4 billion preferred equity interest) in TWE to TW NY Holding in exchange for an approximately 12.4% non-voting common stock interest in TW NY Holding. On July 31, 2006, we and TWE redeemed Comcast s ownership interests in us and TWE, respectively.

Income tax provision. Our income tax provision has been prepared as if we operated as a stand-alone taxpayer for all periods presented. In 2006 and 2005, we recorded income tax provisions of $620 million and $153 million, respectively. The effective tax rate was approximately 40% in 2006 compared to approximately 12% in 2005. The increase in the effective tax rate was primarily due to the favorable impact in 2005 of state tax law changes in Ohio, an ownership restructuring in Texas and certain other methodology changes. The income tax provision for 2005, absent the noted deferred tax impacts, would have been $532 million, with a related effective tax rate of approximately 41%.

Income before discontinued operations and cumulative effect of accounting change. Income before discontinued operations and cumulative effect of accounting change was $936 million in 2006 compared to $1.149 billion in 2005. Basic and diluted income per common share before discontinued operations and cumulative effect of accounting change were $0.95 in 2006 compared to $1.15 in 2005. These decreases were primarily due to the increase in the income tax provision, discussed above, and higher interest expense, partially offset by increased Operating Income and income from equity investments, net.

Discontinued operations, net of tax. Discontinued operations, net of tax, reflect the impact of treating the Transferred Systems as discontinued operations. For the years ended December 31, 2006 and 2005, we recognized pretax income applicable to these systems of $285 million and $163 million, respectively,

($1.038 billion and $104 million, respectively, net of tax). Included in the 2006 results are a pretax gain of approximately $165 million on the Transferred Systems and a tax benefit of approximately $800 million comprised of a tax benefit of $814 million on the Redemptions, partially offset by a provision of $14 million on the Exchange. The tax benefit of $814 million resulted primarily from the reversal of historical deferred tax liabilities that had existed on systems transferred to Comcast in the TWC Redemption. The TWC Redemption was designed to qualify as a tax-free split-off under section 355 of the Tax Code, and as a result, such liabilities were no longer required. However, if the IRS were successful in challenging the tax-free characterization of the TWC Redemption, an additional cash liability on account of taxes of up to an estimated $900 million could become payable by us. See Recent Developments Tax Benefits from the Transactions.

Cumulative effect of accounting change, net of tax. In 2006, we recorded a benefit of $2 million, net of tax, as the cumulative effect of a change in accounting principle upon the adoption of FAS 123R in 2006, to recognize the effect of estimating the number of Time Warner equity-based awards granted to our employees prior to January 1, 2006 that are not ultimately expected to vest.

Net income and net income per common share. Net income was $1.976 billion in 2006 compared to $1.253 billion in 2005. Basic and diluted net income per common share were $2.00 in 2006 compared to $1.25 in 2005.

Full year 2005 compared to full year 2004

Revenues. Revenues by major category were as follows (in millions):

	Year Ended December 31,		
	2005	**2004**	**% Change**

NM Not meaningful.

[a] Managed subscribers include consolidated subscribers and subscribers in the Kansas City Pool of TKCCP, which we received on January 1, 2007 in the TKCCP asset distribution. Since January 1, 2007, subscribers in the Kansas City Pool have been included in consolidated subscriber results.

[b] Basic video subscriber numbers reflect billable subscribers who receive basic video service.

[c] Digital video subscriber numbers reflect billable subscribers who receive any level of video service via digital technology.

[d] High-speed data subscriber numbers reflect billable subscribers who receive our Road Runner high-speed data service or any of the other high-speed data services offered by us.

[e] Digital Phone subscriber numbers reflect billable subscribers who receive IP-based telephony service.

Subscription revenues increased in 2005 as a result of increases in video, high-speed data and Digital Phone revenues. Total video revenues increased by $338 million, or 6%, over 2004, primarily due to continued penetration of digital video services and video price increases, as well as an increase in basic video subscribers

between December 31, 2004 and December 31, 2005. Aggregate revenues associated with digital video services, including digital tiers, Pay-Per-View, VOD, SVOD and DVRs, increased 19% from $612 million in 2004 to $727 million in 2005.

High-speed data revenues increased in 2005 primarily due to growth in high-speed data subscribers. Consolidated residential high-speed data penetration, expressed as a percentage of service-ready homes, increased from 21.8% at December 31, 2004 to 26.1% at December 31, 2005. Commercial high-speed data revenues increased from $181 million in 2004 to $241 million in 2005.

The increase in voice revenues in 2005 was primarily due to the full-scale launch of Digital Phone across our footprint. Digital Phone was available to nearly 88% of our consolidated homes passed as of December 31, 2005.

Subscription ARPU increased approximately 13% to $81 in 2005 from approximately $72 in 2004 as a result of the increased penetration in advanced services and higher video prices, as discussed above.

Advertising revenues in 2005 increased as a result of an approximate $19 million increase in national advertising, partially offset by a $4 million decline in local advertising. The increase in national advertising was driven by growth in both the rate and volume of advertising spots sold. Local advertising declined as a result of a decrease in political advertising.

Costs of revenues. The primary components of costs of revenues were as follows (in millions):

	Year Ended December 31,		
	2005	**2004**	**% Change**
Video programming	$ 1,889	$ 1,709	11%
Employee	1,156	1,002	15%
High-speed data	102	128	(20)%
Voice	122	14	NM
Other	649	603	8%
Total	$ 3,918	$ 3,456	13%

NM Not meaningful.

Total video programming costs increased by 11% in 2005. On a per subscriber basis, programming costs increased by 11%, from $16.60 per month in 2004 to $18.35 per month in 2005. These increases were primarily attributable to contractual rate increases and the ongoing deployment of new service offerings, including VOD and SVOD.

Employee costs increased in 2005, in part, as a result of increased headcount driven by new service deployment initiatives, including Digital Phone. Salary increases also contributed to the increase in employee costs.

High-speed data costs have benefited as connectivity costs have continued to decrease on a per subscriber basis due to industry-wide cost reductions.

Voice costs increased due to the ongoing deployment of Digital Phone.

Other costs increased due largely to the revenue-driven increase in fees paid to local franchise authorities.

Selling, general and administrative expenses. The primary components of selling, general and administrative expenses were as follows (in millions):

	Year Ended December 31,		
	2005	2004	% Change
Employee	$ 678	$ 632	7%
Marketing	306	272	13%
Other	545	546	
Total	$ 1,529	$ 1,450	5%

Table of Contents

Employee costs increased primarily due to an increase in headcount associated with the continued roll-out of advanced services, as well as salary increases, partially offset by a decrease in equity-based compensation expense. Marketing costs increased due to a continued focus on aggressive marketing of our broad range of services. Other costs decreased slightly primarily due to $34 million of costs incurred in 2004 in connection with a settlement related to Urban Cable, partially offset by an increase in legal fees.

Merger-related and restructuring costs. In 2005, we expensed approximately $8 million of non-capitalizable merger-related costs associated with the Adelphia acquisition and the Exchange. In addition, the 2005 results include approximately $35 million of restructuring costs, primarily associated with the early retirement of certain senior executives and the closing of several local news channels, partially offset by a $1 million reduction in restructuring charges, reflecting changes to previously established restructuring accruals. These charges are part of our broader plans to simplify our organizational structure and enhance our customer focus.

Reconciliation of Operating Income to OIBDA. The following table reconciles Operating Income to OIBDA. In addition, the table provides the components from Operating Income to net income for purposes of the discussions that follow (in millions):

	Year Ended December 31,		
	2005	**2004**	**% Change**
Net income	$ 1,253	$ 726	73%
Discontinued operations, net of tax	(104)	(95)	9%
Income before discontinued operations	1,149	631	82%
Income tax provision	153	454	(66)%
Income before income taxes and discontinued operations	1,302	1,085	20%
Interest expense, net	464	465	
Income from equity investments, net	(43)	(41)	5%
Minority interest expense, net	64	56	14%
Other income, net	(1)	(11)	(91)%
Operating Income	1,786	1,554	15%
Depreciation	1,465	1,329	10%
Amortization	72	72	
OIBDA	$ 3,323	$ 2,955	12%

OIBDA. OIBDA increased $368 million, or 12%, from $2.955 billion in 2004 to $3.323 billion in 2005. This increase was driven by revenue growth (particularly high margin high-speed data revenues), partially offset by increases in costs of revenues, selling, general and administrative expenses and the $42 million of merger-related and restructuring charges in 2005, discussed above.

Depreciation expense. Depreciation expense increased 10% to $1.465 billion in 2005 from $1.329 billion in 2004. This increase was primarily due to the increased spending on customer premise equipment in recent years. Such equipment generally has a shorter useful life compared to the mix of assets previously purchased.

Operating Income. Operating Income increased to $1.786 billion in 2005 from $1.554 billion in 2004, due to the increase in OIBDA, partially offset by the increase in depreciation expense.

Interest expense, net. Interest expense, net, decreased slightly from $465 million in 2004 to $464 million in 2005, primarily due to an increase in interest income associated with loans to TKCCP, which was largely offset by an increase in interest expense related to long-term debt.

Income from equity investments, net. Income from equity investments, net, increased slightly from $41 million in 2004 to $43 million in 2005. This increase was primarily due to an increase in the profitability of iN DEMAND and a decrease in losses incurred by local news joint ventures, partially offset by a decline in profitability of TKCCP, as a result of higher interest expense associated with an increase in debt at the joint venture.

Minority interest expense, net. The results of TWE are consolidated by us for financial reporting purposes. Minority interest expense, net, increased from $56 million in 2004 to $64 million in 2005. This increase primarily reflects an increase in the profitability of TWE, in which Time Warner and Comcast had residual equity ownership interests of 1% and 4.7%, respectively, at December 31, 2005.

Other income, net. Other income, net, decreased from $11 million in 2004 to $1 million in 2005 due to a reversal of previously established reserves associated with the dissolution of a joint venture in 2004.

Income tax provision. Our income tax provision has been prepared as if we operated as a stand-alone taxpayer for all periods presented. The income tax provision decreased from $454 million in 2004 to $153 million in 2005. The effective tax rate was approximately 42% in 2004 compared to 12% in 2005. The decrease in the tax provision and the effective tax rate was primarily a result of the favorable impact of state tax law changes in Ohio, an ownership restructuring in Texas and certain other methodology changes, partially offset by an increase in earnings during 2005 as compared to 2004. The income tax provision for 2005, absent the noted deferred tax impacts, would have been $532 million, with a related effective tax rate of approximately 41%.

Income before discontinued operations. Income before discontinued operations was $1.149 billion in 2005 compared to $631 million in 2004. Basic and diluted income per common share before discontinued operations and cumulative effect of accounting change were $1.15 in 2005 compared to $0.63 in 2004. These increases were due to higher Operating Income and a lower income tax provision, partially offset by higher minority interest expense.

Discontinued operations, net of tax. Discontinued operations, net of tax, reflect the impact of treating the Transferred Systems as discontinued operations. The increase to $104 million in 2005 from $95 million in 2004 was as a result of higher earnings at the Transferred Systems.

Net income and net income per common share. Net income was $1.253 billion in 2005 compared to $726 million in 2004. Basic and diluted net income per common share were $1.25 in 2005 compared to $0.73 in 2004.

Financial Condition and Liquidity

Current Financial Condition

Management believes that cash generated by or available to us should be sufficient to fund our capital and liquidity needs for the foreseeable future. Our sources of cash include cash provided by operating activities, cash and equivalents on hand, $3.327 billion of available borrowing capacity under our committed credit facilities and commercial paper program as of June 30, 2007 and access to the capital markets.

At June 30, 2007, we had $13.871 billion of debt, $70 million of cash and equivalents (net debt of $13.801 billion), $300 million of TW NY Series A Preferred Membership Units and $24.058 billion of shareholders equity. At December 31, 2006, we had $14.432 billion of debt, $51 million of cash and equivalents (net debt of $14.381 billion), $300 million of TW NY Series A Preferred Membership Units and $23.564 billion of shareholders equity. At December 31, 2005, we had $4.463 billion of debt, $12 million of cash and equivalents (net debt of $4.451 billion), $2.400 billion of mandatorily redeemable preferred equity issued by a subsidiary and $20.347 billion of shareholders equity.

Table of Contents

The following table shows the significant items contributing to the change in net debt from December 31, 2005 to December 31, 2006 and from December 31, 2006 to June 30, 2007 (in millions):

Balance at December 31, 2005	$ 4,451
Cash provided by operating activities	(3,595)
Proceeds from the repayment by Comcast of TKCCP debt owed to TWE-A/N	(631)
Proceeds from the issuance of TW NY Series A Preferred Membership Units	(300)
Capital expenditures from continuing operations	2,718
Capital expenditures from discontinued operations	56
Redemption of Comcast s interests in us and TWE	2,004
Cash used for the Adelphia acquisition and the Exchange[(a)]	9,080
Investment in Wireless Joint Venture	633
All other, net	(35)
Balance at December 31, 2006[(b)]	14,381
Cash provided by operating activities	(2,204)
Capital expenditures from continuing operations	1,551
All other, net	73
Balance at June 30, 2007[(b)]	$ 13,801

(a) Included in the cash used for the Adelphia acquisition and the Exchange is cash paid at closing of $8.935 billion, a contractual closing adjustment of $67 million and other transaction-related costs of $78 million paid in 2006.

(b) Includes an unamortized fair value adjustment of $140 million and $134 million at December 31, 2006 and June 30, 2007, respectively.

In connection with the closing of the Adelphia acquisition, TW NY paid $8.935 billion in cash, after giving effect to certain purchase price adjustments, that was funded by an intercompany loan from us and the proceeds of the private placement issuance of $300 million of TW NY Series A Preferred Membership Units with a mandatory redemption date of August 1, 2013 and a cash dividend rate of 8.21% per annum. The intercompany loan was financed by borrowings under the Cable Revolving Facility and the Term Facilities described below and the issuance of commercial paper. In connection with the TWC Redemption, Comcast received 100% of the capital stock of a subsidiary of ours holding both cable systems and approximately $1.857 billion in cash that was funded through the issuance of our commercial paper and borrowings under the Cable Revolving Facility. In addition, in connection with the TWE Redemption, Comcast received 100% of the equity interests in a subsidiary of TWE holding both cable systems and approximately $147 million in cash that was funded by the repayment of a pre-existing loan TWE had made to us (which repayment we funded through the issuance of commercial paper and borrowings under the Cable Revolving Facility). Additionally, ATC s 1% common equity interest and $2.4 billion preferred equity interest in TWE were contributed to TW NY Holding in exchange for an approximately 12.4% non-voting common stock interest in TW NY Holding. Following these transactions, TW NY also exchanged certain cable systems with Comcast and TW NY paid Comcast approximately $67 million for certain adjustments related to the Exchange. See Bank Credit Agreements and Commercial Paper Program, Mandatorily Redeemable Preferred Equity and TW NY Mandatorily Redeemable Non-voting Series A Preferred Membership Units for additional information on the indebtedness incurred and preferred membership units issued in connection with the Adelphia acquisition and the Redemptions.

We are a participant in a wireless spectrum joint venture with several other cable companies (the Wireless Joint Venture), which, on November 29, 2006, was awarded certain advanced wireless spectrum licenses in an FCC

auction. In 2006, we invested approximately $633 million in the Wireless Joint Venture. Sprint was a participant in the Wireless Joint Venture until August 2007. Under the joint venture agreement, Sprint exercised its option to have the Wireless Joint Venture purchase its interests in the Wireless Joint Venture for an amount equal to Sprint s capital contributions. In August 2007, we contributed $28 million to the Wireless Joint Venture to fund our share of the payment to Sprint. Under certain circumstances, the remaining members have the ability to exit the Wireless Joint Venture and receive from the Wireless Joint Venture, subject to certain limitations and adjustments, advanced wireless spectrum licenses covering their operating areas.

Table of Contents

On October 2, 2006, we received approximately $630 million from Comcast for the repayment of debt owed by TKCCP to TWE-A/N that had been allocated to the Houston Pool.

Cash Flows

Cash and equivalents increased by $19 million and $14 million for the six months ended June 30, 2007 and 2006, respectively, and by $39 million for the year ended December 31, 2006. Cash and equivalents decreased by $90 million and $227 million for the years ended December 31, 2005 and 2004, respectively. Components of these changes are discussed below in more detail.

Operating Activities

Details of cash provided by operating activities are as follows (in millions):

	Six Months Ended June 30,		Year Ended December 31,		
	2007	2006	2006	2005	2004
OIBDA	$ 2,751	$ 1,801	$ 4,229	$ 3,323	$ 2,955
Net interest payments[a]	(400)	(251)	(662)	(507)	(492)
Net income taxes refunded (paid)[b]	(50)	(143)	(474)	(535)	13
Noncash equity-based compensation	38	21	33	53	70
Net cash flows from discontinued operations[c]	46	119	112	237	240
Merger-related and restructuring payments, net of accruals[d]	(8)	(1)	(3)	30	
Pension plan contributions			(101)	(91)	(150)
All other, net, including working capital changes	(173)	(5)	461	30	25
Cash provided by operating activities	$ 2,204	$ 1,541	$ 3,595	$ 2,540	$ 2,661

(a) Includes interest income received of $6 million for the six months ended June 30, 2007 (none for the six months ended June 30, 2006 and the years ended December 31, 2006, 2005 and 2004).

(b) Includes income tax refunds received of $5 million and $4 million for the six months ended June 30, 2007 and 2006, respectively, and $4 million, $6 million and $61 million for the years ended December 31, 2006, 2005 and 2004, respectively.

(c) Reflects net income from discontinued operations of $64 million for the six months ended June 30, 2006 (none for the six months ended June 30, 2007) and $1.038 billion, $104 million and $95 million for the years ended December 31, 2006, 2005 and 2004, respectively, as well as noncash gains and expenses and working capital-related adjustments of $46 million and $55 million for the six months ended June 30, 2007 and 2006, respectively, and $(926) million, $133 million and $145 million for the years ended December 31, 2006, 2005 and 2004, respectively.

(d) Includes payments for merger-related and restructuring costs and payments for certain other merger-related liabilities, net of accruals.

Cash provided by operating activities increased from $1.541 billion for the six months ended June 30, 2006 to $2.204 billion for the six months ended June 30, 2007. This increase was primarily related to an increase in OIBDA (due to revenue growth, partially offset by increases in costs of revenues and selling, general and administrative expenses, as described above) and a decrease in net income taxes paid (primarily as a result of the timing of tax payments to Time Warner under our tax sharing arrangement), which were partially offset by an increase in working capital requirements, an increase in net interest payments reflecting the increase in debt levels attributable to the Transactions and a decrease in cash relating to discontinued operations. The increase in working capital requirements was primarily due to the timing of accounts payable and accrual payments.

Cash provided by operating activities increased from $2.540 billion in 2005 to $3.595 billion in 2006. This increase was primarily related to an increase in OIBDA (attributable to the impact of the Acquired Systems and revenue growth in the Legacy Systems (particularly high margin high-speed data revenues), partially offset by increases in costs of revenues and selling, general and administrative expenses), a decrease in working capital requirements and a decrease in net income taxes paid, partially offset by lower net cash flows from discontinued operations, an increase in net interest payments and an increase in merger-related and restructuring payments. The decrease in working capital requirements was primarily due to the impact of the Transactions, as well as the timing of accounts payable and accrual payments, partially offset by lower cash collections on receivables.

Table of Contents

Cash provided by operating activities decreased from $2.661 billion in 2004 to $2.540 billion in 2005. This decrease was principally due to an increase in net cash tax payments, partially offset by an increase in OIBDA (attributable to revenue growth (particularly high margin high-speed data revenues), partially offset by increases in costs of revenues, selling, general and administrative expenses and merger-related and restructuring costs), and a decrease in contributions to our pension plans.

Investing Activities

Details of cash used by investing activities are as follows (in millions):

	Six Months Ended June 30,		Year Ended December 31,		
	2007	2006	2006	2005	2004
Investments and acquisitions, net of cash acquired and distributions received:					
Distributions received from an investee	$ 47	$	$	$	$
Adelphia acquisition and the Exchange[(a)]	(16)	(11)	(9,080)		
Wireless Joint Venture	(1)		(633)		
Redemption of Comcast s interest in TWE			(147)		
All other	(7)	(94)	(2)	(113)	(103)
Capital expenditures from continuing operations	(1,551)	(1,018)	(2,718)	(1,837)	(1,559)
Capital expenditures from discontinued operations		(48)	(56)	(138)	(153)
Proceeds from the repayment by Comcast of TKCCP debt owed to TWE-A/N			631		
Proceeds from disposal of property, plant and equipment	4	6	6	4	3
Investments and acquisitions, from discontinued operations				(48)	(4)
Cash used by investing activities	$ (1,524)	$ (1,165)	$ (11,999)	$ (2,132)	$ (1,816)

(a) Included in the cash used for the Adelphia acquisition and the Exchange for the year ended December 31, 2006 is cash paid at closing of $8.935 billion, a contractual closing adjustment of $67 million and other transaction-related costs of $78 million paid in 2006.

Cash used by investing activities increased from $1.165 billion for the six months ended June 30, 2006 to $1.524 billion for the six months ended June 30, 2007. This increase was principally due to an increase in capital expenditures from continuing operations, driven by capital expenditures associated with the Acquired Systems, as well as the continued roll-out of advanced digital services. The increase was partially offset by an increase in net cash acquired from investments, which included distributions received from Sterling Entertainment Enterprises, LLC (dba SportsNet New York), an equity method investee, and decreases in investment spending related to our equity investments and capital expenditures from discontinued operations.

Cash used by investing activities increased from $2.132 billion in 2005 to $11.999 billion in 2006. This increase was principally due to the Adelphia acquisition and the Exchange and an increase in capital expenditures from continuing

operations, driven by capital expenditures associated with the integration of the Acquired Systems, the continued roll-out of advanced digital services, including Digital Phone services, and continued growth in high-speed data services. The increase also reflects the investment in the Wireless Joint Venture and cash used in the TWE Redemption, partially offset by decreases in investment spending related to our equity investments and other acquisition-related expenditures and capital expenditures from discontinued operations.

Cash used by investing activities increased from $1.816 billion in 2004 to $2.132 billion in 2005. This increase was principally due to increases in capital expenditures from continuing operations, cash used by investing activities of discontinued operations and acquisition-related expenditures, partially offset by decreases in investment spending related to our equity investments and capital expenditures from discontinued operations. The increase in capital expenditures from continuing operations in 2005 was primarily associated

Table of Contents

with increased spending associated with the continued roll-out of advanced digital services, including Digital Phone.

Our capital expenditures from continuing operations included the following major categories (in millions):

	Six Months Ended June 30,		Year Ended December 31,		
	2007	2006	2006	2005	2004
Customer premise equipment[(a)]	$ 736	$ 506	$ 1,125	$ 805	$ 656
Scalable infrastructure[(b)]	221	150	568	325	184
Line extensions[(c)]	167	122	280	235	218
Upgrades/rebuilds[(d)]	132	43	151	113	126
Support capital[(e)]	295	197	594	359	375
Total capital expenditures	$ 1,551	$ 1,018	$ 2,718	$ 1,837	$ 1,559

(a) Represents costs incurred in the purchase and installation of equipment that resides at a customer s home or business for the purpose of receiving/sending video, high-speed data and/or Digital Phone signals. Such equipment typically includes digital set-top boxes, remote controls, high-speed data modems, telephone modems and the costs of installing such equipment for new customers. Customer premise equipment also includes materials and labor incurred to install the drop cable that connects a customer s dwelling or business to the closest point of the main distribution network.

(b) Represents costs incurred in the purchase and installation of equipment that controls signal reception, processing and transmission throughout our distribution network, as well as controls and communicates with the equipment residing at a customer s home or business. Also included in scalable infrastructure is certain equipment necessary for content aggregation and distribution (VOD equipment) and equipment necessary to provide certain video, high-speed data and Digital Phone service features (voicemail, e-mail, etc.).

(c) Represents costs incurred to extend our distribution network into a geographic area previously not served. These costs typically include network design, the purchase and installation of fiber optic and coaxial cable and certain electronic equipment.

(d) Represents costs incurred to upgrade or replace certain existing components or an entire geographic area of our distribution network. These costs typically include network design, the purchase and installation of fiber optic and coaxial cable and certain electronic equipment.

(e) Represents all other capital purchases required to run day-to-day operations. These costs typically include vehicles, land and buildings, computer hardware/software, office equipment, furniture and fixtures, tools and test equipment.

We incur expenditures associated with the construction of our cable systems. Costs associated with the construction of the cable transmission and distribution facilities and new cable service installations are capitalized. We generally capitalize expenditures for tangible fixed assets having a useful life of greater than one year. Capitalized costs include direct material, labor and overhead and interest. Sales and marketing costs, as well as the costs of repairing or maintaining existing fixed assets, are expensed as incurred. With respect to certain customer premise equipment, which includes set-top boxes and cable modems, we capitalize installation charges only upon the initial deployment of these assets. All costs incurred in subsequent disconnects and reconnects are expensed as incurred. Depreciation on these assets is provided, generally using the straight-line method, over their estimated useful lives. For set-top boxes and modems, the useful life is 3 to 5 years, and, for distribution plant, the useful life is up to 16 years.

In connection with the Transactions, TW NY acquired significant amounts of property, plant and equipment, which were recorded at their estimated fair values. The remaining useful lives assigned to such assets were generally shorter than the useful lives assigned to comparable new assets, to reflect the age, condition and intended use of the acquired property, plant and equipment.

As a result of the Transactions, we have made and anticipate continuing to make significant capital expenditures related to the continued integration of the Acquired Systems, including improvements to plant and technical performance and upgrading system capacity, which will allow us to offer our advanced services and features in the Acquired Systems. Through December 31, 2006, we incurred approximately $200 million of such expenditures, and we estimate that we will incur additional expenditures of approximately $225 million to $275 million during 2007 (including approximately $90 million incurred during the six months ended June 30, 2007). We expect that these upgrades will be substantially complete by the end of 2007. We do not believe that these expenditures will have a material negative impact on our liquidity or capital resources.

Table of Contents

Financing Activities

Details of cash provided (used) by financing activities are as follows (in millions):

	Six Months Ended June 30,		Year Ended December 31,		
	2007	2006	2006	2005	2004
Borrowings (repayments), net[(a)]	$ 238	$ (346)	$ 634	$ (422)	$ 1,149

Cash provided (used) by financing activities	$ (661)	$ (362)	$ 8,443	$ (498)	$ (1,072)

(a) Borrowings (repayments), net, reflect borrowings under our commercial paper program with original maturities of three months or less, net of repayments of such borrowings. Borrowings (repayments), net, also included $28 million and $13 million of debt issuance costs for the six months ended June 30, 2007 and 2006, respectively, and $17 million of debt issuance costs for the year ended December 31, 2006.

Cash used by financing activities increased from $362 million for the six months ended June 30, 2006 to $661 million for the six months ended June 30, 2007. This increase was due primarily to an increase in the net repayments of borrowings under our debt obligations and other financing activities.

Cash provided by financing activities was $8.443 billion in 2006 compared to cash used by financing activities of $498 million in 2005. This increase in cash provided (used) by financing activities was due to an increase in net borrowings primarily associated with the Transactions, the issuance of the TW NY Series A Preferred Membership Units and other financing activities, partially offset by cash used in the TWC Redemption.

Cash used by financing activities decreased from $1.072 billion in 2004 to $498 million in 2005. This decrease was primarily due to a decline in net repayments of debt, partially offset by increases in net partnership tax distributions and stock option distributions and cash used by financing activities of discontinued operations in 2005.

Table of Contents

Free Cash Flow

Reconciliation of Cash provided by operating activities to Free Cash Flow. The following table reconciles Cash provided by operating activities to Free Cash Flow (in millions):

	Six Months Ended June 30,		Year Ended December 31,		
	2007	**2006**	**2006**	**2005**	**2004**
Cash provided by operating activities	$ 2,204	$ 1,541	$ 3,595	$ 2,540	$ 2,661
Reconciling items:					
Discontinued operations, net of tax		(64)	(1,038)	(104)	(95)
Adjustments relating to the operating cash flow of discontinued operations	(46)	(55)	926	(133)	(145)
Cash provided by continuing operating activities	2,158	1,422	3,483	2,303	2,421
Add: Excess tax benefit from exercise of stock options	5		4		
Less:					
Capital expenditures from continuing operations	(1,551)	(1,018)	(2,718)	(1,837)	(1,559)
Partnership tax distributions, stock option distributions and principal payments on capital leases of continuing operations	(21)	(16)	(34)	(31)	(11)
Free Cash Flow	$ 591	$ 388	$ 735	$ 435	$ 851

Free Cash Flow increased from $388 million for the six months ended June 30, 2006 to $591 million for the six months ended June 30, 2007 primarily as a result of an increase in cash provided by continuing operating activities, partially offset by an increase in capital expenditures from continuing operations, as discussed above.

Free Cash Flow increased to $735 million during 2006, as compared to $435 million during 2005. This increase of $300 million was primarily driven by a $906 million increase in OIBDA, as previously discussed, and a decrease in working capital requirements, partially offset by an increase in capital expenditures from continuing operations.

Free Cash Flow decreased to $435 million during 2005 as compared to $851 million during 2004. This decrease of $416 million was primarily driven by increases in net cash tax payments and capital expenditures from continuing operations, partially offset by an increase in OIBDA, as previously discussed, and a decrease in contributions to our pension plans.

Table of Contents

Outstanding Debt and Mandatorily Redeemable Preferred Equity and Available Financial Capacity

Debt, mandatorily redeemable preferred equity and unused borrowing capacity as of June 30, 2007 and December 31, 2006 were as follows:

	Interest Rate at June 30, 2007	Maturity	Outstanding Balance as of June 30, 2007	December 31, 2006
			(in millions)	
Bank credit agreements and commercial paper program[a][b]	5.590%[c]	2011	$ 5,542	$ 11,077
TWE notes and debentures[d]	7.250%[e]	2008	602	602
	10.150%[e]	2012	269	271
	8.875%[e]	2012	367	369
	8.375%[e]	2023	1,042	1,043
	8.375%[e]	2033	1,054	1,055
TWC notes and debentures	5.400%[f]	2012	1,497	
	5.850%[f]	2017	1,996	
	6.550%[f]	2037	1,490	
TW NY Series A Preferred Membership Units	8.210%	2013	300	300
Capital leases and other			12[g]	15[g]
Total			$ 14,171	$ 14,732

[a] Unused capacity, which includes $70 million and $51 million in cash and equivalents at June 30, 2007 and December 31, 2006, respectively, equals $3.397 billion and $2.798 billion at June 30, 2007 and December 31, 2006, respectively. Unused capacity at both June 30, 2007 and December 31, 2006 reflects a reduction of $159 million for outstanding letters of credit backed by the Cable Revolving Facility, as defined below.

[b] Outstanding balance amounts exclude an unamortized discount on commercial paper of $18 million and $17 million at June 30, 2007 and December 31, 2006, respectively.

[c] Rate represents a weighted-average interest rate.

[d] Includes an unamortized fair value adjustment of $134 million and $140 million as of June 30, 2007 and December 31, 2006, respectively.

[e] Rate represents the stated rate at original issuance. The effective weighted-average interest rate for the TWE notes and debentures in the aggregate is 7.65% at June 30, 2007.

[f] Rate represents the stated rate at original issuance. The effective weighted-average interest rate for the TWC notes and debentures in the aggregate is 5.97% at June 30, 2007.

[g] Amounts include $2 million and $4 million of capital leases due within one year at June 30, 2007 and December 31, 2006, respectively.

Debt Securities

On April 9, 2007, we issued $1.5 billion principal amount of 2012 initial notes, $2.0 billion principal amount of 2017 initial notes and $1.5 billion principal amount of 2037 initial debentures pursuant to Rule 144A and Regulation S under the Securities Act. The debt securities are guaranteed by TWE and TW NY Holding.

The initial debt securities were issued pursuant to an Indenture, dated as of April 9, 2007 (the Base Indenture), by and among us, the guarantors and The Bank of New York, as trustee, as supplemented by the First Supplemental Indenture, dated as of April 9, 2007 (the First Supplemental Indenture and, together with the Base Indenture, the Indenture), by and among us, the guarantors and The Bank of New York, as trustee.

The 2012 notes mature on July 2, 2012, the 2017 notes mature on May 1, 2017 and the 2037 debentures mature on May 1, 2037. Interest on the 2012 notes is payable semi-annually in arrears on January 2 and July 2 of each year, beginning on July 2, 2007. Interest on the 2017 notes and the 2037 debentures is payable semi-annually in arrears on May 1 and November 1 of each year, beginning on November 1, 2007. The debt securities are unsecured senior obligations of ours and rank equally with our other unsecured and unsubordinated obligations. The guarantees of the debt securities are unsecured senior obligations of the guarantors and rank equally in right of payment with all other unsecured and unsubordinated obligations of the guarantors.

The debt securities may be redeemed in whole or in part at any time at our option at a redemption price equal to the greater of (i) 100% of the principal amount of the debt securities being redeemed and (ii) the sum

of the present values of the remaining scheduled payments on the debt securities discounted to the redemption date on a semi-annual basis at a government treasury rate plus 20 basis points for the 2012 notes, 30 basis points for the 2017 notes and 35 basis points for the 2037 debentures as further described in the Indenture, plus, in each case, accrued but unpaid interest to the redemption date.

The Indenture contains customary covenants relating to restrictions on our or any material subsidiary s ability to create liens and on our and the guarantors ability to consolidate, merge or convey or transfer substantially all of our or their assets. The Indenture also contains customary events of default.

In connection with the issuance of the initial debt securities, on April 9, 2007, we, the guarantors and the purchasers of the initial debt securities entered into the Registration Rights Agreement pursuant to which we agreed, among other things, to use our commercially reasonable efforts to consummate a registered exchange offer for the initial debt securities within 270 days after the issuance date of the initial debt securities or cause a shelf registration statement covering the resale of the initial debt securities to be declared effective within specified periods. We will be required to pay additional interest of 0.25% per annum on the initial debt securities if we fail to timely comply with our obligations under the Registration Rights Agreement until such time as we comply. See Description of the Debt Securities and the Guarantees.

Bank Credit Agreements and Commercial Paper Program

In the first quarter of 2006, we entered into $14.0 billion of bank credit agreements, consisting of an amended and restated $6.0 billion senior unsecured five-year revolving credit facility maturing February 15, 2011 (the Cable Revolving Facility), a $4.0 billion five-year term loan facility maturing February 21, 2011 (the Five-Year Term Facility) and a $4.0 billion three-year term loan facility maturing February 24, 2009 (the Three-Year Term Facility and, together with the Five-Year Term Facility, the Term Facilities). The Term Facilities, together with the Cable Revolving Facility, are referred to as the Cable Facilities. Collectively, the Cable Facilities refinanced $4.0 billion of previously existing committed bank financing, and $2.0 billion of the Cable Revolving Facility and $8.0 billion of the Term Facilities were used to finance, in part, the cash portions of the Transactions. The Cable Facilities are guaranteed by TWE and TW NY Holding (or, in the case of the Three-Year Term Facility was guaranteed by TWE and TW NY Holding, as discussed below).

In April 2007, we used the net proceeds of the 2007 Bond Offering to repay all of the outstanding indebtedness under the Three-Year Term Facility, which was terminated on April 13, 2007. The balance of the net proceeds was used to repay a portion of the outstanding indebtedness under the Five-Year Term Facility on April 27, 2007, which reduced the outstanding indebtedness under such facility to $3.045 billion as of such date.

Borrowings under the Cable Revolving Facility bear interest at a rate based on our credit rating, which rate was LIBOR plus 0.27% per annum as of June 30, 2007. In addition, we are required to pay a facility fee on the aggregate commitments under the Cable Revolving Facility at a rate determined by our credit rating, which rate was 0.08% per annum as of June 30, 2007. We may also incur an additional usage fee of 0.10% per annum on the outstanding loans and other extensions of credit under the Cable Revolving Facility if and when such amounts exceed 50% of the aggregate commitments thereunder. Borrowings under the Five-Year Term Facility accrue interest at a rate based on our credit rating, which rate was LIBOR plus 0.40% per annum as of June 30, 2007.

The Cable Revolving Facility provides same-day funding capability and a portion of the commitment, not to exceed $500 million at any time, may be used for the issuance of letters of credit. The Cable Revolving Facility and the Five-Year Term Facility contain a maximum leverage ratio covenant of 5.0 times our consolidated EBITDA. The terms and related financial metrics associated with the leverage ratio are defined in the applicable agreements. At June 30, 2007, we were in compliance with the leverage covenant, with a leverage ratio, calculated in accordance with

the agreements, of approximately 2.6 times. The Cable Revolving Facility and the Five-Year Term Facility do not contain any credit ratings-based defaults or covenants or any ongoing covenant or representations specifically relating to a material adverse change in our financial condition or results of operations or those of Time Warner. Borrowings under the Cable Revolving Facility

may be used for general corporate purposes and unused credit is available to support borrowings under our commercial paper program.

In addition to the Cable Revolving Facility and the Five-Year Term Facility, we maintain a $6.0 billion unsecured commercial paper program (the CP Program) that is also guaranteed by TW NY Holding and TWE. Commercial paper issued under the CP Program is supported by unused committed capacity under the Cable Revolving Facility and ranks pari passu with other unsecured senior indebtedness of our company, TWE and TW NY Holding.

As of June 30, 2007, there were borrowings of $3.045 billion outstanding under the Five-Year Term Facility, letters of credit totaling $159 million outstanding under the Cable Revolving Facility, and $2.515 billion of commercial paper outstanding under the CP Program and supported by the Cable Revolving Facility. Our available committed capacity under the Cable Revolving Facility as of June 30, 2007 was approximately $3.327 billion, and we had $70 million of cash and equivalents on hand.

TWE Notes

During 1992 and 1993, TWE issued notes and debentures (the TWE Notes) publicly in a number of offerings. The maturities of these outstanding issuances ranged from 15 to 40 years and the fixed interest rates range from 7.25% to 10.15%. The fixed-rate borrowings include an unamortized debt premium of $140 million and $154 million as of December 31, 2006 and 2005, respectively. The debt premium is amortized over the term of each debt issue as a reduction of interest expense. As discussed below, we and TW NY Holding have each guaranteed TWE s obligations under the TWE Notes. Prior to November 2, 2006, ATC and Warner Communications Inc. (WCI) (subsidiaries of Time Warner) each guaranteed pro-rata portions of the TWE Notes based on the relative fair value of the net assets that each contributed to TWE prior to the restructuring of TWE, which was completed on March 31, 2003 (the TWE Restructuring). On September 10, 2003, TWE submitted an application with the SEC to withdraw its 7.25% Senior Debentures (due 2008) from listing and registration on the NYSE. The application to withdraw was granted by the SEC effective on October 17, 2003. As a result, TWE has no obligation to file reports with the SEC under the Exchange Act.

Pursuant to the Ninth Supplemental Indenture to the TWE Indenture, TW NY, a subsidiary of ours and a successor in interest to Time Warner NY Cable Inc., agreed to waive, for so long as it remained a general partner of TWE, the benefit of certain provisions in the TWE Indenture which provided that it would not have any liability for the TWE Notes as a general partner of TWE (the TW NY Waiver). On October 18, 2006, TW NY contributed all of its general partnership interests in TWE to TWE GP Holdings LLC, its wholly owned subsidiary (the TWE GP Transfer), and, as a result, the TW NY Waiver, by its terms, ceased to be in effect. In addition, on October 18, 2006, we, together with TWE, TW NY Holding, ATC, WCI and The Bank of New York, as trustee, entered into the Tenth Supplemental Indenture to the TWE Indenture. Pursuant to the Tenth Supplemental Indenture to the TWE Indenture, TW NY Holding fully, unconditionally and irrevocably guaranteed the payment of principal and interest on the TWE Notes.

On October 19, 2006, TWE commenced a consent solicitation to amend the TWE Indenture to simplify the guaranty structure of the TWE Notes and to amend TWE s reporting obligations under the TWE Indenture. On November 2, 2006, the consent solicitation was completed, and we, TWE, TW NY Holding and The Bank of New York, as Trustee, entered into the Eleventh Supplemental Indenture to the TWE Indenture, which (i) amended the guaranty of the TWE Notes previously provided by us to provide a direct guaranty of the TWE Notes by us, rather than a guaranty of the TW Partner Guaranties (as defined below), (ii) terminated the guaranties (the TW Partner Guaranties) previously provided by ATC and WCI and (iii) amended TWE s reporting obligations under the TWE Indenture to allow TWE to provide holders of the TWE Notes with quarterly and annual reports that we (or any other ultimate parent guarantor, as described in the Eleventh Supplemental Indenture) would be required to file with the SEC pursuant to Section 13 of the Exchange Act, if it were required to file such reports with the SEC in respect of the TWE Notes pursuant to such

section of the Exchange Act, subject to certain exceptions as described in the Eleventh Supplemental Indenture.

TW NY Mandatorily Redeemable Non-voting Series A Preferred Membership Units

In connection with the financing of the Adelphia acquisition, TW NY issued $300 million of its Series A Preferred Membership Units to a limited number of third parties. The TW NY Series A Preferred Membership Units pay cash dividends at an annual rate equal to 8.21% of the sum of the liquidation preference thereof and any accrued but unpaid dividends thereon, on a quarterly basis. The TW NY Series A Preferred Membership Units are subject to mandatory redemption by TW NY on August 1, 2013 and are not redeemable by TW NY at any time prior to that date. The redemption price of the TW NY Series A Preferred Membership Units is equal to their liquidation preference plus any accrued and unpaid dividends through the redemption date. Except under limited circumstances, holders of TW NY Series A Preferred Membership Units have no voting rights.

The terms of the TW NY Series A Preferred Membership Units require that holders owning a majority of the TW NY Series A Preferred Membership Units must approve any agreement for a material sale or transfer by TW NY and its subsidiaries of assets at any time during which TW NY and its subsidiaries maintain, collectively, cable systems serving fewer than 500,000 cable subscribers, or that would (after giving effect to such asset sale) cause TW NY to maintain, directly or indirectly, fewer than 500,000 cable subscribers, unless the net proceeds of the asset sale are applied to fund the redemption of the TW NY Series A Preferred Membership Units and the sale occurs on or immediately prior to the redemption date. Additionally, for so long as the TW NY Series A Preferred Membership Units remain outstanding, TW NY may not merge or consolidate with another company, or convert from a limited liability company to a corporation, partnership or other entity, unless (i) such merger or consolidation is permitted by the asset sale covenant described above, (ii) if TW NY is not the surviving entity or is no longer a limited liability company, the then holders of the TW NY Series A Preferred Membership Units have the right to receive from the surviving entity securities with terms at least as favorable as the TW NY Series A Preferred Membership Units and (iii) if TW NY is the surviving entity, the tax characterization of the TW NY Series A Preferred Membership Units would not be affected by the merger or consolidation. Any securities received from a surviving entity as a result of a merger or consolidation or the conversion into a corporation, partnership or other entity must rank senior to any other securities of the surviving entity with respect to dividends and distributions or rights upon a liquidation.

Mandatorily Redeemable Preferred Equity

On July 28, 2006, ATC, a subsidiary of Time Warner, contributed its $2.4 billion of mandatorily redeemable preferred equity interest and a 1% common equity interest in TWE to TW NY Holding in exchange for a 12.4% non-voting common equity interest in TW NY Holding. TWE originally issued the $2.4 billion mandatorily redeemable preferred equity to ATC in connection with the TWE Restructuring. The issuance was a noncash transaction. The preferred equity pays cash distributions on a quarterly basis, at an annual rate of 8.059% of its face value, and is required to be redeemed by TWE in cash on April 1, 2023.

Time Warner Approval Rights

Under a shareholder agreement entered into between us and Time Warner on April 20, 2005 (the Shareholder Agreement), we are required to obtain Time Warner s approval prior to incurring additional debt (except for ordinary course issuances of commercial paper or borrowings under the Cable Revolving Facility up to the limit of that credit facility, to which Time Warner has consented) or rental expenses (other than with respect to certain approved leases) or issuing preferred equity, if our consolidated ratio of debt, including preferred equity, plus six times our annual rental expense to EBITDAR (the TW Leverage Ratio) then exceeds, or would as a result of the incurrence or issuance exceed, 3:1. Under certain circumstances, we are required to include the indebtedness, annual rental expense obligations and EBITDAR of certain unconsolidated entities that we manage and/or in which we own an equity interest, in the calculation of the TW Leverage Ratio. The Shareholder Agreement defines EBITDAR, at any time of

measurement, as operating income plus depreciation, amortization and rental expense (for any lease that is not accounted for as a capital lease) for the twelve months ending on the last day of our most recent fiscal quarter, including certain adjustments to reflect the impact of significant transactions as if they had occurred at the beginning of the period.

Table of Contents

The following table sets forth the calculation of the TW Leverage Ratio for the twelve months ended June 30, 2007 (in millions, except ratio):

Indebtedness	$ 13,871
Preferred Membership Units	300
Six times annual rental expense	1,086
Total	$ 15,257
EBITDAR	$ 5,586
TW Leverage Ratio	2.73x

As indicated in the table above, as of June 30, 2007, the TW Leverage Ratio did not exceed 3:1.

Contractual and Other Obligations

Firm Commitments

We have commitments under various firm contractual arrangements to make future payments for goods and services. These firm commitments secure future rights to various assets and services to be used in the normal course of operations. For example, we are contractually committed to make some minimum lease payments for the use of property under operating lease agreements. In accordance with current accounting rules, the future rights and obligations pertaining to these contracts are not reflected as assets or liabilities on our consolidated balance sheet.

The following table summarizes our material firm commitments at June 30, 2007 and the timing of and effect that these obligations are expected to have on our liquidity and cash flow in future periods. We expect to fund these firm commitments with cash provided by operating activities generated in the ordinary course of business.

	2007	2008-2009	2010-2011 (in millions)	2012 and Thereafter	Total
Programming purchases[(a)]	$ 1,603	$ 5,375	$ 3,715	$ 2,133	$ 12,826
Outstanding debt obligations and TW NY Series A Preferred Membership Units[(b)]	2	600	5,560	7,910	14,072
Interest and dividends[(c)]	449	1,740	1,447	5,969	9,605
Facility leases[(d)]	59	179	149	371	758
Data processing services	22	89	89	40	240
High-speed data connectivity	30	40	2	2	74
Digital Phone connectivity[(e)]	160	394	197		751
Converter and modem purchases	33				33
Other	22	18	2	7	49
Total	$ 2,380	$ 8,435	$ 11,161	$ 16,432	$ 38,408

(a) We have purchase commitments with various programming vendors to provide video services to subscribers. Programming fees represent a significant portion of our costs of revenues. Future fees under such contracts are based on numerous variables, including number and type of customers. The amounts of the commitments reflected above are based on the number of subscribers at June 30, 2007 applied to the per subscriber contractual rates contained in the contracts that were in effect as of June 30, 2007.

(b) Outstanding debt obligations and TW NY Series A Preferred Membership Units represent the principal amounts due on outstanding debt obligations and the TW NY Series A Preferred Membership Units as of June 30, 2007. Amounts do not include any fair value adjustments, bond premiums, discounts, interest payments or dividends.

(c) With the exception of commercial paper issued under our commercial paper program, amounts are based on the outstanding debt or mandatorily redeemable preferred membership units balances, respective interest or dividend rates (interest rates on variable-rate debt were held constant through maturity at the June 30, 2007 rates) and maturity schedule of the respective instruments as of June 30, 2007. With regard to commercial paper issued under the commercial paper program, amounts assume the outstanding commercial paper and interest rates at June 30, 2007 will remain outstanding through the maturity of the underlying credit facility. Interest ultimately paid on these obligations may differ based on changes in interest rates for variable-rate debt, as well as any potential future refinancings entered into by us.

(d) We have facility lease commitments under various operating leases including minimum lease obligations for real estate and operating equipment.

(e) Digital Phone connectivity commitments are based on the number of Digital Phone subscribers at June 30, 2007 and the per subscriber contractual rates contained in the contracts that were in effect as of June 30, 2007.

Our total rent expense, which primarily includes facility rental expense and pole attachment rental fees, amounted to $91 million for the six months ended June 30, 2007 and $149 million, $98 million and $101 million for the years ended December 31, 2006, 2005 and 2004, respectively.

Contingent Commitments

Prior to the TWE Restructuring, TWE had various contingent commitments, including guarantees, related to TWE s non-cable businesses, including Warner Bros., Home Box Office, and TWE s interests in The WB Television Network (which has subsequently ceased operations), Comedy Central (which was subsequently sold) and the Courtroom Television Network (collectively, the Non-cable Businesses). In connection with the restructuring of TWE, some of these commitments were not transferred with their applicable Non-cable Business and they remain contingent commitments of TWE. Specifically, in connection with the Non-cable Businesses former investment in the Six Flags theme parks located in Georgia and Texas (Six Flags Georgia and Six Flags Texas, respectively, and, collectively, the Parks), in 1997, Time Warner and TWE each agreed to guarantee (the Six Flags Guarantee), for the benefit of the limited partners, certain obligations of the partnerships that hold the Parks (the Partnerships), including the following (the Guaranteed Obligations): (a) the obligation to make a minimum amount of annual distributions to the limited partners of the Partnerships; (b) the obligation to make a minimum amount of capital expenditures each year; (c) the requirement that an annual offer to purchase be made in respect of 5% of the limited partnership units of the Partnerships (plus any such units not purchased in any prior year) based on an aggregate price for all limited partnership units at the higher of (i) $250 million in the case of Six Flags Georgia and $374.8 million in the case of Six Flags Texas (the Base Valuations) and (ii) a weighted-average multiple of EBITDA for the respective Park over the previous four-year period; (d) ground lease payments; and (e) either (i) the purchase of all of the outstanding limited partnership units by Six Flags through the exercise of a call option upon the earlier of the occurrence of certain specified events and the end of the term of each of the Partnerships in 2027 (Six Flags Georgia) and 2028 (Six Flags Texas) (the End of Term Purchase) or (ii) the obligation to cause each of the Partnerships to have no indebtedness and to meet certain other financial tests as of the end of the term of the Partnership. The aggregate amount payable in connection with an End of Term Purchase of either Park will be the Base Valuation applicable to such Park, adjusted for changes in the consumer price index from December 1996, in the case of Six Flags Georgia, and December 1997, in the case of Six Flags Texas through December of the year immediately preceding the year in which the End of Term Purchase occurs, in each case, reduced ratably to reflect limited partnership units previously purchased.

