MERCHANTS GROUP, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Principles of Consolidation and Basis of Presentation

The consolidated balance sheet as of September 30, 2006 and the related consolidated statements of operations and comprehensive income for the three and nine month periods ended September 30, 2006 and 2005, and changes in stockholders' equity and cash flows for the nine months ended September 30, 2006 and 2005, respectively, are unaudited. In the opinion of management, these interim financial statements reflect all adjustments necessary for a fair presentation of financial position and results of operations. Such adjustments consist only of normal recurring items. Interim results are not necessarily indicative of results for a full year.

The consolidated financial statements include the accounts of Merchants Group, Inc. (the Company), its wholly-owned subsidiary, Merchants Insurance Company of New Hampshire, Inc. (MNH), and M.F.C. of New York, Inc., an inactive premium finance company which is a wholly-owned subsidiary of MNH. The accompanying consolidated financial statements should be read in conjunction with the following notes and the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2005.

The consolidated financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) which differ in some respects from those followed in reports to insurance regulatory authorities. All significant intercompany balances and transactions have been eliminated.

2. Related Party Transactions

The Company and MNH operate and manage their business in conjunction with Merchants Mutual Insurance Company (Mutual) under a services agreement (the Services Agreement) that became effective January 1, 2003. At September 30, 2006 Mutual owned 11.9% of the Company's issued and outstanding common stock. The Company and MNH do not have any operating assets or employees. Under the Services Agreement, Mutual provides the Company and MNH with the facilities, management and personnel required to operate their day-to-day business. The Services Agreement covers substantially the same services previously provided under a management agreement among the Company, MNH and Mutual from 1986 to 2002. The Services Agreement provides for negotiated fees (subject to periodic adjustment) for administrative, underwriting, claims and investment management services.

As of January 1, 2003 MNH and Mutual entered into a reinsurance pooling agreement (the Reinsurance Pooling Agreement) that provides for the pooling, or sharing, of the insurance business traditionally written by Mutual and MNH. The Reinsurance Pooling Agreement applies to premiums earned and losses incurred on or after its effective date.

Table of Contents

The Financial Statements include supplemental disclosure of affiliate balances, which represent the effects of the Services Agreement and the Reinsurance Pooling Agreement. In certain instances, particularly for Net losses and loss adjustment expenses, the affiliate amount may exceed the amount presented in the line item, because of changes in estimates for reserves for losses and loss adjustment expenses (LAE) prior to the effective date of the Reinsurance Pooling Agreement.

The terms of these agreements are more fully described under the heading Administration in Part I, Item 1, Business, in the Company's Annual Report on Form 10-K for the year ended December 31, 2005. In accordance with the terms of the Services Agreement in June 2005 the Company and MNH issued notice to Mutual to terminate the Investment and Cash Management Services Annex of the Services Agreement as of June 30, 2006. In June 2006, the Company and Mutual agreed that Mutual would continue to provide Investment and Cash Management Services to the Company on a month-to-month basis, subject to a thirty-day cancellation notice effective at the end of any calendar month. On September 29, 2006, the Company and MNH delivered a notice to Mutual confirming that the Company and MNH agreed that if Mutual gives them notice at any time prior to January 1, 2007 of the termination of the Administrative Services Annex to the Services Agreement effective March 31, 2007, neither the Company nor MNH will challenge the timeliness of the notice. The Services Agreement otherwise provides for a 180 days notice of termination for the Administrative Services Annex. The Services Annex to the Services Agreement provides for Mutual to provide the Company and MNH with administrative, accounting, bookkeeping, actuarial services, procurement of legal services related to insurance operations, internal audit services, and other administrative services.

3. Earnings Per Share

Basic and diluted earnings per share were computed by dividing net income by the weighted average number of shares of common stock outstanding during each period.

For diluted earnings per share, the weighted average number of shares outstanding was increased by the assumed exercise of options for the three and nine month periods ended September 30, 2005. The effect on the number of shares outstanding assumed the proceeds to the Company from exercise were used to purchase shares of the Company's common stock at its average market value per share during the period. The number of options assumed to be exercised and the incremental effect on average shares outstanding for purposes of calculating diluted earnings per share are shown below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	2006	2005
Options assumed exercised		31,500		31,500
Incremental shares outstanding		5,504		5,166

There were no options outstanding at September 30, 2006.

The Company is not affected by Statement of Financial Accounting Standards No. 123(R) entitled Share Based Payment as no share based payments were outstanding at September 30, 2006.