In connection with the 1998 sale of Six Flags Entertainment Corporation to Six Flags Inc. (formerly Premier Parks Inc.) (Six Flags), Six Flags, Historic TW Inc. (formerly known as Time Warner Inc., Historic TW) and TWE, among others, entered into a Subordinated Indemnity Agreement pursuant to which Six Flags agreed to guarantee the performance of the Guaranteed Obligations when due and to indemnify Historic TW and TWE, among others, in the event that the Guaranteed Obligations are not performed and the Six Flags Guarantee is called upon. In the event of a default of Six Flags obligations under the Subordinated Indemnity Agreement, the Subordinated Indemnity Agreement and related agreements provide, among other things, that Historic TW and TWE have the right to acquire control of the managing partner of the Parks. Six Flags obligations to Historic TW and TWE are further secured by its interest in all limited partnership units that are purchased by Six Flags.

Additionally, Time Warner and WCI have agreed, on a joint and several basis, to indemnify TWE from and against any and all of these contingent liabilities, but TWE remains a party to these commitments. In the event that TWE is required to make a payment related to any contingent liabilities of the TWE Non-cable Businesses, TWE will recognize an expense from discontinued operations and will receive a capital contribution from Time Warner and/or its subsidiary WCI for reimbursement of the incurred expenses. Additionally, costs related to any acquisition and subsequent distribution to Time Warner would also be treated as an expense of discontinued operations to be reimbursed by Time Warner.

To date, no payments have been made by Historic TW or TWE pursuant to the Six Flags Guarantee. In its annual report on Form 10-K for the year ended December 31, 2006, Six Flags has reported a maximum

Table of Contents

limited partnership unit obligation for 2007 of approximately $277 million. We believe the current fair values of the Parks are in excess of this amount.

We have cable franchise agreements containing provisions requiring the construction of cable plant and the provision of services to customers within the franchise areas. In connection with these obligations under existing franchise agreements, we obtain surety bonds or letters of credit guaranteeing performance to municipalities and public utilities and payment of insurance premiums. Such surety bonds and letters of credit as of June 30, 2007 and December 31, 2006 and 2005 amounted to $322 million, $328 million and $245 million, respectively. Payments under these arrangements are required only in the event of nonperformance. We do not expect that these contingent commitments will result in any amounts being paid in the foreseeable future.

We are required to make cash distributions to Time Warner when our employees exercise previously issued Time Warner stock options. For more information, see Market Risk Management Equity Risk below.

Market Risk Management

Market risk is the potential loss arising from adverse changes in market rates and prices, such as interest rates and changes in the market value of investments.

Interest Rate Risk

Variable-rate Debt

As of June 30, 2007, we had an outstanding balance of variable-rate debt of $5.542 billion, which excludes an unamortized discount adjustment of $18 million. Based on the variable-rate obligations outstanding at June 30, 2007, each 25 basis point increase or decrease in the level of interest rates would, respectively, increase or decrease our annual interest expense and related cash payments by approximately $14 million. These potential increases or decreases are based on simplifying assumptions, including a constant level of variable-rate debt for all maturities and an immediate, across-the-yield curve increase or decrease in the level of interest rates with no other subsequent changes for the remainder of the periods.

Fixed-rate Debt and TW NY Series A Preferred Membership Units

As of June 30, 2007, we had approximately $8.617 billion of fixed-rate debt and TW NY Series A Preferred Membership Units, including an unamortized fair value adjustment of $134 million. Based on the fixed-rate debt obligations outstanding at June 30, 2007, a 25 basis point increase or decrease in the level of interest would, respectively, increase or decrease the fair value of the fixed-rate debt by approximately $172 million. These potential increases or decreases are based on simplifying assumptions, including a constant level and rate of fixed-rate debt and an immediate, across-the-board increase or decrease in the level of interest rates with no other subsequent changes for the remainder of the periods.

Equity Risk

We are also exposed to market risk as it relates to changes in the market value of our investments. We invest in equity instruments of private companies for operational and strategic business purposes. These investments are subject to significant fluctuations in fair market value due to volatility of the industries in which the companies operate. As of June 30, 2007, we had approximately $692 million of investments.

Some of our employees have been granted options to purchase shares of Time Warner common stock in connection with their past employment with subsidiaries and affiliates of Time Warner. We have agreed that, upon the exercise by any of our officers or employees of any options to purchase Time Warner common stock, we will reimburse Time Warner in an amount equal to the excess of the closing price of a share of Time Warner common stock on the date of the exercise of the option over the aggregate exercise price paid by the exercising officer or employee for each share of Time Warner common stock. At June 30, 2007, we had accrued approximately $131 million of stock option distributions payable to Time Warner. That amount, which

is not payable until the underlying options are exercised and then only subject to limitations on cash distributions in accordance with the senior unsecured revolving credit facilities, will be adjusted in subsequent accounting periods based on changes in the quoted market prices for Time Warner s common stock.

Critical Accounting Policies

The SEC considers an accounting policy to be critical if it is important to our financial condition and results, and if it requires significant judgment and estimates on the part of management in its application. The development and selection of these critical accounting policies have been determined by our management and the related disclosures have been reviewed with the audit committee of our board of directors. For a summary of all of our significant accounting policies, see Note 2 to our consolidated financial statements for the year ended December 31, 2006.

Asset Impairments

Goodwill and Indefinite-lived Intangible Assets

Goodwill impairment is determined using a two-step process. The first step of the goodwill impairment test is to identify a potential impairment by comparing the fair value of a reporting unit with its carrying amount, including goodwill. We have identified six reporting units based on the geographic locations of our systems. The estimates of fair value of a reporting unit are determined using various valuation techniques, with the primary technique being a discounted cash flow analysis. A discounted cash flow analysis requires one to make various judgmental assumptions including assumptions about future cash flows, growth rates and discount rates. The assumptions about future cash flows and growth rates are based on our budget and business plan and assumptions are made about the perpetual growth rate for periods beyond the long-term business plan period. Discount rate assumptions are based on an assessment of the risk inherent in the future cash flows of the respective reporting units. In estimating the fair values of our reporting units, we also use research analyst estimates, as well as comparable market analyses. If the fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is not deemed to be impaired and the second step of the impairment test is not performed. If the carrying amount of a reporting unit exceeds its fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. The second step of the goodwill impairment test compares the implied fair value of the reporting unit s goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit s goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination. In other words, the fair value of the reporting unit is allocated to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid to acquire the reporting unit.

The impairment test for other intangible assets not subject to amortization consists of a comparison of the fair value of the intangible asset with its carrying value. We have identified six units of accounting based upon geographic locations of our systems in performing our testing. If the carrying value of the intangible asset exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. The estimates of fair value of intangible assets not subject to amortization are determined using various discounted cash flow valuation methodologies. The methodology used to value the cable franchises entails identifying the projected discrete cash flows related to such franchises and discounting them back to the valuation date. Significant assumptions inherent in the methodologies employed include estimates of discount rates. Discount rate assumptions are based on an assessment of the risk inherent in the respective intangible assets.

Our 2006 annual impairment analysis, which was performed during the fourth quarter, did not result in an impairment charge. For one reporting unit, the 2006 estimated fair value was within 10% of the respective book value. Applying a

hypothetical 10% decrease to the fair value of this reporting unit would result in a greater book value than fair value for cable franchises in the amount of approximately $20 million. Other intangible assets not subject to amortization are tested for impairment annually, or more frequently if events or circumstances indicate that the asset might be impaired.

Finite-lived Intangible Assets

In determining whether finite-lived intangible assets (e.g., customer relationships) are impaired, the accounting rules do not provide for an annual impairment test. Instead, they require that a triggering event occur before testing an asset for impairment. Such triggering events include the significant disposal of a portion of such assets or the occurrence of an adverse change in the market involving the business employing the related asset. The Redemptions were a triggering event for testing such assets for impairment. Once a triggering event has occurred, the impairment test employed is based on whether the intent is to hold the asset for continued use or to hold the asset for sale. If the intent is to hold the asset for continued use, the impairment test first requires a comparison of undiscounted future cash flows against the carrying value of the asset. If the carrying value of such asset exceeds the undiscounted cash flow, the asset would be deemed to be impaired. Impairment would then be measured as the difference between the fair value of the asset and its carrying value. Fair value is generally determined by discounting the future cash flows associated with that asset. If the intent is to hold the asset for sale and certain other criteria are met (e.g., the asset can be disposed of currently, appropriate levels of authority have approved the sale or there is an actively pursuing buyer), the impairment test involves comparing the asset s carrying value to its fair value. To the extent the carrying value is greater than the asset s fair value, an impairment loss is recognized for the difference.

Significant judgments in this area involve determining whether a triggering event has occurred and the determination of the cash flows for the assets involved and the discount rate to be applied in determining fair value. There was no impairment of finite-lived intangible assets in 2006 or in connection with testing done as a result of the Redemptions.

Equity-based Compensation Expense

We account for equity-based compensation in accordance with FAS 123R. The provisions of FAS 123R require a company to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost is recognized in the statement of operations over the period during which an employee is required to provide service in exchange for the award.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model, consistent with the provisions of FAS 123R and SAB No. 107, *Share-Based Payment.* Because option-pricing models require the use of subjective assumptions, changes in these assumptions can materially affect the fair value of the options. The assumptions presented in the table below represent the weighted-average value of the applicable assumption used to value Time Warner stock options at their grant date.

	Year Ended December 31,		
	2006	**2005**	**2004**
Expected volatility	22.3%	24.5%	34.9%
Expected term to exercise from grant date	5.07 years	4.79 years	3.60 years
Risk-free rate	4.6%	3.9%	3.1%
Expected dividend yield	1.1%	0.1%	0%

The two most significant judgments involved in the selection of fair value assumptions are the expected volatility of Time Warner s common stock and the expected term to exercise from grant date. In estimating expected volatility, we look to the volatility implied by long-term traded Time Warner options (i.e., terms of two years). Because Time Warner options granted to our employees have terms greater than two years, the volatility implied by the traded Time Warner options is adjusted to reflect the expected life of the options. In estimating the expected term of stock options granted to an employee, we utilize a mathematical model which considers factors such as historical employee exercise

patterns and volatility of Time Warner common stock to predict the expected term of an employee stock option. The judgments involved here also include determining whether different segments of the employee population have different exercise behavior. Separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. The risk-free rate assumed in valuing the options is based on the U.S. Treasury yield curve in effect at the time of

grant for the expected term of the option. We determine the expected dividend yield percentage by dividing the expected annual dividend by the market price of Time Warner common stock at the date of grant.

Our stock option compensation expense for the years ended December 31, 2006, 2005 and 2004 was $29 million, $53 million and $66 million, respectively. The weighted-average fair value of an option for the years ended December 31, 2006, 2005 and 2004, was $4.47, $5.11 and $5.11, respectively. A one year increase in the expected term, from 5.07 years to 6.07 years, while holding all other assumptions constant, would result in an increase to the 2006 weighted-average grant date fair value of approximately $0.46 per option, resulting in approximately $4 million of additional compensation expense recognized in income over the period during which an employee is required to provide service in exchange for the award. A 500 basis point increase in the volatility, from 22.3% to 27.3%, while holding all other assumptions constant, would result in an increase to the 2006 weighted-average grant date fair value of approximately $0.63 per option, resulting in approximately $6 million of additional compensation expense recognized in income over the period during which an employee is required to provide service in exchange for the award.

Multiple-element Transactions

Multiple-element transactions involve situations where judgment must be exercised in determining fair value of the different elements in a bundled transaction. As the term is used here, multiple-element arrangements can involve:

Contemporaneous purchases and sales. We sell a product or service (e.g., advertising services) to a customer and at the same time purchases goods or services (e.g., programming);

Sales of multiple products and/or services. We sell multiple products or services to a counterparty (e.g., we sell video, Digital Phone and high-speed data services to a customer); and/or

Purchases of multiple products and/or services, or the settlement of an outstanding item contemporaneous with the purchase of a product or service. We purchase multiple products or services from a counterparty (e.g., we settle a dispute on an existing programming contract at the same time that it is renegotiating a new programming contract with the same programming vendor).

Contemporaneous Purchases and Sales

In the normal course of business, we enter into multiple-element transactions where we are simultaneously both a customer and a vendor with the same counterparty. For example, when negotiating the terms of programming purchase contracts with cable networks, we may at the same time negotiate for the sale of advertising to the same cable network. Arrangements, although negotiated contemporaneously, may be documented in one or more contracts. In accounting for such arrangements, we look to the guidance contained in the following authoritative literature:

APB Opinion No. 29, *Accounting for Nonmonetary Transactions* (APB 29);

FASB Statement No. 153, *Exchanges of Nonmonetary Assets an amendment of APB Opinion No. 29* (FAS 153);

EITF Issue No. 01-09, *Accounting for Consideration Given by a Vendor to a Customer* (EITF 01-09); and

EITF Issue No. 02-16, *Accounting by a Customer (Including a Reseller) for Certain Consideration Received from a Vendor* (EITF 02-16).

Our policy for accounting for each transaction negotiated contemporaneously is to record each element of the transaction based on the respective estimated fair values of the products or services purchased and the products or services sold. The judgments made in determining fair value in such arrangements impact the amount and period in which revenues, expenses and net income are recognized over the term of the contract. In determining the fair value of the respective elements, we refer to quoted market prices (where available), historical transactions or comparable cash transactions. The most frequent transactions of this type that we

encounter involve funds received from our vendors, which we account for in accordance with EITF 02-16. We record cash consideration received from a vendor as a reduction in the price of the vendor s product unless (i) the consideration is for the reimbursement of a specific, incremental, identifiable cost incurred in which case we would record the cash consideration received as a reduction in such cost or (ii) we are providing an identifiable benefit in exchange for the consideration in which case we recognize revenue for this element.

With respect to programming vendor advertising arrangements being negotiated simultaneously with the same cable network, we assess whether each piece of the arrangements is at fair value. The factors that are considered in determining the individual fair values of the programming and advertising vary from arrangement to arrangement and include:

- existence of a most-favored-nation clause or comparable assurances as to fair market value with respect to programming;
- comparison to fees under a prior contract;
- comparison to fees paid for similar networks; and
- comparison to advertising rates paid by other advertisers on our systems.

Advertising revenues associated with such arrangements were less than $1 million for each of the years ended December 31, 2006 and 2005, and were $9 million in 2004.

Sales of Multiple Products or Services

Our policy for revenue recognition in instances where multiple deliverables are sold contemporaneously to the same counterparty is in accordance with EITF Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*, and SEC Staff Accounting Bulletin No. 104, *Revenue Recognition.* Specifically, if we enter into sales contracts for the sale of multiple products or services, then we evaluate whether we have objective fair value evidence for each deliverable in the transaction. If we have objective fair value evidence for each deliverable of the transaction, then we account for each deliverable in the transaction separately, based on the relevant revenue recognition accounting policies. However, if we are unable to determine objective fair value for one or more undelivered elements of the transaction, we recognize revenue on a straight-line basis over the term of the agreement. For example, we sell cable, Digital Phone and high-speed data services to subscribers in a bundled package at a rate lower than if the subscriber purchases each product on an individual basis. Subscription revenues received from such subscribers are allocated to each product in a pro-rata manner based on the fair value of each of the respective services.

Purchases of Multiple Products or Services

Our policy for cost recognition in instances where multiple products or services are purchased contemporaneously from the same counterparty is consistent with our policy for the sale of multiple deliverables to a customer. Specifically, if we enter into a contract for the purchase of multiple products or services, we evaluate whether it has fair value evidence for each product or service being purchased. If we have fair value evidence for each product or service being purchased, we account for each separately, based on the relevant cost recognition accounting policies. However, if we are unable to determine fair value for one or more of the purchased elements, we would recognize the cost of the transaction on a straight-line basis over the term of the agreement.

This policy also would apply in instances where we settle a dispute at the same time we purchase a product or service from that same counterparty. For example, we may settle a dispute on an existing programming contract with a

programming vendor at the same time that we are renegotiating a new programming contract with the same programming vendor. Because we are negotiating both the settlement of the dispute and a new programming contract, each of the elements should be accounted for at fair value. The amount allocated to the settlement of the dispute would be recognized immediately, whereas the amount allocated to the new programming contract would be accounted for prospectively, consistent with the accounting for other similar programming agreements.

Property, Plant and Equipment

We incur expenditures associated with the construction of our cable systems. Costs associated with the construction of the cable transmission and distribution facilities and new cable service installations are capitalized. With respect to certain customer premise equipment, which includes set-top boxes and cable modems, we capitalize installation charges only upon the initial deployment of these assets. All costs incurred in subsequent disconnects and reconnects are expensed as incurred. Depreciation on these assets is provided, generally using the straight-line method, over their estimated useful lives.

We use product-specific and, in the case of customers who have multiple products installed at once, bundle-specific standard costing models to capitalize installation activities. Significant judgment is involved in the development of these costing models, including the average time required to perform an installation and the determination of the nature and amount of indirect costs to be capitalized. Additionally, the development of standard costing models for new products such as Digital Phone involve more estimates than the standard costing models for established products because we have less historical data related to the installation of new products. The standard costing models are reviewed annually and adjusted prospectively, if necessary, based on comparisons to actual costs incurred.

We generally capitalize expenditures for tangible fixed assets having a useful life of greater than one year. Types of capitalized expenditures include: customer premise equipment, scalable infrastructure, line extensions, plant upgrades and rebuilds and support capital. For set-top boxes and modems, useful life is generally 3 to 5 years and for distribution plant, useful life is up to 16 years. In connection with the Transactions, TW NY acquired significant amounts of property, plant and equipment, which were recorded at their estimated fair values. The remaining useful lives assigned to such assets were generally shorter than the useful lives assigned to comparable new assets to reflect the age, condition and intended use of the acquired property, plant and equipment.

Programming Agreements

We exercise significant judgment in estimating programming expense associated with certain video programming contracts. Our policy is to record video programming costs based on our contractual agreements with programming vendors, which are generally multi-year agreements that provide for us to make payments to the programming vendors at agreed upon rates, which represent fair market value, based on the number of subscribers to which we provide the service. If a programming contract expires prior to entering into a new agreement, we are required to estimate the programming costs during the period there is no contract in place. We consider the previous contractual rates, inflation and the status of the negotiations in determining our estimates. When the programming contract terms are finalized, an adjustment to programming expense is recorded, if necessary, to reflect the terms of the new contract. We must also make estimates in the recognition of programming expense related to other items, such as the accounting for free periods, most-favored-nation clauses and service interruptions, as well as the allocation of consideration exchanged between the parties in multiple-element transactions. Additionally, judgments are also required by management when we purchase multiple services from the same cable programming vendor. In these scenarios, the total consideration provided to the programming vendor is required to be allocated to the various services received based upon their respective fair values. Because multiple services from the same programming vendor are often received over different contractual periods and often have different contractual rates, the allocation of consideration to the individual services will have an impact on the timing of our expense recognition.

Income Taxes

From time to time, we engage in transactions in which the tax consequences may be subject to uncertainty. Examples of such transactions include business acquisitions and disposals, issues related to consideration paid or received in

connection with acquisitions and disposals, and certain financing transactions. Significant judgment is required in assessing and estimating the tax consequences of these transactions. For example, the Adelphia acquisition was designed as a taxable acquisition. Accordingly, we have viewed a portion of our tax basis in the acquired assets resulting from the Adelphia acquisition as incremental value above the amount of basis more generally associated with cable systems. The tax benefit of such incremental

Table of Contents

step-up would reduce net cash tax payments by more than $300 million per year, assuming the following: (i) incremental step-up relating to 85% of the $14.4 billion purchase price (which assumes that 15% of the fair market value of cable systems represents a typical amount of basis), (ii) straight-line amortization deductions over 15 years, (iii) sufficient taxable income to utilize the amortization deductions, and (iv) a 40% effective tax rate. The IRS or state and local taxing authorities might challenge the anticipated tax characterizations or related valuations, and any successful challenge could significantly increase our future tax payments and significantly reduce our future earnings and cash flow. Additionally, the TWC Redemption was designed to qualify as a tax-free split-off under section 355 of the Tax Code. If the IRS were successful in challenging the tax-free characterization of the TWC Redemption, an additional cash liability on account of taxes of up to an estimated $900 million could be payable by us.

We prepare and file tax returns based on interpretation of tax laws and regulations. In the normal course of business, our tax returns are subject to examination by various taxing authorities. Such examinations may result in future tax and interest assessments by these taxing authorities. Although we believe we have support for the positions taken on our tax return, we have recorded a liability for our best estimate of the probable loss on certain of these positions. There is considerable judgment involved in determining whether positions taken on the tax return are probable of being sustained. We adjust our tax reserve estimates periodically because of ongoing examinations by and settlements with the various taxing authorities, as well as changes in tax laws, regulations and interpretations. The consolidated tax provision of any given year includes adjustments to prior year income tax accruals that are considered appropriate.

Table of Contents

BUSINESS

Overview

We, together with our subsidiaries, are the second-largest cable operator in the U.S. and are an industry leader in developing and launching innovative video, data and voice services. At June 30, 2007, we had cable systems that passed approximately 26 million U.S. homes in well-clustered locations and had approximately 14.7 million customer relationships. Approximately 85% of these homes passed were located in one of five principal geographic areas: New York state, the Carolinas, Ohio, southern California and Texas. As of June 30, 2007, we were the largest cable system operator in a number of large cities, including New York City and Los Angeles.

As part of our strategy to expand our cable footprint and improve the clustering of our cable systems, on July 31, 2006, TW NY and Comcast completed their respective acquisitions of assets comprising, in the aggregate, substantially all of the cable systems of Adelphia. TW NY paid for the Adelphia assets acquired by it with approximately $8.9 billion in cash (after certain purchase price adjustments) and shares of our Class A common stock representing approximately 16% of our outstanding common stock. Immediately prior to the Adelphia acquisition, we and our subsidiary, TWE, redeemed Comcast s interests in us and TWE, respectively, with the result that Comcast no longer had an interest in either company. In addition, TW NY exchanged certain cable systems with subsidiaries of Comcast. As a result of the closing of the Transactions, we acquired systems with approximately 4.0 million basic video subscribers and disposed of systems with approximately 0.8 million basic video subscribers transferred to Comcast in connection with the Redemptions and the Exchange for a net gain of approximately 3.2 million basic video subscribers.

On February 13, 2007, Adelphia s Chapter 11 reorganization plan became effective and, under applicable securities law regulations and provisions of the U.S. bankruptcy code, we became a public company subject to the requirements of the Exchange Act. Under the terms of the reorganization plan, most of the 155,913,430 shares of our Class A common stock that Adelphia received in the Adelphia acquisition (representing approximately 16% of our common stock) are being distributed to Adelphia s creditors. As of June 30, 2007, approximately 91% of these shares of Class A common stock had been distributed to Adelphia s creditors. The remaining shares are expected to be distributed during the coming months as remaining disputes are resolved by the bankruptcy court. On March 1, 2007, our Class A common stock began trading on the NYSE under the symbol TWC.

Time Warner currently owns approximately 84.0% of our common stock (representing a 90.6% voting interest). Our financial results are consolidated by Time Warner.

As the marketplace for basic video services has matured, the cable industry has responded by introducing new services, including enhanced video services like HDTV and VOD, high-speed internet access and IP-based telephony. As of June 30, 2007, approximately 7.7 million (or 58%) of our 13.4 million basic video customers subscribed to digital video services, 7.2 million (or 28%) of high-speed data service-ready homes subscribed to a residential high-speed data service such as our Road Runner service and 2.3 million (or 12%) of voice service-ready homes subscribed to Digital Phone. We launched Digital Phone broadly in the Legacy Systems during 2004 and as of June 30, 2007, it was available to over 40% of the homes passed in the Acquired Systems. As of June 30, 2007, in the Legacy Systems, approximately 59% of our 9.6 million basic video customers subscribed to digital video services and over 32% of high-speed data service-ready homes subscribed to a residential high-speed data service. For periods presented prior to January 1, 2007, the customer data contained in this section include subscribers in managed, but unconsolidated, Kansas City Pool systems, which were distributed to us by TKCCP effective on January 1, 2007 and were consolidated on January 1, 2007. For additional information with respect to the distribution of the assets of TKCCP to its partners on January 1, 2007, see Management s Discussion and Analysis of Results of Operations and

Financial Condition Recent Developments TKCCP Joint Venture.

Corporate Structure

The following chart illustrates our corporate structure as of June 30, 2007. The subscriber numbers, long-term debt and preferred equity balances presented below are approximate as of June 30, 2007. Certain intermediate entities and certain preferred interests held by us or our subsidiaries are not reflected. The subscriber counts within each entity indicate the number of basic video subscribers attributable to cable systems owned by such entity. Basic video subscriber numbers reflect billable subscribers who receive our basic video service.

(1) The principal amount of TWE s debt securities excludes an unamortized fair value adjustment of $134 million.

(2) We are also the obligor under an intercompany loan from TWE with an aggregate principal amount of $2.5 billion.

(3) TW NY is also the obligor under an intercompany loan from us with an aggregate principal amount of $8.7 billion.

(4) The subscribers and economic ownership interests listed in the chart for TWE-A/N relate only to those TWE-A/N systems in which we have an economic interest and over which we exercise day-to-day supervision. See Operating Partnerships and Joint Ventures Description of Certain Provisions of the TWE-A/N Partnership Agreement for a more detailed description of the TWE-A/N capital structure.

(5) Pursuant to the terms of Adelphia s plan of reorganization, as of June 30, 2007, approximately 91% of the shares of our Class A common stock that Adelphia received in the Adelphia acquisition had been distributed to Adelphia s creditors.

Table of Contents

Services

We offer a variety of services over our broadband cable systems, including video, high-speed data and voice services. We market our services separately and as bundled packages of multiple services and features. Increasingly, our customers subscribe to more than one of our services for a single price reflected on a single consolidated monthly bill.

Video Services

We offer a full range of analog and digital video service levels, including premium services such as HBO and Showtime, as well as advanced services such as VOD, HDTV, and set-top boxes equipped with DVRs. The following table presents selected statistical data regarding our video services:

	December 31,			June 30,
	2004	2005	2006	2007
	(in thousands, except percentages)			
Homes passed[1]	15,977	16,338	26,062	26,335
Basic subscribers[2]	9,336	9,384	13,402	13,391
Basic penetration[3]	58.4%	57.4%	51.4%	50.8%
Digital subscribers	4,067	4,595	7,270	7,732
Digital penetration[4]	43.6%	49.0%	54.2%	57.7%

(1) Homes passed represent the estimated number of service-ready single residence homes, apartment and condominium units and commercial establishments passed by our cable systems without further extending our transmission lines.
(2) Basic subscriber numbers reflect billable subscribers who receive basic video service.
(3) Basic penetration represents basic subscribers as a percentage of homes passed.
(4) Digital penetration represents digital subscribers as a percentage of basic subscribers.

Analog services. Analog video service is available in almost all of our operating areas. We typically offer two levels or tiers of service Basic and Standard which together offer, on average, approximately 70 channels for viewing on cable-ready television sets generally without the need for a separate set-top box.

Basic Tier generally, broadcast television signals, satellite delivered broadcast networks and superstations, local origination channels, and public access, educational and government channels; and

Standard Tier generally includes national, regional and local cable news, entertainment and other specialty networks, such as CNN, A&E, ESPN, CNBC and MTV.

We offer our Basic and Standard tiers for a fixed monthly fee. The rates we can charge for our Basic tier and certain video equipment are subject to regulation under federal law. See Regulatory Matters.

In certain areas, our Basic and Standard tiers also include proprietary local programming devoted to the communities we serve. For example, we provide 24-hour local news channels in the following areas: NY1 News and NY1 Noticias in New York, NY; News 14 Carolina in Charlotte, Greensboro and Raleigh, NC; R News in Rochester, NY; Capital News 9 in Albany, NY; News 8 Austin in Austin, TX; and News 10 Now in Syracuse, NY. In most of these areas, these news channels are available exclusively on our cable systems.

As of June 30, 2007, 50.8% of our homes passed, or 13.4 million subscribers, subscribed to our basic video services and, in the Legacy Systems, 56.5% of our homes passed, or 9.6 million subscribers, subscribed to our basic video services.

Digital services. Subscribers to our digital video services receive up to 250 digital video and audio programming services. Our digital video services may include:

Additional Cable Networks up to 60 digitally delivered cable networks, including spin-off and successor networks to successful national cable services, new networks and niche programming services, such as Discovery Home and MTV2;

Interactive Program Guide an on-screen interactive program guide that contains descriptions of available viewing options, enables navigation among these options and provides convenient parental controls and access to our On-Demand services, which are described below;

Premium and Multiplex Premium Channels multi-channel versions of premium services, such as the suite of HBO networks, which includes HBO, HBO 2, HBO Signature, HBO Family, HBO Comedy, HBO Zone and HBO Latino;

Music Channels up to 45 CD-quality genre-themed audio music stations;

Seasonal Sports Packages packages of sports programming, such as MLB Extra Innings, NBA League Pass and NHL Center Ice, which provide multiple channels displaying games from outside the subscriber s local area;

Digital Tiers specialized tiers comprising thematically linked programming services, including sports and Spanish language tiers; and

Family Choice Tier a specialized tier comprising about 15 standard and digital channels selected to be appropriate for family viewing based on ratings information provided by the programmers and based on our best judgment.

Our analog and digital video subscribers pay a fixed monthly fee for the level of service they receive. Subscribers to premium channels are charged an additional monthly fee, with discounts generally available for the purchase of packages of more than one such service.

As of June 30, 2007, 57.7%, or approximately 7.7 million, of our basic video subscribers subscribed to our digital video services and, in the Legacy Systems, approximately 58.6%, or approximately 5.6 million, of our basic video subscribers subscribed to our digital video services.

On-Demand services. We offer a number of On-Demand services that enable users to view what they want, when they want it. These services which are provided only to our digital video customers feature advanced functionality, such as the ability to pause, rewind and fast-forward the programming using our VOD system. We believe that access to On-Demand programming gives our existing analog subscribers and potential new subscribers a compelling reason to subscribe to our digital video service. Our On-Demand products and services include:

Movies-on-Demand offers a wide selection of movies and occasional special events to our digital video subscribers.

Subscription-Video-on-Demand provides digital subscribers with On-Demand access to packages of programming that are either associated with a particular premium content provider to which they already subscribe or are otherwise made available on a subscription basis.

Ad-Supported Video-on-Demand provides digital subscribers with free On-Demand access to selected movies, programs and program excerpts from cable television networks such as A&E, PBS Sprout, Oxygen and CNN, as well as music videos, local programming and other content, and introduces subscribers to the convenience of our On-Demand services.

Start Over this VOD-based, Emmy award-winning technology allows digital video customers to conveniently and instantly restart select programs then being aired by participating programming services. Users cannot fast forward through commercials while using Start Over, so traditional advertising economics are preserved for participating programming vendors. Introduced in our Columbia, South Carolina, division in 2005, we deployed this service in several areas during 2006 and are introducing it more broadly in 2007.

Quick Clips permits our digital subscribers watching a program to access without switching channels, relevant short-form content on an on demand basis.

We believe our VOD technology will also facilitate the introduction of other service enhancements, including such features as Look Back, Catch Up and Coming Soon.

We charge for most of the movies that are made available in our Movies-on-Demand service on a per-use basis. Generally, the SVOD services that are associated with particular premium content are packaged together

with such premium content and are made available as part of a separate package of SVOD services. Other SVOD services are made available for a fixed monthly fee.

DVRs. Set-top boxes equipped with digital video recorders are available for a flat monthly fee. These set-top boxes enable customers to:

- pause and/or rewind live television programs;
- record programs on a hard drive built into the set-top box by selecting the program s title from the interactive program guide rather than by start and stop times;
- pause, rewind and fast-forward recorded programs;
- automatically record each episode or only selected episodes of a particular series without the need to reprogram the DVR;
- watch one show while recording another;
- record two shows at the same time; and
- set parental controls on what can be recorded.

Initially introduced in 2002, we currently offer our DVR product to our digital video subscribers in all of the Legacy Systems. As of June 30, 2007, 37.8%, or approximately 2.9 million, of our digital video subscribers also received a DVR set-top box. We charge a monthly fee for our DVR service over and above the normal set-top box charge. The monthly equipment fee for a DVR set-top box is subject to regulation. See Regulatory Matters below.

High definition services. We generally offer at least 15 channels of HDTV, in each of our systems, mainly consisting of broadcast signals and standard and premium cable networks, as well as HDTV Movies-on-Demand in most of the Legacy Systems. HDTV provides a higher resolution picture and improved audio quality. In most instances, customers who already subscribe to the standard-definition versions of these services, including in the case of broadcast stations those customers who receive only Basic service, are not charged for the high definition version of the channels. We also offer a package of HDTV channels for an additional monthly fee.

High-speed Data Services

We offer residential and commercial high-speed data services to nearly all of our homes passed as of June 30, 2007. Our high-speed data services provide customers with a fast, always-on connection to the Internet. Subscribers pay a monthly flat fee based on the level of service received. Due to their different characteristics, commercial and bulk subscribers are charged at different rates from residential subscribers.

The following table presents some statistical data regarding our high-speed data services:

	December 31,			June 30,
	2004	**2005**	**2006**	**2007**
	(in thousands, except percentages)			
Service-ready homes passed[1]	15,870	16,227	25,691	26,033

Residential high-speed data subscribers	3,368	4,141	6,644	7,188
Residential high-speed data penetration(2)	21.2%	25.5%	25.9%	27.6%
Commercial high-speed data subscribers	151	183	245	263

(1) Service-ready homes passed represent the estimated number of high-speed data service-ready single residence homes, apartment and condominium units and commercial establishments passed by our cable systems without further extending our transmission lines.

(2) Residential high-speed data penetration represents residential high-speed data subscribers as a percentage of high-speed data service-ready homes passed.

High-speed data subscribers connect their personal computers or other broadband ready devices to our cable systems using a cable modem, which we provide at no charge or which subscribers can purchase themselves if they wish. Our high-speed data service enables subscribers to connect to the Internet at speeds much greater than traditional dial-up telephone modems. In contrast to dial-up services, subscribers to our

Table of Contents

high-speed data service do not have to log in to their account each time they wish to access the service and can remain connected without being disconnected because of inactivity.

Road Runner. As of June 30, 2007, we offered our Road Runner branded, high-speed data service to residential subscribers in virtually all of our systems.

Our Road Runner service provides communication tools and personalized services, including e-mail, PC security, parental controls, news group, online radio and personal home pages. Electronic messages can be personalized with photo attachments or video clips. The Road Runner portal provides access to content and media from local, national and international providers and topic-specific channels including games, news, sports, autos, kids, music, movie listings, and shopping sites.

We offer multiple tiers of Road Runner service, each with different operating characteristics and a different monthly fee. In recent years, we have steadily increased maximum download speeds in response to competitive factors and we anticipate that we will continue to be able to do so for the foreseeable future.

Road Runner was a recipient of the SATMetrics award for highest consumer likelihood to recommend in 2006, well ahead of all other cable providers, DSL providers, and other ISPs. In addition to Road Runner, most of our cable systems provide high-speed access to the services of certain other on-line providers, including EarthLink.

Time Warner Cable Business Class. We offer commercial customers a variety of high-speed data services, including Internet access, website hosting and managed security. These services are offered to a broad range of businesses and are marketed under the Time Warner Cable Business Class brand. We expect that small- and medium-sized businesses will increasingly find the need to purchase high-speed data services and intend to pursue opportunities in this area.

In addition to the residential subscribers and commercial accounts serviced through our cable systems, we provide our Road Runner high-speed data service to third parties for a fee.

Voice Services

Digital Phone. Digital Phone is the newest of our core services, having been launched broadly across the Legacy Systems in 2004. Under our primary calling plan, our customers receive a Digital Phone package that provides unlimited local, in-state and U.S., Canada and Puerto Rico long-distance calling and a number of calling features for a fixed monthly fee. We are also currently deploying lower-priced calling plans to serve those customers that do not use interstate and/or long-distance calling plans extensively and intend to offer additional plans with a variety of calling options in the future. Our Digital Phone plans include, among others, the following calling features:

- Call Waiting;
- Caller ID;
- Voicemail;
- Call Forwarding;
- Speed Dial;
- Anonymous Call Reject;

International Direct Dial service;

3-way calling;

Enhanced 911 Service, which allows our customers to contact local emergency services personnel by dialing 911. With Enhanced 911 service, the customer s address and phone number will automatically display on the emergency dispatcher s screen; and

Customer Service (611).

Table of Contents

As of June 30, 2007, Digital Phone had been launched in all of the Legacy Systems and was available to 94% of the homes passed in those systems. At that time, in the Legacy Systems, we had 2.2 million Digital Phone customers and penetration of voice service to serviceable homes was approximately 14%. Since no comparable IP-based telephony service was available in the Acquired Systems at the time of acquisition, the continued introduction of Digital Phone in the Acquired Systems, separately and as part of a bundle, is a high priority. As of June 30, 2007, Digital Phone was available to over 40% of the homes passed in the Acquired Systems. We expect to continue to roll out Digital Phone across the Acquired Systems during the remainder of 2007.

As an adjunct to our existing commercial high-speed data business, we have begun to introduce Business Class Phone, a commercial Digital Phone service, to small- and medium-sized businesses and will continue to roll out this service during the remainder of 2007 in most of the Legacy Systems. We are also introducing this service in some of the Acquired Systems.

Digital Phone is delivered over the same system facilities we use to provide video and high-speed data services. We provide customers with a voice-enabled cable modem that digitizes voice signals and routes them as data packets, using IP technology, over our own managed broadband cable systems. Calls to destinations outside of our cable systems are routed to the traditional public switched telephone network. Unlike Internet phone providers, such as Vonage and Lingo, which utilize the Internet to transport telephone calls, our Digital Phone service uses only managed networks and public switched telephone networks to route calls. We believe our managed approach to delivery of voice services allows us to better monitor and maintain call and service quality.

We have agreements with Verizon and Sprint under which these companies assist us in providing Digital Phone service by routing voice traffic to the public switched telephone network, delivering enhanced 911 service and assisting in local number portability and long distance traffic carriage. In July 2006, we agreed to expand our multi-year relationship with Sprint as our primary provider of these services, including in the Acquired Systems. See Risk Factors Risks Related to Dependence on Third Parties We may not be able to obtain necessary hardware, software and operational support.

Circuit-switched Telephone. In the Exchange, we acquired customers from Comcast who receive traditional, circuit-switched local and long distance telephone services. We continue to provide traditional, circuit-switched services to some of those subscribers and, in some areas, have begun the process of discontinuing the circuit-switched offering in accordance with regulatory requirements. In those areas where the circuit-switched offering is discontinued, Digital Phone will be the only voice service we provide.

Service Bundles

In addition to selling our services separately, we are focused on marketing differentiated packages of multiple services and features, or bundles, for a single price. Increasingly, many of our customers subscribe to two or three of our services. The bundle represents a discount from the price of buying the services separately and the convenience of a single monthly bill. We believe that these Double Play and Triple Play offerings increase our customers satisfaction with us, increase customer retention and encourage subscription to additional features. In the Legacy Systems as of June 30, 2007, 49.4% of our customers, received at least two services. The table below sets forth the number of our Double Play and Triple Play customers as of the dates indicated.

	December 31,			June 30,
	2004	2005	2006(1)	2007(1)
	(in thousands)			

Double Play	2,850	3,099	4,647	4,745
Triple Play	145	760	1,523	1,915

(1) As of December 31, 2006, double play and triple play subscribers include approximately 68,000 and 24,000 subscribers, respectively, acquired from Comcast in the Exchange who receive traditional, circuit-switched telephone service. As of June 30, 2007, double play and triple play subscribers include approximately 51,000 and 17,000 subscribers, respectively, acquired from Comcast in the Exchange who receive traditional, circuit-switched telephone service.

Cross-platform Features

In support of our bundled services strategy, we are developing features that operate across two or more of our services. For example, we have begun to offer customers who subscribe to both Time Warner Digital Cable and Digital Phone, at no charge, a Caller ID on TV feature that displays incoming call information on the customer s television set. In July 2006, we introduced a new feature called PhotoShowTV in our Oceanic division in Hawaii that gives customers who subscribe to both Time Warner Digital Cable and Road Runner high-speed online service the ability to create and share their personal photo shows with our other Time Warner Cable digital video customers using our VOD technology.

Advertising

We sell advertising time to a variety of national, regional and local businesses. As part of the agreements under which we acquire video programming, we typically receive an allocation of scheduled advertising time in such programming, generally two minutes per hour, into which our systems can insert commercials, subject to limitations regarding subject matter. The clustering of our systems expands the share of viewers that we reach within a local designated market area, which helps our local advertising sales personnel to compete more effectively with broadcast and other media. Following the Transactions, we now have a strong presence in the country s two largest advertising markets, New York, New York, and Los Angeles, California.

In addition, in many locations, contiguous cable system operators have formed advertising interconnects to deliver locally inserted commercials across wider geographic areas, replicating the reach of the broadcast stations as much as possible. Our local cable news channels also provide us with opportunities to generate advertising revenue.

New Opportunities

Commercial Services

We believe that selling video and telecommunications services to commercial customers could provide us with a significant growth opportunity. We have sold video and high-speed data services to businesses for some time. In 2007, we introduced an IP-based telephony service geared to small- and medium-sized businesses, which we expect to deploy in most of the Legacy Systems and some of the Acquired Systems by the end of 2007. We believe the introduction of a business phone offering will, over time, allow us to expand the commercial services part of our business.

Wireless Joint Ventures

In November 2005, we and several other cable companies, together with Sprint, announced the formation of a joint venture to develop integrated video entertainment, wireline and wireless data and communications products and services. In 2006, we began offering under the Pivot brand name a bundle that includes Sprint wireless voice service (with some of our unique features) in limited operating areas and will continue to roll out this service during the remainder of 2007. The package contains some wireline/wireless integration, such as a common voice mail-box for both the home and wireless phone. See Risk Factors Risks Related to Competition Our competitive position could suffer if we are unable to develop a compelling wireless offering.

A separate joint venture formed by the same parties participated in the FCC Auction 66 for Advanced Wireless Spectrum (AWS), and was the winning bidder of 137 licenses. These licenses cover 20 MHz of AWS in about 90% of the continental United States and Hawaii. The FCC awarded these licenses to the venture on November 29, 2006.

There can be no assurance that the venture will successfully develop mobile and related services. Under the joint venture agreement, Sprint had the ability to exit the venture upon 60 days notice and to require that the venture purchase its interests for an amount equal to Sprint s capital contributions. Sprint has exercised this option and, in August 2007, we contributed $28 million to the venture to fund our share of the payment to Sprint. In addition, under certain circumstances, the remaining members of the venture have the ability to exit the venture and receive from the venture, subject to certain limitations and adjustments, AWS licenses covering their operating areas.

Table of Contents

Advanced Advertising

We are exploring various means by which we could utilize our advanced services, such as VOD and interactive TV to deliver the same kind of targeting and interactivity to television advertisers that currently is available to Internet advertisers. For example, in upstate New York, we provide overlays that enable customers to request additional information regarding certain advertised products, to telescope from a traditional advertisement to a long form VOD segment regarding the advertised product, to vote on a hot topic or receive more specific additional information. These tools can be used to provide advertisers with important feedback about the impact of their advertising efforts.

Marketing and Sales

We seek to deepen our relationships with existing customers, thereby increasing the amount of revenue we obtain from each home we serve and increasing customer retention, as well as to attract new customers. Our marketing is focused on conveying the benefits of our services in particular, the way our services can enhance and simplify customers lives to these target groups. Our marketing strategy focuses on bundles of video, data and voice services, including premium services, offered in differentiated but easy to understand packages. These bundles provide discounted pricing as compared with the aggregate prices for the services provided if they were purchased separately, in addition to the convenience of a single bill. We generally market bundles with entry level pricing, which provide our customer care representatives the opportunity to offer additional services or upgraded levels of existing services that are relevant to targeted customer groups.

To support these efforts, we utilize our brand and the brand statement, *The Power of You*™, in conjunction with a variety of integrated marketing, promotional and sales campaigns and techniques. Our advertising is intended to let our diverse base of subscribers and prospects know that we are a customer-centric company one that empowers customers by providing maximum choice, convenience and value and that we are committed to exceeding expectations through innovative product offerings and superior customer service. Our message is supported across broadcast, our own cable systems, print, radio and other outlets including outdoor advertising, direct mail, e-mail, on-line advertising, local grassroots efforts and non-traditional media.

We also employ a wide range of direct channels to reach our customers, including outbound telemarketing and door-to-door sales. In addition, we use customer care channels and inbound call centers to increase awareness of our products and services offered. Creative promotional offers are also a key part of our strategy, and an area where we work with third parties such as consumer electronics manufacturers and cable programmers.

We have been developing and implementing a number of technology-based tools and capabilities. These initiatives include the development of customized data storage and flexible access tools. This infrastructure will ensure that critical customer information is in the hands of customer service representatives as they interact with customers and prospects and on an aggregate basis to help us develop marketing programs.

Each of our local operations has a marketing and sales function responsible for selecting the relevant marketing communications, pricing and promotional offers for the products and services being sold and the consumer segments being targeted. The marketing and sales strategy is developed in coordination with our regional and corporate marketing teams, with execution by the local operating division.

We are also developing new sales channels through agreements with local and national retail stores, where our satellite competitors have a strong presence. This retail presence enables both new and existing customers to learn more about us, and purchase our products and services. We maintain dedicated customer service centers that allow for the resolution of billing and service issues as well as facilitate the sale of new products and services. Our centers are

located in our local administrative offices or operations centers, independent facilities or kiosks or booths within larger retail establishments, such as shopping malls.

Customer Care

We believe that superior customer care can help increase customer satisfaction, promote customer loyalty and lasting customer relationships, and increase the penetration of our services. We are committed to putting

our customers at the center of everything we do and are making significant investments in technology and people to support this commitment.

Our customer call centers use a range of software and systems to try to ensure the most efficient and effective customer care possible. For instance, many of our customer call centers utilize workforce and call flow management systems to route the millions of calls we receive each month to available representatives and to maximize existing resources. Customer representatives have access to desktop tools to provide the information our customers need, reducing call handling time. These desktop tools provide the representative with timely, valuable information regarding the customer then calling (e.g., notifying the representative if the customer has called previously on the same issue or helping to identify a new service in which the customer might be interested). We use quality assurance software that monitors both the representative s customer interactions and the desktop tools the representative selects during each call.

Many of our divisions are utilizing interactive voice recognition systems and on-line customer care systems to allow customers to obtain information they require without the need to speak with a customer care representative. Most customers who wish or need to speak with a representative will talk to a locally-based representative, which enables us to respond to local customer needs and preferences. However, some specialized care functions, such as advanced technical support for our high-speed data service, are handled regionally or nationally.

In order to enhance customer convenience and satisfaction, we have implemented a number of customer care initiatives. Depending on location, these may include:

- two-hour appointment windows with an on-time guarantee;
- customer loyalty and reward programs;
- weekend, evening and same-day installation and trouble-shooting service appointments;
- payment and/or billing information through the Internet or by phone; and
- follow-up calls to monitor satisfaction with installation or maintenance visits.

We also provide Answers on Demand, which allows customers to select discrete help topics from a menu and then view interactive videos that answer their questions. Customers can access Answers on Demand either on-line or on their television set (using our VOD technology).

Technology

Our Cable Systems

Our cable systems employ a flexible and extensible network architecture known as hybrid fiber coax, or HFC. We transmit signals on these systems via laser-fed fiber optic cable from origination points known as headends and hubs to a group of distribution nodes, and use coaxial cable to deliver these signals from the individual nodes to the homes they serve. We pioneered this architecture and received an Emmy award in 1994 for our HFC development efforts. HFC architecture allows the delivery of two-way video and broadband transmissions, which is essential to providing advanced video services, like VOD, Road Runner high-speed data services and Digital Phone.

HFC architecture is the cornerstone technology in our digital cable systems. HFC architecture provides us with numerous benefits, including the following:

Reliability. HFC enables the delivery of highly dependable traditional and two-way video and broadband services.

Signal quality. HFC delivers very clean signal quality, which permits us to provide excellent video signals, as well as facilitating the delivery of advanced services like VOD, high-speed data and voice services.

Flexibility. HFC utilizes optical networking that allows inexpensive and efficient bandwidth increases and takes advantage of favorable cost and performance curves.

Adaptability. HFC is highly adaptable, and allows us to utilize new networking techniques that afford increased capacity and performance without costly upgrades.

As of June 30, 2007, almost all of the homes passed in the Legacy Systems and, according to our estimates, approximately 97% of all homes passed were served by plant that had been upgraded to provide at least 750MHz of capacity. Carriage of analog programming (approximately 70 channels per system) uses about two thirds of a typical system s capacity leaving capacity for digital video, high-speed data and voice products. Digital signals, including video, high-speed data and voice signals, can be carried more efficiently than analog signals. Generally 10 to 12 digital channels or their equivalent can be broadcast using the same amount of capacity required to broadcast just one analog channel. We are in the process of upgrading the plant in the Acquired Systems to our Legacy Systems standards.

We believe that our network architecture is sufficiently flexible and extensible to support our current requirements. However, in order for us to continue to innovate and deliver new services to our customers, as well as meet competitive imperatives, we anticipate that we will need to increase the amount of usable bandwidth available to us in most of our systems over the next few years. We believe that this can be achieved largely through the maximization and careful management of our systems existing bandwidth, without costly upgrades. For example, to accommodate increasing numbers of HDTV channels and other demands for greater capacity in our network, in certain areas we have begun deployment of a technology known as switched digital video (SDV). SDV ensures that only those channels that are being watched within a given grouping of households are being transmitted to those households. Since it is generally the case that not all channels are being watched at all times by a given group of households, this frees up capacity that can then be made available for other uses. This expansion of network capacity does not rely on extensive upgrade construction. Instead, we invest in switching equipment in our headends and hubs and, as necessary, segment our plant to ensure that switches and lasers are shared among fewer households. As a result of this process, capacity is made available for new services, including HDTV channels.

Video, High-speed Data and Voice Distribution

In most systems, we deliver our services via laser-fed fiber optic cable from the headend, either directly or via a hub, to a group of nodes, and use coaxial cable to deliver these signals and services from individual nodes to the homes they serve. A typical hub provides service to approximately 20,000 homes, and our average node provides service to approximately 500 homes.

National and regional video services are generally delivered to us through satellites that are owned or leased by the relevant programmer. These services signals are transmitted to downlink facilities located at our headends. Local video signals, including local broadcast signals, are picked up by antennae or are delivered to our headends via fiber connection. VOD content is received using a variety of these methods and generally stored on servers located at each system s headend.

We deliver high-speed data services to our subscribers through our HFC network, our regional fiber networks that are either owned by us or leased from third parties, including, in some instances, AOL, a subsidiary of Time Warner, and through backbone networks that provide connectivity to the Internet and are operated by third parties, including AOL. We pay fees for leased circuits based on the amount of capacity used and pay for Internet connectivity based either on a fixed fee for a specified amount of available capacity or on the amount of data traffic received from and sent over the provider s backbone network. We provide all major high-speed data customer service applications and monitor our

IP network, through our operation of two national data centers, eight regional data centers and two network operations centers.

We deliver Digital Phone voice services to our customers over the same system facilities used to provide video and high-speed data services. We provide Digital Phone customers with a voice-enabled cable modem that digitizes voice signals and routes them as data packets, using Internet protocol, a common standard for the packaging of data for transmission, over the cable system to one of our regional data centers. At the

Table of Contents

regional data center, a softswitch routes the data packets as appropriate based on the call s destination. Calls destined for end users outside of our network are routed through devices called session border controllers in the session initiation protocol format and delivered to our wholesale service providers. Such calls are then routed to a traditional public telephone switch, operated by one of our wholesale service providers, and then to their final destination (e.g., a residential or business end-user, a 911 dispatcher, or an operator). Calls placed outside of our network and intended for our subscribers follow a reverse route. Calls entirely within our network are generally routed by the softswitch to the appropriate end user without the use of a traditional public telephone switch.

Set-top Boxes

Our Basic and Standard tier subscribers generally do not require a set-top box to view their video services. However, because our digital signals and signals for premium programming are secured, our digital video customers receiving one-way (i.e., non-interactive) programming, such as premium channels and digital cable networks, can only receive such channels if they have a digital set-top box or if they have a digital cable ready television or similar device equipped with a CableCARD (as described below under Set-top Box Developments). Customers receiving our two-way video services, such as VOD and our interactive program guide, must have a digital set-top box that we provide to receive these services. Each of our cable systems uses one of only two conditional access systems to secure signals from unauthorized receipt, the intellectual property rights to which are controlled by set-top box manufacturers. In part as a result of the proprietary nature of these conditional access schemes, we currently purchase set-top boxes from a limited number of suppliers. For more information, see Risk Factors Risks Related to Dependence on Third Parties We may not be able to obtain necessary hardware, software and operational support. The cable industry has recently entered into agreements with certain consumer electronics manufacturers under which they will shortly complete development of a limited number of interactive digital cable ready televisions (i.e., sets capable of utilizing our two-way services without the need for a set-top box). We have begun ordering some set-top boxes from some of these manufacturers as well. Our purchasing agreements generally provide us with most favored nation treatment under which the suppliers must offer us favorable price terms, subject to some limitations.

Historically, we have also relied primarily on set-top box suppliers to create the applications and interfaces we make available to our customers. Although we believe that our current applications and interfaces are compelling to customers, the lack of compatibility among set-top box operating systems has in the past hindered applications development. This is beginning to change somewhat, as third parties have begun to develop interactive applications, such as gaming and polling applications, notwithstanding the lack of common platform among set-top box schemes. Over the last few years, we have been developing our own interactive program guide and user interface, which we are in the process of deploying.

As described below under Set-top Box Developments, as current technological and compatibility issues for set-top box applications are resolved and a common platform for set-top box applications emerges, we expect that applications developers will devote more time and resources to the creation of innovative digital platform products, which should enable us to offer new features to our subscribers in the future.

Set-top Box Developments

There have been a number of market and regulatory developments in recent years that may impact the costs and benefits to us of providing customers with set-top boxes.

Plug and play. In December 2002, cable operators and consumer-electronics companies entered into a standard-setting agreement, known as the plug and play agreement, relating to interoperability between cable systems and reception equipment. The FCC promulgated rules to implement the agreement, under which cable systems with activated spectrum of 750MHz or higher must, among other things, support digital cable ready consumer electronic devices

(e.g., televisions) equipped with a slot for a CableCARD. The CableCARD performs certain security functions and enables the device to tune and receive encrypted (or scrambled) digital signals without the need for a separate set-top box.

The plug and play agreement and the FCC rules address only unidirectional devices (i.e., devices capable of utilizing only cable operators one-way transmission services) and not devices capable of carrying two-way services, such as interactive program guides and VOD. As a result, those of our customers who use a CableCARD equipped television set, and who do not have a set-top box, cannot access these advanced services. If a significant number of our subscribers decline set-top boxes in favor of one-way devices purchased at retail, it could have an adverse effect on our business. For more information, see Risk Factors Risks Related to Dependence on Third Parties The adoption of, or the failure to adopt, certain consumer electronics devices may negatively impact our offerings of new and enhanced services. Cable operators, consumer-electronics companies and other market participants have been holding discussions that may lead to a similar set of interoperability agreements covering digital devices capable of carrying cable operators two-way, interactive products and services. Although efforts to reach an inter-industry agreement on two-way interoperability standards have not yielded results, as noted above, certain consumer electronics manufacturers have entered into direct agreements with the cable industry under which they will shortly complete development of a limited number of two-way capable television sets.

If two-way interoperability standards can be agreed upon, or if other efforts to enable consumer electronics devices to securely receive and utilize our two-way services are successful, our business could be benefited. First, consumer electronic companies could manufacture set-top boxes without the need to license our current suppliers conditional access technology, which could lead to greater competition and innovation. Second, if customers widely adopted such devices sold at retail, it would likely reduce our set-top box capital expenditures and the need for installation appointments in homes already wired for cable. However, we could suffer a decline in set-top box revenues. Furthermore, in the long term, as interoperability for two-way devices evolves, consumer electronics companies may be more willing to develop products that make enhanced use of digital cable s capabilities, expanding the range of services we could offer.

Under another set of FCC regulations, which became effective on July 1, 2007, cable operators must cease placing into service new set-top boxes with security functions built into the box. In other words, new set-top boxes deployed by cable operators are required to utilize a CableCARD or similar means of separating security functions from other set-top box functions. See Regulatory Matters Communications Act and FCC Regulation Other regulatory requirements of the Communications Act and the FCC below. The provision of set-top boxes that accept a CableCARD, or similar separate security device, will significantly increase per-unit set-top box costs as compared with the set-top boxes we have been using, which utilize integrated security. The FCC has also ordered the cable industry to investigate and report on the possibility of implementing a downloadable security system that would be accessible to all set-top devices. If the implementation of such a system proves technologically feasible, this may eliminate the need for consumers to lease separate conditional-access security devices.

Open cable application platform. CableLabs, a nonprofit research and development consortium founded by members of the cable industry, has put forward a set of hardware and software specifications known as OpenCable, which represent an effort to achieve compatibility across cable network interfaces. The OpenCable software specification, which is known as open cable application platform, or OCAP, is intended to create a common platform for set-top box applications regardless of what operating system the box uses. The OpenCable specification is consistent with the CableCARD specification promulgated under the FCC s plug and play rules and the encryption technology that allows the CableCARD to securely communicate with the host device. If widely adopted, OCAP could spur innovation in applications for set-top boxes and cable-ready consumer electronics devices. Furthermore, the availability of multi-platform set-top box applications should, together with the move toward separable conditional access systems, help to make set-top boxes more fungible, resulting in increased competition among manufacturers. We expect to deploy OCAP in nearly all of our operating areas by the end of 2008.

Content and Equipment Suppliers

Video Programming Content

We believe that offering a wide variety of programming is an important factor influencing a subscriber s decision to subscribe to and retain our video services. We devote considerable resources to obtaining access to a wide range of programming that we believe will appeal to both existing and potential subscribers.

Cable television networks. The terms and conditions of carriage of cable programming services are generally established through written affiliation agreements between programmers, including affiliates of Time Warner, and us. Most cable programming services are available to us for a fixed monthly per subscriber fee, which sometimes includes a volume discount pricing structure. However, payments to the providers of some premium channels, may be based on a percentage of our gross receipts from subscriptions to the channels. For home shopping channels, we do not pay and generally receive a percentage of the amount spent on home shopping purchases that is attributable to our subscribers and in some instances receive minimum guarantees.

Our programming contracts usually continue for a fixed period of time, generally from three to seven years. We believe that our ability to provide compelling programming packages is best served when we have maximum flexibility to determine on which systems and tiers a programming service will be carried. Sometimes, our flexibility is limited by the affiliation agreement. It is often necessary to agree to carry a particular programming service in certain of our cable systems and/or carry the service on a specific tier. In some cases, it is necessary for us to agree to distribute a programming service to a minimum number of subscribers or to a minimum percentage of our subscribers.

Broadcast television signals. Generally, we carry all local full power analog broadcast stations serving the areas in which we provide cable service. In most areas, we also carry the digital broadcast signals of a number of these stations. In some cases, we carry these stations under the FCC must-carry rules. In other cases, we must negotiate with the stations owners for the right to retransmit these stations signals. For more information, see Regulatory Matters below. Currently, we have multi-year retransmission consent agreements in place with most of the retransmission consent stations we carry. In other cases, we are carrying stations under short-term arrangements while we negotiate new long-term agreements.

Pay-Per-View and On-Demand content. Generally, we obtain rights to carry movies on an on-demand basis, as well as Pay-Per-View events, through iN Demand, a company in which we hold a minority interest. iN Demand negotiates with motion picture studios to obtain the relevant distribution rights. In some instances, we have contracted directly with the motion picture studios for the rights to carry their movies on an on-demand basis. Movies-on-Demand content is generally provided to us under a revenue-sharing arrangement, although in some cases there are minimum guaranteed payments required.

Our ability to get access to current hit films in a timely fashion is hampered to some extent by the traditional sequence of Hollywood s distribution windows. Typically, after theatrical release, films are made available to home video distributors on an exclusive basis for a set period of time, currently about 45 days. It is only after home video has enjoyed its exclusive window that Movies-on-Demand and Pay-Per-View distributors can gain access to the content. It is possible that subscriber purchases of Movies-on-Demand would increase if we were able to provide hit films during the home video window. However, despite continuing efforts to do so, we have generally been unable to obtain the right to offer current hit films during this window on a regular basis.

In line with our goal of offering a wide variety of programming that will appeal to both existing and potential subscribers, we are trying to maximize the quantity and quality of all of our video offerings, especially our VOD

offerings. As additional VOD content becomes available we evaluate it to determine if it meets our standards and to the extent it does, we begin offering it to our digital subscribers.

We obtain SVOD and other free on-demand content directly from the relevant content providers.

Set-top Boxes

We purchase set-top boxes and CableCARDs from a limited number of suppliers. We lease these devices to subscribers at monthly rates. Our video equipment fees are regulated. Under FCC rules, cable operators are allowed to set equipment rates for set-top boxes, CableCARDs and remote controls on the basis of actual capital costs, plus an annual after-tax rate of return of 11.25%, on the capital cost (net of depreciation). This

rate of return allows us to economically provide sophisticated customer premise equipment to subscribers. See Technology Set-top Boxes above and Regulatory Matters below.

Competition

We face intense competition from a variety of alternative information and entertainment delivery sources, principally from direct-to-home satellite video providers and certain regional telephone companies, each of which offers or will shortly be able to offer a broad range of services through increasingly varied technologies. In addition, technological advances will likely increase the number of alternatives available to our customers from other providers and intensify the competitive environment. See Risk Factors Risks Related to Competition.

Principal Competitors

Direct broadcast satellite. Our video services face competition from direct broadcast satellite services, such as the Dish Network and DirecTV. DirecTV and Dish Network offer satellite-delivered pre-packaged programming services that can be received by relatively small and inexpensive receiving dishes. The video services provided by these satellite providers are comparable, in many respects, to our analog and digital video services, and direct broadcast satellite subscribers can obtain satellite receivers with integrated digital video recorders from those providers as well. Both major direct broadcast satellite providers have entered into co-marketing arrangements with regional telephone companies that allow these telephone companies to offer customers a bundle of video, telephone and DSL services, which competes with our Triple Play of video, high-speed data and Digital Phone services.

Incumbent local telephone companies. Our high-speed data and Digital Phone services face competition from the DSL and traditional phone offerings of incumbent local telephone companies in most of our operating areas. In some cases, DSL providers have partnered with ISPs such as AOL, which may enhance DSL s competitive position. In addition, some incumbent local telephone companies, such as AT&T and Verizon, have undertaken fiber-optic upgrades of their networks. The technologies they are using, such as FTTN and FTTH, are capable of carrying two-way video, high-speed data with substantial bandwidth and IP-based telephony services, each of which is similar to the comparable services we offer. These networks allow for the marketing of service bundles of video, data and voice services and these companies also have the ability to include wireless services provided by owned or affiliated companies in bundles that they may offer.

Cable overbuilds. We operate our cable systems under non-exclusive franchises granted by state or local authorities. The existence of more than one cable system, including municipality-owned systems, operating in the same territory is referred to as an overbuild. In some of our operating areas, other operators have overbuilt our systems and/or offer video, data and voice services in competition with us.

Satellite Master Antenna Television (SMATV). Additional competition comes from private cable television systems servicing condominiums, apartment complexes and certain other multiple dwelling units, often on an exclusive basis, with local broadcast signals and many of the same satellite-delivered program services offered by franchised cable systems. Some SMATV operators now offer voice and high-speed data services as well.

Wireless Cable/Multi-channel Microwave Distribution Services (MMDS). We face competition from wireless cable operators, including digital wireless operators, who use terrestrial microwave technology to distribute video programming and some of which now offer voice and high-speed data services.

Other Competition and Competitive Factors

Aside from competing with the video, data and voice services offered by direct broadcast satellite providers, local incumbent telephone companies, cable overbuilders and some SMATVs and MMDSs, each of our services also faces competition from other companies that provide services on a stand-alone basis.

Table of Contents

Video competition. Our video services face competition on a stand-alone basis from a number of different sources, including:

- local television broadcast stations that provide free over-the-air programming which can be received using an antenna and a television set;
- local television broadcasters, which in selected markets sell digital subscription services; and
- video programming delivered over broadband Internet connections.

Our VOD services compete with online movie services, which are delivered over broadband Internet connections, and with video stores and home video products.

Online competition. Our high-speed data services face or may face competition from a variety of companies that offer other forms of online services, including low cost dial-up services over ordinary telephone lines, and developing technologies, such as Internet service via power lines, satellite and various wireless services (e.g., Wi-Fi), including those of local municipalities.

Digital Phone competition. Our Digital Phone service also competes with wireless phone providers and national providers of Internet-based phone products such as Vonage. The increase in the number of different technologies capable of carrying voice services has intensified the competitive environment in which our Digital Phone service operates.

Additional competition. In addition to multi-channel video providers, cable systems compete with all other sources of news, information and entertainment, including over-the-air television broadcast reception, live events, movie theaters and the Internet. In general, we also face competition from other media for advertising dollars. To the extent that our products and services converge with theirs, we compete with the manufacturers of consumer electronics products. For instance, our digital video recorders compete with similar devices manufactured by consumer electronics companies.

Franchise process. Under the Cable Television Consumer Protection and Competition Act of 1992, franchising authorities are prohibited from unreasonably refusing to award additional franchises. In December 2006, the FCC adopted an order intended to make it easier for competitors to obtain franchises, by defining when the actions of county- and municipal-level franchising authorities will be deemed to be unreasonable as part of the franchising process. The order, among other things, establishes deadlines for franchising authorities to act on competitive franchise applications; prohibits franchising authorities from placing unreasonable build-out demands on competitive applicants; and prohibits franchising authorities from requiring competitive applicants to undertake certain obligations concerning the provision of public, educational, and governmental access programming. Furthermore, legislation supported by regional telephone companies has been proposed at the state and federal level and enacted in a number of states to allow these companies to enter the video distribution business without obtaining local franchise approval and often on substantially more favorable terms than those afforded us and other existing cable operators. Legislation of this kind has been enacted in California, New Jersey, North Carolina, South Carolina and Texas. See Risk Factors Risks Related to Government Regulation.

Employees

As of June 30, 2007, we had approximately 45,000 employees, including approximately 1,700 part-time employees. Approximately 4.5% of our employees are represented by labor unions. We consider our relations with our employees to be good.

Regulatory Matters

Our business is subject, in part, to regulation by the FCC and by most local and some state governments where we have cable systems. In addition, our business is operated subject to compliance with the terms of the Memorandum Opinion and Order issued by the FCC in July 2006 in connection with the regulatory clearance of the Transactions (the Adelphia/Comcast Transactions Order). In addition, various legislative and

regulatory proposals under consideration from time to time by Congress and various federal agencies have in the past materially affected us and may do so in the future.

The following is a summary of the terms of the Adelphia/Comcast Transactions Order as well as current significant federal, state and local laws and regulations affecting the growth and operation of our businesses. The summary of the Adelphia/Comcast Transactions Order herein does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the provisions of the Adelphia/Comcast Transactions Order.

Adelphia/Comcast Transactions Order

In the Adelphia/Comcast Transactions Order, the FCC imposed conditions on us, which will expire in July 2012, related to regional sports networks, as defined in the Adelphia/Comcast Transactions Order (RSNs), and the resolution of disputes pursuant to the FCC s leased access regulations. In particular, the Adelphia/Comcast Transactions Order provides that:

- neither we nor our affiliates may offer an affiliated RSN on an exclusive basis to any multi-channel video programming distributor (MVPD);

- we may not unduly or improperly influence:

  - the decision of any affiliated RSN to sell programming to an unaffiliated MVPD;

  - the prices, terms, and conditions of sale of programming by an affiliated RSN to an unaffiliated MVPD;

- if an MVPD and an affiliated RSN cannot reach an agreement on the terms and conditions of carriage, the MVPD may elect commercial arbitration to resolve the dispute;

- if an unaffiliated RSN is denied carriage by us, it may elect a form of commercial arbitration to resolve the dispute in accordance with federal and FCC rules, subject to de novo review by the FCC; and

- with respect to leased access, if an unaffiliated programmer is unable to reach an agreement with us, that programmer may elect commercial arbitration to resolve the dispute, with the arbitrator being required to resolve the dispute using the FCC s existing rate formula relating to pricing terms.

The application and scope of these conditions have not yet been tested, but some of them are the subject of an arbitration with the Mid-Atlantic Sports Network. We retain the right to obtain FCC and judicial review of any arbitration awards made pursuant to these conditions.

Communications Act and FCC Regulation

The Communications Act and the regulations and policies of the FCC affect significant aspects of our cable system operations, including video subscriber rates; carriage of broadcast television stations, as well as the way we sell our program packages to subscribers; the use of cable systems by franchising authorities and other third parties; cable system ownership; offering of voice and high-speed data services; and use of utility poles and conduits.

Net neutrality legislative and regulatory proposals. In the 2005-2006 Congressional term, several net neutrality -type provisions were introduced as part of broader Communications Act reform legislation. These provisions would have limited to a greater or lesser extent the ability of broadband providers to adopt pricing models and network management policies that would differentiate based on different uses of the Internet. None of these provisions was

adopted. Similar legislation has been introduced in the current Congressional term.

In September 2005, the FCC issued a non-binding policy statement regarding net neutrality (the Net Neutrality Policy Statement). The FCC indicated that the statement was intended to offer guidance and insight into its approach to the Internet and broadband related issues. The principles contained in the statement set forth the FCC s view that consumers are entitled to access and use the lawful Internet content and applications of their choice, to connect lawful devices of their choosing that do not harm the broadband

provider s network and are entitled to competition among network, application, service and content providers. The FCC statement also noted that these principles are subject to reasonable network management. Subsequently, the FCC has made these principles binding as to certain telecommunications companies in orders adopted in connection with mergers undertaken by those companies. To date, the FCC has declined to adopt any such regulations that would be applicable to us.

Several parties are seeking to persuade the FCC to adopt net neutrality-type regulations in a number of proceedings that are currently pending before the agency. These include pending FCC rulemakings regarding IP-enabled services and broadband Internet access services. In addition, in March 2007, the FCC opened a Notice of Inquiry regarding the implementation of net neutrality regulations.

We are unable to predict the likelihood that legislative or additional regulatory proposals regarding net neutrality will be adopted. For a discussion of net neutrality and the impact such proposals could have on us if adopted, see the discussion in Risk Factors Risks Related to Government Regulation Net neutrality legislation or regulation could limit our ability to operate our high-speed data business profitably, to manage our broadband facilities efficiently and to make upgrades to those facilities sufficient to respond to growing bandwidth usage by our high-speed data customers.

Subscriber rates. The Communications Act and the FCC s rules regulate rates for basic cable service and equipment in communities that are not subject to effective competition, as defined by federal law. Where there is no effective competition, federal law authorizes franchising authorities to regulate the monthly rates charged by the operator for the minimum level of video programming service, referred to as basic service, which generally includes local broadcast channels and public access or educational and government channels required by the franchise. This kind of regulation also applies to the installation, sale and lease of equipment used by subscribers to receive basic service, such as set-top boxes and remote control units. In many localities, we are no longer subject to this rate regulation, either because the local franchising authority has not become certified by the FCC to regulate these rates or because the FCC has found that there is effective competition.

Carriage of broadcast television stations and other programming regulation. The Communications Act and the FCC s regulations contain broadcast signal carriage requirements that allow local commercial television broadcast stations to elect once every three years to require a cable system to carry their stations, subject to some exceptions, or to negotiate with cable systems the terms by which the cable systems may carry their stations, commonly called retransmission consent. The most recent election by broadcasters became effective on January 1, 2006.

The Communications Act and the FCC s regulations require a cable operator to devote up to one-third of its activated channel capacity for the mandatory carriage of local commercial television stations. The Communications Act and the FCC s regulations give local non-commercial television stations mandatory carriage rights, but non-commercial stations do not have the option to negotiate retransmission consent for the carriage of their signals by cable systems. Additionally, cable systems must obtain retransmission consent for all distant commercial television stations (i.e., those television stations outside the designated market area to which a community is assigned) except for commercial satellite-delivered independent superstations and some low-power television stations.

FCC regulations require us to carry the signals of both commercial and non-commercial local digital-only broadcast stations and the digital signals of local broadcast stations that return their analog spectrum to the government and convert to a digital broadcast format. The FCC s rules give digital-only broadcast stations discretion to elect whether the operator will carry the station s primary signal in a digital or converted analog format, and the rules also permit broadcasters with both analog and digital signals to tie the carriage of their digital signals to the carriage of their analog signals as a retransmission consent condition.

The Communications Act also permits franchising authorities to negotiate with cable operators for channels for public, educational and governmental access programming. It also requires a cable system with 36 or more activated channels to designate a significant portion of its channel capacity for commercial leased access by third parties to provide programming that may compete with services offered by the cable operator.

The FCC regulates various aspects of such third party commercial use of channel capacity on our cable systems, including the rates and some terms and conditions of the commercial use.

In connection with certain changes in our programming line-up, the Communications Act and FCC regulations also require us to give various kinds of advance notice. Under certain circumstances, we must give as much as 30 days advance notice to subscribers, programmers and franchising authorities. Under certain circumstances, notice may have to be given in the form of bill inserts, on-screen announcements and/or newspaper advertisements. Giving notice can be expensive and, given long lead times, may limit our ability to implement programming changes quickly. Direct broadcast satellite operators and other non-cable programming distributors are not subject to analogous duties.

High-speed Internet access. From time to time, industry groups, telephone companies and ISPs have sought local, state and federal regulations that would require cable operators to sell capacity on their systems to ISPs under a common carrier regulatory scheme. Cable operators have successfully challenged regulations requiring this forced access, although courts that have considered these cases have employed varying legal rationales in rejecting these regulations.

In 2002, the FCC released an order in which it determined that cable-modem service constitutes an information service rather than a cable service or a telecommunications service, as those terms are used in the Communications Act. That determination was sustained by the U.S. Supreme Court. According to the FCC, an information service classification may permit but does not require it to impose multiple ISP requirements. In 2002, the FCC initiated a rulemaking proceeding to consider whether it may and should do so and whether local franchising authorities should be permitted to do so. As of August 2007, this rulemaking proceeding was still pending. As noted above, in 2005, the FCC adopted a Net Neutrality Policy Statement intended to offer guidance on its approach to the Internet and broadband access. Among other things, the Policy Statement stated that consumers are entitled to competition among network, service and content providers, and to access the lawful content and services of their choice, subject to the needs of law enforcement. The FCC may in the future adopt specific regulations to implement the Policy Statement.

Ownership limitations. There are various rules prohibiting joint ownership of cable systems and other kinds of communications facilities. Local telephone companies generally may not acquire more than a small equity interest in an existing cable system in the telephone company s service area, and cable operators generally may not acquire more than a small equity interest in a local telephone company providing service within the cable operator s franchise area. In addition, cable operators may not have more than a small interest in MMDS facilities or SMATV systems in their service areas. Finally, the FCC has been exploring whether it should prohibit cable operators from holding ownership interests in satellite operators.

The Communications Act also required the FCC to adopt reasonable limits on the number of subscribers a cable operator may reach through systems in which it holds an ownership interest. In September 1993, the FCC adopted a rule that was later amended to prohibit any cable operator from serving more than 30% of all cable, satellite and other multi-channel subscribers nationwide. The Communications Act also required the FCC to adopt reasonable limits on the number of channels that cable operators may fill with programming services in which they hold an ownership interest. In September 1993, the FCC imposed a limit of 40% of a cable operator s first 75 activated channels. In March 2001, a federal appeals court struck down both limits and remanded the issue to the FCC for further review. The FCC initiated a rulemaking in 2001 to consider adopting a new horizontal ownership limit and announced a follow-on proceeding to consider the issue anew. As of August 2007, the FCC was continuing to explore whether it should re-impose any limits.

Pole attachment regulation. The Communications Act requires that utilities provide cable systems and telecommunications carriers with non-discriminatory access to any pole, conduit or right-of-way controlled by investor-owned utilities. The Communications Act also requires the FCC to regulate the rates, terms and conditions

imposed by these utilities for cable systems use of utility pole and conduit space unless state authorities demonstrate to the FCC that they adequately regulate pole attachment rates, as is the case in some states in which we operate. In the absence of state regulation, the FCC administers pole attachment rates on a formula basis. The FCC s original rate formula governs the maximum rate utilities may charge for attachments to their poles and conduit by cable operators providing cable services. The FCC also adopted a second rate

formula that became effective in February 2001 and governs the maximum rate investor-owned utilities may charge for attachments to their poles and conduit by companies providing telecommunications services. The U.S. Supreme Court has upheld the FCC s jurisdiction to regulate the rates, terms and conditions of cable operators pole attachments that are being used to provide both cable service and high-speed data service. The applicability of this determination to our voice services is still an open issue.

Set-top box regulation. Certain regulatory requirements are also applicable to set-top boxes. Currently, many cable subscribers rent from their cable operator a set-top box that performs both signal-reception functions and conditional-access security functions. The lease rates cable operators charge for this equipment are subject to rate regulation to the same extent as basic cable service. In 1996, Congress enacted a statute seeking to allow subscribers to use set-top boxes obtained from third party retailers. The most important of the FCC s implementing regulations requires cable operators to offer separate equipment providing only the security function (so that subscribers can purchase set-top boxes or other navigational devices from other sources) and to cease placing into service new set-top boxes that have integrated security. The regulations requiring cable operators to cease distributing new set-top boxes with integrated security became effective on July 1, 2007. We expect to incur approximately $50 million in incremental set-top box costs during 2007 as a result of these regulations.

In December 2002, cable operators and consumer-electronics companies entered into a standard-setting agreement relating to reception equipment that uses a conditional-access security card a CableCARD™ provided by the cable operator to receive one-way cable services. To implement the agreement, the FCC adopted regulations that (i) establish a voluntary labeling system for such one-way devices; (ii) require most cable systems to support these devices; and (iii) adopt various content-encoding rules, including a ban on the use of selectable output controls. The FCC has recently initiated a notice of proposed rulemaking that may lead to regulations covering equipment sold at retail that is designed to receive two-way products and services.

Other regulatory requirements of the Communications Act and the FCC. The Communications Act also includes provisions regulating customer service, subscriber privacy, marketing practices, equal employment opportunity, technical standards and equipment compatibility, antenna structure notification, marking, lighting, emergency alert system requirements and the collection from cable operators of annual regulatory fees, which are calculated based on the number of subscribers served and the types of FCC licenses held.

Separately, the FCC has adopted cable inside wiring rules to provide specific procedures for the disposition of residential home wiring and internal building wiring where a subscriber terminates service or where an incumbent cable operator is forced by a building owner to terminate service in a multiple dwelling unit building. The FCC has also adopted rules providing that, in the event that an incumbent cable operator sells the inside wiring, it must make the wiring available to the multiple dwelling unit owner or the alternative cable service provider during the 24-hour period prior to the actual service termination by the incumbent, in order to avoid service interruption.

Compulsory copyright licenses for carriage of broadcast stations and music performance licenses. Our cable systems provide subscribers with, among other things, local and distant television broadcast stations. We generally do not obtain a license to use the copyrighted performances contained in these stations programming directly from program owners. Instead, we obtain this license pursuant to a compulsory license provided by federal law, which requires us to make payments to a copyright pool. The elimination or substantial modification of the cable compulsory license could adversely affect our ability to obtain suitable programming and could substantially increase the cost of programming that remains available for distribution to our subscribers.

When we obtain programming from third parties, we generally obtain licenses that include any necessary authorizations to transmit the music included in it. When we create our own programming and provide various other programming or related content, including local origination programming and advertising that we insert into

cable-programming networks, we are required to obtain any necessary music performance licenses directly from the rights holders. These rights are generally controlled by three music performance rights organizations, each with rights to the music of various composers. We generally have obtained the necessary licenses, either through negotiated licenses or through procedures established by consent decrees entered into by some of the music performance rights organizations.

State and Local Regulation

Cable operators operate their systems under non-exclusive franchises. Franchises are awarded, and cable operators are regulated, by state franchising authorities, local franchising authorities, or both. We believe we generally have good relations with state and local cable regulators.

Franchise agreements typically require payment of franchise fees and contain regulatory provisions addressing, among other things, upgrades, service quality, cable service to schools and other public institutions, insurance and indemnity bonds. The terms and conditions of cable franchises vary from jurisdiction to jurisdiction. The Communications Act provides protections against many unreasonable terms. In particular, the Communications Act imposes a ceiling on franchise fees of five percent of revenues derived from cable service. We generally pass the franchise fee on to our subscribers, listing it as a separate item on the bill.

Franchise agreements usually have a term of ten to 15 years from the date of grant, although some renewals may be for shorter terms. Franchises usually are terminable only if the cable operator fails to comply with material provisions. We have not had a franchise terminated due to breach. After a franchise agreement expires, a local franchising authority may seek to impose new and more onerous requirements, including requirements to upgrade facilities, to increase channel capacity and to provide various new services. Federal law, however, provides significant substantive and procedural protections for cable operators seeking renewal of their franchises. In addition, although we occasionally reach the expiration date of a franchise agreement without having a written renewal or extension, we generally have the right to continue to operate, either by agreement with the local franchising authority or by law, while continuing to negotiate a renewal. In the past, substantially all of the material franchises relating to our systems have been renewed by the relevant local franchising authority, though sometimes only after significant time and effort. During 2006, in adopting new regulations intended to limit the ability of local franchising authorities to delay or refuse the grant of competitive franchises (by, for example, imposing deadlines on franchise negotiations), the FCC announced the adoption of a Further Notice of Proposed Rulemaking that concluded tentatively that these new regulations should also apply to existing franchisees, including cable operators, at the time of their next franchise renewal. The FCC indicated it would issue an order in the Further Notice of Proposed Rulemaking within six months from release of the final order adopting the new regulations applicable to new entrants. Despite our efforts and the protections of federal law, it is possible that some of our franchises may not be renewed, and we may be required to make significant additional investments in our cable systems in response to requirements imposed in the course of the franchise renewal process. See Competition Other Competition and Competitive Factors Franchise process.

Local telephone companies may provide service as traditional cable operators with local franchises or they may opt to provide their programming over unfranchised open video systems. Open video systems are subject to specified requirements, including, but not limited to, a requirement that they set aside a portion of their channel capacity for use by unaffiliated program distributors on a non-discriminatory basis.

Regulation of Telephony

Traditional providers of circuit-switched telephone services generally are subject to significant regulation. It is unclear whether and to what extent regulators will subject services like our Digital Phone service (Non-traditional Voice Services) to the regulations that apply to these traditional services provided by incumbent telephone companies. In February 2004, the FCC opened a broad-based rulemaking proceeding to consider these and other issues. That rulemaking remains pending. The FCC has, however, issued a series of orders resolving discrete issues on a piecemeal basis. For example, over the past several years, the FCC has required Non-traditional Voice Service providers to supply E911 capabilities as a standard feature to their subscribers, to assist law enforcement investigations with wiretaps and information, to contribute to the federal universal service fund, to pay regulatory fees, to comply with

customer privacy rules and to provide access to their services to persons with disabilities. Certain other issues remain unclear. In particular, in November 2004, the FCC issued an order stating that certain kinds of Non-traditional Voice Services are not subject to state certification and tariffing requirements. The full extent of this preemption is not clear. One state public utility commission, for example, has determined that our Digital Phone service is subject to traditional, circuit-

108

Table of Contents

switched telephone regulations. This determination has been appealed. It is also unclear whether utility pole owners may charge cable operators offering Non-traditional Voice Services higher rates for pole rental than for traditional cable service and cable-modem service.

Legal Proceedings

On May 20, 2006, the America Channel LLC (America Channel) filed a lawsuit in U.S. District Court for the District of Minnesota against both us and Comcast alleging that the purchase of Adelphia by Comcast and us will injure competition in the cable system and cable network markets and violate the federal antitrust laws. The lawsuit seeks monetary damages as well as an injunction blocking the Adelphia acquisition. The United States Bankruptcy Court for the Southern District of New York issued an order enjoining America Channel from pursuing injunctive relief in the District of Minnesota and ordering that America Channel s efforts to enjoin the transaction can only be heard in the Southern District of New York, where the Adelphia bankruptcy is pending. America Channel s appeal of this order was dismissed on October 10, 2006, and its claim for injunctive relief should now be moot. However, America Channel has announced its intention to proceed with its damages case in the District of Minnesota. On September 19, 2006, we filed a motion to dismiss this action, which was granted on January 17, 2007 with leave to replead. On February 5, 2007, the America Channel filed an amended complaint. We filed a motion to dismiss the amended complaint on April 10, 2007, which motion was granted on June 28, 2007. America Channel has appealed this decision. We intend to defend against this lawsuit vigorously, but are unable to predict the outcome of this suit or reasonably estimate a range of possible loss.

On June 22, 2005, Mecklenburg County filed suit against TWE-A/N in the General Court of Justice District Court Division, Mecklenburg County, North Carolina. Mecklenburg County, the franchisor in TWE-A/N s Mecklenburg County cable system, alleges that TWE-A/N s predecessor failed to construct an institutional network in 1981 and that TWE-A/N assumed that obligation upon the transfer of the franchise in 1995. Mecklenburg County is seeking compensatory damages and TWE-A/N s release of certain video channels it is currently using on the cable system. On April 14, 2006, TWE-A/N filed a motion for summary judgment, which is pending. We intend to defend against this lawsuit vigorously, but are unable to predict the outcome of this suit or reasonably estimate a range of possible loss.

On June 16, 1998, plaintiffs in *Andrew Parker and Eric DeBrauwere, et al.* v. *Time Warner Entertainment Company, L.P. and Time Warner Cable* filed a purported nationwide class action in U.S. District Court for the Eastern District of New York claiming that TWE sold its subscribers personally identifiable information and failed to inform subscribers of their privacy rights in violation of the Cable Communications Policy Act of 1984 and common law. The plaintiffs seek damages and declaratory and injunctive relief. On August 6, 1998, TWE filed a motion to dismiss, which was denied on September 7, 1999. On December 8, 1999, TWE filed a motion to deny class certification, which was granted on January 9, 2001 with respect to monetary damages, but denied with respect to injunctive relief. On June 2, 2003, the U.S. Court of Appeals for the Second Circuit vacated the District Court s decision denying class certification as a matter of law and remanded the case for further proceedings on class certification and other matters. On May 4, 2004, plaintiffs filed a motion for class certification, which we have opposed. On October 25, 2005, the court granted preliminary approval of a class settlement arrangement on terms that were not material to us. A final settlement approval hearing was held on May 19, 2006, and on January 26, 2007, the court denied approval of the settlement. We intend to defend against this lawsuit vigorously, but are unable to predict the outcome of the suit.

Certain Patent Litigation

On September 1, 2006, Ronald A. Katz Technology Licensing, L.P. (Katz) filed a complaint in the U.S. District Court for the District of Delaware alleging that we and several other cable operators, among other defendants, infringe a number of patents purportedly relating to our customer call center operations, voicemail and/or VOD services. The plaintiff is seeking unspecified monetary damages as well as injunctive relief. On March 20, 2007, this case, together

with other lawsuits filed by Katz, was made subject to a Multidistrict Litigation (MDL) Order transferring the case for pretrial proceedings to the U.S. District Court

for the Central District of California. We intend to defend against the claim vigorously, but are unable to predict the outcome of the suit or reasonably estimate a range of possible loss.

On July 14, 2006, Hybrid Patents Inc. filed a complaint in the U.S. District Court for the Eastern District of Texas alleging that we and a number of other cable operators infringed a patent purportedly relating to high-speed data and Internet-based phone services. The plaintiff is seeking unspecified monetary damages as well as injunctive relief. We intend to defend against the claim vigorously, but are unable to predict the outcome of the suit or reasonably estimate a range of possible loss.

On June 1, 2006, Rembrandt Technologies, LP (Rembrandt) filed a complaint in the U.S. District Court for the Eastern District of Texas alleging that we and a number of other cable operators infringed several patents purportedly related to a variety of technologies, including high-speed data and Internet-based phone services. In addition, on September 13, 2006, Rembrandt filed a complaint in the U.S. District Court for the Eastern District of Texas alleging that we infringe several patents purportedly related to high-speed cable modem internet products and services. In each of these cases, the plaintiff is seeking unspecified monetary damages as well as injunctive relief. On June 18, 2007, these cases, along with other lawsuits filed by Rembrandt, were made subject to an MDL Order transferring the case for pretrial proceedings to the U.S. District Court for the District of Delaware. We intend to defend against these lawsuits vigorously, but are unable to predict the outcome of these suits or reasonably estimate a range of possible loss.

On April 26, 2005, Acacia Media Technologies (AMT) filed suit against us in the U.S. District Court for the Southern District of New York alleging that we infringe several patents held by AMT. AMT has publicly taken the position that delivery of broadcast video (except live programming such as sporting events), pay-per-view, video-on-demand and ad insertion services over cable systems infringe its patents. AMT has brought similar actions regarding the same patents against numerous other entities, and all of the previously pending litigations have been made the subject of an MDL Order consolidating the actions for pretrial activity in the U.S. District Court for the Northern District of California. On October 25, 2005, our action was consolidated into the MDL proceedings. The plaintiff is seeking unspecified monetary damages as well as injunctive relief. We intend to defend against this lawsuit vigorously, but are unable to predict the outcome of this suit or reasonably estimate a range of possible loss.

From time to time, we receive notices from third parties claiming that we infringe their intellectual property rights. Claims of intellectual property infringement could require us to enter into royalty or licensing agreements on unfavorable terms, incur substantial monetary liability or be enjoined preliminarily or permanently from further use of the intellectual property in question. In addition, certain agreements that we enter may require us to indemnify the other party for certain third-party intellectual property infringement claims, which could increase our damages and our costs of defending against such claims. Even if the claims are without merit, defending against the claims can be time consuming and costly.

As part of the TWE Restructuring, Time Warner agreed to indemnify the cable businesses of TWE from and against any and all liabilities relating to, arising out of or resulting from specified litigation matters brought against the TWE Non-cable Businesses. Although Time Warner has agreed to indemnify the cable businesses of TWE against such liabilities, TWE remains a named party in certain litigation matters.

The costs and other effects of pending or future litigation, governmental investigations, legal and administrative cases and proceedings (whether civil or criminal), settlements, judgments and investigations, claims and changes in those matters (including those matters described above), and developments or assertions by or against us relating to intellectual property rights and intellectual property licenses, could have a material adverse effect on our business, financial condition and operating results.

Facilities and Properties

Our principal physical assets consist of operating plant and equipment, including signal receiving, encoding and decoding devices, headends and distribution systems and equipment at or near subscribers homes for each of our cable systems. The signal receiving apparatus typically includes a tower, antenna, ancillary electronic equipment and earth stations for reception of satellite signals. Headends, consisting of

electronic equipment necessary for the reception, amplification and modulation of signals, are located near the receiving devices. Our distribution system consists primarily of coaxial and fiber optic cables, lasers, routers, switches and related electronic equipment. Our cable plant and related equipment generally are attached to utility poles under pole rental agreements with local public utilities, although in some areas the distribution cable is buried in underground ducts or trenches. Customer premise equipment consists principally of set-top boxes and cable modems. The physical components of cable systems require periodic maintenance.

Our high-speed data backbone consists of fiber owned by us or circuits leased from affiliated and third-party vendors, and related equipment. We also operate regional and national data centers with equipment that is used to provide services, such as e-mail, news and web services to our high-speed data subscribers and to provide services to our Digital Phone customers. In addition, we maintain a network operations center with equipment necessary to monitor and manage the status of our high-speed data network.

As of June 30, 2007, the largest property we owned was an approximately 318,500 square foot building housing one of our divisional headquarters, a call center and a warehouse in Columbia, SC, of which approximately 50% is leased to a third-party tenant, and we leased and owned other real property housing national operations centers and regional data centers used in our high-speed data services business in Herndon, VA; Raleigh, NC; Tampa, FL; Syracuse, NY; Austin, TX; Kansas City, MO; Orange County, CA; New York, NY; Coudersport, PA; and Columbus, OH. As of June 30, 2007, we also leased and owned locations for our corporate offices in New York, NY, Stamford, CT and Charlotte, NC as well as numerous business offices, warehouses and properties housing divisional operations throughout the country. Our signal reception sites, primarily antenna towers and headends, and microwave facilities are located on owned and leased parcels of land, and we own or lease space on the towers on which certain of our equipment is located. We own most of our service vehicles.

We believe that our properties, both owned and leased, taken as a whole, are in good operating condition and are suitable and adequate for our business operations. The nature of the facilities and properties that we acquired as a result of the Transactions is substantially similar to those used in our existing business.

The Transactions

The following provides a more detailed description of the Transactions and contains summaries of the terms of the material agreements that were entered into in connection with the Transactions. This description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the applicable agreements.

Agreements with Adelphia

As described in more detail below, under separate agreements (as amended, the TW NY Purchase Agreement and Comcast Purchase Agreement, respectively, and, collectively, the Purchase Agreements), TW NY and Comcast purchased substantially all of the cable assets of Adelphia. The Purchase Agreements were entered into after Adelphia filed voluntary petitions for relief under Chapter 11 of Title 11 of the United States Bankruptcy Code (the Bankruptcy Code). This section provides additional details regarding the Purchase Agreements, the Adelphia acquisition and Comcast s underlying acquisition of Adelphia s assets (the Comcast Adelphia acquisition), along with certain other agreements we entered into with Comcast.

The TW NY Purchase Agreement. On April 20, 2005, TW NY, one of our subsidiaries, entered into the TW NY Purchase Agreement with Adelphia. The TW NY Purchase Agreement provided that TW NY would purchase certain assets and assume certain liabilities from Adelphia. On June 21, 2006, Adelphia and TW NY entered into Amendment No. 2 to the TW NY Purchase Agreement (the TW NY Amendment). Under the terms of the TW NY Amendment, the assets TW NY acquired from Adelphia and the consideration to be paid to Adelphia remained unchanged. However,

the TW NY Amendment provided that the Adelphia acquisition would be effected in accordance with the provisions of sections 105, 363 and 365 of the Bankruptcy Code and, as a result, Adelphia s creditors were not required to approve a plan of reorganization under chapter 11 of the Bankruptcy Code prior to the consummation of the Adelphia acquisition. The Adelphia acquisition closed on July 31, 2006, immediately after the Redemptions. The Adelphia acquisition included cable systems located

in the following areas: West Palm Beach, Florida; Cleveland and Akron, Ohio; Los Angeles, California; and suburbs of the District of Columbia (some of which we transferred to Comcast as part of the Exchange). As consideration for the assets purchased from Adelphia, TW NY assumed certain liabilities as specified in the TW NY Purchase Agreement and paid to Adelphia approximately $8.9 billion in cash (including approximately $360 million paid into escrow), after giving effect to certain purchase price adjustments discussed below, and delivered 149,765,147 shares of our Class A common stock to Adelphia and 6,148,283 shares of our Class A common stock into escrow. This represents approximately 17.3% of our Class A common stock outstanding (including shares issued into escrow), and approximately 16% of our total outstanding common stock as of the closing of the Adelphia acquisition.

The purchase price was subject to customary adjustments to reflect changes in Adelphia s net liabilities and subscribers as well as any shortfall in Adelphia s capital expenditure spending relative to its budget during the interim period between the execution of the TW NY Purchase Agreement and the closing of the transactions contemplated by the TW NY Purchase Agreement (the Adelphia Closing). Approximately 6 million shares of our Class A common stock and cash were deposited into escrow to secure Adelphia s obligations in respect of any post-closing adjustments to the purchase price and its indemnification obligations for, among other things, breaches of its representations, warranties and covenants contained in the TW NY Purchase Agreement. All of the shares and substantially all of the cash have been released from escrow except for an amount of cash retained to satisfy claims against the escrow asserted on or prior to July 31, 2007.

The parties to the TW NY Purchase Agreement made customary representations and warranties. Adelphia s representations and warranties survived until July 31, 2007 and, to the extent any claims were made prior to such date, until such claims are resolved. The debtors in Adelphia s bankruptcy proceedings (excluding, except to the extent provided in the TW NY Purchase Agreement, the joint ventures described in The Comcast Purchase Agreement below), are jointly and severally liable for breaches or violations by Adelphia of its representations, warranties and covenants. The representations and warranties of TW NY contained in the TW NY Purchase Agreement expired at the Adelphia Closing.

The TW NY Purchase Agreement included customary and certain other covenants made by Adelphia and TW NY, including covenants that require Adelphia to deliver financial statements for the systems purchased sufficient to fulfill our obligations to provide such financial statements in connection with the distribution of our Class A common stock by Adelphia to certain of Adelphia s creditors.

The TW NY Purchase Agreement requires Adelphia to indemnify TW NY and each of its affiliates (including us), their respective directors, officers, shareholders, agents and other individuals (the TW Indemnified Parties) for losses and expenses stemming from the breach of any representation or warranty, covenant and certain other items. Subject to very limited exceptions, the TW Indemnified Parties are only able to seek reimbursement for losses from the escrowed cash and shares. In addition, subject to specified exceptions, losses associated with breaches of representations and warranties generally must exceed certain dollar amounts before a TW Indemnified Party may make a claim for indemnification. Even after the applicable threshold has been reached, a claim for indemnification for losses associated with breaches of representations and warranties is subject to specified aggregate deductibles and cap amounts. With respect to assets acquired from Adelphia by TW NY that were subsequently transferred to Comcast in the Exchange, Adelphia s indemnification obligation is subject to a threshold of $74 million, a deductible of $42 million and is capped at $296.7 million, subject to certain adjustments, and with respect to assets acquired by TW NY that were not transferred to Comcast pursuant to the Exchange, Adelphia s indemnification obligation is subject to a threshold of $67 million, a deductible of $38 million and is capped at $267.9 million, subject to certain adjustments.