Table of Contents4. Reserve for Loss and Loss Adjustment Expenses

The following table presents the liability for reserves for losses and LAE separated into case reserves, reserves for losses incurred but not reported (IBNR) and reserves for LAE by major product:

	September 30, 2006	December 31, 2005
	(in thousands)	
Case reserves:		
Private passenger auto liability	\$ 5,851	\$ 6,072
Homeowners	1,453	1,899
Commercial auto liability	4,316	5,384
Workers compensation	13,830	14,531
Commercial package	10,462	12,739
General liability	693	505
Other	238	308
Total case reserves	36,843	41,438
IBNR:		
Private passenger auto liability	2,594	4,372
Homeowners	368	228
Commercial auto liability	6,855	6,396
Workers compensation	7,824	8,074
Commercial package	17,424	16,965
General liability	3,234	2,581
Other	(288)	(407)
Total IBNR	38,011	38,209
Reserve for LAE:		
Private passenger auto liability	1,523	2,004
Homeowners	500	604
Commercial auto liability	1,517	1,622
Workers compensation	1,880	2,104
Commercial package	10,219	11,493
General liability	4,031	3,668
Other	187	242
Total reserve for LAE	19,857	21,737
Subtotal	94,711	101,384
Reinsurance recoverables	12,469	13,807
Reserve for losses and LAE	\$ 107,180	\$ 115,191

Table of Contents

The reserve for losses and LAE at September 30, 2006 included \$15,134,000 of reserves for the 1996 and prior accident years. Reserves related to workers compensation comprised \$9,563,000 of this amount at September 30, 2006. The following table presents workers compensation claim count and paid loss data for accident years older than ten years as of each date:

	For the nine months ended September 30, 2006	For the year ended December 31, 2005
	(dollars in thousands)	
Number of claims pending, beginning of period	84	92
Number of claims reported		
Number of claims settled or dismissed		(16)
Number of claims pending, end of period	84	76
Losses paid (\$000 s)	\$ 538	\$ 599
Loss settlement expenses paid (\$000 s)	\$ 33	\$ 33

The workers compensation claims consist primarily of reserves for the estimated cost of lifetime medical care for injured claimants. In developing the reserves for such claimants, the Company estimates the nature, frequency and duration of future medical treatments and pharmaceutical usage, in some instances for the lifetime of the claimant. Periodic reevaluation of these factors, based on new information on the claimant or changes in medical procedures, devices or pharmaceuticals, may result in changes in estimates for individual claims that are significant to the Company.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

ENTRY INTO MERGER AGREEMENT

On October 31, 2006, the Company entered into an Agreement and Plan of Merger (the "Merger Agreement") with American European Group, Inc., a Delaware corporation (AEG), and American European Financial, Inc., a newly-formed Delaware corporation that is a wholly owned subsidiary of AEG (Merger Sub), pursuant to which Merger Sub will merge with and into the Company, with the Company surviving the merger. Upon completion of the merger, the Company will be a wholly owned subsidiary of AEG. In the merger, each of the Company's issued and outstanding shares of common stock will be converted into the right to receive \$33.00 per share in cash. The total consideration for the acquisition of the Company will be approximately \$70.8 million.

The board of directors of the Company unanimously (1) approved the merger and the Merger Agreement, (2) determined that the consideration to be paid in the Merger is fair to the Company's stockholders, and (3) resolved to recommend that the Company's stockholders approve the merger, the Merger Agreement, and the transactions contemplated by the Merger Agreement.

Completion of the merger is expected in the first quarter of 2007, subject to the receipt of required approval by the Company's stockholders and applicable regulatory approvals including approval of the New Hampshire Department of Insurance. The Merger Agreement also contains customary non solicitation, fiduciary out and termination provisions. The foregoing description of the Merger Agreement is qualified in its entirety by reference to the Merger Agreement, which was included as Exhibit 99.1 to the Company's Form 8-K Report filed on November 2, 2006.

Cautionary Statement

The Merger Agreement is incorporated in order to provide investors with complete information concerning its terms. Except for its status as a contractual document that establishes the legal relations among the parties to the Merger Agreement, the Merger Agreement is not intended to be a source of factual, business, or operational information about the parties.

Certain of the representations made by the parties to the Merger Agreement are subject to a standard of materiality that may be different from that which the Company's stockholders may view as material to their interests.

Representations may be used as a tool to allocate risks between the parties to the Merger Agreement, including where the parties do not have complete knowledge of all of the facts. Investors in the Company's securities are not third party beneficiaries under the Merger Agreement and should not rely on the representations and covenants or any descriptions thereof as characterizations of the actual state of facts or condition of the parties or any of their affiliates.

Table of Contents**Results of Operations for the Nine Months Ended September 30, 2006 As Compared to the Nine Months Ended September 30, 2005**

The following discussion should be considered in light of the statements under the heading Safe Harbor Statement under the Securities Litigation Reform Act of 1995, at the end of this Item. All capitalized terms used in this Item that are not defined in this Item have the meanings given to them in Notes to Consolidated Financial Statements contained in Item 1 of this Form 10-Q, which is incorporated herein by reference.