The TW NY Purchase Agreement required us, at the Adelphia Closing, to amend and restate our by-laws to restrict us and our subsidiaries from entering into transactions with or for the benefit of Time Warner and its affiliates other than

us and our subsidiaries (the Time Warner Group), subject to specified exceptions. Additionally, prior to August 1, 2011 (five years following the Adelphia Closing), our restated certificate of incorporation and by-laws do not allow for an amendment to the provisions of our by-laws restricting these transactions without the consent of a majority of the holders of our Class A common stock, other than any

112

member of the Time Warner Group. Additionally, under the TW NY Purchase Agreement, we agreed that we will not enter into any short-form merger prior to August 1, 2008 (two years after the Adelphia Closing) and that we will not issue equity securities to any person (other than, subject to satisfying certain requirements, we and our affiliates) that have a higher vote per share than our Class A common stock prior to February 1, 2008 (18 months after the Adelphia Closing).

At the closing of the Adelphia acquisition, we and Adelphia entered into the Adelphia Registration Rights and Sale Agreement (the Adelphia Registration Rights and Sale Agreement), which governed the disposition of the shares of our Class A common stock received by Adelphia in the Adelphia acquisition. Upon the effectiveness of Adelphia s plan of reorganization, the parties obligations under the Adelphia Registration Rights and Sale Agreement terminated.

Parent Agreement. Pursuant to the Parent Agreement among Adelphia, TW NY and us, dated as of April 20, 2005, we, among other things, guaranteed the obligations of TW NY to Adelphia under the TW NY Purchase Agreement.

The Comcast Purchase Agreement. The Comcast Purchase Agreement has similar terms to the TW NY Purchase Agreement and the transactions contemplated by the Comcast Purchase Agreement also closed on July 31, 2006. The Comcast Adelphia acquisition was effected in accordance with the provisions of sections 105, 363 and 365 of the Bankruptcy Code and a plan of reorganization for the joint ventures referred to in the following sentence. The Comcast Adelphia acquisition included cable systems and Adelphia s interest in two joint ventures in which Comcast also held interests: Century-TCI California Communications, L.P. (the Century-TCI joint venture), which owned cable systems in the Los Angeles, California area, and Parnassos Communications, L.P. (the Parnassos joint venture), which owned cable systems in Ohio and Western New York. The purchase price under the Comcast Purchase Agreement was approximately $3.6 billion in cash.

Agreements with Comcast

As described in more detail below, on the same day as the parties consummated the transactions governed by the Purchase Agreements, we and some of our affiliates (collectively, the TWC Group) and Comcast consummated the TWC Redemption, the TWE Redemption and the Exchange (collectively, the TWC/Comcast Transactions). Under the terms of the agreement which governed the TWC Redemption (the TWC Redemption Agreement), we redeemed Comcast s investment in us in exchange for one of our subsidiaries that held both cable systems and cash. In accordance with the terms of the agreement which governed the TWE Redemption (the TWE Redemption Agreement), TWE redeemed Comcast s interest in TWE in exchange for one of TWE s subsidiaries that held both cable systems and cash. In accordance with the terms of the agreement which governed the Exchange (as amended, the Exchange Agreement), TW NY and Comcast transferred to one another subsidiaries that held certain cable systems, including cable systems acquired by each from Adelphia. The TWC Redemption Agreement, the TWE Redemption Agreement and the Exchange Agreement, are collectively referred to as the TWC/Comcast Agreements.

The TWC Redemption Agreement. Pursuant to the TWC Redemption Agreement, dated as of April 20, 2005, as amended, among us and certain other members of the TWC Group and Comcast, the TWC Redemption was effected and Comcast s interest in us was redeemed on July 31, 2006, immediately prior to the Adelphia acquisition. The TWC Redemption Agreement required that we redeem all of our Class A common stock held by TWE Holdings II Trust (Comcast Trust II), a trust that was established for the benefit of Comcast, in exchange for 100% of the common stock of Cable Holdco II Inc. (Cable Holdco II), then a subsidiary of ours. At the time of the TWC Redemption, Cable Holdco II held both certain cable systems previously owned directly or indirectly by us (TWC Redemption Systems) serving approximately 589,000 basic subscribers and approximately $1.9 billion in cash, subject generally to the liabilities associated with the TWC Redemption Systems. Certain specified assets and liabilities of the TWC Redemption Systems were retained by us.

The TWC Redemption Agreement contains closing adjustments to be paid in cash based on (1) the relative growth or decline in the number of basic video subscribers served by the TWC Redemption Systems as compared to the relative growth or decline in the number of basic video subscribers served by the other

113

cable systems operated by us and (2) the excess, if any, of the net liabilities of the TWC Redemption Systems over an agreed upon threshold amount.

The TWC Redemption Agreement contains various customary representations and warranties of the parties thereto including representations by us as to the absence of certain changes or events concerning the TWC Redemption Systems, compliance with law, litigation, employee benefit plans, property, intellectual property, environmental matters, financial statements, regulatory matters, taxes, material contracts, insurance and brokers. The representations and warranties of the parties to the TWC Redemption Agreement generally survive the closing of the TWC Redemption for a period of one year and certain representations and warranties either did not survive the closing of the TWC Redemption, survive indefinitely or survive until the expiration of the applicable statute of limitations (giving effect to any waiver, mitigation or extension thereof).

The TWC Redemption Agreement contains customary indemnification obligations on the part of the parties thereto with respect to breaches of representations, warranties and covenants and certain other matters, generally subject to a $20 million threshold and $200 million cap, with respect to certain of our representations and warranties regarding the TWC Redemption Systems and related matters, and with respect to certain representations and warranties of the Comcast parties relating to litigation, financial statements, finder s fees and certain regulatory matters.

TWC/Comcast Tax Matters Agreement. In connection with the closing of the TWC Redemption, we, Cable Holdco II and Comcast entered into the Holdco Tax Matters Agreement (the TWC/Comcast Tax Matters Agreement). The TWC/Comcast Tax Matters Agreement allocates responsibility for income taxes of Cable Holdco II and deals with matters relating to the income tax consequences of the TWC Redemption. This agreement contains representations, warranties and covenants relevant to such income tax treatment. The TWC/Comcast Tax Matters Agreement also contains indemnification obligations relating to the foregoing.

The TWE Redemption Agreement. Pursuant to the TWE Redemption Agreement, dated as of April 20, 2005, as amended, among us and Comcast, Comcast s interest in TWE was redeemed on July 31, 2006, immediately prior to the Adelphia acquisition. Prior to the TWE Redemption, TWE Holdings I Trust (Comcast Trust I), a trust established for the benefit of Comcast, owned a 4.7% residual equity interest in TWE. Pursuant to the TWE Redemption Agreement, TWE redeemed all of the TWE residual equity interest held by Comcast Trust I in exchange for 100% of the limited liability company interests of Cable Holdco III LLC (Cable Holdco III), then a subsidiary of TWE. At the time of the TWE Redemption, Cable Holdco III held both certain cable systems previously owned or operated directly or indirectly by TWE (the TWE Redemption Systems) serving approximately 162,000 subscribers and approximately $147 million in cash, subject generally to the liabilities associated with the TWE Redemption Systems. Certain specified assets and liabilities of the TWE Redemption Systems were retained by TWE.

The TWE Redemption Agreement contains closing adjustments to be paid in cash based on (1) the relative growth or decline in the number of basic video subscribers served by the TWE Redemption Systems as compared to the relative growth or decline in the number of basic video subscribers served by the other cable systems owned by TWE and (2) the excess, if any, of the net liabilities of the TWE Redemption Systems over an agreed upon threshold amount.

The TWE Redemption Agreement contained various customary representations and warranties of the parties thereto including representations by TWE as to the absence of certain changes or events concerning the TWE Redemption Systems, compliance with law, litigation, employee benefit plans, property, intellectual property, environmental matters, financial statements, regulatory matters, taxes, material contracts, insurance and brokers. The representations and warranties of the parties to the TWE Redemption Agreement generally survive the closing of the TWE Redemption Agreement for a period of one year and certain representations and warranties either survive indefinitely or survive until the expiration of the applicable statute of limitations (giving effect to any waiver, mitigation or extension thereof).

The TWE Redemption Agreement contained customary indemnification obligations on the part of the parties thereto with respect to breaches of representations and warranties and covenants and certain other matters, generally subject to a $6 million threshold and $60 million cap, with respect to certain representations

and warranties of TWE regarding the TWE Redemption Systems and related matters, and with respect to certain representations and warranties of the Comcast parties relating to litigation, financial statements, finder s fees and certain regulatory matters.

The Exchange Agreement. Pursuant to the Exchange Agreement, dated as of April 20, 2005, as amended, among us, TW NY and Comcast, the Exchange closed on July 31, 2006, immediately after the Adelphia acquisition. Pursuant to the Exchange Agreement, TW NY transferred all outstanding limited liability company interests of certain newly formed limited liability companies (collectively, the TW Newcos) to Comcast in exchange for all limited liability company interests of certain newly formed limited liability companies or limited partnerships, respectively, owned by Comcast (collectively, the Comcast Newcos). In addition, we paid Comcast approximately $67 million in cash for certain adjustments related to the Exchange. Included in the systems we acquired in the Exchange were cable systems (i) that were owned by the Century-TCI joint venture in the Los Angeles, California area and the Parnassos joint venture in Ohio and Western New York and (ii) then owned by Comcast located in the Dallas, Texas, Los Angeles, California, and Cleveland, Ohio areas.

The Exchange Agreement contains various customary representations and warranties of the parties thereto (which generally survive for a period of 12 months after the closing of the Exchange), including representations concerning the cable systems subject to the Exchange Agreement originally owned by us or Comcast as to the absence of certain changes or events, compliance with law, litigation, employee benefit plans, property, intellectual property, environmental matters, financial statements, regulatory matters, taxes, material contracts, insurance and brokers.

The Exchange Agreement contains customary indemnification obligations on the part of the parties thereto with respect to breaches of representations, warranties, covenants and certain other matters. Each party s indemnification obligations with respect to breaches of representations and warranties (other than certain specified representations and warranties) are subject to (1) with respect to cable systems originally owned by us that were acquired by Comcast, a $5.7 million threshold and $19.1 million cap, (2) with respect to cable systems originally owned by Adelphia that were initially acquired by us pursuant to the TW NY Purchase Agreement and then transferred to Comcast pursuant to the Exchange Agreement, a $74.6 million threshold and $746 million cap, (3) with respect to cable systems originally owned by Comcast that were acquired by us, a $41.5 million threshold and $415 million cap, and (4) with respect to cable systems originally owned by Adelphia that were initially acquired by Comcast pursuant to the Comcast Purchase Agreement and then transferred to us pursuant to the Exchange Agreement, a $34.9 million threshold and $349 million cap. In addition, no party is required to indemnify the other for breaches of representations, warranties or covenants relating to assets or liabilities initially acquired from Adelphia and then transferred to the other party, unless the breach is of a representation, warranty or covenant actually made by the party under the Exchange Agreement in relation to those Adelphia assets or liabilities.

Operating Partnerships and Joint Ventures

Time Warner Entertainment Company, L.P.

TWE is a Delaware limited partnership that was formed in 1992. At the time of the TWE Restructuring, which was completed on March 31, 2003, subsidiaries of Time Warner owned general and limited partnership interests in TWE consisting of 72.36% of the pro-rata priority capital and residual equity capital and 100% of the junior priority capital, and Comcast Trust I owned limited partnership interests in TWE consisting of 27.64% of the pro-rata priority capital and residual equity capital. Prior to the TWE Restructuring, TWE s business consisted of interests in cable systems, cable networks and filmed entertainment.

Through a series of steps executed in connection with the TWE Restructuring, TWE transferred its non-cable businesses, including its filmed entertainment and cable network businesses, along with associated liabilities, to WCI,

a wholly owned subsidiary of Time Warner, and the ownership structure of TWE was reorganized so that (i) we owned 94.3% of the residual equity interests in TWE, (ii) Comcast Trust I owned 4.7% of the residual equity interests in TWE and (iii) ATC, a wholly owned subsidiary of Time Warner, owned 1.0% of the residual equity interests in TWE and $2.4 billion in mandatorily redeemable preferred

equity issued by TWE. In addition, following the TWE Restructuring, Time Warner indirectly held shares of our Class A common stock and Class B common stock representing, in the aggregate, 89.3% of our voting power and 82.1% of our outstanding equity.

On July 28, 2006, the partnership interests and preferred equity originally held by ATC, were contributed to TW NY Holding, a wholly owned subsidiary of ours, in exchange for a 12.4% non-voting common stock interest in TW NY Holding and upon the closing of the TWE Redemption, Comcast Trust I s ownership interest in TWE was redeemed. As a result, Time Warner has no direct interest in TWE and Comcast no longer has any interest in TWE. As of June 30, 2007, TWE had $3.2 billion in principal amount of outstanding debt securities with maturities ranging from 2008 to 2033 and fixed interest rates ranging from 7.25% to 10.15%. See Management s Discussion and Analysis of Results of Operations and Financial Condition Financial Condition and Liquidity TWE Notes.

The TWE partnership agreement requires that transactions between us and our subsidiaries, on the one hand, and TWE and its subsidiaries on the other hand, be conducted on an arm s-length basis, with management, corporate or similar services being provided by us on a no mark-up basis with fair allocations of administrative costs and general overhead.

Description of Certain Provisions of the TWE-A/N Partnership Agreement

The following description summarizes certain provisions of the partnership agreement relating to TWE-A/N. Such description does not purport to be complete and is subject to, and is qualified in its entirety by reference to, the provisions of the TWE-A/N partnership agreement.

Partners of TWE-A/N. The general partnership interests in TWE-A/N are held by TW NY and an indirect subsidiary of TWE (such TWE subsidiary and TW NY are together, the TW Partners) and A/N, a partnership owned by wholly owned subsidiaries of Advance Publications Inc. and Newhouse Broadcasting Corporation. The TW Partners also hold preferred partnership interests.

2002 Restructuring of TWE-A/N. The TWE-A/N cable television joint venture was formed by TWE and A/N in December 1995. A restructuring of the partnership was completed during 2002. As a result of this restructuring, cable systems and their related assets and liabilities serving approximately 2.1 million subscribers as of December 31, 2002 (which amount is not included in TWE-A/N s 4.8 million consolidated subscribers, as of June 30, 2007) located primarily in Florida (the A/N Systems), were transferred to a subsidiary of TWE-A/N (the A/N Subsidiary). As part of the restructuring, effective August 1, 2002, A/N s interest in TWE-A/N was converted into an interest that tracks the economic performance of the A/N Systems, while the TW Partners retain the economic interests and associated liabilities in the remaining TWE-A/N cable systems. Also, in connection with the restructuring, we effectively acquired A/N s interest in Road Runner. TWE-A/N s financial results, other than the results of the A/N Systems, are consolidated with us. Road Runner continues to provide high-speed data services to the A/N Subsidiary.

Management and Operations of TWE-A/N. Subject to certain limited exceptions, a subsidiary of TWE is the managing partner, with exclusive management rights of TWE-A/N, other than with respect to the A/N Systems. Also, subject to certain limited exceptions, A/N has authority for the supervision of the day-to-day operations of the A/N Subsidiary and the A/N Systems. In connection with the 2002 restructuring, TWE entered into a services agreement with A/N and the A/N Subsidiary under which TWE agreed to exercise various management functions, including oversight of programming and various engineering-related matters. TWE and A/N also agreed to periodically discuss cooperation with respect to new product development.

Restrictions on Transfer TW Partners. Each TW Partner is generally permitted to directly or indirectly dispose of its entire partnership interest at any time to a wholly owned affiliate of TWE (in the case of transfers by TWE-A/N

Holdco, L.P. (TWE-A/N Holdco)) or to TWE, Time Warner or a wholly owned affiliate of TWE or Time Warner (in the case of transfers by us). In addition, the TW Partners are also permitted to transfer their partnership interests through a pledge to secure a loan, or a liquidation of TWE in which Time Warner, or its affiliates, receives a majority of the interests of TWE-A/N held by the TW Partners. TWE-A/N Holdco is allowed to issue additional partnership interests in TWE-A/N Holdco so long as Time

Warner continues to own, directly or indirectly, either 35% or 43.75% of the residual equity capital of TWE-A/N Holdco, depending on when the issuance occurs.

Restrictions on Transfer A/N Partner. A/N is generally permitted to directly or indirectly transfer its entire partnership interest at any time to certain members of the Newhouse family or specified affiliates of A/N. A/N is also permitted to dispose of its partnership interest through a pledge to secure a loan and in connection with specified restructurings of A/N.

Restructuring Rights of the Partners. TWE-A/N Holdco and A/N each has the right to cause TWE-A/N to be restructured at any time. Upon a restructuring, TWE-A/N is required to distribute the A/N Subsidiary with all of the A/N Systems to A/N in complete redemption of A/N s interests in TWE-A/N, and A/N is required to assume all liabilities of the A/N Subsidiary and the A/N Systems. To date, neither TWE-A/N Holdco nor A/N has delivered notice of the intent to cause a restructuring of TWE-A/N.

TWE s Regular Right of First Offer. Subject to exceptions, A/N and its affiliates are obligated to grant TWE-A/N Holdco a right of first offer prior to any sale of assets of the A/N Systems to a third party.

TWE s Special Right of First Offer. Within a specified time period following the first, seventh, thirteenth and nineteenth anniversaries of the deaths of two specified members of the Newhouse family (those deaths have not yet occurred), A/N has the right to deliver notice to TWE-A/N Holdco stating that it wishes to transfer some or all of the assets of the A/N Systems, thereby granting TWE-A/N Holdco the right of first offer to purchase the specified assets. Following delivery of this notice, an appraiser will determine the value of the assets proposed to be transferred. Once the value of the assets has been determined, A/N has the right to terminate its offer to sell the specified assets. If A/N does not terminate its offer, TWE-A/N Holdco will have the right to purchase the specified assets at a price equal to the value of the specified assets determined by the appraiser. If TWE-A/N Holdco does not exercise its right to purchase the specified assets, A/N has the right to sell the specified assets to an unrelated third party within 180 days on substantially the same terms as were available to TWE.

Our Governing Documents

Our Management and Operations

The following description summarizes certain provisions of our constituent documents and certain agreements that affect and govern our ongoing operations. Such description does not purport to be complete and is qualified in its entirety by reference to the provisions of such agreements and constituent documents.

Our Stockholders. A subsidiary of Time Warner owns 746,000,000 shares of our Class A common stock, which generally has one vote per share, and 75,000,000 shares of our Class B common stock, which generally has ten votes per share, which together represent 90.6% of the voting power of our stock and approximately 84% of our equity. Our Class B common stock is not convertible into our Class A common stock. Our Class A common stock and our Class B common stock vote together as a single class on all matters, except with respect to the election of directors and certain matters described below.

Our Board of Directors. Our Class A common stock votes as a separate class with respect to the election of our Class A directors (the Class A Directors), and our Class B common stock votes as a separate class with respect to the election of our Class B directors (the Class B Directors). Pursuant to our Certificate of Incorporation, which was adopted upon the closing of the Adelphia acquisition, the Class A Directors must represent not less than one-sixth and not more than one-fifth of our directors, and the Class B Directors must represent not less than four-fifths of our directors. As a result of its holdings, Time Warner has the ability to cause the election of all Class A Directors and

Class B Directors, subject to certain restrictions on the identity of these directors discussed below.

Under the terms of our Certificate of Incorporation, until August 1, 2009, at least 50% of our board of directors must be independent directors as defined under the NYSE listed company rules.

Pursuant to our Shareholder Agreement, so long as Time Warner has the power to elect a majority of our board of directors, we must obtain Time Warner s consent before entering into any agreement that binds or

purports to bind Time Warner or its affiliates or that would subject us or our subsidiaries to significant penalties or restrictions as a result of any action or omission of Time Warner or its affiliates; or adopting a stockholder rights plan, becoming subject to section 203 of the Delaware General Corporation Law, adopting a fair price provision in its certificate of incorporation or taking any similar action.

Furthermore, pursuant to the Shareholder Agreement, Time Warner may purchase debt securities issued by TWE under the TWE Indenture only after giving notice to us of the approximate amount of debt securities it intends to purchase and the general time period for the purchase, which period may not be greater than 90 days, subject to our right to give notice to Time Warner that we intend to purchase such amount of TWE debt securities ourself.

Protections of Minority Class A Common Stockholders. The approval of the holders of a majority of the voting power of the outstanding shares of our Class A common stock held by persons other than Time Warner is necessary in connection with:

- any merger, consolidation or business combination of ours in which the holders of our Class A common stock do not receive per share consideration identical to that received by the holders of our Class B common stock (other than with respect to voting power) or which would adversely affect the specific rights and privileges of our Class A common stock relative to our Class B common stock;

- any change to our Certificate of Incorporation that would have a material adverse effect on the rights of the holders of our Class A common stock in a manner different from the effect on the holders of our Class B common stock;

- through July 31, 2011, any change to provisions of our By-Laws concerning restrictions on transactions between us and Time Warner and its affiliates and the adoption of provisions of our Certificate of Incorporation or our By-Laws inconsistent with such restrictions;

- any change to our Certificate of Incorporation that would alter the number of independent directors required on our board of directors; and

- any change to the provisions of our Certificate of Incorporation that would affect the right of our Class A common stock to vote as a class in connection with any of the events discussed above.

MANAGEMENT

Our Directors and Executive Officers

The following table sets forth the name of each of our directors and executive officers, the office held by such director or officer and the age of such director or officer as of July 31, 2007. Unless otherwise noted, each of the executive officers named below assumed his or her position with us at the time of the TWE Restructuring, which took place in March 2003 and, prior to that time, each held the same position within the Time Warner Cable division of TWE.

Name	Age	Office
Glenn A. Britt	58	President and Chief Executive Officer, Class B Director
Carole Black	64	Class B Director
Thomas H. Castro	53	Class B Director
David C. Chang	65	Class A Director
James E. Copeland, Jr.	62	Class A Director
Peter R. Haje	73	Class B Director
Don Logan	63	Chairman of the Board, Class B Director
Michael Lynne	66	Class B Director
N.J. Nicholas, Jr.	67	Class B Director
Wayne H. Pace	61	Class B Director
Landel C. Hobbs	44	Chief Operating Officer
Michael LaJoie	52	Executive Vice President and Chief Technology Officer
Marc Lawrence-Apfelbaum	52	Executive Vice President, General Counsel and Secretary
Robert D. Marcus	42	Senior Executive Vice President
John K. Martin, Jr.	40	Executive Vice President and Chief Financial Officer
Carl U.J. Rossetti	58	Executive Vice President, Corporate Development
Lynn M. Yaeger	58	Executive Vice President, Corporate Affairs

Set forth below are the principal positions held during at least the last five years by each of the directors and executive officers named above:

Mr. Britt

Glenn A. Britt has served as our President and Chief Executive Officer since February 15, 2006. Prior to that, he had served as our Chairman and Chief Executive Officer since the TWE Restructuring. Prior to the TWE Restructuring, Mr. Britt was the Chairman and Chief Executive Officer of the Time Warner Cable division of TWE from August 2001 and was President of the Time Warner Cable division of TWE from January 1999 to August 2001. Prior to assuming that position, he was Chief Executive Officer and President of Time Warner Cable Ventures, a unit of TWE, from January 1994 to January 1999. He was an Executive Vice President for certain of our predecessor entities from 1990 to January 1994. From 1972 to 1990, Mr. Britt held various positions at Time Warner and its predecessor Time Inc., including as Chief Financial Officer of Time Inc. Mr. Britt has served as a Class B director since March 2003. Mr. Britt also serves as a director of Xerox Corporation and a trustee of Teachers Insurance and Annuity Association.

Ms. Black	Carole Black served as the President and Chief Executive Officer of Lifetime Entertainment Services, a multi-media brand for women, including Lifetime Network, Lifetime Movie Network, Lifetime Real Women Network, Lifetime Online and Lifetime Home Entertainment, from March 1999 to March 2005. Prior to that, Ms. Black served as the President and General Manager of NBC4, Los

Table of Contents

	Angeles, a commercial television station, from 1994 to 1999, and at various marketing-related positions at The Walt Disney Company, a media and entertainment company, from 1986 to 1993. Ms. Black has served as a Class B Director since July 31, 2006.
Mr. Castro	Thomas H. Castro, the co-founder of Border Media Partners LLC, a radio broadcasting company that primarily targets Hispanic listeners, has served as its President and Chief Executive Officer since 2002. Prior to that, Mr. Castro, an entrepreneur, owned and operated other radio stations and founded a company that exported oil field equipment to Mexico. Mr. Castro has served as a Class B Director since July 31, 2006.
Dr. Chang	David C. Chang has served as Chancellor of Polytechnic University in New York since July 2005, having served as its President from 1994. He has also served as a Professor of Electrical and Computer Engineering since 1994. Prior to assuming that position, he was Dean of the College of Engineering and Applied Sciences at Arizona State University. Dr. Chang is also a director of AXT, Inc., has served as a Class A director since March 2003, and served as an independent director of ATC from 1986 to 1992.
Mr. Copeland	James E. Copeland, Jr. has served as a Global Scholar at the Robinson School of Business at Georgia State University since 2003. Prior to that, Mr. Copeland served as the Chief Executive Officer of Deloitte & Touche USA LLP, a public accounting firm, and Deloitte Touche Tohmatsu, its global parent, from 1999 to May 2003. Prior to that, Mr. Copeland served in various positions at Deloitte & Touche, and its predecessors from 1967. Mr. Copeland has served as a Class A director since July 31, 2006 and is also a director of Coca-Cola Enterprises Inc., ConocoPhillips and Equifax, Inc.
Mr. Haje	Peter R. Haje has served as a legal and business consultant and private investor since he retired from service as an executive officer of Time Warner on January 1, 2000. Prior to that, he served as the Executive Vice President and General Counsel of Time Warner from October 1990, adding the title of Secretary in May 1993. He also served as the Executive Vice President and General Counsel of TWE from June 1992 until 1999. Prior to his service to Time Warner, Mr. Haje was a partner of the law firm of Paul, Weiss, Rifkind, Wharton & Garrison LLP for more than 20 years. Mr. Haje has served as a Class B director since July 31, 2006 and is also a director of American Community Newspapers Inc.
Mr. Logan	Don Logan was appointed Chairman of our Board of Directors on February 15, 2006. He served as Chairman of Time Warner s Media & Communications Group from July 2002 until December 31, 2005. Prior to assuming that position, he was Chairman and Chief Executive Officer of Time Inc., Time Warner s publishing subsidiary, from 1994 to July 2002 and was its President and Chief Operating Officer from 1992 to 1994. Prior to that, Mr. Logan held various executive positions with Southern

Progress Corporation, which was acquired by Time Inc. in 1985. Mr. Logan has served as a Class B director since March 2003.

Mr. Lynne	Michael Lynne has served as the Co-Chairman and Co-Chief Executive Officer of New Line Cinema Corporation, a producer, marketer and distributor of theatrical motion pictures and a subsidiary of Time Warner, since 2001. Prior to that, he served as its President and Chief Operating Officer from 1990 and as Counsel to New Line Cinema for a decade prior to that. Mr. Lynne has served as a Class B director since July 31, 2006 and is also a director of Vornado Realty Trust.
Mr. Nicholas	N.J. Nicholas, Jr. is an investor. From 1964 until 1992, Mr. Nicholas held various positions at Time Inc. and Time Warner. He was named President of Time Inc. in 1986 and served as Co-Chief Executive Officer of Time Warner from 1990 to 1992. Mr. Nicholas is also a director of Boston Scientific Corporation and Xerox Corporation and has served as a Class B director since March 2003.
Mr. Pace	Wayne H. Pace has served as Executive Vice President and Chief Financial Officer of Time Warner since November 2001, and served as Executive Vice President and Chief Financial Officer of TWE from November 2001 until October 2004. He was Vice Chairman and Chief Financial and Administrative Officer of Turner Broadcasting System, Inc. (TBS) from March 2001 to November 2001 and held various other executive positions at TBS, including Chief Financial Officer, from 1993 to 2001. Prior to that Mr. Pace was an audit partner with Price Waterhouse, now PricewaterhouseCoopers LLP, an international accounting firm. Mr. Pace has served as a Class B director since March 2003.
Mr. Hobbs	Landel C. Hobbs has served as our Chief Operating Officer since August 2005. Prior to that, he served as our Executive Vice President and Chief Financial Officer since March 2003 and in the same capacity for the Time Warner cable division of TWE from October 2001. Prior to that, he was Vice President, Financial Analysis and Operations Support for Time Warner from September 2000 to October 2001. Beginning in 1993, Mr. Hobbs was employed by TBS (a subsidiary of Time Warner since 1996), including as Senior Vice President and Chief Accounting Officer from 1996 until September 2000.
Mr. LaJoie	Michael LaJoie has served as our Executive Vice President and Chief Technology Officer since January 2004. Prior to that, he served as Executive Vice President of Advanced Technology from March 2003 and in the same capacity for the Time Warner Cable division of TWE from August 2002 until the TWE Restructuring. Mr. LaJoie served as Vice President of Corporate Development of the Time Warner Cable division of TWE from 1998.
Mr. Lawrence-Apfelbaum	Marc Lawrence-Apfelbaum has served as our Executive Vice President, General Counsel and Secretary since January 2003. Prior to that, he served as Senior Vice President, General Counsel and Secretary of the Time

	Warner Cable division of TWE from 1996 and other positions in the law department prior to that.
Mr. Marcus	Robert D. Marcus has served as our Senior Executive Vice President since August 2005, joining us from Time Warner where he had served as Senior Vice President, Mergers and Acquisitions

	from 2002. Mr. Marcus joined Time Warner in 1998 as Vice President of Mergers and Acquisitions.
Mr. Martin	John K. Martin, Jr. has served as our Executive Vice President and Chief Financial Officer since August 2005, joining us from Time Warner where he had served as Senior Vice President of Investor Relations from May 2004 and Vice President from March 2002 to May 2004. Prior to that, Mr. Martin was Director in the Equity Research group of ABN AMRO Securities LLC from 2000 to 2002, and Vice President of Investor Relations at Time Warner from 1999 to 2000. Mr. Martin first joined Time Warner in 1993 as a Manager of SEC financial reporting.
Mr. Rossetti	Carl U.J. Rossetti has served as our Executive Vice President, Corporate Development since August 2002. Previously, Mr. Rossetti served as an Executive Vice President of the Time Warner Cable division of TWE from 1998 and in various other positions since 1976.
Ms. Yaeger	Lynn M. Yaeger has served as our Executive Vice President of Corporate Affairs since January 2003. Prior to assuming that position, she served as Senior Vice President of Corporate Affairs for our various predecessors beginning in 1988.

Currently, our board of directors consists of ten members, five of whom are independent as required pursuant to our by-laws. See Corporate Governance below. Our board has identified Ms. Black and Messrs. Castro, Chang, Copeland and Nicholas as independent directors as independence is defined in the NYSE Listed Company Manual and as defined by Rule 10A-3 of the Exchange Act. Additionally, each of these directors meets the categorical standards for independence established by our board, as set forth in our Corporate Governance Policy. Our board has determined that the employment of Mr. Nicholas stepson by Time Inc., a subsidiary of Time Warner, does not affect Mr. Nicholas independence. A copy of our Corporate Governance Policy is available on our website.

Terms of Executive Officers and Directors

Each director serves for a term of one year. Directors hold office until the annual meeting of stockholders and until their successors have been duly elected and qualified. Our executive officers are appointed by the board of directors and serve at the discretion of the board.

Corporate Governance

Controlled Company

Our Class A common stock began trading on the NYSE on March 1, 2007. For purposes of the NYSE rules, we are a controlled company. Controlled companies under the NYSE rules are companies of which more than 50% of the voting power is held by an individual, a group or another company. A subsidiary of Time Warner currently holds approximately 84.0% of our common stock and 90.6% of the voting power and Time Warner, through its subsidiary, is able to elect the entire Board of Directors. Accordingly, we are exempt from certain NYSE governance requirements. Specifically, as a controlled company under NYSE rules, the board does not have a majority of independent directors and the Nominating and Governance Committee and Compensation Committee are not composed entirely of independent directors.

Board of Directors

Holders of our Class A common stock vote, as a separate class, with respect to the election of our Class A directors, and holders of our Class B common stock vote, as a separate class, with respect to the election of our Class B directors. Under our restated certificate of incorporation, the Class A directors must represent not

less than one-sixth and not more than one-fifth of our directors, and the Class B directors must represent not less than four-fifths of our directors. As a result of its shareholdings, Time Warner has the ability to cause the election of all Class A directors and Class B directors, subject to certain restrictions on the identity of these directors discussed below.

Under the terms of our amended and restated certificate of incorporation at least 50% of our board of directors must be independent directors. As a condition to the consummation of the Adelphia acquisition, we agreed not to amend this charter provision prior to August 1, 2009 (three years following the Adelphia Closing) without, among other things, the consent of the holders of a majority of the shares of Class A common stock other than Time Warner and its affiliates.

Board Committees

Our board of directors has three principal standing committees, an audit committee, a compensation committee and a nominating and governance committee.

Audit Committee. The members of the audit committee are currently James Copeland, Jr., who serves as the Chair, David Chang and N.J. Nicholas, Jr. Among other things, the audit committee complies with all NYSE and legal requirements and consists entirely of independent directors. The Audit Committee assists the board in fulfilling its responsibilities in connection with our (i) independent auditors, (ii) internal auditors, (iii) financial statements, (iv) earnings releases and guidance, as well as (v) our compliance program, internal controls, and risk management. The board has determined that each member of the Audit Committee qualifies as an audit committee financial expert under the rules of the SEC implementing section 407 of the Sarbanes-Oxley Act and meets the independence and experience requirements of the NYSE and the federal securities laws.

Compensation Committee. The members of our compensation committee are Michael Lynne, who serves as the Chair, Carole Black, Thomas Castro, Peter Haje, Don Logan and N.J. Nicholas, Jr.

The members of the Compensation Committee who are independent directors are Ms. Black and Messrs. Castro and Nicholas. The Compensation Committee is responsible for (i) approving compensation and employment agreements for, and reviewing benefits provided to certain of our senior executives, (ii) overseeing our disclosure regarding executive compensation, (iii) administering our equity-based compensation plans and (iv) reviewing our overall compensation structure and benefit plans. A sub-committee of the Compensation Committee, consisting of two independent directors, Ms. Black and Mr. Nicholas, is responsible for certain executive compensation matters, including (i) reviewing and approving corporate goals and objectives relevant to the compensation of the CEO and each of the executive officers and each of the other employees whose annual total compensation has a value of $2 million or more (the Senior Executives), (ii) evaluating the performance of the CEO and the Senior Executives, and (iii) setting the compensation level of the CEO and the Senior Executives.

Nominating and Governance Committee. The members of our nominating and governance committee are N.J. Nicholas, Jr., who serves as the Chair, David Chang, Peter Haje, Don Logan and Wayne Pace. The members of the Nominating and Governance Committee who are independent directors are Messrs. Chang and Nicholas. The Nominating and Governance Committee is responsible for assisting the board in relation to (i) corporate governance, (ii) director nominations, (iii) committee structure and appointments, (iv) CEO performance evaluations and succession planning, (v) Board performance evaluations, (vi) director compensation, (vii) regulatory matters relating to corporate governance, and (viii) stockholder proposals and communications.

Code of Ethics

We have adopted a Code of Ethics for our Chief Executive Officer and senior financial officers. Amendments to this Code of Ethics or any grant of a waiver from a provision of this Code of Ethics requiring disclosure under applicable SEC rules will be disclosed on our website. We have also adopted a code of business conduct and ethics for our employees that conforms to the requirements of the NYSE listing rules.

Copies of our audit, compensation and nominating and governance committee charters, our Code of Ethics for our senior executives and senior financial officers and our code of business conduct and ethics are available on our website, at www.timewarnercable.com. The information on our website is not part of this prospectus.

EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

Oversight and Authority for Executive Compensation

We developed our compensation philosophy for 2006 before we became a separately-traded public company and before we completed the Transactions with Adelphia and Comcast in July 2006. Some of our compensation philosophy, structure and practices are derived from our relationship with Time Warner, our corporate parent. We obtained certain efficiencies by making use of the Time Warner compensation logistics and infrastructure that are available to us. For example, as is explained below, our executives have participated in the equity award programs of Time Warner. The compensation paid to our executive officers also reflects the terms of their employment agreements that were developed before we became a public company.

Before July 31, 2006, our Compensation Committee was composed of all of the members of our Board of Directors (in such capacity, the Old Compensation Committee), which at that time consisted of six members. Our Board of Directors expanded from six members to ten on July 31, 2006 when the Transactions closed, and a new separate five-member compensation committee was appointed (the New Compensation Committee). Our New Compensation Committee had its first meeting in December 2006, and subsequently added a sixth member.

At all times, our Compensation Committee has been responsible for reviewing and/or approving all elements of our executive compensation programs. These include:

- salary;
- annual cash bonus;
- long-term compensation, including equity-based awards;
- employment agreements for our named executive officers, including any change of control or severance provisions or personal benefits set forth in those agreements; and
- any change in control or severance arrangements for our named executive officers that are not part of their employment agreements.

For 2006, members of our management, including Glenn Britt, our President and Chief Executive Officer, Robert Marcus, our Senior Executive Vice President, and Tomas Mathews, our Senior Vice President, Human Resources, evaluated each of the compensation elements described above. They reviewed base salaries, target award levels and performance measures in the incentive plans, and the structure of each compensation program, as discussed in this Compensation Discussion and Analysis. They also consulted with Time Warner executive compensation personnel. Our management then made recommendations to the Old Compensation Committee, which reviewed and approved each compensation element for each of the named executive officers for 2006. Our New Compensation Committee determined final 2006 annual cash bonuses in February 2007. A similar process has been followed for establishing the elements of the compensation package for each named executive officer for 2007, except that the recommendations of management were reviewed and approved by the New Compensation Committee.

2006 Compensation Philosophy

We seek to use a competitive mix of base salary and incentive compensation that will attract, retain, motivate and reward our executive officers for achievement of our company and personal performance goals. Our philosophy is informed by the following key principles:

Competitive pay Total compensation delivered to executives should reflect the competitive marketplace for talent inside and outside our industry so that we can attract, motivate and retain key talent while maintaining appropriate balance among our similarly situated executives.

Pay for performance Total compensation delivered to executives should reflect an appropriate mix of variable, performance-based compensation tied to the achievement of our company financial performance goals.

Short-term and long-term elements Our executives total compensation should be delivered in a form that focuses the executive on both our short-term and long-term strategic objectives.

We also enter into employment agreements with our named executive officers (as defined below) to foster retention, to be competitive and to protect our business (through the use of restrictive covenants).

As a result of awards made prior to 2007, our named executive officers continue to participate in the Time Warner equity program. For 2007, our executives will receive awards based on our Class A common stock and will not receive awards under Time Warner s equity plans. Our employees who have outstanding equity awards under the Time Warner equity plans will retain any rights under those awards pursuant to their terms.

Review of Compensation Practices

To make sure our compensation practices for 2006 matched our compensation philosophy, we began to review our compensation programs and practices in 2005. We continued our review through 2006. We determined that the compensation programs in place were still effective and appropriate for 2006.

Application of Compensation Philosophy

Competitive Compensation Levels. We compared our named executive officers current compensation levels to competitive market norms using survey market data that represented national companies from general industry, telecommunications and media industries, with revenues which were generally comparable to ours, when we made our 2006 compensation recommendations to our Old Compensation Committee. Each named executive officer s compensation was compared to that of other executives in positions of comparable scope and responsibility.

Additionally, compensation levels for Glenn Britt, our Chief Executive Officer, Landel Hobbs, our Chief Operating Officer, and John Martin, our Chief Financial Officer, were compared to data published in proxy statements or other publicly available sources for executives in similarly situated positions in cable companies of varying sizes, including Comcast, Cox Communications, Inc., Cablevision Systems Corp., Charter Communications, Inc. and Adelphia. We believe that these cable companies represented some of our major competitors for executive talent in 2006. Where available, we supplemented the compensation review with internal compensation data for comparable positions within Time Warner. We refer to the survey companies, proxy companies and internal Time Warner positions used to benchmark 2006 compensation levels for our named executive officers as the 2006 Peer Group.

We began our review of each named executive officer s compensation package with a review of the relevant executive s employment agreement. The employment agreements provide a minimum annual salary and a target annual discretionary bonus, stated as a percentage of annual salary. Our 2006 compensation recommendations to our Old Compensation Committee also took into account the importance of each named executive officer s position in our company, the importance of retaining the executive in his role and his tenure in the role. In consideration of these factors, we recommended target levels of compensation, consisting of base salary, annual cash bonus and long-term incentives, that would place the pay of each named executive officer between the median and the 75th percentile of the 2006 Peer Group. The total cash compensation delivered was dependent on the ultimate awards under our cash-based incentive plans, which were based on achievement of certain financial performance goals, discussed in detail below, and an evaluation of the executive s individual performance.

125

Table of Contents

Compensation Elements. Our 2006 compensation program incorporated the following elements, which together were intended to encourage executives to focus on both our short-term and long-term strategic objectives:

Annual Base Salary;

Short-Term Cash Incentive variable, performance-based annual incentive payment based on the achievement of company financial goals and individual goals;

Long-Term Incentives blend of Time Warner stock options, Time Warner restricted stock units and variable performance-based long-term cash awards; and

Other Benefits health and welfare benefits available generally to all employees and special personal benefits that are considered on a case-by-case basis.

To support our pay for performance compensation objective, a portion of compensation paid was variable and dependent upon the achievement of our and the relevant executive s performance goals. The higher the level of strategic impact on organizational success an executive has, the larger the portion of the overall compensation package that is delivered through variable compensation related to our performance. For example, Mr. Britt s target compensation is based approximately 90% on variable, performance-based and/or equity-based compensation and 10% on base salary. Other named executive officers target compensation is based on approximately 75-80% variable, performance-based and/or equity-based compensation.

We believe the split between short-term and long-term performance-based 2006 compensation for our named executive officers, which was approximately even, but with slightly more compensation being delivered through long-term incentives, is consistent with the 2006 Peer Group.

2006 Base Salary. We generally conduct reviews of base salaries annually, and we repeat the review when a named executive officer is promoted or his responsibilities change. During such a review we generally compare each named executive officer s roles and responsibilities with the roles and responsibilities of his counterparts from other comparable companies, which for 2006 included the 2006 Peer Group. We consider each named executive officer s performance, the importance of the executive officer s position within our company, the importance of keeping the executive officer in his role and his tenure in the role. In general, the higher the strategic impact an executive officer has on our organizational success, the less we rely on base salary for his compensation.

We determined that Mr. Britt s base salary for 2006 was within the ranges of the 2006 Peer Group; therefore, we did not consider a salary increase for Mr. Britt for 2006. Messrs. Hobbs, Martin and Marcus were hired or promoted into their current positions in August 2005. We considered data for comparable positions when we set their salaries at that time, so we did not think a base salary adjustment was needed for 2006. However, when we promoted Mr. Hobbs to Chief Operating Officer, we agreed to undertake a further review of his compensation during 2006. We reviewed Mr. Hobbs base salary in mid-2006 against the 2007 Peer Group (as described in Looking Forward), his performance as our Chief Operating Officer and in light of his responsibility for a larger number of cable systems as a result of the Adelphia/Comcast Transactions. Based on this review, the New Compensation Committee approved a salary increase for Mr. Hobbs to $850,000, effective as of August 1, 2006.

Mr. LaJoie s base salary was increased from $400,600 to $420,600 effective January 1, 2006 to reflect an annual performance merit increase. We reviewed Mr. LaJoie s base salary against the 2006 Peer Group later in 2006 and, based on that review, Mr. LaJoie s base salary was increased from $420,600 to $450,000 effective March 1, 2006.

2006 Short-Term Incentives. The Time Warner Cable Incentive Plan (TWCIP) is a short-term annual cash incentive plan designed to motivate executives to help us meet and exceed our annual growth goals by giving them a chance to share in our financial success. The TWCIP also rewards executives for achieving specified individual and non-financial short-term goals. Each TWCIP participant is eligible to receive a target bonus stated as a percentage of base salary. Upon review of the 2006 Peer Group we determined that target bonus recommendations were in line with our compensation philosophy. For every level in our company, there

is a TWCIP target bonus level. With increasing levels of responsibility, a higher percentage of the executive s total compensation comes from performance-based bonuses.

Mr. Britt s previous employment contract expired in August 2006. In connection with the negotiation of Mr. Britt s new employment agreement, we compared Mr. Britt s annual target bonus with publicly available data that had been assembled for these purposes, and we considered his increased responsibilities following the closing of the Adelphia/Comcast Transactions and our anticipated change to a public company. Our review and evaluation led to increasing Mr. Britt s target bonus from $3,750,000 to $5,000,000 effective August 1, 2006. When we reviewed Mr. Hobbs employment agreement as discussed above, we also compared Mr. Hobbs annual target bonus with the 2007 Peer Group, and considered his responsibility for a larger number of cable systems following the closing of the Adelphia/Comcast Transactions. Our review and evaluation led to increasing Mr. Hobbs target bonus from 175% to 200% of base salary effective August 1, 2006. Earlier in 2006, we also compared Mr. LaJoie s target bonus to the 2006 Peer Group. Our review and evaluation led to increasing his target bonus from 80% to 100% of base salary, effective March 1, 2006.

The TWCIP established for 2006 was similar in structure to short-term incentive programs implemented by other Time Warner companies.

For 2006, the TWCIP performance goals for the named executive officers were weighted 70% on company-wide financial goals and 30% on individual goals. The financial goals following their amendment in July 2006, as discussed below were further weighted 70% based on OIBDA, and 30% based on OIBDA less capital expenditures (other than capitalized transaction costs related to the Transactions). Management and the Old Compensation Committee believed that OIBDA is an important indicator of the operational strength and performance of our business, including our ability to provide cash flows to service debt and fund capital expenditures. This makes it a useful performance criterion. OIBDA less capital expenditures was chosen as the other financial measure because it is a measure of free cash flow (which is a common financial tool to assess a cable company s ability to service debt).

Mr. Britt s 2006 individual performance goals were as follows:

Adelphia/Comcast Integration Close the Transactions and successfully integrate the Adelphia and Comcast resources into our existing systems;

Deployment of New Products and Technology Successfully deploy within budget targets, Start Over, Digital Simulcast, Switched Digital and Mystro Digital Navigator;

Bundling Increase the penetration of Triple-play products among subscribers;

Regionalization Complete the regional organizational structure;

Digital Phone Advance broad-based scaling and increase the penetration of our Digital Phone product;

Diversity Implement a diversity program covering hiring, programming, marketing and partnering; and

Succession Planning strengthen our management team through succession planning and the recruitment and retention of key executives (with a focus on diversity).

Mr. Britt established and approved the individual measurable goals for each of the other named executive officers. The goals for each of our named executive officers, other than Mr. Britt, include supporting Mr. Britt in achieving his goals, taking into account each named executive officer s particular role and responsibilities.

At the time that the 2006 TWCIP was established, our Old Compensation Committee recognized that it was difficult to predict when the Transactions would ultimately close, and that the timing of the closing could significantly affect our financial results. Under the terms of the TWCIP, any significant change in our business that would impact our financial results, such as acquisitions or divestitures, should be reviewed to determine whether and to what extent the TWCIP targets should be modified. In light of this, the Old Compensation Committee did not initially establish the specific financial goals that would be used to determine payments under the 2006 TWCIP. However, it did, early in 2006, determine that the 2006 TWCIP would utilize a 70/30

weighting as between financial and individual goals discussed above. At that time, it also intended that the financial component would be further weighted 70% based on OIBDA and 30% based on Free Cash Flow. Free Cash Flow is a non-GAAP financial measure, which we define as cash provided by operating activities (as defined under GAAP) plus excess tax benefits from the exercise of stock options less cash provided by (used by) discontinued operations, capital expenditures, partnership distributions and principal payments on capital leases. In July 2006, the Old Compensation Committee acted to establish specific 2006 TWCIP financial goals, which were intended to reflect to the greatest extent possible the impact of the closing of the Adelphia/Comcast Transactions, as well as the then anticipated dissolution of TKCCP. In adopting the goals, our Old Compensation Committee elected to replace the Free Cash Flow financial measure originally contemplated with OIBDA less capital expenditures. Our Old Compensation Committee felt it would be difficult to predictably gauge Free Cash Flow for 2006 because of anticipated working capital fluctuations arising as a result of the closing of the Transactions and our integration of the cable systems acquired in the Transactions into our existing operations, as well as the pending dissolution of TKCCP. As discussed above, OIBDA less capital expenditures was considered a more reliable financial measure under the circumstances. However, in light of the significant changes in our operational environment during the year, it was anticipated that it would still be difficult to accurately assess management s performance under this revised measure and that discretion would need to be exercised in determining final 2006 TWCIP payouts to ensure, to the extent possible, that the payments reflect the actual degree of difficulty required to achieve the financial goals that were established.

In early 2007, the New Compensation Committee determined 2006 awards for each named executive officer under the 2006 TWCIP based on the previously established financial and non-financial criteria. As a result of our superior financial results in 2006 that exceeded established financial targets and the Committee s assessment of each named executive officer s significant accomplishments in light of his individual goals, each of the named executive officers was awarded the maximum percentage of his target payout, as shown in the table under Grants of Plan-Based Awards in 2006. Mr. Britt s annual award was capped pursuant to the terms of his employment agreement. Awards for Messrs. Britt, Hobbs and LaJoie were prorated to reflect changes in their TWCIP award targets during 2006. In establishing bonus payments for the executive officers, the Committee consulted with representatives of Korn/Ferry Compensation Advisors, its compensation consultant.

2006 Long-Term Incentives. Our long-term incentive compensation (LTI) program is designed to retain and motivate employees to meet and exceed our long-term growth goals as a balance to the short-term incentive plan. The 2006 LTI Program was similar in structure to long-term incentive programs implemented by other Time Warner companies.