Results of operations for the nine months ended September 30, 2006 and 2005 reflect the effects of the Services Agreement and the Reinsurance Pooling Agreement among the Company and its wholly-owned insurance subsidiary, Merchants Insurance Company of New Hampshire, Inc. (MNH), and Merchants Mutual Insurance Company (Mutual), effective January 1, 2003. The Services Agreement calls for Mutual to provide underwriting, administrative, claims and investment services to the Company and MNH. The Reinsurance Pooling Agreement provides for the pooling, or sharing, of insurance business traditionally written by Mutual and MNH on or after the effective date. MNH's share of pooled (combined Mutual and MNH) premiums earned and losses and loss adjustment expenses (LAE) for 2006 in accordance with the Reinsurance Pooling Agreement is 25%, though not to exceed \$42,500,000 in net premiums written. MNH's share of pooled premiums earned and losses and LAE was 30% in 2005. The Reinsurance Pooling Agreement pertains to premiums earned and incurred losses and LAE. MNH's share of pooled premiums earned will be 25% in 2007, though not to exceed \$37,500,000 in net premiums written.

Total combined Mutual and MNH or group-wide direct premiums written (DWP) for the nine months ended September 30, 2006 were \$150,523,000, an increase of \$721,000, or less than 1%, from \$149,802,000 in 2005. The Company's pro-forma share of combined direct premiums written in 2006, in accordance with the Reinsurance Pooling Agreement, was \$37,631,000 compared to \$44,941,000 in 2005. The table below shows a comparison of direct premiums written by major category in 2006 and 2005:

Major Category	Group-wide DWP Nine months ended September 30,			MNH Pro-forma Share Nine months ended September 30,		
	2006 (000's omitted)	2005	Change	2006 (000's omitted) (25%)*	2005 (30%)*	Change
Voluntary Personal	\$ 27,045	\$ 30,730	(12%)	\$ 6,761	\$ 9,219	(27%)
Voluntary Commercial	110,326	100,440	10%	27,582	30,132	(8%)
Umbrella Program	12,177	16,292	(25%)	3,044	4,888	(38%)
Involuntary	975	2,340	(58%)	244	702	(65%)
Total Direct Written Premiums	\$ 150,523	\$ 149,802		\$ 37,631	\$ 44,941	(16%)

* Pooling
Percentages

The 12% (or \$3,685,000) decrease in group-wide voluntary personal DWP resulted from a 20% (or \$3,488,000) decrease in private passenger automobile (PPA) DWP. The decrease in PPA direct premiums written is the result of the companies' decision, implemented in 2002, not to write new policies in certain jurisdictions and to increased availability of this product from other competitors. As a result, voluntary PPA policies in force at September 30, 2006 decreased 17% to 12,838 from 15,484 at September 30, 2005.

Table of Contents

Group-wide voluntary commercial DWP increased \$9,886,000, or 10%, to \$110,326,000 for the nine months ended September 30, 2006, from \$100,440,000 for the nine months ended September 30, 2005. This increase resulted from period-to-period increases in every group-wide commercial product. The average premium per group-wide, non-Umbrella Program commercial lines policy increased 2% from the year earlier period. Total non-Umbrella Program commercial lines policies in force at September 30, 2006 were 38,067, an increase of 6% from 35,746 at September 30, 2005.

The monoline commercial umbrella program (the Umbrella Program) resulted in \$12,177,000 of DWP in the nine months ended September 30, 2006 compared to \$16,292,000 in the nine months ended September 30, 2005. This decrease resulted from increased competition from property casualty companies that have expanded their underwriting appetite to include commercial umbrella policies written in conjunction with the underlying property and liability policies. The Umbrella Program is marketed exclusively through one independent agent and approximately 95% of the premiums related to Umbrella Program Policies are reinsured with an A rated national reinsurer through a quota share reinsurance treaty.

The 58% decrease in group-wide involuntary DWP resulted primarily from a decrease in assignments from the New York Automobile Insurance Plan (NYAIP). DWP related to policies assigned from the NYAIP decreased to \$618,000 for the nine months ended September 30, 2006, compared to \$1,896,000 for the nine months ended September 30, 2005. The NYAIP provides coverage for individuals who are unable to obtain auto insurance in the voluntary market. Assignments from the NYAIP vary depending upon a company's PPA market share and the size of the NYAIP. The Company is unable to predict the volume of future assignments from the NYAIP.

Group-wide pooled net premiums written for 2006 were \$126,943,000, an increase of \$1,587,000, or 1%, from \$125,356,000 for the nine months ended September 30, 2005. This increase in group-wide net premiums written is primarily the result of \$721,000 increase in group-wide DWP. The Company's share of 2006 pooled net premiums written was \$27,587,000, a decrease of \$5,954,000, or 18%, from \$33,541,000 in 2005. The decrease in the Company's share of net premiums written resulted from the Company's decreased percentage participation in the Reinsurance Pooling Agreement for 2006 as compared to 2005.

Total revenues for the nine months ended September 30, 2006 were \$36,867,000, a decrease of \$6,179,000, or 14%, from \$43,046,000 for the nine months ended September 30, 2005.

The Company's share of pooled net premiums earned in accordance with the Reinsurance Pooling Agreement for the nine months ended September 30, 2006 was \$30,744,000, compared to \$36,899,000 for the nine months ended September 30, 2005. This \$6,155,000, or 17%, decrease in net premiums earned resulted from the Company's decreased participation in the Reinsurance Pooling Agreement for 2006 as compared to 2005.

Net investment income was \$5,869,000 for the nine months ended September 30, 2006, an increase of 2% from \$5,734,000 for the nine months ended September 30, 2005 primarily due to a 19 basis point (5%) increase in average portfolio yield somewhat offset by a 3% decrease in average portfolio assets.

Table of Contents

Net losses and LAE were \$15,501,000 for the nine months ended September 30, 2006, a decrease of \$3,484,000, or 18%, from \$18,985,000 for the nine months ended September 30, 2005. The decrease in net losses and LAE was due to the 17% decrease in net premiums earned, which reduced net losses and LAE by \$3,167,000, and a 1.1 percentage point decrease in the loss and LAE ratio to 50.4% for the nine months ended September 30, 2006 from 51.5% for the nine months ended September 30, 2005.

The 1.1 percentage point decrease in the loss and LAE ratio resulted from a \$3,334,000 decrease in 2006 in the Company's estimate of losses and LAE occurring in prior accident years, which reduced the loss and LAE ratio by 10.8 percentage points, compared to a \$3,785,000 decrease in 2005 in its estimate of losses and LAE occurring in prior years, which reduced the loss and LAE ratio by 10.2 percentage points, and a decrease in the loss and LAE ratio for the current accident year to 61.3% in 2006 from 61.7% in 2005.

The reserve development for each product and for each accident year during 2006 was within the range of reasonably likely reserves by product as of December 31, 2005. It is not appropriate to project future increases or decreases in the estimate of losses and LAE for prior accident years from past experience. See "Critical Accounting Policies" for a further discussion of the Company's Reserves for Losses and LAE. The following table documents the changes in the estimate of losses and LAE related to prior accident years recorded in 2006 for the Company's primary products:

Accident Year	Homeowners	Commercial					All Other	Total
		PPA Liability	Auto Liability	Workers Compensation	Commercial Package	General Liability		
Prior to								
2003	\$ 230	\$ (107)	\$ 33	\$ (144)	\$ (954)	\$ 668	\$ 63	\$ (211)
2003	20	(234)	120	189	(912)	(37)	32	(822)
2004	(46)	(231)	9	(538)	(752)	292	14	(1,252)
2005	156	(242)	(43)	(342)	(485)	(128)	35	(1,049)
Total	\$ 360	\$ (814)	\$ 119	\$ (835)	\$ (3,103)	\$ 795	\$ 144	\$ (3,334)

The Company experienced \$3,103,000 of favorable loss development during 2006 related to its commercial package product. The Company made no significant changes to its procedures for processing or reserving its claims during 2006, and attributes the changes to its prior year reserves to the inherent uncertainty in estimating ultimate costs in circumstances that involve complex and changing conditions.

The Company experienced \$835,000 of favorable loss development during 2006 related to its workers' compensation product. This decrease in loss estimates for workers' compensation business is consistent with changes initiated by the Company in 2001 to reduce the concentration in its workers' compensation policy portfolio of classes of risk that are subject to high severity losses. Those underwriting changes have continued through 2006. The Company believes that it took several years for the absence of severe losses to become apparent, as the severity of such losses, if they were to occur, typically do not become apparent for several years.

The Company's reduction in its estimate of losses and LAE related to prior accident years during the nine months ended September 30, 2006 represented less than 3% of the recorded reserve for losses and LAE at December 31, 2005.

Table of Contents

The Company made no changes to the key assumptions used in evaluating the adequacy of its reserves for losses and LAE during the first nine months of 2006. A reasonable possibility exists in any reporting period that relatively minor fluctuations in the estimate of reserves for losses and LAE may have a significant impact on the Company's net income. This is due primarily to the size of the Company's reserves for losses and LAE (\$107,180,000 at September 30, 2006) relative to its net income. See "Critical Accounting Policies and Estimates" for a further discussion of the Company's Reserves for Losses and LAE.