For 2006, the LTI program was designed to deliver its value using a combination of 55% in stock-based awards and 45% in cash awards. The mix was determined in a manner designed to deliver a target amount of value. We used Time Warner common stock for our stock-based awards since we did not have any publicly traded stock at the time. Because the performance of Time Warner common stock relates to other Time Warner businesses in addition to ours, we used a long-term performance-based cash award (LTIP) to increase the extent to which our named executive officers long-term compensation ties directly to our financial results.

We established LTI target awards for each named executive officer based on a competitive award level as compared against executives in comparable positions in the 2006 Peer Group. We based the target levels of the long-term awards on an evaluation of the named executive officer s performance, the importance of his position within our organization, the importance of retaining the executive in his role, his tenure in the role and his established target award level.

2006 Stock-Based Awards. We believe that the award of stock options and restricted stock units provides retention value and an opportunity to align the interests of our executives with the interests of our stockholders. Time Warner stock options and restricted stock units granted in 2006 to our named executive officers other than our Chief Executive Officer were based in part on the recommendations of our management to the compensation committee of Time Warner s board of directors (the Time Warner compensation committee).

128

The 2006 stock-based awards, including the mix between stock options and restricted stock units, was similar in structure to 2006 stock programs utilized by other Time Warner companies. Upon exercise of Time Warner stock options, we are obligated to reimburse Time Warner for the excess of the market price of the Time Warner common stock over the option exercise price. See Certain Relationships and Related Transactions Relationship Between Time Warner and Us Reimbursement for Time Warner Equity Compensation and Note 4 to our audited consolidated financial statements.

For 2006, the stock-based grants reflected a mix between time-based stock options and time-based restricted stock units of approximately 70% and 30%, respectively. Stock options are designed to reward executives for stock price growth and company performance as well as to align executives interests with stockholders. Restricted stock units are designed to enhance executive retention even when the stock value is fluctuating, reward stock price growth and encourage executive stock ownership.

The Time Warner compensation committee approved and granted stock-based awards to our named executive officers in 2006. Time Warner stock-based awards can be granted only by Time Warner. The Time Warner compensation committee approved stock-based grants to Messrs. Britt and Hobbs with input from Time Warner senior management and our management in the case of Mr. Hobbs. Separately, the Time Warner compensation committee awarded stock-based grants within Time Warner s guidelines to our other named executive officers based on the recommendations of our management, in light of the relevant named executive officer s individual performance, as well as the established target award level for each named executive officer. All of these stock-based awards were also presented to our Old Compensation Committee for review as part of its approval of 2006 compensation. Mr. Britt and the other named executive officers were awarded both stock options and restricted stock units. Pursuant to Time Warner s long-standing practice, the stock options were granted with an exercise price equal to the average of the high and low sales prices of Time Warner common stock on the grant date. The restricted stock units awarded by Time Warner to our executive officers in March 2006 vest in two equal installments on the third and fourth anniversaries of the date of grant, and the stock options awarded at the same time vest in four equal installments on each of the first four anniversaries of the date of grant. We believe that the multi-year vesting schedule encourages executive retention and emphasizes a longer-term perspective.

2006 Long-Term Cash Awards. Performance goals under the 2006-2008 LTIP are based on cumulative OIBDA for the years 2006 to 2008 relative to established OIBDA targets as discussed below. At the end of the three-year performance period, performance against the established OIBDA objectives will be measured. Actual achievement versus the established objectives will determine individual awards. We selected OIBDA as a performance measure in the LTIP for the same reasons discussed under the short-term incentive plan above.

Our Old Compensation Committee initially approved dollar amounts payable under the LTIP for the 2006-2008 performance period if targets were met, intending to utilize a three-year cumulative OIBDA performance range against our then-current four year budget and long-range financial plan. Under the terms of the LTIP, any change in our business that impacts our financial results, such as acquisitions or divestitures, are to be reviewed to determine whether and to what extent the LTIP performance ranges should be modified. In December 2006, our New Compensation Committee modified the LTIP performance goal for the 2006-2008 performance period and adopted the same OIBDA measure used in the TWCIP for the 2006 portion of the three-year performance period. The New Compensation Committee also established OIBDA goals for 2007 and 2008 based on our then current proposed budget and long-range financial plan. Our New Compensation Committee also indicated it would review final payouts carefully in light of the significant changes in our operational environment.

Actual awards can range from 0% to 200% of the LTIP target based on our actual performance, although no payout will be made for performance below the established minimum threshold under the LTIP. Payouts under the LTIP will be made during the first quarter of the year following the completion of the three-year performance period. For

example, payouts from the 2006-2008 LTIP will occur during the first quarter of 2009.

Table of Contents

Total Compensation Review

We believe that the total compensation delivered for 2006, including base salary and short-term and long-term incentives, appropriately reflects market competitive levels, individual and company performance, the importance of each individual s position within our company, the importance of retaining the executive in his role and his tenure in the role.

Pursuant to our compensation philosophy and practices, we targeted total direct 2006 compensation to executives to be between the 50th and 75th percentiles of the 2006 Peer Group.

Total direct 2006 compensation for each of Messrs. Britt, Martin, Marcus and LaJoie (including pro-rated adjustments for Mr. Britt due to an August increase in his short-term bonus target) is between the 50th and 75th percentile when compared to the survey market data. Mr. Britt s and Mr. Martin s total direct compensation was below the average when compared to the 2006 proxy data that had been assembled (the benchmark used by Time Warner when reviewing Mr. Britt s compensation). Neither Mr. Marcus nor Mr. LaJoie s compensation was compared to a public peer group at the time that 2006 compensation was initially reviewed. Mr. Hobbs 2006 total direct compensation (including pro-rated adjustments due to an August increase in base salary and short-term bonus target) is below the 50th percentile when compared to the survey market data and below the 50th percentile when compared to the 2007 Peer Group (the benchmark used by Time Warner when reviewing Mr. Hobbs compensation).

Looking Forward

Our management and our New Compensation Committee have evaluated the structure of our short-term and long-term incentive programs. As a newly-public company, we expect that our long-term compensation will consist largely of grants based on our Class A common stock, including stock options and restricted stock units. During 2006, we engaged Mercer Consulting to help us evaluate our executive compensation program for 2007, including measuring our executive compensation program against various benchmarks and advising us on our compensation mix and the structure of our bonus programs. Mercer also met with our New Compensation Committee in connection with reviewing 2007 salaries and bonus targets for our executive officers and provided insights on various executive compensation trends.

During 2006, we established a more refined peer group of 20 public cable, communications and entertainment companies with publicly available data that we believe are similar in size and focus to us and/or will better reflect our competitors for talent in the coming years. We call this group our 2007 Peer Group. The companies in our 2007 Peer Group include: ALLTEL Corporation, AT&T Inc., Bell Canada Enterprises, BellSouth, Inc., Cablevision Systems Corporation, CBS Corporation, Charter Communications Inc., Clear Channel Communications, Inc., Comcast, DIRECTV Group, Inc., Echostar Communications Corporation, Liberty Global Inc., News Corporation, QWEST Communications International, Inc., Rogers Communications Inc., Sprint Nextel Corporation, TELUS Corporation, The Walt Disney Company, Verizon Communications, Inc. and Viacom Inc. Based upon the recommendation of the New Compensation Committee s consultant, the New Compensation Committee determined that for future compensation comparisons, the 2007 Peer Group would be modified to eliminate three Canadian companies Bell Canada Enterprises, Rogers Communications, Inc. and TELUS Corporation and to replace Liberty Global Inc. with Liberty Media Corporation. We believe the 2007 compensation approved by the New Compensation Committee for our named executive officers is consistent with our compensation philosophy which is informed in part by the practices of the 2007 Peer Group.

Perquisites

As described below, we provide personal benefits, such as reimbursement for financial services, from time to time to our named executive officers under their employment agreements when we determine such personal benefits are a useful part of a competitive compensation package. Mr. Britt was also provided with a car allowance in 2006. Additionally, we own aircraft jointly with Time Warner and other Time Warner companies. Use of corporate aircraft for business and personal travel is governed by a policy established by Time Warner. Under the policy, Mr. Britt is authorized to use the corporate aircraft for domestic business travel and for

personal use when there is available space on a flight scheduled for a business purpose or in the event of a medical or family emergency. Other executives require various approvals for use of the corporate aircraft.

Employment Agreements

Consistent with our goal of attracting and retaining executives in a competitive environment, we have entered into employment agreements with Mr. Britt and the other named executive officers. The employment agreements with Messrs. Britt, Martin and Marcus were reviewed and approved by our Old Compensation Committee. The employment agreement for each named executive officer is described in detail under Employment Agreements and Potential Payments Upon Termination or Change in Control.

Deferred Compensation

Before 2003, we maintained a nonqualified deferred compensation plan that generally permitted employees whose annual cash compensation exceeded a designated threshold to defer receipt of all or a portion of their annual bonus until a specified future date. Since March 2003, deferrals may no longer be made but amounts previously credited under the deferred compensation plan continue to track crediting rate elections made by the employee from an array of third-party investment vehicles offered under our savings plan. See Nonqualified Deferred Compensation.

Tax Deductibility of Compensation

Section 162(m) of the Tax Code generally disallows a tax deduction to public corporations for compensation in excess of $1,000,000 in any one year with respect to each of its five most highly paid executive officers with the exception of compensation that qualifies as performance-based compensation. Because we were not a public company in 2006, section 162(m) did not apply to us with respect to compensation deductible for 2006. The New Compensation Committee will consider section 162(m) implications in making compensation recommendations and in designing compensation programs for our executives as a public company. However, the New Compensation Committee reserves the right to pay compensation that is not deductible if it determines that to be in our best interest and the best interests of our stockholders.

Table of Contents

Executive Compensation Summary Table

The following table presents information concerning total compensation paid to our Chief Executive Officer, Chief Financial Officer and each of our three other most highly compensated executive officers who served in such capacities on December 31, 2006 (collectively, the named executive officers).

Summary Compensation Table

e and Principal Position	Year	Salary	Bonus	Time Warner Stock Awards[2]	Time Warner Option Awards[3]	Non-Equity Incentive Plan Compensation	Change in Pension Value and Nonqualified Deferred Compensation Earnings[4]	All Other Compensation[5]	Total
A. Britt[1] ent and Chief tive Officer	2006	$ 1,000,000		$ 1,018,786	$ 1,645,404	$ 5,587,500	$ 150,810	$ 73,390	$ 9,475
K. Martin, Jr. tive Vice ent and Chief cial Officer	2006	$ 650,000		$ 115,111	$ 246,094	$ 1,218,750	$ 40,570	$ 11,200	$ 2,281
l C. Hobbs Operating r	2006	$ 762,500		$ 230,364	$ 460,658	$ 2,134,376	$ 35,820	$ 36,780	$ 3,660
t D. Marcus Executive Vice ent	2006	$ 650,000		$ 124,719	$ 276,112	$ 1,218,750	$ 24,210	$ 13,360	$ 2,307
el LaJoie tive Vice ent and Chief ology Officer	2006	$ 444,911		$ 51,953	$ 230,583	$ 646,620	$ 60,090	$ 12,000	$ 1,446

(1) Mr. Britt served as Chairman from January 1, 2006 through February 15, 2006, at which time he added the title of President and ceased serving as Chairman.

(2) Amounts set forth in the Time Warner Stock Awards column represent the value of Time Warner restricted stock and restricted stock unit awards, which represent a contingent right to receive a designated number of shares of Time Warner common stock, par value $.01 per share (Time Warner Common Stock), upon completion of the vesting period, recognized for financial statement reporting purposes for 2006 as computed in accordance with FAS 123R, disregarding estimates of forfeitures related to service-based vesting conditions. The amounts were calculated based on the average of the high and low sale prices of Time Warner Common Stock on the date of grant. The awards granted in 2006 vest equally on each of the third and fourth anniversaries of the date of grant, assuming continued employment. Each of the named executive officers has a right to receive dividends on their unvested shares of restricted stock and dividend equivalents on unvested Time

Warner restricted stock units, if paid.

(3) Amounts set forth in the Time Warner Option Awards column represent the fair value of stock option awards with respect to Time Warner Common Stock, recognized for financial statement reporting purposes for 2006 as computed in accordance with FAS 123R, disregarding estimates of forfeitures related to service-based vesting conditions. For additional information about the assumptions used in these calculations, see Note 4 to our audited consolidated financial statements for the year ended December 31, 2006, included elsewhere in this prospectus. The discussion in our financial statements reflects average assumptions on a combined basis for retirement eligible employees and non-retirement eligible employees. The amounts provided in the table reflect specific assumptions for Mr. Britt, who is retirement-eligible, and for the other named executive officers, who are not retirement eligible. For example, the amounts with respect to awards in 2006 for the named executive officers other than Mr. Britt were calculated using the Black-Scholes option pricing model, based on the following assumptions used in developing the grant valuations for the awards on March 3, 2006 and June 21, 2006, respectively: an expected volatility of 22.15% and 24.00%, respectively, determined using implied volatilities based primarily on publicly-traded Time Warner options; an expected term to exercise of 4.86 years from the date of grant in each case; a risk-free interest rate of 4.61% and 4.90%, respectively; and a dividend yield of 1.1% in each case. Because the retirement provisions of these awards apply to Mr. Britt, different assumptions were used in developing his 2006 grant valuations: an expected volatility of 22.28%; an expected term to exercise of 6.71 years from the date of grant; a risk-free interest rate of 4.63% and a dividend yield of 1.1%. The actual value of the options, if any, realized by an officer will depend on the extent to which the market value of Time Warner Common Stock exceeds the exercise price of the option on the date the option is exercised. Consequently, there is no assurance that the value realized by an officer will be at or near the value estimated above. These amounts should not be used to predict stock performance. None of the stock options reflected was awarded with tandem stock appreciation rights.

(4) This amount represents the aggregate change in the actuarial present value of each named executive officer s accumulated pension benefits under the Time Warner Cable Pension Plan, the Time Warner Cable Excess Benefit Pension Plan, the Time Warner Employees Pension Plan and the Time Warner Excess Benefit Pension Plan, to the extent the named executive officer participates in these plans, from December 31, 2005 through December 31, 2006. See the Pension Benefits Table and Pension Plans for additional information regarding these benefits. The named executive officers did not receive any above-market or preferential earnings on compensation deferred on a basis that is not tax qualified.

(5) The amounts shown in the All Other Compensation column include the following:
(a) Pursuant to our Savings Plan (the Savings Plan), a defined contribution plan available generally to our employees, for the 2006 plan year, each of the named executive officers deferred a portion of his annual compensation and we contributed $10,000 as a matching contribution on the amount deferred by each named executive officer.
(b) We maintain a program of life and disability insurance generally available to all salaried employees on the same basis. This group term life insurance coverage was reduced to $50,000 for each of Messrs. Britt, Hobbs, Marcus and Martin, who were each given a cash payment to cover the cost of specified coverage under a voluntary group program available to employees generally (GUL insurance). For 2006, this cash payment was $32,640 for Mr. Britt, $2,520 for Mr. Hobbs, $3,360 for Mr. Marcus and $1,200 for Mr. Martin. Mr. LaJoie elected not to receive a cash payment for life insurance over $50,000 and instead receives group term life insurance and is taxed on the imputed income. For a description of life insurance coverage for certain executive officers provided pursuant to the terms of their employment agreements, see Employment Agreements.
(c) The amounts of personal benefits shown in this column that aggregate $10,000 or more include: for Mr. Britt, financial services of $6,750 and an automobile allowance of $24,000; and for Mr. Hobbs, financial services of $22,156 and transportation-related benefits of $2,104. Mr. Hobbs transportation-related benefits consist of the incremental cost to us of personal use of corporate aircraft (based on fuel, landing, repositioning and catering costs and crew travel expenses). Mr. Hobbs flew, on several occasions, on corporate aircraft for personal reasons when there was available space on a flight that had been requested by others. There is no incremental cost to us for Mr. Hobbs use of the aircraft under these circumstances, except for our portion of employment taxes attributable to the income imputed to Mr. Hobbs for tax purposes.

Grants of Plan-Based Awards

The following table presents information with respect to each award in 2006 to each named executive officer of plan-based compensation, including annual cash awards under the TWCIP, long-term cash awards under our LTIP and awards of stock options to purchase Time Warner Common Stock and Time Warner restricted stock units granted by Time Warner under the Time Warner Inc. 2003 Stock Incentive Plan.

Grants of Plan-Based Awards During 2006

			Estimated Possible Payouts Under Non-Equity Incentive Plan Awards			Time Warner Equity Plan Awards			
	Grant Date	Approval Date(1)	Threshold	Target	Maximum	All Other Stock Awards: Number of Shares of Stock or Units	All Other Stock Awards: Number of Securities Underlying Options	Exercise or Base Price of Option Awards(2)	Closing Market Price on Date of Grant
itt	(3)		$ 2,187,500	$ 4,375,000	$ 5,587,500				
	(4)		730,000	1,460,000	2,920,000				
	3/3/2006(5)	1/25/2006					180,950	$ 17.40	$ 17.43

	3/3/2006(6)	1/25/2006				33,605			
	(3)		$ 406,250	$ 812,500	$ 1,218,750				
	(4)		289,000	578,000	1,156,000				
	3/3/2006(5)	1/25/2006					71,400	$ 17.40	$ 17.43
	3/3/2006(6)	1/25/2006				13,260			
	6/21/2006(5)	6/21/2006					30,000	$ 17.23	$ 17.25
	(3)		$ 711,459	$ 1,422,917	$ 2,134,376				
	(4)		484,500	969,000	1,938,000				
	3/3/2006(5)	2/22/2006					119,700	$ 17.40	$ 17.43
	3/3/2006(6)	2/22/2006				22,230			
	(3)		$ 406,250	$ 812,500	$ 1,218,750				
	(4)		289,000	578,000	1,156,000				
	3/3/2006(5)	1/25/2006					71,400	$ 17.40	$ 17.43
	3/3/2006(6)	1/25/2006				13,260			
	6/21/2006(5)	6/21/2006					25,000	$ 17.23	$ 17.25
oie	(3)		$ 215,540	$ 431,080	$ 646,620				
	(4)		168,300	336,600	673,200				
	3/3/2006(5)	1/25/2006					42,000	$ 17.40	$ 17.43
	3/3/2006(6)	1/25/2006				7,800			

(1) The date of approval is the date on which the Time Warner compensation committee reviewed and approved stock-based awards to be made on a selected future date that (a) provided sufficient time for Time Warner and us to prepare communications materials for our employees and (b) was after the issuance of Time Warner s earnings release for the 2005 fiscal year.

(2) The exercise price for the awards of stock options under the Time Warner Inc. 2003 Stock Incentive Plan was determined based on the average of the high and low sale prices of Time Warner Common Stock on the date of grant.

(3) Reflects the threshold, target and maximum payout amounts of non-equity incentive plan awards that were awarded in 2006 and were paid out in 2007 under the TWCIP. The target payout amount for each named executive officer was established in accordance with the

terms of the named executive officer s employment agreement. Each maximum payout amount reflects 150% of the applicable target payout amount, except for Mr. Britt s payout, which is subject to a contractual limit. Mr. Britt s 2006 target bonus has been pro-rated to reflect six months at a target bonus of $3,750,000 and six months at a target bonus of $5,000,000 and related pro-rated threshold and maximum bonus opportunity Mr. Britt s new employment agreement was approved by our board on July 28, 2006 and became effective on August 1, 2006; Mr. Hobbs 2006 target bonus has been pro-rated to reflect seven months base salary of $700,000, with a target bonus of 175% of his base salary, and five months base salary of $850,000, with a target bonus of 200% of his base salary Mr. Hobbs new compensation became effective as of August, 1, 2006; and Mr. LaJoie s 2006 target bonus has been pro-rated to reflect two months base salary of $420,600, with a target bonus of 80% of his base salary, and ten months base salary of $450,000, with a target bonus of 100% of his base salary Mr. LaJoie s new compensation became effective as of March 1, 2006.

(4) Reflects the threshold, target and maximum payout amounts of non-equity incentive plan awards that were awarded in 2006 and will be paid out in 2009 under our LTIP. The LTIP establishes a potential future cash payout based on a three-year performance cycle. Actual awards can range from 50% to 200% of target-based on actual performance, although no payout will be made for performance below the established minimum threshold for the LTIP. The target payout is 100% of the pre-established cash value. Payout levels under the LTIP for the three-year period starting in 2006 are based on our three-year cumulative OIBDA, as defined in the LTIP, compared to pre-established target levels. See Compensation Discussion and Analysis. Results will be interpolated based on the percentage of the target achieved. Typically, payouts, if any, under the LTIP will be made during the first quarter of each year following the completion of a three-year performance period. In the event of a participant s death, disability, retirement or job elimination, the participant (or the participant s estate) receives a pro-rated payment at the end of the applicable three-year performance period.

(5) Reflects awards of stock options to purchase Time Warner Common Stock under the Time Warner Inc. 2003 Stock Incentive Plan. See footnote (3) in the Summary Compensation Table for the assumptions used to determine the grant-date fair value of the stock options in accordance with FAS 123R. Estimates of forfeitures related to service-related vesting conditions are disregarded in computing the value shown in this column.

(6) Reflects awards of restricted stock units with respect to Time Warner Common Stock under the Time Warner Inc. 2003 Stock Incentive Plan. See footnote (2) in the Summary Compensation Table for the assumptions used to determine the grant-date fair value of the stock awards in accordance with FAS 123R. Estimates of forfeitures related to service-based vesting conditions are disregarded in computing the value shown in this column.

Employment Agreements

The following is a description of the material terms of the compensation provided to our named executive officers during the term of their employment pursuant to employment agreements between us or TWE, and each executive. See Potential Payments Upon Termination or Change in Control for a description of the payments and benefits that would be provided to our named executive officers in connection with a termination of their employment or a change in control of us.

Glenn A. Britt. We entered into an employment agreement with Mr. Britt, effective as of August 1, 2006, which provides that Mr. Britt will serve as our Chief Executive Officer through December 31, 2009, subject to earlier termination as provided in the agreement. Mr. Britt s agreement is automatically extended for consecutive one-month periods, unless terminated by either party upon 60 days notice, and terminates automatically on the date Mr. Britt becomes eligible for normal retirement at age 65. The agreement provides Mr. Britt with a minimum annual base salary of $1 million and an annual discretionary target bonus of $5 million, which will vary subject to Mr. Britt s and our performance from a minimum of $0 up to a maximum of $6,675,000. In addition, the agreement provides that, beginning in 2007, for each year of the agreement, we will provide Mr. Britt with long-term incentive compensation with a target value of approximately $6,000,000 (based on a valuation method established by us), which may be in the form of stock options, restricted stock units, other equity-based awards, cash or other components, or any combination

of such forms, as may be determined by our Board of Directors or, if delegated by the Board, the Compensation Committee, in its sole discretion. Mr. Britt participates in the benefit plans and programs available to our other senior executive officers, including $50,000 of group life insurance. Mr. Britt also receives an annual payment equal to two times the premium cost of $4 million of life insurance as determined under our GUL insurance program.

John K. Martin, Jr. We entered into an employment agreement with Mr. Martin, effective as of August 8, 2005, which provides that Mr. Martin will serve as our Executive Vice President and Chief Financial Officer through August 8, 2008, subject to earlier termination as provided in the agreement. Mr. Martin s agreement is automatically extended for consecutive one-month periods, unless terminated by Mr. Martin upon 60 days written notice or by us upon written notice specifying the effective date of such termination. The agreement provides Mr. Martin with a minimum annual base salary of $650,000 (which was increased to $700,000 by the New Compensation Committee as of January 1, 2007), an annual discretionary target bonus of 125% of his base salary (which was increased to 150% as of January 1, 2007), subject to Mr. Martin s and our performance, a one-time grant of options to purchase 30,000 shares of Time Warner Common Stock, a

discretionary long-term incentive compensation award for 2006 with a target value of $1,300,000 subject to Mr. Martin s and our performance, and participation in our benefit plans and programs, including life insurance.

Landel C. Hobbs. We entered into an employment agreement with Mr. Hobbs, effective as of August 1, 2005, which provides that Mr. Hobbs will serve as our Chief Operating Officer through July 31, 2008, subject to earlier termination as provided in the agreement. Mr. Hobbs agreement is automatically extended for consecutive one month periods, unless terminated by Mr. Hobbs upon 60 days written notice or by us upon written notice specifying the effective date of such termination. The agreement provides Mr. Hobbs with a minimum annual base salary of $700,000 (which was increased to $850,000 by the New Compensation Committee as of August 1, 2006), an annual discretionary target bonus of 175% of his base salary (which was increased to 200% as of August 1, 2006), subject to Mr. Hobbs and our performance, eligibility for annual grants of stock options, awards under our long-term incentive plan and participation in our benefit plans and programs, including life insurance.

Robert D. Marcus. We entered into an employment agreement with Mr. Marcus, effective as of August 15, 2005, which provides that Mr. Marcus will serve as our Senior Executive Vice President through August 15, 2008, subject to earlier termination as provided in the agreement. Mr. Marcus agreement is automatically extended for consecutive one-month periods, unless terminated by Mr. Marcus upon 60 days written notice or by us upon written notice specifying the effective date of such termination. The agreement provides Mr. Marcus with a minimum annual base salary of $650,000 (which was increased to $700,000 by the New Compensation Committee as of January 1, 2007), an annual discretionary target bonus of 125% of his base salary (which was increased to 150% as of January 1, 2007), subject to Mr. Marcus and our performance, a one-time grant of options to purchase 25,000 shares of Time Warner Common Stock, a discretionary annual equity and other long-term incentive compensation award with a minimum target value of $1,300,000, subject to Mr. Marcus and our performance, and participation in our benefit plans and programs, including $50,000 of group life insurance. Mr. Marcus also receives an annual payment equal to two times the premium cost of $2 million of life insurance as determined under our GUL insurance program.

Michael LaJoie. Mr. LaJoie s employment agreement was renewed and amended, effective as of January 1, 2006, and provides that Mr. LaJoie will serve as our Executive Vice President and Chief Technology Officer through December 31, 2008, subject to earlier termination as provided in the agreement. Our failure upon the expiration of the agreement to offer Mr. LaJoie a renewal agreement with terms substantially similar to those of his current agreement is considered a termination without cause. The agreement provides for a minimum annual base salary of $420,600 (which was increased to $480,000 by the New Compensation Committee as of January 1, 2007) and an annual discretionary target bonus of 80% of his base salary (which was increased to 100% as of March 1, 2006), subject to Mr. LaJoie s and our performance, and participation in our benefit plans.

Table of Contents

Outstanding Equity Awards

The following table provides information about each of the outstanding awards of options to purchase Time Warner Common Stock and the aggregate Time Warner restricted stock and restricted stock units held by each named executive officer as of December 31, 2006. As of December 31, 2006, none of the named executive officers held equity awards based on our securities or performance-based awards under any equity incentive plan of either ours or Time Warner.

(1) This column presents the number of shares of Time Warner Common Stock underlying exercisable options that have not been exercised at December 31, 2006.

(2) This column presents the number of shares of Time Warner Common Stock underlying unexercisable and unexercised options at December 31, 2006. These options become exercisable in installments of 25% on the first four anniversaries of the date of grant.

(3) This column presents the number of shares of Time Warner Common Stock represented by unvested restricted stock awards and restricted stock unit awards at December 31, 2006.

(4) The awards of Time Warner restricted stock vest equally on each of the second, third and fourth anniversaries of the date of grant except for 70,000 of Mr. Britt s shares of Time Warner restricted stock that vest equally on each

of the third and fourth anniversaries of the date of grant, and the awards of restricted stock units vest equally on each of the third and fourth anniversaries of the date of grant, in each case, subject to continued employment.

Option Exercises and Stock Vesting in 2006

The following table sets forth as to each of the named executive officers information on exercises of Time Warner stock options and the vesting of restricted stock during 2006, including: (i) the number of shares of Time Warner Common Stock underlying options exercised during 2006; (ii) the aggregate dollar value realized upon exercise of such options; (iii) the number of shares of Time Warner Common Stock received from the vesting of awards of Time Warner restricted stock during 2006; and (iv) the dollar value realized upon such vesting (based on the stock price of Time Warner Common Stock on February 14, 2006, the vesting date). No Time Warner restricted stock units vested during 2006.

Option Exercises and Stock Vested During 2006

	Option Awards		Stock Awards	
Name	**Number of Shares Acquired on Exercise**	**Value Realized on Exercise(1)**	**Number of Shares Acquired on Vesting(2)**	**Value Realized on Vesting(3)**
Glenn A. Britt	77,150	$ 270,504	25,896	$ 470,271
John K. Martin, Jr.				
Landel C. Hobbs	91,875	$ 721,831	12,945	$ 235,081
Robert D. Marcus	50,000	$ 542,815		
Michael LaJoie	65,750	$ 257,882	6,657	$ 120,891

(1) Calculated using the difference between the sale price per share of Time Warner Common Stock and the option exercise price.

(2) The awards of Time Warner restricted stock that vested in 2006 were awarded on February 14, 2003 and vest in installments of one-third on the second, third and fourth anniversaries of the date of grant, subject to acceleration upon the occurrence of certain events such as death, disability or retirement. The payment of withholding taxes due upon vesting of the restricted stock (unless a section 83(b) election was made at the time of the grant) generally may be made in cash or by having full shares of Time Warner Common Stock withheld from the number of shares delivered to the individual. Each of the named executive officers has a right to receive dividends on unvested awards of restricted stock and dividend equivalents on awards of restricted stock units, if regular cash dividends are paid on the outstanding shares of Time Warner Common Stock. The holders have the right to vote unvested shares of Time Warner restricted stock on matters presented to Time Warner stockholders, but do not have any right to vote on such matters in connection with restricted stock units.

(3) Calculated using the average of the high and low sale prices of Time Warner Common Stock, which was $18.16 per share, on February 14, 2006, the vesting date.

Pension Plans

Our Pension Plans

Each of the named executive officers currently participates in the Time Warner Cable Pension Plan, a tax qualified defined benefit pension plan, and the Time Warner Cable Excess Benefit Pension Plan (the Excess Benefit Plan), a non-qualified defined benefit pension plan (collectively, the TWC Pension Plans), which are sponsored by us. Mr. Britt was a participant in pension plans sponsored by Time Warner until March 31, 2003, when he commenced

participation in the Time Warner Cable Pension Plan. Each of Messrs. Martin, Hobbs, Marcus and LaJoie ceased participation in the TW Pension Plans (as defined below) on August 7, 2005, October 15, 2001, August 14, 2005 and July 31, 1995, respectively, when their respective participation in the Time Warner Cable Pension Plan commenced.

The Excess Benefit Plan is designed to provide supplemental payments to highly compensated employees in an amount equal to the difference between the benefits payable to an employee under the tax-qualified Time Warner Cable Pension Plan and the amount the employee would have received under that plan if the limitations under the tax laws relating to the amount of benefit that may be paid and compensation that may be taken into account in calculating a pension payment were not in effect. In determining the amount of excess benefit pension payment, the Excess Benefit Plan takes into account compensation earned up to $350,000 per year (including any deferred bonus). The pension benefit under the Excess Benefit Plan is payable under the same options as are available under the Time Warner Cable Pension Plan.

Benefit payments are calculated using the highest consecutive five-year average annual compensation, which is referred to as average compensation. Compensation covered by the TWC Pension Plans takes into account salary, bonus, some elective deferrals and other compensation paid, but excludes the payment of

Table of Contents

deferred or long-term incentive compensation and severance paid in a lump sum. The annual pension payment under the terms of the TWC Pension Plans, if the employee is vested, and if paid as a single life annuity, commencing at age 65, is an amount equal to the sum of:

1.25% of the portion of average compensation which does not exceed the average of the social security taxable wage base ending in the year the employee reaches the social security retirement age, referred to as covered compensation, multiplied by the number of years of benefit service up to 35 years, plus

1.67% of the portion of average compensation which exceeds covered compensation, multiplied by the number of years of benefit service up to 35 years, plus

0.5% of average compensation multiplied by the employee s number of years of benefit service in excess of 35 years, plus

a supplemental benefit in the amount of $60 multiplied by the employee s number of years of benefit service up to 30 years, with a maximum supplemental benefit of $1,800 per year.

In addition, in determining the benefits under the TWC Pension Plans, special rules apply to various participants who were previously participants in plans that have been merged into the TWC Pension Plans and of various participants in the TWC Pension Plans prior to January 1, 1994. Reduced benefits are available before age 65 and in other optional forms of benefits payouts. Amounts calculated under the pension formula that exceed Tax Code limits are payable under the Excess Benefit Plan.

For vesting purposes under the TWC Pension Plans, each of Messrs. Britt, Martin, Marcus and LaJoie is credited with service under the TW Pension Plans and is therefore fully vested. Mr. Hobbs is also fully vested in his benefits under the TWC Pension Plans, based on past service with TWE and its affiliates.

Time Warner Pension Plans

The Time Warner Employees Pension Plan, as amended (the Old TW Pension Plan), which provides benefits to eligible employees of Time Warner and certain of its subsidiaries, was amended effective as of January 1, 2000, as described below, and was renamed (the Amended TW Pension Plan and, together with the Old TW Pension Plan, the TW Pension Plans). Messrs. Britt, Martin, Marcus and LaJoie have ceased to be active participants in the TW Pension Plans described below and commenced participation in the TWC Pension Plans described above. Each of them is entitled to benefits under the TW Pension Plans in addition to the TWC Pension Plans.

Under the Amended TW Pension Plan, a participant accrues benefits equal to the sum of 1.25% of a participant s average annual compensation (defined as the highest average annual compensation for any five consecutive full calendar years of employment, which includes regular salary, overtime and shift differential payments, and non-deferred bonuses paid according to a regular program) not in excess of his covered compensation up to the applicable average Social Security wage base and 1.67% of his average annual compensation in excess of such covered compensation multiplied by his years of benefit service (not in excess of 30). Compensation for purposes of calculating average annual compensation under the TW Pension Plans is limited to $200,000 per year for 1988 through 1993, $150,000 per year for 1994 through 2001 and $200,000 per year for 2002 and thereafter (each subject to adjustments provided in the Tax Code). Eligible employees become vested in all benefits under the TW Pension Plans on the earlier of five years of service or certain other events.

Under the Old TW Pension Plan, a participant accrues benefits on the basis of 1.67% of the average annual compensation (defined as the highest average annual compensation for any five consecutive full and partial calendar

years of employment, which includes regular salary, overtime and shift differential payments, and non-deferred bonuses paid according to a regular program) for each year of service up to 30 years and 0.50% for each year of service over 30. Annual pension benefits under the Old TW Pension Plan are reduced by a Social Security offset determined by a formula that takes into account benefit service of up to 35 years, covered compensation up to the average Social Security wage base and a disparity factor based on the age at which Social Security benefits are payable (the Social Security Offset). Under the Old TW Pension Plan and

139

the Amended TW Pension Plan, the pension benefit of participants on December 31, 1977 in the former Time Employees Profit-Sharing Savings Plan (the Profit Sharing Plan) is further reduced by a fixed amount attributable to a portion of the employer contributions and investment earnings credited to such employees account balances in the Profit Sharing Plan as of such date (the Profit Sharing Offset).

Under the Amended TW Pension Plan, employees who are at least 62 years old and have completed at least ten years of service may elect early retirement and receive the full amount of their annual pension. This provision could apply to Messrs. Martin and Marcus with respect to their benefits under the TW Plans. Under the Old TW Pension Plan, employees who are at least 60 years old and have completed at least ten years of service may elect early retirement and receive the full amount of their annual pension. This provision could apply to Mr. Britt. An early retirement supplement is payable to an employee terminating employment at age 55 and before age 60, after 20 years of service, equal to the actuarial equivalent of such person s accrued benefit, or, if greater, an annual amount equal to the lesser of 35% of such person s average compensation determined under the Old TW Pension Plan or such person s accrued benefit at age 60 plus Social Security benefits at age 65. The supplement ceases when the regular pension commences at age 60.

Federal law limits both the amount of compensation that is eligible for the calculation of benefits and the amount of benefits derived from employer contributions that may be paid to participants under both of the TW Pension Plans. However, as permitted by the Employee Retirement Income Security Act of 1974, as amended (ERISA), Time Warner has adopted the Time Warner Excess Benefit Pension Plan (the TW Excess Plan). The TW Excess Plan provides for payments by Time Warner of certain amounts which eligible employees would have received under the TW Pension Plans if eligible compensation (including deferred bonuses) were limited to $250,000 in 1994 (increased 5% per year thereafter, to a maximum of $350,000) and there were no payment restrictions. The amounts shown in the table do not reflect the effect of an offset that affects certain participants in the TW Pension Plans on December 31, 1977.

Set forth in the table below is each named executive officer s years of credited service and present value of his accumulated benefit under each of the pension plans pursuant to which he would be entitled to a retirement benefit computed as of December 31, 2006, the pension plan measurement date used for financial statement reporting purposes in our audited financial statements for the year ended December 31, 2006. The estimated amounts are based on the assumption that payments under the TWC Pension Plans and the TW Pension Plans will commence upon normal retirement (generally age 65) or early retirement (for those who have at least ten years of service), that the TWC Pension Plans and the TW Pension Plans will continue in force in their present forms, that the maximum annual covered compensation is $350,000 and that no joint and survivor annuity will be payable (which would on an actuarial basis reduce benefits to the employee but provide benefits to a surviving beneficiary). Amounts calculated under the pension formula which exceed ERISA limits will be paid under the Excess Benefit Plan or the TW Excess Plan, as the case may be, from our or Time Warner s assets, respectively, and are included in the present values shown in the table.

Pension Benefits

Name	Plan Name	Number of Years Credited Service[1]	Present Value of Accumulated Benefit[2]	Payments During 2006
Glenn A. Britt[3]	Old TW Pension Plan	30.7	$ 1,168,060[4]

	Time Warner Cable Pension Plan	11.4	$ 188,080	
	Time Warner Cable Excess Benefit Plan	11.4	$ 143,670	
	Total	13.0	$ 390,420	

(1) Consists of the number of years of service credited to the executive officers as of December 31, 2006 for the purpose of determining benefit service under the applicable pension plan.

(2) The present value of accumulated benefits as of December 31, 2006 were calculated using a 6.00% interest rate and the RP2000 mortality table (projected to 2020 with no collar adjustment for the TWC Pension Plans and white collar adjustment for all other plans). All benefits are payable at the earliest retirement age at which unreduced benefits are payable (which is age 65 under the TWC Pension Plans, age 62 under the TW Pension Plans in the case of Messrs. Martin and Marcus, and age 60 under the TW Pension Plans in the case of Mr. Britt) as a life annuity, except for Mr. Britt s benefits under the TW Pension Plans, which are assumed payable as a lump sum determined using a GATT mortality and a 4.69% discount rate as of December 31, 2006. No preretirement turnover is reflected in the calculations.

(3) Under Mr. Britt s employment agreement, in the event that the benefits Mr. Britt receives upon retirement are not as generous as benefits he would have received if he had participated in the TW Pension Plans for his entire tenure, we will provide him or his survivors, if applicable, with the financial equivalent of the difference between the two benefits. See Employment Arrangements for more information.

(4) Because of certain grandfathering provisions under the TW Pension Plans, the benefit of participants with a minimum of ten years of benefit service whose age and years of benefit service equal or exceed 65 years as of January 1, 2000, including Mr. Britt, will be determined under either the provisions of the Old TW Pension Plan or the Amended TW Pension Plan, whichever produces the greater benefit. The amount shown in the table is greater than the estimated annual benefit payable under the Amended TW Pension Plan and the TW Excess Plan.

Nonqualified Deferred Compensation

Prior to 2003, TWE s unfunded deferred compensation plan generally permitted employees whose annual cash compensation exceeded a designated threshold (including certain named executive officers) to defer receipt of all or a portion of their annual bonus until a specified future date at which a lump-sum or installment distribution will be made. During the deferral period, the participant selects the crediting rate applied to the deferred amount from the array of third party investment vehicles then offered under the TWC Savings Plan and may change that selection quarterly. Since March 2003, deferrals may no longer be made under the deferred compensation plan but amounts previously credited under the deferred compensation plan continue to track the available crediting rate elections. Certain named executive officers also participated in the Time Warner Inc. Deferred Compensation Plan prior to being employed by us. The terms of the Time Warner plan are substantially the same, except that employees of Time Warner may still make deferrals under the plan. While these executives may no longer make deferrals under these plans, during the deferral period, they may select the crediting rate applied to the deferred amount similarly to accounts maintained under TWE s plan.

During his employment with Turner Broadcasting System, Inc., prior to his employment by us, Mr. Hobbs deferred a portion of his compensation under the Turner Broadcasting System, Inc. Supplemental Benefit Plan, a nonqualified defined contribution plan, and received matching contributions. While he may no longer make deferrals under this plan, he may maintain his existing account and select among several crediting rates,

similar to those available under the Time Warner Savings Plan, to be applied to the balance maintained in a rabbi trust on his behalf.

In addition, prior to 2002, pursuant to his employment agreement then in place, TWE made contributions for Mr. Britt to a separate special deferred compensation account maintained in a grantor trust. The accounts maintained in the grantor trust are invested by a third party investment manager and the accrued amount will be paid to Mr. Britt following termination of employment in accordance with the terms of the deferred compensation arrangements. In general, except as otherwise described under Potential Payments Upon Termination or Change in Control, payments under Mr. Britt s special deferred compensation account commence following the later of December 31, 2009 and the date Mr. Britt ceases to be our employee and leaves our payroll, for any reason. The payment is made either on the first regular payroll date to occur after such date or, if Mr. Britt is named in our most recent proxy statement, then in January of the year following the year of the event. There is no guaranteed rate of return on accounts maintained under any of these deferred compensation arrangements.

Set forth in the table below is information about the earnings, if any, credited to the accounts maintained by the named executive officers under these arrangements and any withdrawal or distributions therefrom during 2006 and the balance in the account on December 31, 2006.

Nonqualified Deferred Compensation for 2006

Name	Executive Contributions in 2006	Registrant Contributions in 2006	Aggregate Earnings in 2006[4]	Aggregate Withdrawals/ Distributions	Aggregate Balance at December 31, 2006
Glenn A. Britt[1]			$ 454,343		$ 3,381,834
John K. Martin, Jr.					
Landel C. Hobbs[2]			$ 35,169		$ 262,139
Robert D. Marcus[3]			$ 84,133		$ 1,542,544
Michael LaJoie					

(1) The amounts reported for Mr. Britt consist of the aggregate earnings and the aggregate year-end balance credited to his nonqualified deferred compensation under the Time Warner Excess Profit Sharing Plan, which is now maintained under the Time Warner Entertainment Deferred Compensation Plan ($79,585) and his individual deferred compensation account provided under the terms of his employment agreement ($3,302,249).

(2) The amounts reported for Mr. Hobbs reflect the aggregate earnings/net loss, as the case may be, and the year-end balance credited to his account in the Turner Broadcasting System, Inc. Supplemental Benefit Plan.

(3) The amounts reported for Mr. Marcus reflect the aggregate earnings/net loss, as the case may be, and the year-end balance credited to his nonqualified deferred compensation under the Time Warner Deferred Compensation Plan.

(4) None of the amounts reported in this column are required to be reported as compensation for fiscal year 2006 in the Summary Compensation Table.

Potential Payments Upon Termination or Change in Control

The following summaries and tables describe and quantify the potential payments and benefits that would be provided to each of our named executive officers in connection with a termination of employment or a change in control of our company under the executive s employment agreement and our other compensation plans and programs. In

determining the benefits payable upon certain terminations of employment, we have assumed in all cases that (i) the executive s employment terminates on December 31, 2006, (ii) he does not become employed by a new employer or return to work for us and (iii) we continue to be a consolidated subsidiary of Time Warner during the time that the executive remains on our payroll following termination of employment.

Glenn A. Britt

Termination without Cause/Our Material Breach. Under his employment agreement, Mr. Britt is entitled to certain payments and benefits upon a termination without cause, which includes our termination of his employment under the employment agreement without cause or his termination of such employment due to

Table of Contents

our material breach. For this purpose, cause means certain felony convictions and certain willful and intentional actions by Mr. Britt including failure to perform material duties; misappropriation, embezzlement or destruction of our property; material breach of duty of loyalty to us having a significant adverse financial impact; improper conduct materially prejudicial to our business; and material breach of certain restrictive covenants regarding noncompetition, hiring of employees, and nondisclosure of confidential information. A material breach includes our failure to cause a successor to assume our obligations under the employment agreement; our or a successor s failure to offer Mr. Britt the CEO position after a merger, sale, joint venture or other combination of assets with another entity in the cable business; Mr. Britt not being employed as our CEO with authority, functions, duties and powers consistent with that position; Mr. Britt not reporting to the Board; and Mr. Britt s principal place of employment being anywhere other than the greater Stamford, Connecticut or New York, New York areas.

In the event of a termination without cause, Mr. Britt is entitled to the following payments and benefits:

any earned but unpaid base salary;

a pro-rata portion of his average annual bonus, which is defined as the average of his two largest annual bonuses paid in the prior five years, except that if Mr. Britt has not been paid any full-year annual bonus under his current employment agreement, then he is entitled to be paid his target annual bonus, or if he has been paid only one full-year annual bonus under his current employment agreement, he will be paid the average of such full-year annual bonus and his target annual bonus. We will pay this bonus between January 1 and March 15 of the calendar year following the year of termination, which is the same time the full annual bonus would have been paid under the employment agreement had such termination not occurred;

any unpaid bonus for the year before the year in which termination of employment occurs, to the extent the bonus amount has been determined or, if not determined, it will be deemed to be his average annual bonus;

any accrued but unpaid long-term compensation;

until the later of December 31, 2009 or 24 months after termination (and Mr. Britt will remain on our payroll during this period), continued payment by us of Mr. Britt s base salary (paid on our normal payroll payment dates in effect immediately prior to Mr. Britt s termination), his average annual bonus, the continuation of his benefits, including pension, automobile allowance and financial services benefits but not including any additional stock-based awards, unless Mr. Britt dies during such period, in which case these benefits will be replaced with the death benefits described below;

office space, secretarial services, office facilities, services and furnishings reasonably appropriate to an employee of Mr. Britt s position and responsibilities prior to termination, but taking into account his reduced need for such space, services, facilities and furnishings. We will provide these benefits for no charge for up to 12 months after termination. These benefits will cease if Mr. Britt commences full-time employment with another employer;

all stock options granted to Mr. Britt by Time Warner will continue to vest, and these vested stock options will remain exercisable (but not beyond the original term of the options) while Mr. Britt is on our payroll;

unless Mr. Britt otherwise qualifies for retirement under the applicable stock option agreement, all stock options granted to Mr. Britt by Time Warner on or after January 10, 2000 (a) that would have vested on or before the date when the salary and bonus continuation payments described above would otherwise cease, will vest immediately on the date Mr. Britt leaves our payroll and (b) that are vested will remain exercisable for three years after Mr. Britt leaves our payroll (but not beyond the original term of the options);

if the date Mr. Britt leaves our payroll because of a termination without cause occurs before a change in control transaction (as described below) and Mr. Britt forfeits any restricted stock grants because of such termination, then, as of the date that Mr. Britt leaves our payroll, Mr. Britt will receive a cash

payment equal to the value of any forfeited restricted stock based on the fair market value of the stock as of the date of termination; and

unless otherwise elected by Mr. Britt, his special deferred compensation account will be distributed in installments over 10 years following the later of December 31, 2009 and the date he leaves our payroll.

Conditions and Obligations Applicable to Receipt of Payments and Benefits. Mr. Britt s right to receive these payments and benefits upon a termination without cause is conditioned on his execution of a release of claims against us. If Mr. Britt does not execute a release of claims, he will receive a severance payment determined in accordance with our policies relating to notice and severance. Mr. Britt is required to engage in any mitigation necessary to preserve our tax deduction in respect of the payments described above and avoid applicability of the golden parachute excise taxes and related lost corporate tax deduction. Also, if, following a termination without cause, Mr. Britt obtains other employment (other than with a non-profit organization or government entity), he is required to pay over to us the total cash salary and bonus (but not any equity-based compensation or similar benefit) payable to him by a new employer for services provided until December 31, 2009 to the extent of the amounts we have paid him that are in excess of any severance to which he would be entitled from us under our standard severance policies. Mr. Britt must pay us these amounts when he receives them from his new employer. The payments may also be delayed to the extent we deem it necessary for compliance with section 409A of the Tax Code, governing nonqualified deferred compensation.

Change in Control. Under his employment agreement, Mr. Britt is entitled to certain payments and benefits if we cease to be a consolidated subsidiary of Time Warner or if Time Warner disposes of all or substantially all of our assets that results in the financial results of our business not being consolidated with Time Warner s financial results. Upon such a transaction, unless Mr. Britt otherwise qualifies for retirement under the applicable stock option agreement, all Time Warner stock options granted to Mr. Britt on or after January 10, 2000 (a) that would have vested on or before December 31, 2009 will vest immediately and (b) that are vested will remain exercisable for three years following the date of the transaction (but not beyond the original term of the options). All other restricted stock, restricted stock units or other awards will be treated pursuant to applicable plans as if Mr. Britt s employment was terminated without cause on the date of closing of the transaction. If this section applies to any equity-based compensation awards, then the termination without cause treatment of such awards (described above) will not apply. Also, if Mr. Britt forfeits any restricted stock grants because of such transaction, then he will receive a cash payment equal to the value of the forfeited stock based on the value of the stock as of the date of the close of the transaction. Payments or benefits may also be delayed to the extent we deem it necessary for compliance with section 409A of the Tax Code.