The ratio of amortization of deferred policy acquisition costs and other underwriting expenses to net premiums earned was 46.3% for the nine months ended September 30, 2006 compared to 41.9% for the nine months ended September 30, 2005. Amortization of deferred acquisition costs decreased \$1,601,000, or 17%, compared to the year earlier period, consistent with the 17% decrease in net premiums earned. Other underwriting expenses as a percentage of net premiums earned increased by 4.4 percentage points to 20.3% in 2006 from 15.9% in 2005. Other underwriting expenses include retrospective commissions related to the Reinsurance Pooling Agreement, which provides for retrospective commission income or expense due from or to Mutual based on the estimated experience compared to a targeted loss and LAE ratio. Retrospective commission expense totaled \$2,642,000 (8.6 percentage points of the expense ratio) for the nine months ended September 30, 2006 compared to \$1,960,000 (5.3 percentage points of the expense ratio) for the nine months ended September 30, 2005.

Commissions (other than retrospective commissions under the Reinsurance Pooling Agreement), premium taxes and other state assessments that vary directly with the Company's premium volume represented 19.2% of net premiums earned in the nine month period ended September 30, 2006 compared to 19.6% of net premiums earned in the nine months ended September 30, 2005.

The Company's effective income tax rate was 29.3% for each of the nine month periods ended September 30, 2006 and 2005. This rate was calculated based upon the Company's estimate of its effective income tax rate for all of the applicable year. Non-taxable income, primarily tax-exempt income from fixed maturity investments, reduced the Company's effective income tax rate by approximately 5 percentage points in both 2006 and 2005.

Table of Contents**Results of Operations for the Three Months Ended September 30, 2006 As Compared to the Three Months Ended September 30, 2005**

Total combined Mutual and MNH DWP for the three months ended September 30, 2006 were \$49,886,000, an increase of \$624,000 from \$49,262,000 in 2005. The Company's pro-forma share of combined direct premiums written in 2006, in accordance with the Reinsurance Pooling Agreement, was \$12,472,000 compared to \$14,779,000 in 2005. The table below shows a comparison of direct premiums written by major category in 2006 and 2005:

Major Category	Group-wide DWP Three months ended September 30,			MNH Pro-forma Share Three months ended September 30,		
	2006 (000's omitted)	2005 (000's omitted)	Change	2006 (25%)* (000's omitted)	2005 (30%)* (000's omitted)	Change
Voluntary Personal	\$ 9,969	\$ 11,225	(11%)	\$ 2,492	\$ 3,368	(26%)
Voluntary Commercial	36,785	33,025	11%	9,196	9,908	(7%)
Umbrella Program	2,786	4,281	(35%)	697	1,284	(46%)
Involuntary	346	731	(53%)	87	219	(60%)
Total Direct Written Premiums	\$ 49,886	\$ 49,262	1%	\$ 12,472	\$ 14,779	(16%)

* Pooling
Percentages

The 11% (or \$1,256,000) decrease in group-wide voluntary personal DWP resulted from a 21% (or \$1,222,000) decrease in private passenger automobile (PPA) DWP. The decrease in PPA direct premiums written is the result of the companies' decision, implemented in 2002, not to write new policies in certain jurisdictions.

Group-wide voluntary commercial DWP increased \$3,760,000, or 11%, to \$36,785,000 for the three months ended September 30, 2006, from \$33,025,000 for the three months ended September 30, 2005. This increase resulted from period to period increases in every group-wide commercial product.

The Umbrella Program resulted in \$2,786,000 of DWP in the three months ended September 30, 2006 compared to \$4,281,000 in the three months ended September 30, 2005. This decrease in Umbrella Program DWP was due to the same factors that caused the decline in Umbrella Program DWP in the nine months ended September 30, 2006 as compared to the nine months ended September 30, 2005, discussed previously in this Item.

The 53% decrease in group-wide involuntary DWP resulted primarily from a decrease in assignments from the NYAIP. DWP related to policies assigned from the NYAIP decreased \$314,000, or 56%, to \$244,000 for the three months ended September 30, 2006, compared to \$558,000 for the three months ended September 30, 2005.

Group-wide pooled net premiums written for the three months ended September 30, 2006 were \$44,104,000, an increase of \$2,557,000, or 6% from \$41,547,000 for the three months ended September 30, 2005. This increase in group-wide net premiums written is due to the increase in group wide direct premiums written and the decrease in Umbrella Program DWP as a percentage of total DWP in 2006 as compared to 2005. Approximately 95% of Umbrella Program DWP are ceded to a reinsurer. The

Table of Contents

Company's share of 2006 pooled net premiums written was \$11,061,000, a decrease of \$1,403,000, or 11%, from \$12,464,000 in 2005. The decrease in the Company's net premiums written resulted from the Company's decreased percentage participation in the Reinsurance Pooling Agreement for 2006 as compared to 2005 somewhat offset by the 6% increase in group-wide net premiums written.

Total revenues for the three months ended September 30, 2006 were \$12,734,000, a decrease of \$1,474,000, or 10%, from \$14,208,000 for the three months ended September 30, 2005.

The Company's share of pooled net premiums earned in accordance with the Reinsurance Pooling Agreement for the three months ended September 30, 2006 was \$10,699,000, compared to \$12,155,000 for the three months ended September 30, 2005. This \$1,456,000, or 12%, decrease in net premiums earned resulted from the five percentage point decrease in the Company's participation in the Reinsurance Pooling Agreement somewhat offset by the 6% increase in pooled net premiums written.

Net investment income was \$1,923,000 for the three months ended September 30, 2006, an increase of 2% from \$1,890,000 for the three months ended September 30, 2005, primarily due to a 24 basis point, or 6%, increase in average portfolio yield somewhat offset by a 4% decrease in average portfolio assets.

Net losses and LAE were \$6,236,000 for the three months ended September 30, 2006, a decrease of \$838,000, or 12%, from \$7,074,000 for the three months ended September 30, 2005. The decrease in net losses and LAE was due to the 12% decrease in net premiums earned. The loss and LAE ratio was 58.3% for the three months ended September 30, 2006 compared to 58.2% for the three months ended September 30, 2005. The accident year loss and LAE ratio was 62.2% for the 2006 period compared to 65.7% in the third quarter of 2005. During the three months ended September 30, 2006 the Company recorded a \$421,000 decrease to its estimate of losses and LAE related to prior accident years (3.9 points of the loss and LAE ratio), compared to a \$896,000 decrease in the estimate of losses and LAE related to prior accident years recorded in 2005 (7.4 points of the loss and LAE ratio). The reasons for this decrease are discussed in the Results of Operations for the Nine Months Ended September 30, 2006 As Compared to the Nine Months Ended September 30, 2005: appearing earlier in this Item.

To enhance the statistical credibility of the Company's data, the Company performs its loss and LAE analysis for the current accident year on a year-to-date basis as of the end of each quarter of the year. As a result, the accident year net losses and LAE for each quarter is the difference between the current quarter year-to-date estimate and the prior quarter year-to-date estimate. Therefore, due to limited statistical credibility and absent a significant individual loss or a loss-causing event (such as a storm) it is not determinable whether the quarter-to-quarter change is due to new losses occurring during the current quarter, or changes in estimates for losses occurring in prior quarters. Accordingly, differences in current accident year quarterly loss and LAE ratios may not be indicative of improvement or deterioration in the Company's business.

The ratio of amortization of deferred policy acquisition costs and other underwriting expenses to net premiums earned increased to 45.3% for the three months ended September 30, 2006 from 38.3% for the three months ended September 30, 2005. Amortization of deferred acquisition costs decreased \$378,000, or 12% compared to the year earlier period. Other underwriting expenses as a percentage of net premiums earned increased by 7.0 percentage points due to an increase in retrospective commissions related to the Reinsurance Pooling Agreement. The commission is owed to Mutual based on a decrease during the third

Table of Contents

quarter of 2006 in the estimated cumulative loss and LAE ratio on the pooled business since the inception of the Reinsurance Pooling Agreement. Retrospective commission expense totaled \$769,000 (7.2 percentage points of the expense ratio) for the three months ended September 30, 2006 compared to \$107,000 (.9 percentage points of the expense ratio) for the three months ended September 30, 2005. Commissions (other than retrospective commissions under the Reinsurance Pooling Agreement), premium taxes and other state assessments that vary directly with the Company's premium volume represented 18.5% of net premiums earned in the three month period ended September 30, 2006 compared to 19.5% of net premiums earned in the three months ended September 30, 2005. The Company's effective income tax rate for the three months ended September 30, 2006 and 2005 was 29.8% and 30.7%, respectively. These rates were calculated based upon the Company's estimate of its full year effective income tax rate for each year. The effective income tax rates differed from the federal statutory rate of 34% primarily due to tax-exempt income from fixed maturity investments.

Critical Accounting Policies

Reserve for Losses and LAE

The Reserve for Losses and LAE is an estimate of the ultimate cost of settling all losses incurred and unpaid, including those losses not yet reported to the Company, and is stated net of reinsurance. The amount of loss reserves for reported claims is based upon a case-by-case evaluation of the circumstances pertaining to the claim and the policy provisions relating to the loss. Reserves for claims that have occurred but have not been reported (IBNR) to the Company and for the future costs of settling or adjusting claims are determined using commonly accepted actuarial techniques based on historical information for each of the Company's products, adjusted for current conditions. The Company's primary assumption when determining its reserves is that past experience, adjusted for the effect of current developments and trends, is relevant in predicting future events. When establishing its loss reserves, the Company analyzes historical data and estimates the impact of various loss development factors such as the historical loss experience of the Company and of the industry, the mix of products sold, trends in claim frequency and severity, the Company's claim processing procedures, changes in legislation, judicial decisions, legal developments, including the prevalence of litigation in the areas served by the Company, and changes in general economic conditions including inflation.