Disability. Under his employment agreement, Mr. Britt is entitled to payments and benefits if he becomes disabled and has not resumed his duties after six consecutive months or an aggregate of six months in any 12-month period. In such event, we will pay him a pro-rata bonus for the year in which the disability occurs (which will be calculated based on his average annual bonus, described above). In addition, through the later of December 31, 2009 or 12 months following the date the disability occurs, Mr. Britt will remain on our payroll, and we will pay Mr. Britt disability benefits equal to 75% of his annual base salary and average annual bonus, and he will continue to be eligible to participate in our benefit plans (other than equity-based plans) and to receive his other benefits (including automobile allowance and financial services). We may generally deduct from these payments amounts equal to disability payments received by Mr. Britt during this payment period from Workers Compensation, Social Security and our disability insurance policies. Mr. Britt s special deferred compensation account will be distributed in installments over 10 years following the date he leaves our payroll.

Retirement. No benefits or payments provided above in connection with a termination without cause or due to disability shall be payable after Mr. Britt s normal retirement date at age 65. Under his employment agreement and a

separate agreement with Time Warner, Mr. Britt is entitled to certain payments and benefits when he retires. Under these arrangements, to the extent the benefits Mr. Britt receives upon retirement are not as generous as benefits he would have received if he had participated in the defined benefit pension plans

Table of Contents

offered by Time Warner instead of our defined benefit pension plans, then we will provide Mr. Britt with the financial equivalent of the more generous benefits. In addition, Time Warner has agreed to ensure that Mr. Britt receives the equivalent of the benefits he would have received under Time Warner s retiree medical program if he had retired from Time Warner on the same terms and conditions as senior corporate executives of Time Warner upon retirement. This commitment is conditioned on Mr. Britt s retiring pursuant to his employment agreement.

Death. Under his employment agreement, if Mr. Britt dies, the employment agreement and all of our obligations to make any payments under the agreement terminate, except that Mr. Britt s estate or designated beneficiary is entitled to receive: (i) Mr. Britt s salary to the last day of the month in which his death occurs, (ii) any unpaid bonus for the year prior to his death (if not previously determined, then based on his average annual bonus) and (iii) bonus compensation, at the time bonuses are normally paid, based on his average annual bonus but prorated according to the number of whole or partial months Mr. Britt was employed by us in the calendar year. Mr. Britt s special deferred compensation account will be distributed in a lump sum within 75 days following his death.

For Cause. Under Mr. Britt s employment agreement, if we terminate his employment for cause (as defined above), we will have no further obligations to Mr. Britt other than (i) to pay his base salary through the effective date of termination, (ii) to pay any bonus for any year prior to the year in which such termination occurs that has been determined but not yet paid as of the date of such termination, and (iii) to satisfy any rights Mr. Britt has pursuant to any insurance or other benefit plans or arrangements. Mr. Britt s special deferred compensation account will be valued as of the later of December 31, 2009 and 12 months after termination of employment, and distributed in a lump sum within 75 days of such valuation date.

See Pension Plans for a description of Mr. Britt s entitlements under our pension plans and Time Warner s pension plans. See Nonqualified Deferred Compensation for a description of Mr. Britt s entitlements under nonqualified deferred compensation plans in which he participates.

Certain Restrictive Covenants. Mr. Britt s employment agreement provides that he is subject to restrictive covenants that obligate him, among other things: (1) not to disclose any of our confidential matters, (2) not to hire certain of our employees for one year following termination of employment for cause, without cause, or due to retirement at age 65; and (3) not to compete with our business during his employment and until the latest of December 31, 2009, the date Mr. Britt leaves our payroll and 12 months after the effective date of any termination of the term of employment for cause, without cause, or due to retirement at age 65.

Assuming the trigger event causing any of the termination payments and other benefits described above occurred on December 31, 2006, and based on the NYSE closing price per share of Time Warner Common Stock on December 29, 2006 ($21.78), the dollar value of additional payments and other benefits provided Mr. Britt under his contract are estimated to be as follows:

	Base Salary Continuation	Annual Bonus Continuation	Pro Rata Bonus	LTIP[(1)]	Group Benefit Plans Continuation[(2)]	Pension Accrual[(3)]	Stock-Based Awards[(4)]	Other[(5)]
Termination without Cause	$ 3,000,000	$ 15,000,000	$ 5,000,000	$ 2,924,835	$ 103,568	$ 52,500	$ 5,489,405	$ 515,456
Change in Control				$ 2,438,168			$ 5,489,405	

Retirement			$ 5,000,000	$ 2,438,168	(6)		$ 5,489,405	
Disability	$ 2,250,000	$ 11,250,000	$ 5,000,000	$ 2,924,835	$ 103,568		$ 5,489,405	$ 447,456
Death			$ 5,000,000	$ 2,438,168			$ 5,489,405	

(1) The amount shown reflects the amount payable under 2005 and 2006 LTIP grants (based on target value) under his employment agreement and the terms of the LTIP by reason of his termination or a change in control, as applicable (including treatment as a retirement under the LTIP, as applicable).

(2) Includes $30,388 to cover the estimated cost of continued health, life and disability insurance for three years, $43,180 for medical subsidy under the Time Warner Inc. Retiree Medical Plan for three years, plus estimated Savings Plan (401(k)) company contributions of $10,000 per year for three years. After three years, Mr. Britt would continue to receive the medical subsidy under the Time Warner Inc. Retiree Medical Plan, which, based on current plan rates, would be an amount equal to $14,393 per year before the age of 65 and $4,040 per year after turning 65 years old.

(3) Reflects the present value of the increase in the annual pension benefit payable as a result of the additional period of service during the post-termination period. See the Pension Benefits Table for additional information as of December 31, 2006.

(4) Based on the excess of the closing sale price of Time Warner Common Stock on December 29, 2006 over the exercise price for each accelerated option, and based on the closing sale price of Time Warner Common Stock on December 29, 2006 in the case of

145

accelerated restricted stock and restricted stock units. See the Outstanding Time Warner Equity Awards at December 31, 2006 Table for additional information as of December 31, 2006.

(5) Includes car allowance of $24,000 annually for three years, financial planning reimbursement of up to $100,000 annually for three years, payments of $25,152 annually for three years corresponding to two times the premium cost of $4,000,000 of life insurance coverage under our GUL insurance program, and, other than in the case of disability, office space and secretarial support for one year after termination at a cost of $68,000.

(6) Upon retirement, Mr. Britt would be entitled to receive the medical subsidy under the Time Warner Inc. Retiree Medical Plan, which, based on current plan rates, would be an amount equal to $14,393 per year before age 65 and $4,040 per year after turning 65 years old.

John K. Martin, Jr.

Termination without Cause/Our Material Breach. Under his employment agreement, Mr. Martin is entitled to certain payments and benefits upon a termination without cause, which includes our termination of his employment under the employment agreement without cause or his termination of such employment due to our material breach. For this purpose, cause means certain felony convictions and certain willful and intentional actions by Mr. Martin including failure to perform material duties; misappropriation, embezzlement or destruction of our property having a significant adverse effect on us; material breach of duty of loyalty to us having a significant adverse effect on us; improper conduct materially prejudicial to our business; and material breach of certain restrictive covenants regarding noncompetition, hiring of employees, and nondisclosure of confidential information. A material breach includes our failure to cause a successor to assume our obligations under the agreement; Mr. Martin not being employed as our Executive Vice President and Chief Financial Officer with authority, functions, duties and powers consistent with that position; Mr. Martin not reporting to the CEO; and Mr. Martin s principal place of employment being anywhere other than the greater Stamford, Connecticut area or other location of our principal corporate offices in the New York metropolitan area.

In the event of a termination without cause, Mr. Martin is entitled to the following payments and benefits:

any earned but unpaid base salary;

a pro-rata portion of his average annual bonus, which is defined as the average of his two largest regular annual bonuses paid in the prior five years, except that if Mr. Martin has not been paid any full-year annual bonus under his current employment agreement, then he is entitled to be paid his target annual bonus, or if he has been paid only one full-year annual bonus under his current employment agreement, he will be paid the average of such full-year annual bonus and his target annual bonus. We will pay this bonus between January 1 and March 15 of the calendar year following the year of termination, which is the same time the full annual bonus would have been paid under the employment agreement had such termination not occurred;

until the later of August 8, 2008 or 24 months after termination (and Mr. Martin will remain on our payroll during this period), continued payment by us of Mr. Martin s base salary (paid on our normal payroll payment dates in effect immediately prior to Mr. Martin s termination), his average annual bonus, and the continuation of his benefits, including pension but not including any additional stock-based awards, unless Mr. Martin dies during such period, in which case these benefits will be replaced with the death benefits described below;

unless Mr. Martin otherwise qualifies for retirement under the applicable stock option agreement, all stock options granted to Mr. Martin by Time Warner will continue to vest, and these vested stock options will remain exercisable (but not beyond the original term of the options) while Mr. Martin is on our payroll; and

unless Mr. Martin otherwise qualifies for retirement under the applicable stock option agreement, all stock options granted to Mr. Martin by Time Warner on or after January 10, 2000 (a) that would have vested on or before the date when the salary and bonus continuation payments described above would otherwise cease, will vest immediately on the date Mr. Martin leaves our payroll and (b) that are vested will remain exercisable for three years after Mr. Martin leaves our payroll (but not beyond the original term of the options).

Conditions and Obligations Applicable to Receipt of Payments and Benefits. Mr. Martin s right to receive these payments and benefits upon a termination without cause is conditioned on his execution of a release of claims against us. If Mr. Martin does not execute a release of claims, he will receive a severance payment determined in accordance with our policies relating to notice and severance.

Change in Control. Under his employment agreement, Mr. Martin is entitled to certain payments and benefits if we cease to be a consolidated subsidiary of Time Warner or if Time Warner disposes of all or substantially all of our assets that results in the financial results of our business not being consolidated with Time Warner s financial results. Upon such a transaction, unless Mr. Martin otherwise qualifies for retirement under the applicable stock option agreement, all stock options granted to Mr. Martin on or after January 10, 2000 (a) that would have vested on or before December 31, 2008 will vest immediately and (b) that are vested will remain exercisable for three years following the date of the transaction (but not beyond the original term of the options). All other restricted stock, restricted stock units or other awards will be treated pursuant to applicable plans as if Mr. Martin s employment was terminated without cause on the date of closing of the transaction. If this section applies to any equity-based compensation awards, then the termination without cause treatment of such awards (described above) will not apply.

Disability. Under his employment agreement, Mr. Martin is entitled to payments and benefits if he becomes disabled and has not resumed his duties after six consecutive months or an aggregate of six months in any 12-month period. In such event, we will pay him a pro-rata bonus for the year in which the disability occurs (which will be calculated based on his average annual bonus). In addition, through the later of August 8, 2008 or 12 months following the date the disability occurs, Mr. Martin will remain on our payroll, and we will pay Mr. Martin disability benefits equal to 75% of his annual base salary and average annual bonus, and he will continue to be eligible to participate in our benefit plans (other than equity-based plans) and to receive his other benefits (including financial services). We may generally deduct from these payments amounts equal to disability payments received by Mr. Martin during this payment period from Workers Compensation, Social Security and our disability insurance policies.

Death. Under his employment agreement, if Mr. Martin dies, the employment agreement and all of our obligations to make any payments under the agreement terminate, except that Mr. Martin s estate or designated beneficiary is entitled to receive: (a) Mr. Martin s salary to the last day of the month in which his death occurs and (b) bonus compensation, at the time bonuses are normally paid, based on his average annual bonus but pro-rated according to the number of whole or partial months Mr. Martin was employed by us in the calendar year.

For Cause. Under Mr. Martin s employment agreement, if we terminate his employment for cause (as defined above), we will have no further obligations to Mr. Martin other than (a) to pay his base salary through the effective date of termination, (b) to pay any bonus for any year prior to the year in which such termination occurs that has been determined but not yet paid as of the date of such termination, and (c) to satisfy any rights Mr. Martin has pursuant to any insurance or other benefit plans or arrangements.

See Pension Plans for a description of Mr. Martin s entitlements under our pension plans and Time Warner s pension plans.

Certain Restrictive Covenants. Mr. Martin s employment agreement provides that he is subject to restrictive covenants that obligate him, among other things: (1) not to disclose any of our confidential matters, (2) not to hire certain of our employees for one year following termination of employment for cause or without cause; and (3) not to compete with our business during his employment and until the latest of August 8, 2008, the date Mr. Martin leaves our payroll and 12 months after the effective date of any termination of the term of employment for cause or without cause.

Table of Contents

Assuming the trigger event causing any of the termination payments and other benefits described above occurred on December 31, 2006, and based on the NYSE closing price per share of Time Warner Common Stock on December 29, 2006 ($21.78), the dollar value of additional payments and other benefits provided Mr. Martin under his contract are estimated to be as follows:

	Base Salary Continuation	Annual Bonus Continuation	Pro Rata Bonus	LTIP[(1)]	Group Benefit Plans Continuation[(2)]	Pension Accrual[(3)]	Stock-Based Awards[(4)]	Other[(5)]
Termination without Cause	$ 1,300,000	$ 1,587,119	$ 793,560	$ 578,000	$ 77,807	$ 45,030	$ 775,862	$ 52,232
Change in Control				$ 192,667			$ 775,862	
Disability	$ 771,859	$ 942,332	$ 793,560	$ 497,723	$ 77,807		$ 1,475,706	$ 52,232
Death			$ 793,560	$ 192,667			$ 1,475,706	

(1) The amount shown reflects the amount payable under 2006 LTIP grant (based on target value) under his employment agreement and the terms of the LTIP by reason of his termination or a change in control, as applicable.

(2) Includes $57,807 to cover the estimated cost of continued health, life and disability insurance for two years, plus estimated Savings Plan (401(k)) company contributions of $10,000 per year for two years.

(3) Reflects the present value of the increase in the annual pension benefit payable as a result of the additional period of service during the post-termination period. See the Pension Benefits Table for additional information as of December 31, 2006.

(4) Based on the excess of the closing sale price of Time Warner Common Stock on December 29, 2006 over the exercise price for each accelerated option, and based on the closing sale price of Time Warner Common Stock on December 29, 2006 in the case of accelerated restricted stock and restricted stock units. The change-in-control amount is based on the assumption that the change in control of our company results in our financial results ceasing to be consolidated with those of Time Warner. If there were a change in control of Time Warner that met the requirements of the Time Warner equity award agreements, the amount would be $1,475,706. See the Outstanding Time Warner Equity Awards at December 31, 2006 Table for additional information as of December 31, 2006.

(5) Includes financial planning reimbursement of up to $25,000 annually for two years and payments of $2,232 in the aggregate corresponding to two times the premium cost of $1,000,000 of life insurance coverage under our GUL insurance program.

Landel C. Hobbs

Termination without Cause/Our Material Breach. Under his employment agreement, Mr. Hobbs is entitled to certain payments and benefits upon a termination without cause, which includes our termination of his employment under the employment agreement without cause or his termination of such employment due to our material breach. For this purpose, cause means certain felony convictions and certain willful and intentional actions by Mr. Hobbs including failure to perform material duties; misappropriation, embezzlement or destruction of our property having a significant adverse effect on us; material breach of duty of loyalty to us having a significant adverse effect on us; improper conduct materially prejudicial to our business; and material breach of certain restrictive covenants regarding noncompetition, hiring of employees, and nondisclosure of confidential information. A material breach includes our

failure to cause a successor to assume our obligations under the agreement; Mr. Hobbs not being employed as our COO with authority, functions, duties and powers consistent with that position; Mr. Hobbs not reporting to the CEO; and Mr. Hobbs principal place of employment being anywhere other than Stamford, Connecticut or New York, New York.

In the event of a termination without cause, Mr. Hobbs is entitled to the following payments and benefits:

any earned but unpaid base salary;

a pro-rata portion of his average annual bonus, which is defined as the average of his two largest annual bonuses paid in the prior five years, except that if Mr. Hobbs has not been paid any full-year annual bonus under his current employment agreement, then he is entitled to be paid his target annual bonus, or if he has been paid only one full-year annual bonus under his current employment agreement, he will be paid the average of such full-year annual bonus and his target annual bonus; and

until the later of July 31, 2008 or 24 months after termination (and Mr. Hobbs will remain on our payroll during this period), continued payment by us of Mr. Hobbs base salary (paid on our normal payroll payment dates in effect immediately prior to Mr. Hobbs termination), his average annual bonus, and the continuation of his benefits, including pension, but not including any additional stock-based awards, unless Mr. Hobbs dies during such period, in which case these benefits will be replaced with the death benefits described below.

Conditions and Obligations Applicable to Receipt of Payments and Benefits. Mr. Hobbs right to receive these payments and benefits upon a termination without cause is conditioned on his execution of a release of claims against us. If Mr. Hobbs does not execute a release of claims, he will receive a severance payment determined in accordance with our policies relating to notice and severance. Mr. Hobbs is required to engage in any mitigation necessary to preserve our tax deduction in respect of the payments described above and avoid applicability of the golden parachute excise taxes and related lost corporate tax deduction.

Disability. Under his employment agreement, Mr. Hobbs is entitled to payments and benefits if he becomes disabled and has not resumed his duties after six consecutive months or an aggregate of six months in any 12-month period. In such event, we will pay him a pro-rata bonus for the year in which the disability occurs (which will be calculated based on his average annual bonus). In addition, through the later of July 31, 2008 or 12 months following the date the disability occurs, Mr. Hobbs will remain on our payroll, and we will pay Mr. Hobbs disability benefits equal to 75% of his annual base salary and average annual bonus, and he will continue to be eligible to participate in our benefit plans (other than additional equity-based plans) and to receive his other benefits (including financial services). We may generally deduct from these payments amounts equal to disability payments received by Mr. Hobbs during this payment period from Workers Compensation, Social Security and our disability insurance policies.

Death. Under his employment agreement, if Mr. Hobbs dies, the employment agreement and all of our obligations to make any payments under the agreement terminate, except that Mr. Hobbs estate or designated beneficiary is entitled to receive: (a) Mr. Hobbs salary to the last day of the month in which his death occurs and (b) bonus compensation, at the time bonuses are normally paid, based on his average annual bonus but pro-rated according to the number of whole or partial months Mr. Hobbs was employed by us in the calendar year.

For Cause. Under Mr. Hobbs employment agreement, if we terminate his employment for cause (as defined above), we will have no further obligations to Mr. Hobbs other than (a) to pay his base salary through the effective date of termination, (b) to pay any bonus for any year prior to the year in which such termination occurs that has been determined but not yet paid as of the date of such termination, and (c) to satisfy any rights Mr. Hobbs has pursuant to any insurance or other benefit plans or arrangements.

See Pension Plans for a description of Mr. Hobbs entitlements under our pension plans and Time Warner s pension plans. See Nonqualified Deferred Compensation for a description of Mr. Hobbs entitlements under nonqualified deferred compensation plans in which he participates.

Certain Restrictive Covenants. Mr. Hobbs employment agreement provides that he is subject to restrictive covenants that obligate him, among other things: (a) not to disclose any of our confidential matters, (b) not to hire certain of our employees for one year following termination of employment for cause or without cause; and (c) not to compete with our business during his employment and until the latest of July 31, 2008, the date Mr. Hobbs leaves our payroll and 12 months after the effective date of any termination of the term of employment for cause or without cause.

Assuming the trigger event causing any of the termination payments and other benefits described above occurred on December 31, 2006, and based on the NYSE closing price per share of Time Warner Common Stock on December 29, 2006 ($21.78), the dollar value of additional payments and other benefits provided Mr. Hobbs under his contract are estimated to be as follows:

	Base Salary	Annual Bonus	Pro Rata	Group Benefit Plans	Pension	Stock-Based

	Continuation	Continuation	Bonus	LTIP(1)	Continuation(2)	Accrual(3)	Awards(4)	Other(5)
Termination without Cause	$ 1,700,000	$ 2,023,270	$ 1,011,635	$ 1,567,400	$ 77,807	$ 36,400	$ 1,631,573	$ 84,176
Change in Control				$ 721,933			$ 406,653	
Disability	$ 1,009,354	$ 1,201,291	$ 1,011,635	$ 1,432,817	$ 77,807		$ 2,687,125	$ 84,176
Death			$ 1,011,635	$ 721,933			$ 2,687,125	

(1) The amount shown reflects the amount payable under 2005 and 2006 LTIP grants (based on target value) under his employment agreement and the terms of the LTIP by reason of his termination or a change in control, as applicable.

(2) Includes $57,807 to cover the estimated cost of continued health, life and disability insurance for two years, plus estimated Savings Plan (401(k)) company contributions of $10,000 per year for two years.

(3) Reflects the present value of the increase in the annual pension benefit payable as a result of the additional period of service during the post-termination period. See the Pension Benefits Table for additional information as of December 31, 2006.

(4) Based on the excess of the closing sale price of Time Warner Common Stock on December 29, 2006 over the exercise price for each accelerated option, and based on the closing sale price of Time Warner Common Stock on December 29, 2006 in the case of accelerated restricted stock and restricted stock units. The change-in-control amount is based on the assumption that the change in control of our company results in our financial results ceasing to be consolidated with those of Time Warner. If there were a change in control of Time Warner that met the requirements of the Time Warner equity award agreements, the amount would be $2,687,125. See the Outstanding Time Warner Equity Awards at December 31, 2006 Table for additional information as of December 31, 2006.

(5) Includes financial planning reimbursement of up to $40,000 annually and payments of $4,176 in the aggregate, corresponding to two times the premium cost of $1,500,000 of life insurance coverage under our GUL insurance program.

Robert D. Marcus

Termination without Cause/Our Material Breach. Under his employment agreement, Mr. Marcus is entitled to certain payments and benefits upon a termination without cause, which includes our termination of his employment under the employment agreement without cause or his termination of such employment due to our material breach. For this purpose, cause means certain felony convictions and certain willful and intentional actions by Mr. Marcus including failure to perform material duties; misappropriation, embezzlement or destruction of our property having a significant adverse effect on us; material breach of duty of loyalty to us having a significant adverse effect on us; improper conduct materially prejudicial to our business; and material breach of certain restrictive covenants regarding noncompetition, nonsolicitation of employees, and nondisclosure of confidential information. A material breach includes our failure to cause a successor to assume our obligations under the agreement; Mr. Marcus not being employed as our Senior Executive Vice President with authority, functions, duties and powers consistent with that position; Mr. Marcus not reporting to the CEO; and Mr. Marcus principal place of employment being anywhere other than the greater Stamford, Connecticut area or other location of our principal corporate offices in the New York metropolitan area.

In the event of a termination without cause, Mr. Marcus is entitled to the following payments and benefits:

- any earned but unpaid base salary;

- a pro-rata portion of his average annual bonus, which is defined as the average of his two largest regular annual bonuses paid in the prior five years, except that if Mr. Marcus has not been paid any full-year annual bonus under his current employment agreement, then he is entitled to be paid his target annual bonus, or if he has been paid only one full-year annual bonus under his current employment agreement, he will be paid the average of such full-year annual bonus and his target annual bonus. We will pay this bonus between January 1 and March 15 of the calendar year following the year of termination, which is the same time the full annual bonus would have been paid under the employment agreement had such termination not occurred;

- until the later of August 15, 2008 or 24 months after termination (and Mr. Marcus will remain on our payroll during this period), continued payment by us of Mr. Marcus base salary (paid on our normal payroll payment dates in effect immediately prior to Mr. Marcus termination), his average annual bonus, and the continuation of his benefits, including pension and financial services benefits but not including any additional stock-based awards, unless Mr. Marcus dies during such period, in which case these benefits will be replaced with the death benefits described below; and

unless Mr. Marcus otherwise qualifies for retirement under the applicable stock option, restricted stock, restricted stock unit or other equity-based award agreement, all stock options granted to Mr. Marcus by Time Warner or us on or after January 10, 2000 (a) that would have vested on or before the date when the salary and bonus continuation payments described above would otherwise cease, will vest immediately on the date Mr. Marcus leaves our payroll and will remain exercisable for three years after Mr. Marcus leaves our payroll (but not beyond the original term of the options), (b) any unvested awards of Time Warner or our restricted stock, restricted stock units or other equity-based award that would have vested on or before the date when the salary and bonus continuation payments described above would otherwise cease, will vest immediately and (c) any grants of long-term cash compensation which would vest as of the date when the salary and bonus continuation payments described above would otherwise cease, will vest immediately and be paid on the dates on which such long-term cash

compensation is ordinarily scheduled to be paid (with the awards in (b) and (c) above being deemed for this purpose to vest pro rata over the applicable vesting period).

Conditions and Obligations Applicable to Receipt of Payments and Benefits. Mr. Marcus right to receive these payments and benefits upon a termination without cause is conditioned on his execution of a release of claims against us. If Mr. Marcus does not execute a release of claims, he will receive a severance payment determined in accordance with our policies relating to notice and severance. The payments may also be delayed to the extent we deem it necessary for compliance with section 409A of the Tax Code, governing nonqualified deferred compensation.

Change in Control. Under his employment agreement, Mr. Marcus is entitled to certain payments and benefits if we cease to be a consolidated subsidiary of Time Warner or if Time Warner disposes of all or substantially all of our assets that results in the financial results of our business not being consolidated with Time Warner s financial results. Upon such a transaction, unless Mr. Marcus otherwise qualifies for retirement under the applicable stock option, restricted stock, restricted stock unit or other equity-based award agreement, all stock options granted to Mr. Marcus by Time Warner or us on or after January 10, 2000 (a) that would have vested on or before the date when the salary and bonus continuation payments described above would otherwise cease, will vest immediately on the date the transaction closes and will remain exercisable for three years (but not beyond the original term of the options), (b) any unvested awards of Time Warner or our restricted stock, restricted stock units or other equity-based award that would have vested on or before the date when the salary and bonus continuation payments described above would otherwise cease, will vest immediately on the date the transaction closes and (c) any grants of long-term cash compensation which would vest as of the date when the salary and bonus continuation payments described above would otherwise cease, will vest immediately on the date the transaction closes and be paid on the dates on which such long-term cash compensation is ordinarily scheduled to be paid (with the awards in (b) and (c) above being deemed for this purpose to vest pro rata over the applicable vesting period).

Disability. Under his employment agreement, Mr. Marcus is entitled to payments and benefits if he becomes disabled and has not resumed his duties after six consecutive months or an aggregate of six months in any 12-month period. In such event, we will pay him a pro-rata bonus for the year in which the disability occurs (which will be calculated based on his average annual bonus). In addition, through the later of August 15, 2008 or 24 months following the date the disability occurs, Mr. Marcus will remain on our payroll, and we will pay Mr. Marcus disability benefits equal to 75% of his annual base salary and average annual bonus, and he will continue to be eligible to participate in our benefit plans (other than equity-based plans) and to receive his other benefits (including automobile allowance and financial services). We may generally deduct from these payments amounts equal to disability payments received by Mr. Marcus during this payment period from Workers Compensation, Social Security and our disability insurance policies.

Death. Under his employment agreement, if Mr. Marcus dies, the employment agreement and all of our obligations to make any payments under the agreement terminate, except that Mr. Marcus estate or designated beneficiary is entitled to receive: (a) Mr. Marcus salary to the last day of the month in which his death occurs and (b) bonus compensation, at the time bonuses are normally paid, based on his average annual bonus but pro-rated according to the number of whole or partial months Mr. Marcus was employed by us in the calendar year.

For Cause. Under his employment agreement, if we terminate his employment for cause (as defined above), we will have no further obligations to Mr. Marcus other than (a) to pay his base salary through the effective date of termination, (b) to pay any bonus for any year prior to the year in which such termination occurs that has been determined but not yet paid as of the date of such termination, and (c) to satisfy any rights Mr. Marcus has pursuant to any insurance or other benefit plans or arrangements.

See Pension Plans for a description of Mr. Marcus entitlements under our pension plans and Time Warner s pension plans. See Nonqualified Deferred Compensation for a description of Mr. Marcus entitlements under nonqualified deferred compensation plans in which he participates.

Table of Contents

Certain Restrictive Covenants. Mr. Marcus employment agreement provides that he is subject to restrictive covenants that obligate him, among other things: (a) not to disclose any of our confidential matters, (b) not to solicit certain of our employees for one year following termination of employment for cause or without cause; and (c) not to compete with our business during his employment and until the latest of August 15, 2008, the date Mr. Marcus leaves our payroll and 12 months after the effective date of any termination of the term of employment for cause or without cause.

Assuming the trigger event causing any of the termination payments and other benefits described above occurred on December 31, 2006, and based on the NYSE closing price per share of Time Warner Common Stock on December 29, 2006 ($21.78), the dollar value of additional payments and other benefits provided Mr. Marcus under his contract are estimated to be as follows:

	Base Salary Continuation	Annual Bonus Continuation	Pro Rata Bonus	LTIP(1)	Group Benefit Plans Continuation(2)	Pension Accrual(3)	Stock-Based Awards(4)	Other(5)
Termination without Cause	$ 1,300,000	$ 1,716,919	$ 858,460	$ 578,000	$ 78,299	$ 31,160	$ 863,259	$ 55,184
Change in Control				$ 192,667			$ 863,259	
Disability	$ 975,000	$ 1,287,689	$ 858,460	$ 578,000	$ 78,299		$ 1,578,355	$ 55,184
Death			$ 858,460	$ 192,667			$ 1,578,355	

(1) The amount shown reflects the amount payable under 2006 LTIP grant (based on target value) under his employment agreement and the terms of the LTIP by reason of his termination or a change in control, as applicable.

(2) Includes $58,299 to cover the estimated cost of continued health, life and disability insurance for two years, plus estimated Savings Plan (401(k)) company contributions of $10,000 per year for two years.

(3) Reflects the present value of the increase in the annual pension benefit payable as a result of the additional period of service during the post-termination period. See the Pension Benefits Table for additional information as of December 31, 2006.

(4) Based on the excess of the closing sale price of Time Warner Common Stock on December 29, 2006 over the exercise price for each accelerated option, and based on the closing sale price of Time Warner Common Stock on December 29, 2006 in the case of accelerated restricted Stock and restricted stock units. The change-in-control amount is based on the assumption that the change in control of our company results in our financial results ceasing to be consolidated with those of Time Warner. If there were a change in control of Time Warner that met the requirements of the Time Warner equity award agreements, the amount would be $1,578,355. See the Outstanding Time Warner Equity Awards at December 31, 2006 Table for additional information as of December 31, 2006.

(5) Includes financial planning reimbursement of up to $25,000 annually and an annual payment of $2,592 for two years corresponding to two times the premium cost of $2,000,000 of life insurance coverage under our GUL insurance program.

Michael L. LaJoie

Termination without Cause. Under his employment agreement, Mr. LaJoie is entitled to certain payments and benefits upon our termination of his employment under the employment agreement without cause or his termination of such employment due to our material breach. For this purpose, cause means a felony conviction; willful refusal to perform his obligations; material breach of specified covenants, including restrictive covenants relating to confidentiality, noncompetition and nonsolicitation; or willful misconduct that has a substantial adverse effect on us. A material breach includes Mr. LaJoie not being employed as our Executive Vice President and Chief Technology Officer, with authority, functions, duties and powers consistent with that position, or certain changes in Mr. LaJoie s reporting line. If we terminate Mr. LaJoie s employment without cause, if we fail to renew his agreement or if Mr. LaJoie terminates his employment due to our material breach of his agreement, he will receive the benefits due under any of our benefit plans, and he may elect to either:

receive a lump sum amount equivalent to 30 months of his annual base salary plus the greater of (a) the average of his two most recent annual bonuses (except that if Mr. LaJoie has not been paid any full-year annual bonus under his current employment agreement, then he is entitled to be paid his target annual bonus, or if he has been paid only one full-year annual bonus under his current employment agreement, he will be paid the average of such full-year annual bonus and his target annual bonus), multiplied by 2.5 or (b) his then applicable annual target bonus, multiplied by 2.5; or

be placed on a leave of absence as an inactive employee for up to 30 months during which he will continue to receive his annual base salary and annual bonuses equal to the greater of the average of (a) his two most recent annual bonuses (subject to the same exception as noted in the parenthetical in the preceding bullet) and (b) his then applicable annual target bonus; and while on leave he will continue to receive employee benefits (other than stock-based awards).

Mr. LaJoie will also be entitled to executive level outplacement services for up to one year following his termination of employment.

Retirement Option. Under Mr. LaJoie s employment agreement, because Mr. LaJoie has worked for us at the senior executive level for more than five years, if he is employed by us when he is 55 years of age, he may elect a retirement option. Mr. LaJoie is not currently eligible to receive this benefit. The retirement option would require Mr. LaJoie to remain actively employed by us for a transition period of six months to one year following this election, during which he will continue to receive his current annual salary and bonus (calculated in the same manner as bonus is computed above for severance purposes). Following the transition period, Mr. LaJoie would become an advisor to us for three years during which he will be paid his annual base salary and he will also receive his full bonus for the first year, a 50% bonus for the second year and no bonus for the third year. As an advisor, he will not be required to devote more than 5 days per month to such services. Mr. LaJoie would continue vesting in any outstanding stock options and long-term cash incentives during this period, continue participation in benefit plans, pension plans and group insurance plans, and receive reimbursement for financial and estate planning expenses and $10,000 for office space expenses.

If Mr. LaJoie attains age 65 by the end of the term of his employment agreement, we will not be obligated to renew the agreement, and Mr. LaJoie will not be entitled to severance as a result of our non-renewal in such event.

Conditions and Obligations Applicable to Receipt of Payments and Benefits. Mr. LaJoie s right to receive these payments and benefits upon a termination without cause, a termination due to a material breach or under the retirement option, is conditioned on his execution of a release of claims against us. If Mr. LaJoie does not execute a release of claims, he will receive a severance payment determined in accordance with our policies relating to notice and severance. Mr. LaJoie is required to engage in any mitigation necessary to preserve our tax deduction in respect of the payments described above and avoid applicability of the golden parachute excise taxes and related lost corporate tax deduction.

Disability. Under his employment agreement, if Mr. LaJoie becomes disabled and cannot perform his duties for 26 consecutive weeks, his employment may be terminated, and he will receive, in addition to earned and unpaid base salary through termination, an amount equal to 2.5 times his annual base salary and the greater of the average of his two most recent annual bonuses or his then applicable annual target bonus amount (subject to the same exception described above if less than two annual bonuses are actually provided prior to termination).

Death. If Mr. LaJoie dies prior to the termination of his employment agreement, his estate or beneficiaries will receive life insurance payments equal to 30 months of his annual salary and the greater of his average annual bonus multiplied by 2.5, or his then applicable target bonus multiplied by 2.5 (subject to the same exception described above if less than two annual bonuses are actually provided prior to termination).

For Cause. Under Mr. LaJoie s employment agreement, our obligations to Mr. LaJoie in the event of his termination for cause (as defined in the agreement) are the same as our obligations to Mr. Hobbs.

See Pension Plans for a description of Mr. LaJoie s entitlements under our pension plans and Time Warner s pension plans.

Certain Restrictive Covenants. Mr. LaJoie s employment agreement provides that he is subject to restrictive covenants that obligate him, among other things: (1) not to disclose any of our confidential matters, (2) not to solicit certain of our employees for one year following termination of employment; and (3) not to compete with our business during his employment and for one year following termination of employment.

153

Assuming the trigger event causing any of the termination payments and other benefits described above occurred on December 31, 2006, and based on the NYSE closing price per share of Time Warner Common Stock on December 29, 2006 ($21.78), the dollar value of additional payments and other benefits provided Mr. LaJoie under his contract are estimated to be as follows:

	Base Salary Continuation	Annual Bonus Continuation	Pro Rata Bonus	LTIP[1]	Group Benefit Plans Continuation[2]	Pension Accrual[3]	Stock-Based Awards[4]	Other[5]
Termination without Cause	$ 1,125,000	$ 1,125,000	$ 431,080	$ 673,200	$ 99,772	$ 72,190	$ 881,874	$ 37,500
Change in Control				$ 336,600			$ 150,000	
Disability	$ 1,125,000	$ 1,125,000	$ 431,080	$ 336,600			$ 1,012,806	
Death			$ 431,080	$ 336,600			$ 1,012,806	

(1) The amount shown reflects the amount payable under 2005 and 2006 LTIP grants (based on target value) under his employment agreement and the terms of the LTIP by reason of his termination or a change in control, as applicable.
(2) Includes $69,772 to cover the estimated cost of continued health, life and disability insurance for 30 months, plus estimated Savings Plan (401(k)) company contributions of $10,000 per year for thirty months.
(3) Reflects the present value of the increase in the annual pension benefit payable as a result of the additional period of service during the post-termination period. See the Pension Benefits Table for additional information as of December 31, 2006.
(4) Based on the excess of the closing sale price of Time Warner Common Stock on December 29, 2006 over the exercise price for each accelerated option, and based on the closing sale price of Time Warner Common Stock on December 29, 2006 in the case of accelerated restricted stock and restricted stock units. The change-in-control amount is based on the assumption that the change in control of our company results in our financial results ceasing to be consolidated with those of Time Warner. If there were a change in control of Time Warner that met the requirements of the Time Warner equity award agreements, the amount would be $1,012,806. See the Outstanding Time Warner Equity Awards at December 31, 2006 Table for additional information as of December 31, 2006.
(5) Includes financial planning reimbursement of up to $3,000 annually for 30 months and $30,000 in the aggregate for outplacement services.

Director Compensation

The table below sets out the cash compensation that has been paid or earned by our directors who are not active employees of ours or of Time Warner or its affiliates (non-employee directors) during 2006. No equity awards or other compensatory awards were made to the non-employee directors during 2006. Directors who are active employees of Time Warner or its subsidiaries, including us, are not separately compensated for their Board activities.

We compensate non-employee directors with a combination of equity and cash that we believe is comparable to and consistent with approximately the median compensation provided to independent directors of similarly sized public entities. Prior to July 31, 2006, Messrs. Chang and Nicholas, who served as independent directors, received annual

compensation of $75,000. Independent Directors are those directors the Board has determined have no material relationship with the Company either directly or indirectly and are independent within the meaning of the listing requirements of the NYSE and our more rigorous independent standards. Since July 31, 2006, each non-employee director receives an annual cash retainer of $85,000. Following the listing of our Class A common stock on the NYSE on March 1, 2007, each non-employee director is entitled to receive a total annual director compensation package consisting of (i) a cash retainer of $85,000 and (ii) an equity award of full value stock units, in the form of restricted stock units, valued at $95,000 representing our contingent obligation to deliver the designated number of shares of Class A common stock, generally after the Director ceases his service as a director.

An additional annual cash retainer of $20,000 is paid to the chair of the Audit Committee and $10,000 to each other member of the Audit Committee. No additional compensation is paid for attendance at meetings of the Board of Directors or a Board committee. Non-employee directors are reimbursed for out-of-pocket expenses (including travel, food and lodging) incurred in connection with attending Board, committee and stockholder meetings.

In general, for non-employee directors who join the Board less than six months prior to our next annual meeting of stockholders, our policy is to increase the stock unit grant on a pro-rated basis and to provide a pro-rated cash retainer consistent with the compensation package described above, subject to limitations that may exist under the applicable equity plan.

Table of Contents

In the future, non-employee directors will be given the opportunity to defer for future distribution payment of their cash retainer. Deferred payments of director fees will be recorded as deferred units of Class A common stock. Distributions of the account upon the selected deferral date will be made in shares of Class A common stock.

Director Compensation for 2006

Name	Fees Earned or Paid in Cash[(1)]	Stock Awards	Option Awards	Non-Equity Incentive Plan Compensation	Change in Pension Value and Nonqualified Deferred Compensation Earnings	All Other Compensation	Total
Carole Black	$ 35,417						$ 35,417
Thomas H. Castro	$ 35,417						$ 35,417
David C. Chang	$ 84,334						$ 84,334
James E. Copeland, Jr.	$ 43,751						$ 43,751
Peter R. Haje	$ 35,417						$ 35,417
Don Logan	$ 35,417						$ 35,417
Michael Lynne							
N.J. Nicholas, Jr.	$ 84,334						$ 84,334
Wayne H. Pace							
Jeffrey Bewkes[(2)]							

(1) Amounts represent a pro-rata portion of (a) an annual cash retainer of (1) $75,000 paid to Messrs. Chang and Nicholas prior to July 31, 2006 and (2) $85,000 earned by each non-employee director commencing July 31, 2006 and paid in 2007; and (b) an annual additional payment of $10,000 for each member of the Audit Committee (Messrs. Chang and Nicholas), with $20,000 to its chair (Mr. Copeland) commencing July 31, 2006. Each of Messrs. Chang and Nicholas also received $1,000 in connection with an Audit Committee meeting not held on the same date as a Board meeting.

(2) Mr. Bewkes, Time Warner s President and Chief Operating Officer, served as a director until July 31, 2006.

Additional Information

In connection with an administrative order dated March 21, 2005, Mr. Pace reached a settlement with the SEC pursuant to which he agreed, without admitting or denying the SEC s allegations, to the entry of an administrative order that he cease and desist from causing violations or future violations of certain reporting provisions of the securities laws; however, he is not subject to any suspension, bar or penalty. The spouse of Ms. Black s half sister is employed by our North Carolina division. In connection with his employment, he received compensation in excess of $120,000 in 2006.

Compensation Committee Interlocks and Insider Participation

Prior to July 31, 2006, our entire six-member Board of Directors served as our Compensation Committee and participated in deliberations concerning the compensation of our executive officers. On July 31, 2006, upon the closing of the Adelphia/Comcast Transactions, Mr. Jeffrey Bewkes, Time Warner s President and Chief Operating Officer, resigned from our Board and we expanded our Board from six members to ten. A new, separate, five-member Compensation Committee served through the remainder of 2006 consisting of Ms. Black and Messrs. Castro, Haje, Logan and Lynne. Mr. Britt, who serves as a Class B director, was our Chief Executive Officer throughout the last completed fiscal year and has served as our President and Chief Executive Officer since February 15, 2006.
Mr. Logan, Chairman of our Board of Directors and a Class B director, served as Chairman of Time Warner s Media and Communications Group from July 31, 2002 until December 31, 2005 and is currently a non-active employee of Time Warner. Mr. Wayne H. Pace, a Class B director, served as Executive Vice President and Chief Financial Officer of TWE from November 2001 to October 2004 and has served as Executive Vice President and Chief Financial Officer of Time Warner since November 2001.

CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Procedures for Approval of Transactions with Related Persons

Our By-Laws, which were amended in connection with the Transactions, provide that Time Warner may only enter into transactions with us and our subsidiaries, including TWE, that are on terms that, at the time of entering into such transaction, are substantially as favorable to us or our subsidiaries as we or they would be able to receive in a comparable arm s-length transaction with a third party. Any such transaction involving reasonably anticipated payments or other consideration of $50 million or greater also requires the prior approval of a majority of our independent directors. Our By-Laws prohibit us from entering into any transaction having the intended effect of benefiting Time Warner and any of its affiliates (other than us and our subsidiaries) in a manner that would deprive us of the benefit we would have otherwise obtained if the transaction were to have been effected on arm s length terms. We have included a provision in our by-laws that prohibits amending this provision until August 1, 2011 (five years following the closing of the Transactions) without the consent of a majority of the holders of our Class A common stock, other than Time Warner and its affiliates (other than us and our subsidiaries).

Our Standards of Business Conduct and Guidelines for Non-Employee Directors contain general procedures for the approval of transactions between us and our directors and executive officers and certain other transactions involving our directors and executive officers. Our Standards of Business Conduct and Guidelines for Non-Employee Directors are available on our website.

The Transactions

We and/or our subsidiaries entered into the following agreements with Time Warner, Comcast and Adelphia in connection with the Transactions:

TWC Purchase Agreement;

Adelphia Registration Rights and Sale Agreement;

Exchange Agreement;

TWC Redemption Agreement; and

TWE Redemption Agreement.

We also entered into the TWC/Comcast Tax Matters Agreement in connection with the Transactions. See Business The Transactions for a description of these agreements. In addition, we entered into the Shareholder Agreement with Time Warner in connection with the Transactions, the terms of which are described below under Relationship Between Time Warner and Us.

Description of Certain Agreements Related to Comcast

Prior to the Transactions, trusts established for the benefit of Comcast, held a 21% economic interest in us through a 17.9% direct common stock ownership interest in us and a 4.7% residual equity interest in TWE, one of our subsidiaries. In the Redemptions, we and TWE, respectively, redeemed all of Comcast s common stock ownership in us and its residual equity interest in TWE and, as a result, Comcast no longer beneficially owned an interest in our company. In the ordinary course of our cable business, we have entered into various agreements with Comcast and its

various divisions and affiliates on terms that we believe are no less favorable than those that could be obtained in agreements with other third parties. We do not believe that any of these agreements are material to our business. These agreements include:

- agreements, often entered into on a spot basis, to sell advertising to various video programming vendors owned by Comcast and carried on our cable systems;
- local, regional and national advertising interconnect agreements under which Comcast or we owned cable system operators arrange for local or regional advertising to be carried by the various cable system operators in a market area;
- agreements under which affiliates of Comcast sell advertising on our behalf in some geographic areas to local advertisers and our affiliates sell advertising on Comcast s behalf in some geographic areas to local advertisers;

an agreement under which a joint venture owned by us (or our affiliates), Comcast and another cable operator sells national advertising on our behalf to national advertisers;

agreements, which generally expire prior to 2013, to purchase or license programming from various programming vendors owned in whole or in part by Comcast with license fees to the various vendors calculated generally on a per subscriber basis; and

agreements with and related to iN DEMAND, which is a joint venture among one of our subsidiaries (TWE-A/N), Comcast and Cox Communications Inc., that licenses, from film studios and other producers, motion pictures and other materials, which it then licenses to cable operators for VOD and Pay-Per-View distribution.

Under these agreements, we received $188,000, $0 and $6.8 million from Comcast and its affiliates, and we conferred $79.9 million, $119.2 million and $103.5 million to Comcast and its affiliates (other than us and our subsidiaries) during the years ended December 31, 2006, 2005 and 2004, respectively.

Relationship between Time Warner and Us

Time Warner Registration Rights Agreement

At the closing of the TWE Restructuring, we and Time Warner entered into the Time Warner Registration Rights Agreement relating to Time Warner s shares of our common stock. Subject to several exceptions, including our right to defer a demand registration under some circumstances, Time Warner may, under that agreement, require that we take commercially reasonable steps to register for public resale under the Securities Act all shares of common stock that Time Warner requests to be registered. Time Warner may demand an unlimited number of registrations. In addition, Time Warner has been granted piggyback registration rights subject to customary restrictions and we are permitted to piggyback on their registrations as well. We have also agreed that, in connection with a registration and sale by Time Warner under the Time Warner Registration Rights Agreement, we will indemnify Time Warner and bear all fees, costs and expenses, except underwriting discounts and selling commissions.

Indebtedness Approval Right

Under the Shareholder Agreement, until such time as our indebtedness is no longer attributable to Time Warner, in Time Warner s reasonable judgment, we, our subsidiaries and entities that we manage may not, without the consent of Time Warner, create, incur or guarantee any indebtedness (except for ordinary course issuances of commercial paper or borrowings under the Cable Revolving Facility up to the limit of that credit facility, to which Time Warner has consented), or rental expenses (other than with respect to certain approved leases) or issuing preferred equity, if our consolidated ratio of debt, including preferred equity, plus six times our annual rental expense to EBITDA (as defined in the Shareholder Agreement) plus rental expense, or EBITDAR, then exceeds, or would as a result of the incurrence or issuance exceed 3:1. See Management s Discussion and Analysis of Results of Operations and Financial Condition Financial Condition and Liquidity Time Warner Approval Rights.

Other Time Warner Rights

Under the Shareholder Agreement, as long as Time Warner has the power to elect a majority of our Board of Directors, we must obtain Time Warner s consent before we enter into any agreement that binds or purports to bind Time Warner or its affiliates or that would subject us or our subsidiaries to significant penalties or restrictions as a result of any action or omission of Time Warner or its affiliates; or adopt a stockholder rights plan, become subject to

section 203 of the Delaware General Corporation Law, adopt a fair price provision in our certificate of incorporation or take any similar action.

Furthermore, pursuant to the Shareholder Agreement, Time Warner (and its subsidiaries) may purchase debt securities issued by TWE only after giving us notice of the approximate amount of debt securities it intends to purchase and the general time period (the Specified Period) for the purchase, which period may not be greater than 90 days and the opportunity to indicate our good faith intention to purchase the amount of debt securities indicated in Time Warner s notice within the Specified Period.

Table of Contents

Time Warner Standstill

Under the Shareholder Agreement, Time Warner has agreed that prior to August 1, 2009 (three years following the closing of the Adelphia acquisition), Time Warner will not make or announce a tender offer or exchange offer for our Class A common stock without the approval of a majority of our independent directors; and prior to August 1, 2016 (10 years following the closing of the Adelphia acquisition), Time Warner will not enter into any business combination with us, including a short form merger, without the approval of a majority of our independent directors. Under the TW NY Purchase Agreement, we have agreed that for a period of two years following the closing of the Adelphia acquisition we will not enter into any short form merger and that for a period of 18 months following the closing of the Adelphia acquisition we will not issue equity securities to any person (other than, subject to satisfying certain requirements, Time Warner and its affiliates) that have a higher vote per share than our Class A common stock.