Management determines the amount of reserves for losses and LAE to be recorded based upon analyses prepared by the Company's internal and external actuaries and management's assessment of a reasonable amount of reserves. The reasonable estimate is determined after considering the estimates produced using a variety of actuarial techniques for each of the Company's products. The following is a summary of the methods used:

Table of Contents

Paid Loss Development

The paid loss development method is based on the assumption that past rates of claims payments are indicative of future rates of claims payments. An advantage of this method is that paid losses contain no case reserve estimates. Additionally, paid losses are not as greatly influenced by changes in claims reserving practices as are incurred losses. Estimates can be distorted if changes in claims handling practices or procedures cause an acceleration or deceleration in claims payments. Furthermore, paid loss development may produce biased estimates for long-tailed products where paid loss development factors are large at early evaluation points.

Incurred Loss Development

The incurred loss development method is based on the assumption that the past relative adequacy of case reserves is consistent with the current relative adequacy of case reserves. Because incurred losses include payments and case reserves, a larger volume of data is considered in the estimate of ultimate losses. As a result, incurred loss data patterns may be less erratic than paid loss data patterns, particularly for coverages on which claims are reported relatively quickly but have a long payout pattern. Because this method assumes that the relative adequacy of case reserves has been consistent, changes in claims handling procedures or the occurrence or absence of large losses may cause estimates to be erratic.

Bornhuetter-Ferguson with Premium and Paid Loss

The Bornhuetter-Ferguson (BF) with premium and paid loss method is a combination of the paid loss development method and an expected loss ratio assumption. The expected loss ratios are modified to the extent actual loss payments differ from payments expected based on the selected paid loss development pattern. This method avoids possible distortions resulting from a large development factor being applied to a small base of paid losses in order to estimate ultimate losses. This method will react slowly if actual ultimate losses differ substantially from losses inherent in the expected loss ratio.

Bornhuetter-Ferguson with Premium and Incurred Loss

The Bornhuetter-Ferguson (BF) with premium and incurred loss method is a combination of the incurred loss development method and an expected loss ratio assumption. The expected loss ratios are modified to the extent actual incurred losses differ from expected incurred losses based on the selected incurred loss development pattern. This method avoids possible distortions resulting from a large development factor being applied to a small base of incurred losses in order to estimate ultimate loss. This method will react slowly if actual ultimate losses differ substantially from losses inherent in the expected loss ratio.

Table of Contents

Ultimate Claims and Average Loss

This method multiplies the estimated number of ultimate claims by a selected ultimate average loss for each accident year to produce ultimate loss estimates. If loss development methods produce erratic or unreliable estimates, this method can provide more stable estimates, consistent with recent loss history. This method may produce erratic results if there has been a change in the way claims are counted or in the mix of types of loss. The occurrence or absence of large losses can also distort the average loss estimate.

ALAE are estimated separately from losses because ALAE payment patterns differ from loss payment patterns. The company employs the following methods to estimate ALAE reserves.

Paid ALAE Development

This method is analogous to the paid loss development method except paid ALAE is developed instead of paid losses. Paid ALAE patterns often are more stable than paid loss patterns. However, paid ALAE typically develop more slowly than paid losses, resulting in a large leveraging impact on less mature accident years.

Bornhuetter-Ferguson with Ultimate Loss and Paid ALAE

The Bornhuetter-Ferguson (BF) with ultimate loss and paid ALAE method is a combination of the paid ALAE development method and an expected ratio of ultimate ALAE to ultimate loss. The expected ALAE to loss ratios are modified to the extent paid ALAE differ from expected based on the selected paid ALAE development pattern. This method avoids possible distortions resulting from a large development factor being applied to a small base of paid ALAE in order to estimate ultimate ALAE. This is a useful method for estimating ultimate ALAE for less mature accident years.

Estimated ultimate losses and LAE and the resulting reserve for losses and LAE are determined based on the results of the methods described above along with the following considerations:

How results of methods based on paid losses compare to methods based on incurred losses.

How results of paid and incurred development methods compare to results of paid and incurred BF methods.

Whether diagnostic tests cause management to favor the results of one or more methods over the results of other methods. Such tests include:

closed claim to reported claim ratios

average case reserves per open claim

paid loss per closed claim

paid loss to incurred loss ratios

the reasonableness of ultimate loss & ALAE ratios and ultimate severities

management's consideration of other factors such as premium and loss trends, large loss experience, legislative and judicial changes and changes in underwriting guidelines and practices.