Reimbursement for Time Warner Equity Compensation

From time to time our employees and employees of our subsidiaries and joint ventures have been granted options to purchase shares of Time Warner common stock in connection with their employment with subsidiaries and affiliates of Time Warner. We and TWE have agreed that, upon the exercise by any of our officers or employees of any options to purchase Time Warner common stock, we will reimburse Time Warner in an amount equal to the excess of the closing price of a share of Time Warner common stock on the date of the exercise of the option over the aggregate exercise price paid by the exercising officer or employee for each share of Time Warner common stock. As of June 30, 2007, we had accrued approximately $131 million of stock option reimbursement obligations payable to Time Warner. That amount, which is not payable until the underlying options are exercised, will be adjusted in subsequent accounting periods based on the number of additional options granted and changes in the quoted market prices for shares of Time Warner common stock. We reimbursed Time Warner $18 million in the first six months of 2007 and $16 million, $7 million and $8 million in 2006, 2005 and 2004, respectively. A similar arrangement has been entered into with respect to Time Warner s reimbursement to us related to awards based on our Class A common stock that may from time to time be held by our former employees who may subsequently become employees of Time Warner and its subsidiaries other than us.

Debt Guarantees

WCI and ATC, subsidiaries of Time Warner that are not our subsidiaries, have previously guaranteed our obligations under our credit facilities and the $3.2 billion of TWE Notes. On November 2, 2006, each of WCI s and ATC s guarantees of the TWE Notes and our credit facilities were terminated.

Other Agreements Related to Our Business

In the ordinary course of our business, we have entered into various agreements and arrangements with Time Warner and its various divisions and affiliates on terms that we believe are no less favorable than those that could be obtained in agreements with third parties. We do not believe that any of these agreements or arrangements are individually material to our business. These agreements and arrangements include:

- agreements to sell advertising to various video programming vendors owned by Time Warner and its affiliates and carried on our cable systems;
- agreements to purchase or license programming from various programming vendors owned in whole or in part by Time Warner and its affiliates;

leases with AOL, an affiliate of ours, and Time Warner Telecom Inc., a former affiliate of Time Warner s, relating to the use of fiber and backbone networks;

real property lease agreements with Time Warner and its affiliates;

intellectual property license agreements with Time Warner and its affiliates; and

carriage agreements with AOL and its affiliates.

Under these agreements, we received $9.2 million, $94.0 million, $106.7 million and $105.4 million in aggregate payments from Time Warner and its affiliates (other than us and our subsidiaries), and we made

$447.8 million, $719.4 million, $528.6 million and $529.0 million in aggregate payments to Time Warner and its affiliates (other than us and our subsidiaries) during the six months ended June 30, 2007 and the years ended December 31, 2006, 2005 and 2004, respectively.

Reimbursement for Services

Under an arrangement that went into effect immediately after the completion of the TWE Restructuring, Time Warner provides us with specified administrative services, including selected tax, human resources, legal, information technology, treasury, financial, public policy and corporate and investor relations services. We pay fees that approximate Time Warner s estimated overhead cost for services rendered. The services rendered and fees paid are renegotiated annually. In the first six months of 2007, we incurred a total of $6.8 million under this arrangement, and in 2006, 2005 and 2004, we incurred a total of $11.8 million, $7.6 million and $6.6 million, respectively.

Intellectual Property Agreements

Time Warner Brand and Trade Name License Agreement. In connection with the TWE Restructuring, we entered into a license agreement with Time Warner, under which Time Warner granted us a perpetual, royalty-free, exclusive license to use, in the United States and its territories and possessions, the TW, Time Warner Cable, TWC and TW Cable marks and specified related marks as a trade name and on marketing materials, promotional products, portals and equipment and software. We may extend these rights to our subsidiaries and specified others involved in delivery of our products and services. This license agreement contains restrictions on use and scope, including as to exclusivity, as well as cross indemnification provisions. Time Warner may terminate the agreement if we fail to cure a material breach or other specified breach of the agreement, we become bankrupt or insolvent or if a change of control of us occurs. A change of control occurs upon the earlier of:

- Time Warner and its affiliates ceasing to beneficially own at least 40% of either our outstanding common stock or our outstanding securities entitled to vote in an election of directors; or

- Time Warner and its affiliates ceasing to beneficially own at least 60% of our outstanding common stock or our outstanding securities entitled to vote in the election of directors, and Time Warner determines in good faith that it no longer has the power to direct our management and policies.

Road Runner Brand License Agreement. In connection with the TWE Restructuring, we entered into a license agreement with WCI. WCI granted us a perpetual, royalty-free license to use, in the United States and its territories and possessions and in Canada, the Road Runner mark and copyright and some of the related marks. We may use the Road Runner licensed marks in connection with high-speed data services and other services ancillary to those services, and on marketing materials, promotional products, portals and equipment and software. The license is exclusive regarding high-speed data services, ancillary broadband services and equipment and software. The license is non-exclusive regarding promotional products and portals. WCI is prohibited from licensing to third parties the right to use these marks in connection with DSL, dial-up or direct broadcast satellite technologies in the United States, its territories and possession, or in Canada.

We may extend these rights to our subsidiaries and specified others involved in delivery of our products and services. This license agreement contains restrictions on use and scope, including quality control standards, as well as cross-indemnification provision. WCI may terminate the agreement if we fail to cure a material breach or other specified breach of the agreement, if we become bankrupt or insolvent or if a change of control of us occurs. A change of control occurs upon the earlier of:

Time Warner and its affiliates ceasing to beneficially own at least 40% of either our outstanding common stock or our outstanding securities entitled to vote in an election of directors; or

Time Warner and its affiliates ceasing to beneficially own at least 60% of our outstanding common stock or our outstanding securities entitled to vote in the election of directors, and Time Warner determines in good faith that it no longer has the power to direct our management and policies.

TWE Intellectual Property Agreement. As part of the TWE Restructuring, TWE entered into an intellectual property agreement (the TWE Intellectual Property Agreement) with WCI that allocated to TWE intellectual property relating to the cable business and allocated to WCI intellectual property relating to the

non-cable business, primarily content-related assets, such as HBO assets and Warner Bros. Studio assets. The agreement also provided for cross licenses between TWE and WCI so that each may continue to use intellectual property that each was respectively using at the time of the TWE Restructuring. Under the TWE Intellectual Property Agreement, each of TWE and WCI granted the other a non-exclusive, fully paid up, worldwide, perpetual, non-sublicensable (except to affiliates), non-assignable (except to affiliates), royalty free and irrevocable license to use the intellectual property covered by the TWE Intellectual Property Agreement. In addition, both TWE and WCI granted each other sublicenses to use intellectual property licensed to either by third parties that were being used at the time of the TWE Restructuring.

TWI Cable Intellectual Property Agreement. Prior to the TWE Restructuring, TWI Cable Inc. (TWI Cable), an entity that was under the control of Time Warner, entered into an intellectual property agreement (the TWI Cable Intellectual Property Agreement) with WCI with substantially the same terms as the TWE Intellectual Property Agreement. The TWI Cable Intellectual Property Agreement allocated to WCI intellectual property related to the cable business and allocated to TWI Cable intellectual property related to the non-cable business. As part of the TWE Restructuring, WCI then assigned to us the cable-related intellectual property assets it received under that agreement. These agreements make us the beneficiary of cross licenses to TWI Cable intellectual property related to the non-cable business, on substantially the same terms as those described above. In connection with the TWI Cable Intellectual Property Agreement, TW Cable and WCI executed and delivered assignment agreements in substantially the same form as those executed in connection with the TWE Intellectual Property Agreement.

Tax Matters Agreement

We are party to a tax matters agreement with Time Warner that governs our inclusion in any Time Warner consolidated, combined or unitary group for federal and state tax purposes for taxable periods beginning on and after the date of the TWE Restructuring. Under the tax matters agreement, for each year we are included in the Time Warner consolidated group for federal income tax purposes, we have agreed to make periodic payments, subject to specified adjustments, to Time Warner based on the applicable federal income tax liability that we and our affiliated subsidiaries would have had for each taxable period if we had not been included in the Time Warner consolidated group. Time Warner agreed to reimburse us, subject to specified adjustments, for the use of tax items, such as net operating losses and tax credits attributable to us or an affiliated subsidiary, to the extent that these items are applied to reduce the taxable income of a member of the Time Warner consolidated group other than us or one of our subsidiaries. Similar provisions apply to any state income, franchise or other tax returns filed by any Time Warner consolidated, combined or unitary group for each year we are included in such consolidated, combined or unitary group for any state income, franchise or other tax purposes. During 2006 and 2005, we made cash tax payments to Time Warner of approximately $444 million and $496 million, respectively. During 2004, we received cash tax refunds, net of cash tax payments, from Time Warner of $58 million.

Under applicable United States Treasury Department regulations, each member of a consolidated group filing consolidated federal income tax returns is severally liable for the federal income tax liability of each other member of the consolidated group. Similar rules apply with respect to members of combined or unitary groups for state tax purposes. If we ceased to be a member of the Time Warner consolidated group for federal income tax purposes, we would continue to have several liability for the federal income tax liability of the Time Warner consolidated group for all taxable years, or portions of taxable years, during which we were a member of the Time Warner consolidated group. In addition, we would have several liability for some state income taxes of groups with which we file or have filed combined or unitary state tax returns. Although Time Warner has indemnified us against this several liability, we would be liable in the event that this federal and/or state liability was incurred but not discharged by Time Warner or any member of the relevant consolidated, combined or unitary group.

Table of Contents

PRINCIPAL STOCKHOLDERS

Security Ownership by the Board of Directors and Executive Officers

Our Class A common stock was listed for trading on the NYSE on March 1, 2007. The following table sets forth information as of the close of business on July 31, 2007 as to the number of shares of our Class A common stock and common stock of Time Warner, our parent company, beneficially owned by:

each executive officer named in the Summary Compensation Table included elsewhere in this prospectus;

each of our directors; and

all of our current executive officers and directors as a group.

	TWC Class A Common Stock Beneficially Owned(1)		Time Warner Common Stock Beneficially Owned(1)		
Name	Number of Shares	Percent of Class	Number of Shares	Option Shares(2)	Percent of Class

* Represents beneficial ownership of less than one percent of the issued and outstanding Time Warner common stock or our Class A common stock on July 31, 2007, as applicable.

(1) Beneficial ownership as reported in the above table has been determined in accordance with Rule 13d-3 of the Exchange Act. Unless otherwise indicated, beneficial ownership represents both sole voting and sole investment power. This table does not include any shares of our or Time Warner common stock or other Time Warner equity securities that may be held by pension and profit-sharing plans of other corporations or endowment funds of educational and charitable institutions for which various directors and officers serve as directors or trustees. As of July 31, 2007, the only equity securities of TWC or Time Warner beneficially owned by the named

persons or group were shares of our Class A common stock, Time Warner common stock and options to purchase Time Warner common stock.

(2) Reflects shares of Time Warner common stock subject to options to purchase common stock issued by Time Warner which, on July 31, 2007, were unexercised but were exercisable on or within 60 days after that date. These shares are excluded from the column headed Number of Shares.

(3) Includes 348 shares of Time Warner common stock owned by Mr. Britt s spouse as to which Mr. Britt disclaims beneficial ownership.

(4) Includes 2,000 shares of our Class A common stock owned by the Peter and Helen Haje Foundation, as to which Mr. Haje has shared voting and dispositive power, and 3,000 shares that Mr. Haje purchased on August 3, 2007.

(5) Includes 3,115 shares of Time Warner common stock held by the Ninah and Michael Lynne Foundation and 50,000 stock options that have been transferred to trusts for the benefit of members of Mr. Lynne s family.

(6) Includes 3,000 shares of our Class A common stock that Mr. Nicholas purchased on August 3, 2007.

(7) Includes (a) an aggregate of approximately 161,068 shares of Time Warner common stock held by a trust under the Time Warner Savings Plan and the TWC Savings Plan for the benefit of our current executive officers and directors, including 33,642 shares for Mr. Britt, 10,686 shares for Mr. Haje, 85,546 shares for Mr. Logan, 15,163 shares for Mr. Lynne, 2,498 shares for Mr. Martin and 745 shares for Mr. Pace and (b) an aggregate of approximately 5,141 shares of Time Warner common stock beneficially owned by members of such persons immediate family.

Table of Contents

Security Ownership of Certain Beneficial Owners

The following table sets forth information as of July 31, 2007 as to the number of shares of our Common Stock beneficially owned by each person known to us to be the beneficial owner of more than 5% of our Common Stock.

	Time Warner Cable Inc.				
	Class A Common Stock		Class B Common Stock		
Name of Beneficial Owner[(1)]	**Number of Shares Owned**	**Percent of Class Owned**	**Number of Shares Owned**	**Percent of Class Owned**	**Total Voting Power[(4)]**
Time Warner[(2)(3)]	746,000,000	82.7%	75,000,000	100%	90.6%

(1) Beneficial ownership as reported in the above table has been determined in accordance with Rule 13d-3 of the Exchange Act. Unless otherwise indicated, beneficial ownership represents both sole voting and sole investment power.

(2) The shares are registered in the name of WCI, an indirect and wholly owned subsidiary of Time Warner. By virtue of Time Warner s control of WCI, Time Warner is deemed to beneficially own the shares of Class A and Class B common stock held by WCI. The address of each of Time Warner and WCI is One Time Warner Center, New York, NY 10019.

(3) Amounts shown as owned by Time Warner may be deemed to be beneficially owned by Mr. Pace who is an executive officer of Time Warner and is also a member of our Board of Directors. Mr. Pace disclaims such beneficial ownership.

(4) Reflects the total voting power of such person or entity when both Class A and Class B common stock vote together as a single class.

THE EXCHANGE OFFER

Terms of the Exchange Offer

We are offering to exchange our exchange debt securities for a like aggregate principal amount of our initial debt securities.

The exchange debt securities that we propose to issue in this exchange offer will be substantially identical to our initial debt securities except that, unlike our initial debt securities, the exchange debt securities will have no transfer restrictions or registration rights. You should read the description of the exchange debt securities in the section in this prospectus entitled Description of the Debt Securities and the Guarantees.

We reserve the right in our sole discretion to purchase or make offers for any initial debt securities that remain outstanding following the expiration or termination of this exchange offer and, to the extent permitted by applicable law, to purchase initial debt securities in the open market or privately negotiated transactions, one or more additional tender or exchange offers or otherwise. The terms and prices of these purchases or offers could differ significantly from the terms of this exchange offer.

Expiration Date; Extensions; Amendments; Termination

This exchange offer will expire at 5:00 p.m., New York City time, on , 200 , unless we extend it in our reasonable discretion. The expiration date of this exchange offer will be at least 20 business days after the commencement of the exchange offer in accordance with Rule 14e-1(a) under the Exchange Act.

We expressly reserve the right to delay acceptance of any initial debt securities, extend or terminate this exchange offer and not accept any initial debt securities that we have not previously accepted if any of the conditions described below under Conditions to the Exchange Offer have not been satisfied or waived by us. We will notify the exchange agent of any extension by oral notice promptly confirmed in writing or by written notice. We will also notify the holders of the initial debt securities by a press release or other public announcement communicated before 9:00 a.m., New York City time, on the next business day after the previously scheduled expiration date unless applicable laws require us to do otherwise.

We also expressly reserve the right to amend the terms of this exchange offer in any manner. If we make any material change, we will promptly disclose this change in a manner reasonably calculated to inform the holders of our initial debt securities of the change including providing public announcement or giving oral or written notice to these holders. A material change in the terms of this exchange offer could include a change in the timing of the exchange offer, a change in the exchange agent and other similar changes in the terms of this exchange offer. If we make any material change to this exchange offer, we will disclose this change by means of a post-effective amendment to the registration statement which includes this prospectus and will distribute an amended or supplemented prospectus to each registered holder of initial debt securities. In addition, we will extend this exchange offer for an additional five to ten business days as required by the Exchange Act, depending on the significance of the amendment, if the exchange offer would otherwise expire during that period. We will promptly notify the exchange agent by oral notice, promptly confirmed in writing, or written notice of any delay in acceptance, extension, termination or amendment of this exchange offer.

Procedures for Tendering Initial Debt Securities

Proper Execution and Delivery of Letters of Transmittal

To tender your initial debt securities in this exchange offer, you must use *one of the three* alternative procedures described below:

(1) *Regular delivery procedure:* Complete, sign and date the letter of transmittal, or a facsimile of the letter of transmittal. Have the signatures on the letter of transmittal guaranteed if required by the letter of transmittal. Mail or otherwise deliver the letter of transmittal or the facsimile together with the certificates representing the initial debt securities being tendered and any other required documents to the exchange agent on or before 5:00 p.m., New York City time, on the expiration date.

Table of Contents

(2) *Book-entry delivery procedure:* Send a timely confirmation of a book-entry transfer of your initial debt securities, if this procedure is available, into the exchange agent s account at The Depository Trust Company in accordance with the procedures for book-entry transfer described under Book-Entry Delivery Procedure below, on or before 5:00 p.m., New York City time, on the expiration date.

(3) *Guaranteed delivery procedure:* If time will not permit you to complete your tender by using the procedures described in (1) or (2) above before the expiration date and this procedure is available, comply with the guaranteed delivery procedures described under Guaranteed Delivery Procedure below.

The method of delivery of the initial debt securities, the letter of transmittal and all other required documents is at your election and risk. Instead of delivery by mail, we recommend that you use an overnight or hand-delivery service. If you choose the mail, we recommend that you use registered mail, properly insured, with return receipt requested. **In all cases, you should allow sufficient time to assure timely delivery.** You should not send any letters of transmittal or initial debt securities to us. You must deliver all documents to the exchange agent at its address provided below. You may also request your broker, dealer, commercial bank, trust company or nominee to tender your initial debt securities on your behalf. Initial debt securities tendered in this exchange offer must be in denominations of principal amount of $2,000 and integral multiples of $1,000 in excess of $2,000.

Only a holder of initial debt securities may tender initial debt securities in this exchange offer. A holder is any person in whose name initial debt securities are registered on our books or any other person who has obtained a properly completed bond power from the registered holder.

If you are the beneficial owner of initial debt securities that are registered in the name of a broker, dealer, commercial bank, trust company or other nominee and you wish to tender your debt securities, you must contact that registered holder promptly and instruct that registered holder to tender your debt securities on your behalf. If you wish to tender your initial debt securities on your own behalf, you must, before completing and executing the letter of transmittal and delivering your initial debt securities, either make appropriate arrangements to register the ownership of these debt securities in your name or obtain a properly completed bond power from the registered holder. The transfer of registered ownership may take considerable time.

You must have any signatures on a letter of transmittal or a notice of withdrawal guaranteed by:

(1) a member firm of a registered national securities exchange or of the National Association of Securities Dealers, Inc.,

(2) a commercial bank or trust company having an office or correspondent in the United States, or

(3) an eligible guarantor institution within the meaning of Rule 17Ad-15 under the Exchange Act, *unless* the initial debt securities are tendered:

- by a registered holder or by a participant in The Depository Trust Company whose name appears on a security position listing as the owner, who has not completed the box entitled Special Issuance Instructions or Special Delivery Instructions on the letter of transmittal and only if the exchange debt securities are being issued directly to this registered holder or deposited into this participant s account at The Depository Trust Company, or

- for the account of a member firm of a registered national securities exchange or of the National Association of Securities Dealers, Inc., a commercial bank or trust company having an office or

correspondent in the United States or an eligible guarantor institution within the meaning of Rule 17Ad-15 under the Exchange Act.

If the letter of transmittal or any bond powers are signed by:

(1) the recordholder(s) of the initial debt securities tendered: the signature must correspond with the name(s) written on the face of the initial debt securities without alteration, enlargement or any change whatsoever.

(2) a participant in The Depository Trust Company: the signature must correspond with the name as it appears on the security position listing as the holder of the initial debt securities.

(3) a person other than the registered holder of any initial debt securities: these initial debt securities must be endorsed or accompanied by bond powers and a proxy that authorize this person to tender the initial debt securities on behalf of the registered holder, in satisfactory form to us as determined in our sole discretion, in each case, as the name of the registered holder or holders appears on the initial debt securities.

(4) trustees, executors, administrators, guardians, attorneys-in-fact, officers of corporations or others acting in a fiduciary or representative capacity: these persons should so indicate when signing. Unless waived by us, evidence satisfactory to us of their authority to so act must also be submitted with the letter of transmittal.

To tender your initial debt securities in this exchange offer, you must make the following representations:

(1) you are authorized to tender, sell, assign and transfer the initial debt securities tendered and to acquire exchange debt securities issuable upon the exchange of such tendered initial debt securities, and that we will acquire good and unencumbered title thereto, free and clear of all liens, restrictions, charges and encumbrances and not subject to any adverse claim when the same are accepted by us,

(2) any exchange debt securities acquired by you pursuant to the exchange offer are being acquired in the ordinary course of business, whether or not you are the holder,

(3) neither you nor any other person who receives exchange debt securities, whether or not such person is the holder of the exchange debt securities, has an arrangement or understanding with any person to participate in a distribution of such exchange debt securities within the meaning of the Securities Act and neither you nor any other person who receives exchange debt securities is participating in, or intends to participate in, the distribution of such exchange debt securities within the meaning of the Securities Act,

(4) you are not, or such other person who receives exchange debt securities, whether or not such person is the holder of the exchange debt securities, is not, an affiliate, as defined in Rule 405 of the Securities Act, of ours, or if you are or such other person is an affiliate, you or such other person will comply with the registration and prospectus delivery requirements of the Securities Act to the extent applicable,

(5) if you are not a broker-dealer, you represent that you are not engaging in, and do not intend to engage in, a distribution of exchange debt securities, and

(6) if you are a broker-dealer that will receive exchange debt securities for your own account in exchange for initial debt securities, you represent that the initial debt securities to be exchanged for the exchange debt securities were acquired by you as a result of market-making or other trading activities and acknowledge that you will deliver a prospectus in connection with any resale, offer to resell or other transfer of such exchange debt securities.

You must also warrant that the acceptance of any tendered initial debt securities by the issuer and the issuance of exchange debt securities in exchange therefor shall constitute performance in full by the issuer of its obligations under the Registration Rights Agreement.

To effectively tender debt securities through The Depository Trust Company, the financial institution that is a participant in The Depository Trust Company will electronically transmit its acceptance through the Automatic Tender Offer Program. The Depository Trust Company will then edit and verify the acceptance and send an agent s

message to the exchange agent for its acceptance. An agent s message is a message transmitted by The Depository Trust Company to the exchange agent stating that The Depository Trust Company has received an express acknowledgment from the participant in The Depository Trust Company tendering the debt securities that this participant has received and agrees to be bound by the terms of the letter of transmittal, and that we may enforce this agreement against this participant.

Table of Contents

Book-Entry Delivery Procedure

Any financial institution that is a participant in The Depository Trust Company s systems may make book-entry deliveries of initial debt securities by causing The Depository Trust Company to transfer these initial debt securities into the exchange agent s account at The Depository Trust Company in accordance with The Depository Trust Company s procedures for transfer. To effectively tender debt securities through The Depository Trust Company, the financial institution that is a participant in The Depository Trust Company will electronically transmit its acceptance through the Automatic Tender Offer Program. The Depository Trust Company will then edit and verify the acceptance and send an agent s message to the exchange agent for its acceptance. An agent s message is a message transmitted by The Depository Trust Company to the exchange agent stating that The Depository Trust Company has received an express acknowledgment from the participant in The Depository Trust Company tendering the debt securities that this participation has received and agrees to be bound by the terms of the letter of transmittal, and that we may enforce this agreement against this participant. The exchange agent will make a request to establish an account for the initial debt securities at The Depository Trust Company for purposes of the exchange offer within two business days after the date of this prospectus.

A delivery of initial debt securities through a book-entry transfer into the exchange agent s account at The Depository Trust Company will only be effective if an agent s message or the letter of transmittal or a facsimile of the letter of transmittal with any required signature guarantees and any other required documents is transmitted to and received by the exchange agent at the address indicated below under Exchange Agent on or before the expiration date unless the guaranteed delivery procedures described below are complied with. **Delivery of documents to The Depository Trust Company does not constitute delivery to the exchange agent.**

Guaranteed Delivery Procedure

If you are a registered holder of initial debt securities and desire to tender your debt securities, and (1) these debt securities are not immediately available, (2) time will not permit your debt securities or other required documents to reach the exchange agent before the expiration date or (3) the procedures for book-entry transfer cannot be completed on a timely basis and an agent s message delivered, you may still tender in this exchange offer if:

(1) you tender through a member firm of a registered national securities exchange or of the National Association of Securities Dealers, Inc., a commercial bank or trust company having an office or correspondent in the United States, or an eligible guarantor institution within the meaning of Rule 17Ad-15 under the Exchange Act,

(2) on or before the expiration date, the exchange agent receives a properly completed and duly executed letter of transmittal or facsimile of the letter of transmittal, and a notice of guaranteed delivery, substantially in the form provided by us, with your name and address as holder of the initial debt securities and the amount of debt securities tendered, stating that the tender is being made by that letter and notice and guaranteeing that within three NYSE trading days after the expiration date the certificates for all the initial debt securities tendered, in proper form for transfer, or a book-entry confirmation with an agent s message, as the case may be, and any other documents required by the letter of transmittal will be deposited by the eligible institution with the exchange agent, and

(3) the certificates for all your tendered initial debt securities in proper form for transfer or a book-entry confirmation as the case may be, and all other documents required by the letter of transmittal are received by the exchange agent within three NYSE trading days after the expiration date.

Acceptance of Initial Debt Securities for Exchange; Delivery of Exchange Debt Securities

Your tender of initial debt securities will constitute an agreement between you and us governed by the terms and conditions provided in this prospectus and in the related letter of transmittal.

We will be deemed to have received your tender as of the date when your duly signed letter of transmittal accompanied by your initial debt securities tendered, or a timely confirmation of a book-entry transfer of these

debt securities into the exchange agent s account at The Depository Trust Company with an agent s message, or a notice of guaranteed delivery from an eligible institution is received by the exchange agent.

All questions as to the validity, form, eligibility, including time of receipt, acceptance and withdrawal of tenders will be determined by us in our sole discretion. Our determination will be final and binding.

We reserve the absolute right to reject any and all initial debt securities not properly tendered or any initial debt securities which, if accepted, would, in our opinion or our counsel s opinion, be unlawful. We also reserve the absolute right to waive any conditions of this exchange offer or irregularities or defects in tender as to particular debt securities with the exception of conditions to this exchange offer relating to the obligations of broker-dealers, which we will not waive. If we waive a condition to this exchange offer, the waiver will be applied equally to all debt security holders. Our interpretation of the terms and conditions of this exchange offer, including the instructions in the letter of transmittal, will be final and binding on all parties. Unless waived, any defects or irregularities in connection with tenders of initial debt securities must be cured within such time as we shall determine. We, the exchange agent or any other person will be under no duty to give notification of defects or irregularities with respect to tenders of initial debt securities. Neither we nor the exchange agent, or any other person, will incur any liability for any failure to give notification of these defects or irregularities. Tenders of initial debt securities will not be deemed to have been made until such irregularities have been cured or waived. The exchange agent will return without cost to their holders any initial debt securities that are not properly tendered and as to which the defects or irregularities have not been cured or waived promptly following the expiration date.

If all the conditions to the exchange offer are satisfied or waived on the expiration date, we will accept all initial debt securities properly tendered and will issue the exchange debt securities promptly thereafter. Please refer to the section of this prospectus entitled Conditions to the Exchange Offer below. For purposes of this exchange offer, initial debt securities will be deemed to have been accepted as validly tendered for exchange when, as and if we give oral or written notice of acceptance to the exchange agent.

We will issue the exchange debt securities in exchange for the initial debt securities tendered pursuant to a notice of guaranteed delivery by an eligible institution only against delivery to the exchange agent of the letter of transmittal, the tendered initial debt securities and any other required documents, or the receipt by the exchange agent of a timely confirmation of a book-entry transfer of initial debt securities into the exchange agent s account at The Depository Trust Company with an agent s message, in each case, in form satisfactory to us and the exchange agent.

If any tendered initial debt securities are not accepted for any reason provided by the terms and conditions of this exchange offer or if initial debt securities are submitted for a greater principal amount than the holder desires to exchange, the unaccepted or non-exchanged initial debt securities will be returned without expense to the tendering holder, or, in the case of initial debt securities tendered by book-entry transfer procedures described above, will be credited to an account maintained with the book-entry transfer facility, promptly after withdrawal, rejection of tender or the expiration or termination of the exchange offer.

By tendering into this exchange offer, you will irrevocably appoint our designees as your attorney-in-fact and proxy with full power of substitution and resubstitution to the full extent of your rights on the debt securities tendered. This proxy will be considered coupled with an interest in the tendered debt securities. This appointment will be effective only when, and to the extent that, we accept your debt securities in this exchange offer. All prior proxies on these debt securities will then be revoked and you will not be entitled to give any subsequent proxy. Any proxy that you may give subsequently will not be deemed effective. Our designees will be empowered to exercise all voting and other rights of the holders as they may deem proper at any meeting of debt security holders or otherwise. The initial debt securities will be validly tendered only if we are able to exercise full voting rights on the debt securities, including voting at any meeting of the debt security holders, and full rights to consent to any action taken by the debt security

holders.

Withdrawal of Tenders

Except as otherwise provided in this prospectus, you may withdraw tenders of initial debt securities at any time before 5:00 p.m., New York City time, on the expiration date.

For a withdrawal to be effective, you must send a written or facsimile transmission notice of withdrawal to the exchange agent before 5:00 p.m., New York City time, on the expiration date at the address provided below under Exchange Agent and before acceptance by us of your tendered debt securities for exchange.

Any notice of withdrawal must:

(1) specify the name of the person having tendered the initial debt securities to be withdrawn,

(2) identify the initial debt securities to be withdrawn, including, if applicable, the registration number or numbers and total principal amount of these debt securities,

(3) be signed by the person having tendered the initial debt securities to be withdrawn in the same manner as the original signature on the letter of transmittal by which these debt securities were tendered, including any required signature guarantees, or be accompanied by documents of transfer sufficient to permit the trustee for the initial debt securities to register the transfer of these debt securities into the name of the person having made the original tender and withdrawing the tender,

(4) specify the name in which any of these initial debt securities are to be registered, if this name is different from that of the person having tendered the initial debt securities to be withdrawn, and

(5) if applicable because the initial debt securities have been tendered through the book-entry procedure, specify the name and number of the participant s account at The Depository Trust Company to be credited, if different than that of the person having tendered the initial debt securities to be withdrawn.

We will determine all questions as to the validity, form and eligibility, including time of receipt, of all notices of withdrawal and our determination will be final and binding on all parties. Initial debt securities that are withdrawn will be deemed not to have been validly tendered for exchange in this exchange offer.

The exchange agent will return without cost to their holders all initial debt securities that have been tendered for exchange and are not exchanged for any reason, promptly after withdrawal, rejection of tender or expiration or termination of this exchange offer.

You may retender properly withdrawn initial debt securities in this exchange offer by following one of the procedures described under Procedures for Tendering Initial Debt Securities above at any time on or before the expiration date.

Conditions to the Exchange Offer

We will complete this exchange offer only if:

(1) the exchange offer does not violate applicable law or any applicable interpretation of the staff of the SEC,

(2) no action or proceeding shall have been instituted or threatened in any court or by any governmental agency which might materially impair our ability to proceed with the exchange offer, and no material adverse development shall have occurred in any existing action or proceeding with respect to us, and

(3) we obtain all governmental approvals that we deem in our sole discretion necessary to complete this exchange offer.

These conditions are for our sole benefit. We may assert any one of these conditions regardless of the circumstances giving rise to it and may also waive any one of them, in whole or in part, at any time and from time to time, if we determine in our reasonable discretion that it has not been satisfied, subject to applicable law. Notwithstanding the foregoing, all conditions to the exchange offer must be satisfied or waived before the expiration of this exchange offer. If we waive a condition to this exchange offer, the waiver will be applied equally to all debt security holders. We will not be deemed to have waived our rights to assert or waive these conditions if we fail at any time to exercise any of them. Each of these rights will be deemed an ongoing right which we may assert at any time and from time to time.

Table of Contents

If we determine that we may terminate this exchange offer because any of these conditions is not satisfied, we may:

(1) refuse to accept and return to their holders any initial debt securities that have been tendered,

(2) extend the exchange offer and retain all debt securities tendered before the expiration date, subject to the rights of the holders of these debt securities to withdraw their tenders, or

(3) waive any condition that has not been satisfied and accept all properly tendered debt securities that have not been withdrawn or otherwise amend the terms of this exchange offer in any respect as provided under the section in this prospectus entitled Expiration Date; Extensions; Amendments; Termination.

Accounting Treatment

We will record the exchange debt securities at the same carrying value as the initial debt securities as reflected in our accounting records on the date of the exchange. Accordingly, we will not recognize any gain or loss for accounting purposes. We will amortize the costs of the exchange offer and the unamortized expenses related to the issuance of the exchange debt securities over the term of the exchange debt securities.

Exchange Agent

We have appointed Bank of New York as exchange agent for this exchange offer. You should direct all questions and requests for assistance on the procedures for tendering and all requests for additional copies of this prospectus or the letter of transmittal to the exchange agent as follows:

By mail, hand delivery or overnight delivery:

The Bank of New York
Reorganization Unit
Attn: Evangeline R. Gonzales
101 Barclay Street, 7E
New York, NY 10286
Facsimile Transmission: (212) 298-1915
Confirm by Telephone: (212) 815-3738

Fees and Expenses

We will bear the expenses of soliciting tenders in this exchange offer, including fees and expenses of the exchange agent and trustee and accounting, legal, printing and related fees and expenses.

We will not make any payments to brokers, dealers or other persons soliciting acceptances of this exchange offer. However, we will pay the exchange agent reasonable and customary fees for its services and will reimburse the exchange agent for its reasonable out-of-pocket expenses in connection with this exchange offer. We will also pay brokerage houses and other custodians, nominees and fiduciaries their reasonable out-of-pocket expenses for forwarding copies of the prospectus, letters of transmittal and related documents to the beneficial owners of the initial debt securities and for handling or forwarding tenders for exchange to their customers.

We will pay all transfer taxes, if any, applicable to the exchange of initial debt securities in accordance with this exchange offer. However, tendering holders will pay the amount of any transfer taxes, whether imposed on the

registered holder or any other persons, if:

(1) certificates representing exchange debt securities or initial debt securities for principal amounts not tendered or accepted for exchange are to be delivered to, or are to be registered or issued in the name of, any person other than the registered holder of the debt securities tendered,

(2) tendered initial debt securities are registered in the name of any person other than the person signing the letter of transmittal, or

(3) a transfer tax is payable for any reason other than the exchange of the initial debt securities in this exchange offer.

If you do not submit satisfactory evidence of the payment of any of these taxes or of any exemption from this payment with the letter of transmittal, we will bill you directly the amount of these transfer taxes.

Your Failure to Participate in the Exchange Offer Will Have Adverse Consequences

The initial debt securities were not registered under the Securities Act or under the securities laws of any state and you may not resell them, offer them for resale or otherwise transfer them unless they are subsequently registered or resold under an exemption from the registration requirements of the Securities Act and applicable state securities laws. If you do not exchange your initial debt securities for exchange debt securities in accordance with this exchange offer, or if you do not properly tender your initial debt securities in this exchange offer, you will not be able to resell, offer to resell or otherwise transfer the initial debt securities unless they are registered under the Securities Act or unless you resell them, offer to resell or otherwise transfer them under an exemption from the registration requirements of, or in a transaction not subject to, the Securities Act.

In addition, except as set forth in this paragraph, you will not be able to obligate us to register the initial debt securities under the Securities Act. You will not be able to require us to register your initial debt securities under the Securities Act unless:

(1) changes in law or the applicable interpretations of the staff of the SEC do not permit us to effect the exchange offer,

(2) for any reason the exchange offer is not consummated by January 4, 2008,

(3) any holder notifies us prior to the 30th day following consummation of this exchange offer that it is prohibited by law or applicable interpretations of the staff of the SEC from participating in the exchange offer,

(4) in the case of any holder who participates in the exchange offer, such holder notifies us prior to the 30th day following the consummation of the exchange offer that it did not receive exchange debt securities that may be sold without restriction under state and federal securities laws (other than due solely to the status of such holder as an affiliate of ours within the meaning of the Securities Act), or

(5) any initial purchaser so requests with respect to initial debt securities that have, or that are reasonably likely to be determined to have, the status of unsold allotments in an initial distribution,

in which case the Registration Rights Agreement requires us to file a registration statement for a continuous offer in accordance with Rule 415 under the Securities Act for the benefit of the holders of the initial debt securities described in this sentence. We do not currently anticipate that we will register under the Securities Act any debt securities that remain outstanding after completion of the exchange offer.

Delivery of Prospectus

Each broker-dealer that receives exchange debt securities for its own account in exchange for initial debt securities, where such initial debt securities were acquired by such broker-dealer as a result of market-making activities or other trading activities, must acknowledge that it will deliver a prospectus in connection with any resale of such exchange debt securities. See Plan of Distribution.

Table of Contents

DESCRIPTION OF THE DEBT SECURITIES AND THE GUARANTEES

General

The initial debt securities were issued, and the exchange debt securities will be issued, pursuant to the Indenture. The statements set forth below are brief summaries of certain provisions contained in the Indenture, which summaries do not purport to be complete and are qualified in their entirety by reference to the Indenture, which you may obtain from us upon request. Terms used herein that are otherwise not defined shall have the meanings given to them in the Indenture. Such defined terms shall be incorporated herein by reference.

The initial debt securities in an aggregate principal amount equal to $5 billion were issued on April 9, 2007 and an aggregate principal amount of the exchange debt securities up to $5 billion are being issued in this offering. The Indenture does not limit the amount of debt securities which may be issued thereunder and debt securities may be issued thereunder up to the aggregate principal amount which may be authorized from time to time by us. We may issue debt securities of any series at various times and we may reopen any series for further issuances from time to time without notice to existing Holders of securities of that series. The debt securities will be issued in denominations of $2,000 and integral multiples of $1,000 in excess of $2,000.

The 2012 notes will mature on July 2, 2012, the 2017 notes will mature on May 1, 2017, and the 2037 debentures will mature on May 1, 2037. We will pay interest on the 2012 notes at the rate of 5.40% per year, on the 2017 notes at the rate of 5.85% per year and on the 2037 debentures at the rate of 6.55% per year. Interest on the 2012 notes will be payable semi-annually in arrears on January 2 and July 2 of each year to holders of record on the preceding December 15 and June 15 of each year. Interest on the 2017 notes and the 2037 debentures will be payable semi-annually in arrears on May 1 and November 1 of each year to holders of record on the preceding April 15 and October 15 of each year. If interest or principal on the debt securities is payable on a Saturday, Sunday or any other day when banks are not open for business in The City of New York, we will make the payment on the next business day, and no interest will accrue as a result of the delay in payment. The first interest payment date on the 2012 notes is July 2, 2007. The first interest payment date on the 2017 notes and the 2037 debentures is November 1, 2007. Interest on the debt securities will accrue from April 9, 2007, and will accrue on the basis of a 360-day year consisting of twelve 30-day months.

Additional interest (Additional Interest) may accrue on the initial debt securities in certain circumstances pursuant to the Registration Rights Agreement.

The debt securities will be payable at the office of the paying agent, which initially will be an office or agency of The Bank of New York (the Trustee), or an office or agency maintained by us for such purpose, in the Borough of Manhattan, The City of New York. Debt securities may be presented for exchange or registration of transfer at the office of the registrar, such agent initially being the Trustee. We will not charge a service fee for any registration of transfer or exchange of the debt securities.

Guarantees

Under the guarantees, each of TWE and TW NY Holding, as primary obligor and not merely as surety, will fully, irrevocably and unconditionally guarantee to each holder of the debt securities and to the Trustee and its successors and assigns, (1) the full and punctual payment of principal and interest on the debt securities when due, whether at maturity, by acceleration, by redemption or otherwise, and all other monetary obligations of ours under the Indenture (including obligations to the Trustee) and the securities and (2) the full and punctual performance within applicable grace periods of all other obligations of ours under the Indenture and the debt securities. Such guarantees will

constitute guarantees of payment, performance and compliance and not merely of collection. The obligations of each of TWE and TW NY Holding under the Indenture will be unconditional irrespective of the absence or existence of any action to enforce the same, the recovery of any judgment against us or each other or any waiver or amendment of the provisions of the Indenture or the debt securities to the extent that any such action or similar action would otherwise constitute a legal or equitable discharge or defense of a guarantor (except that any such waiver or amendment that expressly purports to modify or release such obligations shall be effective in accordance with its terms). The obligations of TWE and TW NY Holding to make any payments may be satisfied by causing us to make such payments. Each of

Table of Contents

TWE and TW NY Holding shall further agree to waive presentment to, demand of payment from and protest to us and shall also waive diligence, notice of acceptance of its guarantee, presentment, demand for payment, notice of protest for non-payment, filing a claim if we complete a merger or declare bankruptcy and any right to require a proceeding first against us. These obligations shall be unaffected by any failure or policy of the Trustee to exercise any right under the Indenture or under any series of security. If any holder of any debt security (a Holder) or the Trustee is required by a court or otherwise to return to us, TWE or TW NY Holding, or any custodian, trustee, liquidator or other similar official acting in relation to us, TWE or TW NY Holding, any amount paid by us or any of them to the Trustee or such Holder, the guarantees of TWE and TW NY Holding, to the extent theretofore discharged, shall be reinstated in full force and effect.

Further, each of the guarantors agrees to pay any and all reasonable costs and expenses (including reasonable attorneys fees) incurred by the Trustee or any Holder of debt securities in enforcing any of their respective rights under the guarantees. The Indenture provides that each of the guarantees of TWE and TW NY Holding is limited to the maximum amount that can be guaranteed by TWE and TW NY Holding, respectively, without rendering the relevant guarantee voidable under applicable law relating to fraudulent conveyance or fraudulent transfer or similar laws affecting the rights of creditors generally. Although we believe the guarantees of TWE and TW NY Holding are valid and enforceable, under certain circumstances, a court could find a subsidiary s guarantee void or unenforceable under fraudulent conveyance, fraudulent transfer or similar laws.

The Indenture further provides that we and the Trustee may enter into a supplemental Indenture without the consent of the Holders to add additional guarantors in respect of the debt securities.

Existing Indebtedness

The following is a summary of the existing public debt and committed credit facilities of our company and the guarantors. Please see Management s Discussion and Analysis of Results of Operations and Financial Condition Financial Condition and Liquidity for a further description of this indebtedness. In addition to the following indebtedness, one of our non-guarantor subsidiaries, TW NY, has issued $300 million of Series A Preferred Membership Units, which are subject to mandatory redemption on August 1, 2013.

Our Company. At June 30, 2007, the aggregate committed amount under our Five-Year Term Facility and our Cable Revolving Facility, including amounts reserved from time to time to support commercial paper borrowings and letters of credit, was $9.045 billion. As of June 30, 2007, there were borrowings of $3.045 billion outstanding under our Five-Year Term Facility, letters of credit totaling $159 million outstanding under our Cable Revolving Facility and approximately $2.5 billion of commercial paper was supported by our Cable Revolving Facility. The unused committed capacity under our credit facilities as of June 30, 2007 was $3.4 billion, net of $159 million of outstanding letters of credit backed by the Cable Revolving Facility and including $70 million of cash and equivalents.

TWE. At June 30, 2007, the aggregate principal amount outstanding of debt securities of TWE was $3.2 billion. TWE is also a guarantor under our Five-Year Term Facility, Cable Revolving Facility and commercial paper program.

TW NY Holding. As of June 30, 2007, TW NY Holding did not have any outstanding public debt or bank debt. TW NY Holding is also a guarantor under our Five-Year Term Facility, Cable Revolving Facility and commercial paper program.

Release of Guarantees

The Indenture provides that any guarantor shall be automatically released from its obligations under its guarantee upon receipt by the Trustee of a certificate of a Responsible Officer of ours certifying that such guarantor has no

outstanding Indebtedness For Borrowed Money, as of the date of such certificate, other than any other guarantee of Indebtedness For Borrowed Money that will be released concurrently with the release of such guarantee. In addition, TW NY Holding will be released from its guarantee under such circumstances only if it is also a wholly-owned direct or indirect subsidiary of ours. However, there is no covenant in the Indenture that would prohibit any such guarantor from incurring Indebtedness For Borrowed Money after the date such guarantor is released from its guarantee.

Ranking

The debt securities will be our unsecured senior obligations, and will rank equally with our other unsecured and unsubordinated obligations. The guarantees of the debt securities will be unsecured and senior obligations of TWE and TW NY Holding, and will rank equally with all other unsecured and unsubordinated obligations of TWE and TW NY Holding, respectively.

The debt securities and the guarantee will effectively rank junior in right of payment to any of our or the guarantors future secured obligations to the extent of the value of the assets securing such obligations. Neither we nor the guarantors have any secured obligations other than secured obligations totaling approximately $12 million as of June 30, 2007.

The debt securities and the guarantees will be effectively subordinated to all existing and future liabilities, including indebtedness and trade payables, of our non-guarantor subsidiaries. The Indenture does not limit the amount of unsecured indebtedness or other liabilities that can be incurred by our non-guarantor subsidiaries. As of June 30, 2007, our non-guarantor subsidiaries had total liabilities of $8.6 billion (excluding intercompany liabilities payable to the guarantors or us but including $6.8 billion in deferred income taxes).

Furthermore, we and TW NY Holding are holding companies with no material business operations. The ability of each of us and TW NY Holding to service our respective indebtedness and other obligations is dependent primarily upon the earnings and cash flow of our and TW NY Holding s respective subsidiaries and the distribution or other payment to us or TW NY Holding of such earnings or cash flow. See Business Corporate Structure for a chart showing our corporate organization and our direct and indirect ownership interests in our principal subsidiaries.

Certain Covenants

Limitation on Liens

The Indenture provides that neither we nor any Material Subsidiary of ours shall incur, create, issue, assume, guarantee or otherwise become liable for any Indebtedness For Borrowed Money that is secured by a lien on any asset now owned or hereafter acquired by us or it unless we make or cause to be made effective provisions whereby the debt securities will be secured by such lien equally and ratably with (or prior to) all other indebtedness thereby secured so long as any such indebtedness shall be secured. The foregoing restriction does not apply to the following:

- liens existing as of the date of the Indenture;
- liens issued, created or assumed by our Subsidiaries to secure indebtedness of such Subsidiaries to us or to one or more of our other Subsidiaries;
- liens affecting property of a Person existing at the time it becomes a Subsidiary of ours or at the time it merges into or consolidates with us or a Subsidiary of ours or at the time of a sale, lease or other disposition of all or substantially all of the properties of such Person to us or our Subsidiaries;
- liens on property or assets existing at the time of the acquisition thereof or incurred to secure payment of all or a part of the purchase price thereof or to secure indebtedness incurred prior to, at the time of, or within 18 months after the acquisition thereof for the purpose of financing all or part of the purchase price thereof, in a principal amount not exceeding 110% of the purchase price;

liens on any property to secure all or part of the cost of improvements or construction thereon or indebtedness incurred to provide funds for such purpose in a principal amount not exceeding 110% of the cost of such improvements or construction;

liens on shares of stock, indebtedness or other securities of a Person that is not a Subsidiary of ours;

liens in respect of capital leases entered into after the date of the Indenture provided that such liens extend only to the property or assets that are the subject of such capital leases;

liens resulting from progress payments or partial payments under United States government contracts or subcontracts;

any extensions, renewal or replacement of any lien referred to above or of any indebtedness secured thereby; provided, however, that the principal amount of indebtedness secured thereby shall not exceed the principal amount of indebtedness so secured at the time of such extension, renewal or replacement, or at the time the lien was issued, created or assumed or otherwise permitted, and that such extension, renewal or replacement lien shall be limited to all or part of substantially the same property which secured the lien extended, renewed or replaced (plus improvements on such property);

liens in favor of the trustee; and

other liens arising in connection with our indebtedness and our Subsidiaries indebtedness in an aggregate principal amount for us and our Subsidiaries not exceeding at the time such lien is issued, created or assumed the greater of (a) 15% of the Consolidated Net Worth of our company and (b) $500 million.

Limitation on Consolidation, Merger, Conveyance or Transfer on Certain Terms

None of our company, TWE or TW NY Holding may consolidate with or merge into any other Person or convey or transfer its properties and assets substantially as an entirety to any Person, unless:

(1) (a) in the case of our company, the Person formed by such consolidation or into which our company is merged or the Person which acquires by conveyance or transfer the properties and assets of our company substantially as an entirety shall be organized and existing under the laws of the United States of America or any State or the District of Columbia, and shall expressly assume, by supplemental indenture, executed and delivered to the Trustee, in form reasonably satisfactory to the Trustee, the due and punctual payment of the principal of (and premium, if any) and interest on all the debt securities and the performance of every covenant of the Indenture (as supplemented from time to time) on the part of our company to be performed or observed; (b) in the case of TWE or TW NY Holding, the Person formed by such consolidation or into which TWE or TW NY Holding is merged or the Person which acquires by conveyance or transfer the properties and assets of TWE or TW NY Holding substantially as an entirety shall be either (i) one of us, TWE or TW NY Holding or (ii) a Person organized and existing under the laws of the United States of America or any State or the District of Columbia, and in the case of clause (ii), shall expressly assume, by supplemental indenture, executed and delivered to the Trustee, in form reasonably satisfactory to the Trustee, the performance of every covenant of the Indenture (as supplemented from time to time) on the part of TWE or TW NY Holding to be performed or observed;

(2) immediately after giving effect to such transaction, no Event of Default, and no event which, after notice or lapse of time, or both, would become an Event of Default, shall have happened and be continuing; and

(3) we have delivered to the Trustee an Officers Certificate and an Opinion of Counsel each stating that such consolidation, merger, conveyance or transfer and such supplemental indenture comply with this covenant and that all conditions precedent provided for relating to such transaction have been complied with.

Upon any consolidation or merger, or any conveyance or transfer of the properties and assets of our company, TWE or TW NY Holding substantially as an entirety as set forth above, the successor Person formed by such consolidation or into which our company, TWE or TW NY Holding is merged or to which such conveyance or transfer is made shall succeed to, and be substituted for, and may exercise every right and power of our company, TWE or TW NY Holding, as the case may be, under the Indenture with the same effect as if such successor had been named as our company,

TWE or TW NY Holding, as the case may be, in the Indenture. In the event of any such conveyance or transfer, our company, TWE or TW NY Holding, as the case may be, as the predecessor shall be discharged from all obligations and covenants under the Indenture and the debt securities and may be dissolved, wound up or liquidated at any time thereafter.

Notwithstanding the foregoing, such provisions with respect to limitations on consolidation, merger, conveyance or transfer on certain terms shall not apply to any guarantor if at such time such guarantor has

been released from its obligations under its guarantee upon receipt by the Trustee of a certificate of a Responsible Officer of ours certifying that such guarantor has no outstanding Indebtedness For Borrowed Money as described above under Guarantees.

Subject to the foregoing, the Indenture and the debt securities do not contain any covenants or other provisions designed to afford Holders of debt securities protection in the event of a recapitalization or highly leveraged transaction involving our company.

Certain Definitions

The following are certain of the terms defined in the Indenture:

Consolidated Net Worth means, with respect to any Person, at the date of any determination, the consolidated stockholders or owners equity of the holders of capital stock or partnership interests of such Person and its subsidiaries, determined on a consolidated basis in accordance with GAAP consistently applied.

GAAP means generally accepted accounting principles as such principles are in effect in the United States as of the date of the Indenture.

Holder, when used with respect to any debt securities, means a holder of the debt securities, which means a Person in whose name a debt security is registered in the Security Register.

Indebtedness For Borrowed Money of any Person means, without duplication, (a) all obligations of such Person for borrowed money, (b) all obligations of such Person evidenced by bonds, debentures, notes or similar instruments and (c) all guarantee obligations of such Person with respect to Indebtedness For Borrowed Money of others. The Indebtedness For Borrowed Money of any Person shall include the Indebtedness For Borrowed Money of any other entity (including any partnership in which such Person is general partner) to the extent such Person is liable therefor as a result of such Person s ownership interest in or other contractual relationship with such entity, except to the extent the terms of such Indebtedness For Borrowed Money provide that such Person is not liable therefor.

Material Subsidiary means any Person that is a Subsidiary if, at the end of our most recent fiscal quarter, the aggregate amount, determined in accordance with GAAP consistently applied, of securities of, loans and advances to, and other investments in, such Person held by us and our other Subsidiaries exceeded 10% of our Consolidated Net Worth.

Person means any individual, corporation, limited liability company, partnership, joint venture, association, joint-stock company, trust, unincorporated organization or government or any agency or political subdivision thereof.

Responsible Officer, when used with respect to us, means any of the Chief Executive Officer, President, Chief Operating Officer, Chief Financial Officer, Senior Executive Vice President, General Counsel, Treasurer or Controller of our company (or any equivalent of the foregoing officers).

Security Register means the register or registers we shall keep or cause to be kept, in which, we shall provide for the registration of debt securities, or of debt securities of a particular series, and of transfers of debt securities or of debt securities of such series.

Subsidiary means, with respect to any Person, any corporation more than 50% of the voting stock of which is owned directly or indirectly by such Person, and any partnership, association, joint venture or other entity in which such Person owns more than 50% of the equity interests or has the power to elect a majority of the board of directors or

other governing body.

Optional Redemption

We may redeem some or all of the debt securities at any time and from time to time, as a whole or in part, at our option, on at least 30 days, but not more than 60 days, prior notice mailed to the registered address of each Holder of the debt securities to be redeemed, at respective redemption prices equal to the greater of:

100% of the principal amount of the debt securities to be redeemed, and

the sum of the present values of the Remaining Scheduled Payments, as defined below, discounted to the redemption date, on a semi-annual basis, assuming a 360 day year consisting of twelve 30 day months, at the Treasury Rate, as defined below, plus 20 basis points for the 2012 notes, 30 basis points for the 2017 notes and 35 basis points for the 2037 debentures,

plus, in each case, accrued interest to the date of redemption that has not been paid (such redemption price, the Redemption Price).

Comparable Treasury Issue means, with respect to the debt securities, the United States Treasury security selected by an Independent Investment Banker as having a maturity comparable to the remaining term (Remaining Life) of the debt securities being redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the Remaining Life of such debt securities.

Comparable Treasury Price means, with respect to any redemption date for the debt securities: (1) the average of four Reference Treasury Dealer Quotations for that redemption date, after excluding the highest and lowest of such Reference Treasury Dealer Quotations; or (2) if the Trustee obtains fewer than four Reference Treasury Dealer Quotations, the average of all quotations obtained by the Trustee.

Independent Investment Banker means one of the Reference Treasury Dealers, to be appointed by us.

Reference Treasury Dealer means four primary U.S. Government securities dealers to be selected by us.

Reference Treasury Dealer Quotations means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Trustee, of the bid and asked prices for the Comparable Treasury Issue, expressed in each case as a percentage of its principal amount, quoted in writing to the Trustee by such Reference Treasury Dealer at 3:00 p.m., New York City time, on the third business day preceding such redemption date.

Remaining Scheduled Payments means, with respect to each series of debt securities to be redeemed, the remaining scheduled payments of the principal thereof and interest thereon that would be due after the related redemption date but for such redemption; provided, however, that, if such redemption date is not an interest payment date with respect to such series of debt securities, the amount of the next succeeding scheduled interest payment thereon will be deemed to be reduced by the amount of interest accrued thereon to such redemption date.

Treasury Rate means, with respect to any redemption date for the debt securities: (1) the yield, under the heading which represents the average for the immediately preceding week, appearing in the most recently published statistical release designated H.15(519) or any successor publication which is published weekly by the Board of Governors of the Federal Reserve System and which establishes yields on actively traded United States Treasury notes adjusted to constant maturity under the caption Treasury Constant Maturities, for the maturity corresponding to the Comparable Treasury Issue; provided that if no maturity is within three months before or after the maturity date for the debt

securities, yields for the two published maturities most closely corresponding to the Comparable Treasury Issue will be determined and the Treasury Rate will be interpolated or extrapolated from those yields on a straight line basis, rounding to the nearest month; or (2) if that release, or any successor release, is not published during the week preceding the calculation date or does not contain such yields, the rate per annum equal to the semiannual equivalent yield to maturity of the Comparable Treasury Issue, calculated using a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for that redemption date. The Treasury Rate will be calculated on the third business day preceding the redemption date.

On and after the redemption date, interest will cease to accrue on the debt securities or any portion thereof called for redemption, unless we default in the payment of the Redemption Price, and accrued interest. On or before the redemption date, we shall deposit with a paying agent, or the Trustee, money sufficient to pay the Redemption Price of and accrued interest on the debt securities to be redeemed on such date. If we elect to redeem less than all of the debt securities of a series, then the Trustee will select the particular debt securities of such series to be redeemed in a manner it deems appropriate and fair.

Defeasance

The Indenture provides that we (and, to the extent applicable, TWE and TW NY Holding), at our option,

(a) will be Discharged from any and all obligations in respect of any series of debt securities (except in each case for certain obligations to register the transfer or exchange of debt securities, replace stolen, lost or mutilated debt securities, maintain paying agencies and hold moneys for payment in trust) or

(b) need not comply with the covenants described above under Certain Covenants, the guarantors will be released from the guarantees and certain Events of Default (other than those arising out of the failure to pay interest or principal on the debt securities of a particular series and certain events of bankruptcy, insolvency and reorganization) will no longer constitute Events of Default with respect to such series of debt securities,

in each case if we deposit with the Trustee, in trust, money or the equivalent in securities of the government which issued the currency in which the debt securities are denominated or government agencies backed by the full faith and credit of such government, or a combination thereof, which through the payment of interest thereon and principal thereof in accordance with their terms will provide money in an amount sufficient to pay all the principal (including any mandatory sinking fund payments) of, and interest on, such series on the dates such payments are due in accordance with the terms of such series.

To exercise any such option, we are required, among other things, to deliver to the Trustee an opinion of counsel to the effect that the deposit and related defeasance would not cause the Holders of such series to recognize income, gain or loss for federal income tax purposes and, in the case of a Discharge pursuant to clause (a), accompanied by a ruling to such effect received from or published by the IRS.

In addition, we are required to deliver to the Trustee an Officers Certificate stating that such deposit was not made by us with the intent of preferring the Holders over other creditors of ours or with the intent of defeating, hindering, delaying or defrauding creditors of ours or others.

Events of Default, Notice and Waiver

The Indenture provides that, if an Event of Default specified therein with respect to any series of debt securities issued thereunder shall have happened and be continuing, either the Trustee thereunder or the Holders of 25% in aggregate principal amount of the outstanding debt securities of such series (or 25% in aggregate principal amount of all outstanding debt securities under the Indenture, in the case of certain Events of Default affecting all series of debt securities under the Indenture) may declare the principal of all the debt securities of such series to be due and payable.

Events of Default in respect of any series are defined in the Indenture as being:

- default for 30 days in payment of any interest (including Additional Interest) installment with respect to such series;

default in payment of principal of, or premium, if any, on, or any sinking or purchase fund or analogous obligation with respect to, debt securities of such series when due at their stated maturity, by declaration or acceleration, when called for redemption or otherwise;

default for 90 days after written notice to us (or TWE or TW NY Holding, if applicable) by the Trustee thereunder or by Holders of 25% in aggregate principal amount of the outstanding debt securities of

such series in the performance, or breach, of any covenant or warranty pertaining to debt securities of such series;

certain events of bankruptcy, insolvency and reorganization with respect to us or any Material Subsidiary thereof which is organized under the laws of the United States or any political sub-division thereof or the entry of an order ordering the winding up or liquidation of our affairs; and

any guarantee ceasing to be, or asserted by any guarantor as not being, in full force and effect, enforceable according to its terms, except to the extent contemplated by the Indenture.

The Indenture provides that the Trustee thereunder will, within 90 days after the occurrence of a default with respect to the debt securities of any series, give to the Holders of the debt securities of such series notice of all uncured and unwaived defaults known to it; provided, however, that, except in the case of default in the payment of principal of, premium, if any, or interest, if any, on any of the debt securities of such series, the Trustee thereunder will be protected in withholding such notice if it in good faith determines that the withholding of such notice is in the interests of the Holders of the debt securities of such series. The term default for the purpose of this provision means any event which is, or after notice or lapse of time or both would become, an Event of Default with respect to debt securities of such series.

The Indenture contains provisions entitling the Trustee, subject to the duty of the Trustee during an Event of Default to act with the required standard of care, to be indemnified to its reasonable satisfaction by the Holders of the debt securities before proceeding to exercise any right or power under the Indenture at the request of Holders of the debt securities.

The Indenture provides that the Holders of a majority in aggregate principal amount of the outstanding debt securities of any series may direct the time, method and place of conducting proceedings for remedies available to the Trustee or exercising any trust or power conferred on the Trustee in respect of such series, subject to certain conditions.

In certain cases, the Holders of a majority in principal amount of the outstanding debt securities of any series may waive, on behalf of the Holders of all debt securities of such series, any past default or Event of Default with respect to the debt securities of such series except, among other things, a default not theretofore cured in payment of the principal of, or premium, if any, or interest, if any, on any of the debt securities of such series or payment of any sinking or purchase fund or analogous obligations with respect to such debt securities.

The Indenture includes a covenant that we will file annually with the Trustee a certificate of no default or specifying any default that exists.

Modification of the Indenture

We and the Trustee may, without the consent of the Holders of the debt securities, enter into indentures supplemental to the Indenture for, among others, one or more of the following purposes:

(1) to evidence the succession of another Person to us, TWE or TW NY Holding and the assumption by such successor of our company s, TWE s or TW NY Holding s obligations under the Indenture and the debt securities of any series or the guarantees relating thereto;

(2) to add to the covenants of our company, TWE or TW NY Holding, or to surrender any rights or powers of our company, TWE or TW NY Holding, for the benefit of the Holders of debt securities of any or all series;

(3) to cure any ambiguity, to correct or supplement any provision in the Indenture which may be inconsistent with any other provision therein, or to make any other provisions with respect to matters or questions arising under the Indenture;

(4) to add to the Indenture any provisions that may be expressly permitted by the Trust Indenture Act of 1939, as amended, or the Act, excluding the provisions referred to in Section 316(a)(2) of the

178

Act as in effect at the date as of which the Indenture was executed or any corresponding provision in any similar federal statute hereafter enacted;

(5) to establish the form or terms of any series of debt securities, to provide for the issuance of any series of debt securities and/or to add to the rights of the Holders of debt securities;

(6) to evidence and provide for the acceptance of any successor Trustee with respect to one or more series of debt securities or to add or change any of the provisions of the Indenture as shall be necessary to facilitate the administration of the trusts thereunder by one or more trustees in accordance with the Indenture;

(7) to provide any additional Events of Default;

(8) to provide for uncertificated securities in addition to or in place of certificated securities; provided that the uncertificated securities are issued in registered form for certain federal tax purposes;

(9) to provide for the terms and conditions of converting those debt securities that are convertible into common stock or another such similar security;

(10) to secure any series of debt securities pursuant to the Indenture s limitation on liens;

(11) to add additional guarantors in respect of the debt securities;

(12) to make any change necessary to comply with any requirement of the SEC in connection with the qualification of the Indentures or any supplemental indenture under the Act; and

(13) to make any other change that does not adversely affect the rights of the Holders of the debt securities.

No supplemental indenture for the purpose identified in clauses (2), (3), (5) or (7) above may be entered into if to do so would adversely affect the rights of the Holders of debt securities of any series in any material respect.

The Indenture contains provisions permitting us and the Trustee, with the consent of the Holders of a majority in principal amount of the outstanding debt securities of all series to be affected voting as a single class, to execute supplemental indentures for the purpose of adding any provisions to or changing or eliminating any of the provisions of the Indenture or modifying the rights of the Holders of the debt securities of such series to be affected, except that no such supplemental indenture may, without the consent of the Holders of affected debt securities, among other things:

(1) change the maturity of the principal of, or the maturity of any premium on, or any installment of interest on, any such debt security, or reduce the principal amount or the interest or any premium of any such debt securities, or change the method of computing the amount of principal or interest on any such debt securities on any date or change any place of payment where, or the currency in which, any debt securities or any premium or interest thereon is payable, or impair the right to institute suit for the enforcement of any such payment on or after the maturity of principal or premium, as the case may be;

(2) reduce the percentage in principal amount of any such debt securities the consent of whose Holders is required for any supplemental indenture, waiver of compliance with certain provisions of the Indenture or certain defaults under the Indenture;

(3) modify any of the provisions of the Indenture related to (i) the requirement that the Holders of debt securities consent to certain amendments of the Indenture, (ii) the waiver of past defaults and (iii) the waiver of certain covenants, except to increase the percentage of Holders required to make such amendments or grant such waivers;

(4) impair or adversely affect the right of any Holder to institute suit for the enforcement of any payment on, or with respect to, such debt securities on or after the maturity of such debt securities; or

(5) amend or modify the terms of any of the guarantees in a manner adverse to the Holders.

Table of Contents

The Trustee

The Bank of New York is the Trustee under the Indenture. The Trustee is a depository for funds and performs other services for, and transacts other banking business with, us in the normal course of business. The Bank of New York is also the trustee under the TWE Indenture.

Governing Law

The Indenture will be governed by, and construed in accordance with, the laws of the State of New York.

Table of Contents

BOOK-ENTRY, DELIVERY AND FORM

Except as described below, we will initially issue the exchange debt securities in the form of one or more registered exchange debt securities in global form without coupons. We will deposit each global debt security on the date of the closing of this exchange offer with, or on behalf of, The Depository Trust Company in New York, New York, and register the exchange debt securities in the name of The Depository Trust Company or its nominee, or will leave these debt securities in the custody of the trustee.

Depository Trust Company Procedures

For your convenience, we are providing you with a description of the operations and procedures of The Depository Trust Company, the Euroclear System and Clearstream Banking, S.A. These operations and procedures are solely within the control of the respective settlement systems and are subject to changes by them. We are not responsible for these operations and procedures and urge you to contact the system or its participants directly to discuss these matters.

The Depository Trust Company has advised us that it is a limited-purpose trust company created to hold securities for its participating organizations and to facilitate the clearance and settlement of transactions in those securities between its participants through electronic book entry changes in the accounts of these participants. These direct participants include securities brokers and dealers, banks, trust companies, clearing corporations and other organizations. Access to The Depository Trust Company s system is also indirectly available to other entities that clear through or maintain a direct or indirect, custodial relationship with a direct participant. The Depository Trust Company may hold securities beneficially owned by other persons only through its participants and the ownership interests and transfers of ownership interests of these other persons will be recorded only on the records of the participants and not on the records of The Depository Trust Company.

The Depository Trust Company has also advised us that, in accordance with its procedures,

(1) upon deposit of the global debt securities, it will credit the accounts of the direct participants with an interest in the global debt securities, and

(2) it will maintain records of the ownership interests of these direct participants in the global debt securities and the transfer of ownership interests by and between direct participants.

The Depository Trust Company will not maintain records of the ownership interests of, or the transfer of ownership interests by and between, indirect participants or other owners of beneficial interests in the global debt securities. Both direct and indirect participants must maintain their own records of ownership interests of, and the transfer of ownership interests by and between, indirect participants and other owners of beneficial interests in the global debt securities.

Investors in the global debt securities may hold their interests in the debt securities directly through The Depository Trust Company if they are direct participants in The Depository Trust Company or indirectly through organizations that are direct participants in The Depository Trust Company. Investors in the global debt securities may also hold their interests in the debt securities through Euroclear and Clearstream if they are direct participants in those systems or indirectly through organizations that are participants in those systems. Euroclear and Clearstream will hold omnibus positions in the global debt securities on behalf of the Euroclear participants and the Clearstream participants, respectively, through customers securities accounts in Euroclear s and Clearstream s names on the books of their respective depositories, which are Morgan Guaranty Trust Company of New York, Brussels office, as operator of Euroclear, and Citibank, N.A. and The Chase Manhattan Bank, N.A., as operators of Clearstream. These

depositories, in turn, will hold these positions in their names on the books of DTC. All interests in a global debt security, including those held through Euroclear or Clearstream, may be subject to the procedures and requirements of The Depository Trust Company. Those interests held through Euroclear or Clearstream may also be subject to the procedures and requirements of those systems.

The laws of some states require that some persons take physical delivery in definitive certificated form of the securities that they own. This may limit or curtail the ability to transfer beneficial interests in a global debt security to these persons. Because The Depository Trust Company can act only on behalf of direct participants, which in turn act on behalf of indirect participants and others, the ability of a person having a beneficial interest in a global debt securities to pledge its interest to persons or entities that are not direct participants in The Depository Trust Company or to otherwise take actions in respect of its interest, may be affected by the lack of physical certificates evidencing the interests.

Except as described below, owners of interests in the global debt securities will not have debt securities registered in their names, will not receive physical delivery of debt securities in certificated form and will not be considered the registered owners or holders of these debt securities under the Indenture for any purpose.

Payments with respect to the principal of and interest on any debt securities represented by a global debt securities registered in the name of The Depository Trust Company or its nominee on the applicable record date will be payable by the trustee to or at the direction of The Depository Trust Company or its nominee in its capacity as the registered holder of the global debt security representing these debt securities under the Indenture. Under the terms of the Indenture, we and the trustee will treat the person in whose names the debt securities are registered, including debt securities represented by global debt securities, as the owners of the debt securities for the purpose of receiving payments and for any and all other purposes whatsoever. Payments in respect of the principal and interest on global debt securities registered in the name of The Depository Trust Company or its nominee will be payable by the trustee to The Depository Trust Company or its nominee as the registered holder under the Indenture. Consequently, none of The Bank of New York, the trustee or any of our agents, or the trustee s agents has or will have any responsibility or liability for:

(1) any aspect of The Depository Trust Company s records or any direct or indirect participant s records relating to, or payments made on account of, beneficial ownership interests in the global debt securities or for maintaining, supervising or reviewing any of The Depository Trust Company s records or any direct or indirect participant s records relating to the beneficial ownership interests in any global debt securities or

(2) any other matter relating to the actions and practices of The Depository Trust Company or any of its direct or indirect participants.

The Depository Trust Company has advised us that its current practice, upon receipt of any payment in respect of securities such as the debt securities, including principal and interest, is to credit the accounts of the relevant participants with the payment on the payment date, in amounts proportionate to their respective holdings in the principal amount of beneficial interest in the security as shown on its records, unless it has reasons to believe that it will not receive payment on the payment date. Payments by the direct and indirect participants to the beneficial owners of interests in the global debt securities will be governed by standing instructions and customary practice and will be the responsibility of the direct or indirect participants and will not be the responsibility of The Depository Trust Company, the Trustee or us.

Neither we nor the Trustee will be liable for any delay by The Depository Trust Company or any direct or indirect participant in identifying the beneficial owners of the debt securities and us and the Trustee may conclusively rely on, and will be protected in relying on, instructions from The Depository Trust Company or its nominee for all purposes, including with respect to the registration and delivery, and the respective principal amounts, of the debt securities.

Transfers between participants in The Depository Trust Company will be effected in accordance with The Depository Trust Company s procedures, and will be settled in same day funds, and transfers between participants in Euroclear

and Clearstream will be effected in accordance with their respective rules and operating procedures.

Cross-market transfers between the participants in The Depository Trust Company, on the one hand, and Euroclear or Clearstream participants, on the other hand, will be effected through The Depository Trust Company in accordance with The Depository Trust Company s rules on behalf of Euroclear or Clearstream, as the case may be, by its respective depositary; however, such cross-market transactions will require delivery of

instructions to Euroclear or Clearstream, as the case may be, by the counterparty in such system in accordance with the rules and procedures and within the established deadlines (Brussels time) of such system. Euroclear or Clearstream, as the case may be, will, if the transaction meets its settlement requirements, deliver instructions to its respective depositary to take action to effect final settlement on its behalf by delivering or receiving interests in the relevant global debt security in The Depository Trust Company, and making or receiving payment in accordance with normal procedures for same-day funds settlement applicable to The Depository Trust Company. Euroclear participants and Clearstream participants may not deliver instructions directly to the depositories for Euroclear or Clearstream.

The Depository Trust Company has advised us that it will take any action permitted to be taken by a holder of debt securities only at the direction of one or more participants to whose account The Depository Trust Company has credited the interests in the global debt securities and only in respect of the portion of the aggregate principal amount of the debt securities as to which the participant or participants has or have given that direction. However, if there is an Event of Default with respect to the debt securities, The Depository Trust Company reserves the right to exchange the global debt securities for legended debt securities in certificated form and to distribute them to its participants.

Although The Depository Trust Company has agreed to these procedures to facilitate transfers of interests in the global debt securities among participants in The Depository Trust Company, they are under no obligation to perform or to continue to perform these procedures and may discontinue them at any time. Neither we nor the trustee or any of our or the trustee s respective agents will have any responsibility for the performance by The Depository Trust Company or its participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

Exchange of Book-Entry Debt Securities for Certificated Debt Securities

A global debt security will be exchangeable for definitive debt securities in registered certificated form if:

(1) The Depository Trust Company notifies us that it is unwilling or unable to continue as depository for the global debt securities and we fail to appoint a successor depository within 90 days,

(2) The Depository Trust Company ceases to be a clearing agency registered under the Exchange Act and we fail to appoint a successor within 90 days,

(3) we elect to cause the issuance of the certificated debt securities upon a notice of the Trustee, or

(4) a default or an Event of Default under the Indenture for the debt securities has occurred and is continuing with respect to a series of the debt securities entitling the holders of the debt securities of such series to accelerate the maturity of such debt securities.

In all cases, certificated debt securities delivered in exchange for any global note or beneficial interests in a global debt security will be registered in the name, and issued in any approved denominations, requested by or on behalf of The Depository Trust Company, in accordance with its customary procedures.

Exchange of Certificated Debt Securities for Book-Entry Debt Securities

Initial debt securities issued in certificated form may be exchanged for beneficial interests in the global debt securities.

Same Day Settlement

We expect that the interests in the global debt securities will be eligible to trade in The Depository Trust Company s Same-Day Funds Settlement System. As a result, secondary market trading activity in these interests will settle in immediately available funds, subject in all cases to the rules and procedures of The Depository Trust Company and its participants. We expect that secondary trading in any certificated debt securities will also be settled in immediately available funds.

Because of time zone differences, the securities account of a Euroclear or Clearstream participant purchasing an interest in a global debt security from a participant in The Depository Trust Company will be credited, and any such crediting will be reported to the relevant Euroclear or Clearstream participant, during the securities settlement processing day (which must be a business day for Euroclear and Clearstream) immediately following the settlement date of The Depository Trust Company. The Depository Trust Company has advised us that cash received in Euroclear or Clearstream as a result of sales of interests in a global debt security by or through a Euroclear or Clearstream participant to a participant in The Depository Trust Company will be received with value on the settlement date of The Depository Trust Company but will be available in the relevant Euroclear or Clearstream cash account only as of the business day for Euroclear or Clearstream following The Depository Trust Company s settlement date.

Payment

We will make all payments of principal and interest on the debt securities at the office of the Trustee and at the agency of the Trustee maintained for that purpose within the city and state of New York. This office will initially be the office of the Paying Agent maintained for that purpose. At our option however, we may make these installments of interest by check mailed to the holders of debt securities at their respective addresses provided in the register of holders of debt securities.

Table of Contents

CERTAIN MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES

The following is a general summary of certain material anticipated U.S. federal income tax consequences to a U.S. Holder and to a Non-U.S. Holder, each as defined below, and of certain material anticipated U.S. federal estate tax consequences to a Non-U.S. Holder, of the exchange of initial debt securities for exchange debt securities in accordance with the exchange offer, as well as the ownership and disposition of the exchange debt securities by U.S Holders and Non-U.S. Holders, each as defined below. This discussion is based on the U.S. Internal Revenue Code of 1986, as amended (the Code), Treasury regulations promulgated under the Code, administrative pronouncements or practices, and judicial decisions, all as of the date hereof. Future legislative, judicial, or administrative modifications, revocations, or interpretations, which may or may not be retroactive, may result in U.S. federal tax consequences significantly different from those discussed herein. This discussion is not binding on the U.S. Internal Revenue Service (the IRS). No ruling has been or will be sought or obtained from the IRS with respect to the classification of the exchange debt securities for U.S. federal income tax purposes or any of the U.S. federal tax consequences discussed herein. There can be no assurance that the IRS will not challenge any of the conclusions discussed herein or that a U.S. court will not sustain such a challenge.

This discussion does not address any U.S. federal alternative minimum tax; U.S. federal estate, gift, or other non-income tax except as expressly provided below; or any state, local, or non-U.S. tax consequences of the acquisition, ownership, or disposition of an exchange debt security. In addition, this discussion does not address the U.S. federal income tax consequences to beneficial owners of exchange debt securities subject to special rules, including, for example, beneficial owners that (i) are banks, financial institutions, or insurance companies, (ii) are regulated investment companies or real estate investment trusts, (iii) are brokers, dealers, or traders in securities or currencies, (iv) are tax-exempt organizations, (v) hold debt securities as part of hedges, straddles, constructive sales, conversion transactions, or other integrated investments, (vi) acquire debt securities as compensation for services, (vii) have a functional currency other than the U.S. dollar, (viii) use the mark-to-market method of accounting, or (ix) are U.S. expatriates.

As used in this discussion of certain U.S. federal income tax considerations, a Holder means a beneficial owner of an exchange debt security. A U.S. Holder means a Holder that is: (i) an individual citizen or resident of the United States for U.S. federal income tax purposes, (ii) a corporation or any other entity taxable as a corporation for U.S. federal income tax purposes organized under the laws of the United States, any State thereof or and the District of Columbia, (iii) an estate the income of which is subject to U.S. federal income tax regardless of its source, or (iv) a trust that (a) is subject to the primary jurisdiction of a court within the United States and for which one or more U.S. persons have authority to control all substantial decisions or (b) has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person. If a Holder is a partnership or any other entity taxable as a partnership for U.S. federal income tax purposes (a Partnership), the U.S. federal income tax consequences to an owner or partner in such Partnership generally will depend on the status of such owner or partner and on the activities of such Partnership. A Holder that is a Partnership and any owners or partners in such Partnership are urged to consult their own tax advisors regarding the U.S. federal income tax consequences of the acquisition, ownership, or disposition of an exchange debt security. As used herein, a Non-U.S. Holder means a Holder that is neither a U.S. Holder nor a Partnership.

This discussion assumes that an exchange debt security will be a capital asset, within the meaning of Section 1221 of the Code, in the hands of a Holder at all relevant times. This discussion also assumes that the initial debt securities were issued without original issue discount, and that a Holder did not purchase initial debt securities at a market discount that exceeded a statutorily defined de minimis amount or at a premium.

A HOLDER IS URGED TO CONSULT ITS OWN TAX ADVISOR REGARDING THE APPLICATION OF U.S. FEDERAL TAX LAWS TO ITS PARTICULAR CIRCUMSTANCES AND ANY TAX CONSEQUENCES ARISING UNDER THE LAWS OF ANY STATE, LOCAL, NON-U.S., OR OTHER TAXING JURISDICTION OR UNDER ANY APPLICABLE TAX TREATY.

Tax Considerations Applicable to U.S. Holder and Non-U.S. Holders

An exchange of initial debt securities for exchange debt securities pursuant to the registration rights agreement will not be a taxable exchange for U.S. federal income tax purposes, and a Holder will not recognize any gain or loss on such exchange. Following an exchange of initial debt securities for exchange debt securities pursuant to such registration rights agreement, a Holder s holding period in its exchange debt securities will include its holding period in the debt securities exchanged therefor, and a Holder s tax basis in its exchange debt securities will equal its adjusted tax basis in the initial debt securities exchanged therefor immediately before such exchange. The U.S. federal income tax consequences of a Holder s ownership or disposition of an exchange debt security generally will be the same as the U.S. federal income tax consequences of a Holder s ownership or disposition of an initial debt security.

Tax Considerations for a U.S. Holder

Payments of Interest

Stated interest on an exchange debt security generally will be taxable to a U.S. Holder as ordinary income at the time it accrues or is received in accordance with a U.S. Holder s method of accounting for U.S. federal income tax purposes.

Payments on Early Redemptions

In certain circumstances (see Description of the Debt Securities and the Guarantees Optional Redemption) we may be entitled to redeem exchange debt securities before their stated maturity date. Because we believe that there is only a remote chance that such redemption will occur, we do not intend to treat such potential redemptions as part of or affecting the yield to maturity of any debt security under applicable Treasury regulations. That is, we intend to take the position that the exchange debt securities are not contingent payment debt instruments. In the event that such a contingency occurs, it would affect the amount and timing of the income that a U.S. Holder will recognize. Our determination that this contingency is remote is binding on a U.S. Holder unless such U.S. Holder discloses a contrary position in the manner required by applicable Treasury regulations. Our determination is not binding on the IRS, and if the IRS were to challenge this determination, a U.S. Holder might be required to accrue income on an exchange debt security at a higher yield and to treat as ordinary income (rather than as capital gain) any income realized on the taxable disposition of an exchange debt security before the resolution of such contingencies.

Sale, Exchange, or Retirement of an Exchange Debt Security

A U.S. Holder generally will recognize gain or loss on the sale, exchange, retirement, or other taxable disposition of an exchange debt security in an amount equal to the difference between (i) the amount of cash plus the fair market value of any property received (other than any amount received in respect of accrued but unpaid interest not previously included in income, which will be taxable as ordinary income), and (ii) such U.S. Holder s adjusted tax basis in the exchange debt security. A U.S. Holder s adjusted tax basis in an exchange debt security generally will be its cost to such U.S. Holder (including the cost of initial debt securities exchanged therefore, as described above in Tax Considerations Applicable to U.S. Holder and Non-U.S. Holders). Gain or loss recognized on the sale, exchange, retirement, or other taxable disposition of an exchange debt security generally will be capital gain or loss, and will be long-term capital gain or loss if the U.S. Holder s holding period in such exchange debt security exceeds one year. Long-term capital gain is subject to tax at a reduced rate to a non-corporate U.S. Holder (which reduced rate is currently scheduled to expire on January 1, 2011). The deductibility of capital losses is subject to limitations.

Tax Considerations for a Non-U.S. Holder

The rules governing the U.S. federal income taxation of a Non-U.S. Holder are complex. A Non-U.S. Holder is urged to consult its own tax advisor regarding the application of U.S. federal tax laws, including any information reporting requirements, to its particular circumstances and any tax consequences arising under the laws of any state, local, non-U.S., or other taxing jurisdiction.

Table of Contents

U.S. Federal Income Tax

Payments of interest on an exchange debt security by us or our paying agent to a Non-U.S. Holder generally will not be subject to withholding of U.S. federal income tax if such interest will qualify as portfolio interest. Interest on an exchange debt security paid to a Non-U.S. Holder will qualify as portfolio interest if:

- for U.S. federal income tax purposes, such Non-U.S. Holder does not own directly or indirectly, actually or constructively, 10% or more of the total combined voting power of all classes of Company stock entitled to vote;
- for U.S. federal income tax purposes, such Non-U.S. Holder is not a controlled foreign corporation related directly or indirectly to us through stock ownership;
- such interest is not effectively connected with such Non-U.S. Holder s conduct of a trade or business in the United States (or, if certain income tax treaties apply, such interest is not attributable to a permanent establishment maintained by such Non-U.S. Holder within the United States);
- such Non-U.S. Holder is not a bank receiving interest described in Section 881(c)(3)(A) of the Code; and
- the certification requirement, described below, has been fulfilled with respect to such Non-U.S. Holder of the exchange debt security.

The certification requirement will be fulfilled if either (i) the Non-U.S. Holder provides to us or our paying agent an IRS Form W-8BEN (or successor form), signed under penalty of perjury, that includes such Non-U.S. Holder s name, address, and a certification as to its non-U.S. status, or (ii) a securities clearing organization, bank, or other financial institution that holds customers securities in the ordinary course of its trade or business holds the exchange debt security on behalf of such Non-U.S. Holder, and provides to us or our paying agent a statement, signed under penalty of perjury, in which such organization, bank, or other financial institution certifies that it has received an IRS Form W-8BEN (or successor form) from such Non-U.S. Holder or from another financial institution acting on behalf of such Non-U.S. Holder and provides to us or our paying agent a copy thereof. Other methods might be available to satisfy the certification requirement depending on a Non-U.S. Holder s particular circumstances.

The gross amount of any payment of interest on a Non-U.S. Holder s exchange debt security that does not qualify for the portfolio interest exception will be subject to withholding of U.S. federal income tax at the statutory rate of 30% unless (i) such Non-U.S. Holder provides a properly completed IRS Form W-8BEN (or successor form) claiming an exemption from or reduction in withholding of U.S. federal income tax under an applicable income tax treaty, or (ii) such interest is effectively connected with the conduct of a U.S. trade or business (and, if required by an applicable income tax treaty, is attributable to a U.S. permanent establishment) by such Non-U.S. Holder and such Non-U.S. Holder provides a properly completed IRS Form W-8ECI (or successor form).

Subject to the discussion below concerning backup withholding, a Non-U.S. Holder generally will not be subject to U.S. federal income tax or to withholding of U.S. federal income tax on any gain realized on the sale, exchange, redemption, retirement, or other disposition of an exchange debt security unless (i) such Non-U.S. Holder is an individual present in the United States for 183 days or more in the taxable year of such disposition and other applicable conditions are met, or (ii) such gain is effectively connected with the conduct of a U.S. trade or business by such Non-U.S. Holder and, if required by an applicable income tax treaty, is attributable to a U.S. permanent establishment maintained by such Non-U.S. Holder.

If a Non-U.S. Holder is engaged in a U.S. trade or business and interest on an exchange debt security or gain realized on the disposition of an exchange debt security is effectively connected with the conduct of such U.S. trade or business (and, if required by an applicable income tax treaty, is attributable to a U.S. permanent establishment), such Non-U.S. Holder generally will be subject to regular U.S. federal income tax on such interest and gain on a net income basis at graduated rates in the same manner as if such Non-U.S. Holder were a U.S. Holder, unless an applicable income tax treaty provides otherwise. In addition, if such

Table of Contents

Non-U.S. Holder is a non-U.S. corporation, (i) such interest and gain will be included in the non-U.S. corporation s earnings and profits, and (ii) such non-U.S. corporation may be subject to the branch profits tax on its effectively connected earnings and profits for the taxable year, subject to certain adjustments, at the statutory rate of 30% unless such rate is reduced or the branch profit tax is eliminated by an applicable tax treaty. Although such effectively connected income will be subject to U.S. federal income tax, and may be subject to the branch profits tax, it generally will not be subject to withholding of U.S. federal income tax if a Non-U.S. Holder provides a properly completed IRS Form W-8ECI (or successor form).

In certain circumstances (see Description of the Debt Securities and the Guarantees Optional Redemption), we may become obligated to make additional payments to Holders of the exchange debt securities. If any such additional payments are made, they may be treated as interest subject to the rules described above, or as other income subject to U.S. federal withholding tax. Although the matter is not free from doubt, we may treat such payments made to Non-U.S. holders as subject to U.S. federal withholding tax at a rate of 30 percent subject to reduction or exemption (a) by an applicable treaty if the Non-U.S. holder provides an IRS From W-8BEN certifying that it is entitled to such treaty benefits or (b) upon the receipt of an IRS Form W-8EC1 from a Non-U.S. holder claiming that such payments are effectively connected with the conduct of a trade or business in the United States. Non-U.S. Holders are urged to consult their own tax advisors regarding the U.S. federal income tax consequences of any such contingent payments.

U.S. Federal Estate Tax

An exchange debt security held or treated as held by an individual who is a non-resident of the U.S. (as specially defined for U.S. federal estate tax purposes) at the time of his or her death will not be subject to U.S. federal estate tax, provided that (i) the interest on such exchange debt security is exempt from withholding of U.S. federal income tax under the portfolio interest exemption discussed above (without regard to the certification requirement), and (ii) interest on such exchange debt security is not effectively connected with the conduct of a U.S. trade or business by such individual. An individual may be a Non-U.S. Holder but not a non-resident of the U.S. for U.S. federal estate tax purposes. A Non-U.S. Holder that is an individual is urged to consult its own tax advisor regarding the possible application of the U.S. federal estate tax to its particular circumstances, including the effect of any applicable treaty.

Tax Considerations for Each Holder

Information Reporting and Backup Withholding

A Holder may be subject, under certain circumstances, to information reporting and/or backup withholding at the applicable rate (currently 28%) with respect to certain payments of principal of, and interest on, an exchange debt security, and the proceeds of a disposition of an exchange debt security before maturity. Backup withholding may apply to a U.S. Holder that (i) fails to furnish its taxpayer identification number (TIN), which for an individual is his or her social security number, within a reasonable time after a request therefor, (ii) furnishes an incorrect TIN, (iii) is notified by the IRS that it failed properly to report certain interest or dividends, or (iv) fails, under certain circumstances, to provide a certified statement, signed under penalty of perjury, that it is a U.S. person, that the TIN provided is correct, and that it has not been notified by the IRS that it is subject to backup withholding. The application for exemption is available by providing a properly completed IRS Form W-9. These requirements generally do not apply with respect to certain U.S. Holders, including corporations, tax-exempt organizations, qualified pension and profit sharing trusts, certain financial institutions and individual retirement accounts.

We generally must report to the IRS and to a Non-U.S. Holder the amount of interest on exchange debt securities paid to such Non-U.S. Holder and the amount of any tax withheld in respect of such interest payments. Copies of information returns that report such interest payments and any withholding of U.S. federal income tax may be made available to tax authorities in a country in which a Non-U.S. Holder is a resident under the provisions of an applicable

income tax treaty.

Backup withholding is not an additional tax. Any amount withheld from a payment to a U.S. Holder under the backup withholding rules will be allowed as credit against such U.S. Holder s U.S. federal income

tax liability and may entitle such U.S. Holder to a refund, provided that the required information is timely furnished to the IRS. A U.S. Holder is urged to consult its own tax advisor regarding the application of information reporting and backup withholding in its particular circumstances, the availability of an exemption from backup withholding, and the procedure for obtaining any such available exemption.

If a Non-U.S. Holder provides the applicable IRS Form W-8BEN or other applicable form (together with all appropriate attachments, signed under penalties of perjury, and identifying such Non-U.S. Holder and stating that it is not a U.S. person), and we or our paying agent, as the case may be, has neither actual knowledge nor reason to know that such Non-U.S. Holder is a U.S. person, then such Non-U.S. Holder will not be subject to U.S. backup withholding with respect to payments of principal or interest on exchange debt securities made by us or our paying agent. Special rules apply to pass-through entities and this certification requirement may also apply to beneficial owners of pass-through entities.

Payment of the proceeds of a disposition of an exchange debt security by a Non-U.S. Holder made to or through a U.S. office of a broker generally will be subject to information reporting and backup withholding unless such Non-U.S. Holder (i) certifies its non-U.S. status on IRS Form W-8BEN (or successor form) signed under penalty of perjury, or (ii) otherwise establishes an exemption. Payment of the proceeds of a disposition of an exchange debt security by a Non-U.S. Holder made to or through a non-U.S. office of a non-U.S. broker generally will not be subject to information reporting or backup withholding unless such non-U.S. broker is a U.S. Related Person (as defined below). Payment of the proceeds of a disposition of an exchange debt security by a Non-U.S. Holder made to or through a non-U.S. office of a U.S. broker or a U.S. Related Person generally will not be subject to backup withholding, but will be subject to information reporting, unless (i) such Non-U.S. Holder certifies its non-U.S. status on IRS Form W-8BEN (or successor form) signed under penalty of perjury, or (ii) such U.S. broker or U.S. Related Person has documentary evidence in its records as to the non-U.S. status of such Non-U.S. Holder and has neither actual knowledge nor reason to know that such Non-U.S. Holder is a U.S. person.

For this purpose, a U.S. Related Person is (i) a controlled foreign corporation for U.S. federal income tax purposes, (ii) a non-U.S. person 50% or more of whose gross income from all sources for the three-year period ending with the close of its taxable year preceding the payment (or for such part of the period that the broker has been in existence) is derived from activities that are effectively connected with the conduct of a U.S. trade or business, or (iii) a non-U.S. partnership if at any time during its taxable year one or more of its partners are U.S. persons who, in the aggregate, hold more than 50% of the income or capital interest of the partnership or if, at any time during its taxable year, the partnership is engaged in the conduct of a U.S. trade or business.

Backup withholding is not an additional tax. Any amount withheld from a payment to a Non-U.S. Holder under the backup withholding rules will be allowed as a credit against such Non-U.S. Holder s U.S. federal income tax liability and may entitle such Non-U.S. Holder to a refund, provided that certain required information is timely furnished to the IRS. A Non-U.S. Holder is urged to consult its own tax advisor regarding the application of information reporting and backup withholding in its particular circumstances, the availability of an exemption from backup withholding, and the procedure for obtaining any such available exemption.

The foregoing discussion is for general information only and is not tax advice. Accordingly, you should consult your tax advisor as to the particular tax consequences to you of purchasing, holding and disposing of the exchange debt securities, including the applicability and effect of any state, local, or non-U.S. tax laws and any tax treaty and any recent or prospective changes in any applicable tax laws or treaties.

Table of Contents

PLAN OF DISTRIBUTION

Each broker-dealer that receives exchange debt securities for its own account pursuant to the exchange offer in exchange for initial debt securities acquired by such broker-dealer as a result of market making or other trading activities may be deemed to be an underwriter within the meaning of the Securities Act and, therefore, must deliver a prospectus meeting the requirements of the Securities Act in connection with any resales, offers to resell or other transfers of the exchange debt securities received by it in connection with the exchange offer. Accordingly, each such broker-dealer must acknowledge that it will deliver a prospectus meeting the requirements of the Securities Act in connection with any resale of such exchange debt securities. The letter of transmittal states that by acknowledging that it will deliver and by delivering a prospectus, a broker-dealer will not be deemed to admit that it is an underwriter within the meaning of the Securities Act. This prospectus, as it may be amended or supplemented from time to time, may be used by a broker-dealer in connection with resales of exchange debt securities received in exchange for initial debt securities where such initial debt securities were acquired as a result of market-making activities or other trading activities. We have agreed that, for a period of 180 days after the expiration of this exchange offer, we will make this prospectus, as amended or supplemented, available to any broker-dealer for use in connection with any such resale.

We will not receive any proceeds from any sale of exchange debt securities by broker-dealers. Exchange debt securities received by broker-dealers for their own account pursuant to the exchange offer may be sold from time to time in one or more transactions in the over-the-counter market, in negotiated transactions, through the writing of options on the exchange debt securities or a combination of such methods of resale, at market prices prevailing at the time of resale, at prices related to such prevailing market prices or negotiated prices. Any such resale may be made directly to purchasers or to or through brokers or dealers who may receive compensation in the form of commissions or concessions from any such broker-dealer and/or the purchasers of any such exchange debt securities. Any broker-dealer that resells exchange debt securities that were received by it for its own account pursuant to the exchange offer and any broker or dealer that participates in a distribution of such exchange debt securities may be deemed to be an underwriter within the meaning of the Securities Act and any profit of any such resale of exchange debt securities and any commissions or concessions received by any such persons may be deemed to be underwriting compensation under the Securities Act. The letter of transmittal states that by acknowledging that it will deliver and by delivering a prospectus, a broker-dealer will not be deemed to admit that it is an underwriter within the meaning of the Securities Act.

LEGAL MATTERS

Paul, Weiss, Rifkind, Wharton & Garrison LLP, New York, New York, will opine that the exchange debt securities and guarantees are binding obligations of the registrants. Paul, Weiss, Rifkind, Wharton & Garrison LLP has represented us and our related parties from time to time.

EXPERTS

Ernst & Young LLP, an independent registered public accounting firm, has audited our consolidated financial statements, schedule and supplementary information at December 31, 2006 and 2005, and for each of the three years in the period ended December 31, 2006, as set forth in their report. We have included our financial statements, schedule and supplementary information in the prospectus and elsewhere in the registration statement in reliance on Ernst & Young LLP s report, given on their authority as experts in accounting and auditing.

The consolidated financial statements of Adelphia as of December 31, 2005 and 2004 and for each of the three years in the period ended December 31, 2005 included in this prospectus have been so included in reliance on the report (which contains an explanatory paragraph relating to Adelphia s ability to continue as a going concern as described in Note 2 to the consolidated financial statements) of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

The Special-Purpose Combined Carve-Out Financial Statements of the Los Angeles, Dallas & Cleveland Cable System Operations (A Carve-Out of Comcast Corporation) as of December 31, 2005 and 2004 and for each of the three years in the period ended December 31, 2005 included in this prospectus and registration statement have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report appearing herein and elsewhere in the registration statement (which report expresses an unqualified opinion on the financial statements and includes an explanatory paragraph referring to a discussion of the basis of presentation of the combined financial statements) and has been so included in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We are subject to the informational requirements of the Exchange Act and file reports, proxy statements and other information with the SEC. We have also filed with the SEC a registration statement on Form S-4 to register the exchange debt securities. This prospectus, which forms part of the registration statement, does not contain all of the information included in that registration statement. For further information about us and the exchange debt securities offered in this prospectus, you should refer to the registration statement and its exhibits. You may read and copy any document we file with the SEC at the SEC s Public Reference Room, 100 F Street, N.E., Washington, D.C. 20549. Copies of these reports, proxy statements and information may be obtained at prescribed rates from the Public Reference Section of the SEC at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the Public Reference Room. In addition, the SEC maintains a web site that contains reports, proxy statements and other information regarding registrants, such as us, that file electronically with the SEC. The address of this web site is http://www.sec.gov.

Anyone who receives a copy of this prospectus may obtain a copy of the Indenture without charge by writing to Investor Relations, Time Warner Cable Inc., One Time Warner Center, North Tower, New York, NY 10019.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of
Time Warner Cable Inc.

We have audited the accompanying consolidated balance sheets of Time Warner Cable Inc. (the Company) as of December 31, 2006 and 2005, and the related consolidated statements of operations, shareholders equity and cash flows for each of the three years in the period ended December 31, 2006. Our audits also included the Financial Statement Schedule II and Supplementary Information listed in the index at Item 21(b). These financial statements, schedule and supplementary information are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements, schedule and supplementary information based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Time Warner Cable Inc. at December 31, 2006 and 2005, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule and supplementary information, when considered in relation to the basic financial statements taken as a whole, present fairly in all material respects the information set forth therein.

As discussed in Notes 1 and 3, the Company adopted Financial Accounting Standards Board Statement No. 123R, *Share-Based Payment,* as of January 1, 2006 using the modified-retrospective application method and adopted Financial Accounting Standards Board Statement No. 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Benefits,* as of December 31, 2006.

[a] Includes income from discontinued operations of $1.038 billion, $104 million and $95 million for the years ended December 31, 2006, 2005 and 2004, respectively. Income from discontinued operations in 2006 includes gains, net of taxes, of approximately $965 million. After considering adjustments related to discontinued operations, net cash flows from discontinued operations were $112 million, $237 million and $240 million for the years ended December 31, 2006, 2005 and 2004, respectively.

[b] Borrowings (repayments), net, reflect borrowings under the Company s commercial paper program with original maturities of three months or less, net of repayments of such borrowings. Borrowings (repayments), net, also included $17 million of debt issuance costs for the year ended December 31, 2006.

[c] Includes net borrowings of $9.875 billion in 2006, which financed, in part, the cash portions of payments made in the acquisition of certain cable systems of Adelphia Communications Corporation and the redemption of Comcast Corporation s interests in TWC and TWE.