Table of Contents

To the extent these considerations result in changes to the Company's estimates of reserves for losses and LAE related to prior accident years, the Company recognizes such changes in the accounting period in which the change becomes known.

As stated previously, the above methods assume that past experience adjusted for the effects of current developments and trends is an appropriate basis for predicting future events. As a result of a number of factors, it is possible that ultimate actual payments for losses and LAE will differ from amounts contemplated in recorded reserves. A range of reasonably likely reserves by product as of September 30, 2006, net of reinsurance recoverables, developed by the Company's actuaries based on a variety of generally accepted actuarial methods is shown in the table below. Generally the low and the high values in the range represent reasonable minimum and maximum amounts of these actuarial indications using the methods described above.

Products*	Range of Net Loss & LAE Reserves (\$000's)		
	Low	Recorded	High
Personal Auto	\$ 8,836	\$10,029	\$ 11,369
Homeowners	\$ 1,842	\$ 2,320	\$ 2,801
Commercial Auto	\$ 9,554	\$12,766	\$ 16,252
Workers Compensation	\$20,270	\$23,533	\$ 27,337
Commercial General Liability	\$32,588	\$42,697	\$ 55,323
Commercial Property	\$ 2,523	\$ 3,364	\$ 4,205
Other	\$ 2	\$ 2	\$ 2
All Products	\$82,807	\$94,711	\$107,717

* The products shown in this table are those used by the Company in its loss reserving process. The Company's reserve for unpaid losses and LAE as appears in Note 4. in Item 1., are segregated by product type as defined in the Company's Annual Statement filed with insurance department regulators.

Because the reserve estimates by product are independent of each other it is highly unlikely that the low estimate or the high estimate for each product will occur at the same time. Accordingly, the low and the high estimates for All Products shown above are greater than the sum of the low estimates and less than the sum of the high estimates, respectively, resulting in a narrower range.

Despite the many factors considered in the reserving process, it is reasonably possible that actual payments for losses & LAE will differ from those contemplated in the Company's reserves. Such fluctuations could have a significant

impact on the Company's net income.

Deferred Policy Acquisition Costs

Policy acquisition costs, such as commissions (net of reinsurance commissions), premiums taxes and certain other underwriting expenses which vary directly with premium volume, are deferred and amortized over the terms of the related insurance policies. Deferred policy acquisition costs are evaluated on an aggregate basis at least annually, to determine if recorded amounts exceed estimated recoverable amounts after allowing for anticipated investment income. Premium deficiencies if any, are recorded as amortization of deferred policy acquisition costs. Actual amounts may vary from the Company's estimates.

Table of Contents

Investments

Fixed maturity investments are classified as available for sale and are carried at fair value. Net unrealized holding gains or losses, net of taxes, are shown as accumulated other comprehensive income. Investment income is recognized when earned, and gains and losses are recognized when investments are sold and in instances when a decline in the fair value of a security is determined to be other-than-temporary.

The Company's investment committee, comprised of the Chief Operating Officer, the Chief Investment Officer and the Chief Financial Officer, meets monthly and monitors the Company's investment portfolio for declines in value that are other-than-temporary. This assessment requires significant judgment. The investment committee considers the nature of the investment, the severity and length of the decline in fair value, events specific to the issuer including valuation modeling, overall market conditions, and the Company's intent and ability to retain the investment for a period of time sufficient to allow for any anticipated recovery in market value. When a decline in the fair value of a security is determined to be other-than-temporary, the Company adjusts the cost basis of that security to fair value, and records a corresponding charge to earnings. Future increases in fair value and future decreases in fair value if not other-than-temporary, are included in other comprehensive income.

Liquidity and Capital Resources

In developing its investment strategy the Company determines a level of cash and short-term investments which, when combined with expected cash flow, is estimated to be adequate to meet expected cash obligations. Due to declining written premiums however, the Company's operating activities have resulted in a use of cash each year since 2001. The Company's decreasing participation percentage in the pooled business over the remaining period of the Reinsurance Pooling Agreement will likely result in continued negative cash flows from operations. Net cash used in operations during the nine months ended September 30, 2006 was \$5,520,000. The Company believes that careful management of the relationship between assets and liabilities will minimize the likelihood that investment portfolio sales will be necessary to fund insurance operations, and that the effect of such sales, if any, on the Company's stockholders' equity will not be material.

The Company's objectives with respect to its investment portfolio include maximizing total return within investment guidelines while protecting policyholders' surplus and maintaining flexibility. The Company relies on premiums as a major source of cash, and therefore liquidity. Cash flows from the Company's investment portfolio, in the form of interest or principal payments as well as from the maturity of fixed income investments, are an additional source of liquidity.

The Company designates newly acquired fixed maturity investments as available for sale and carries these investments at fair value. Unrealized gains and losses related to these investments are recorded as accumulated other comprehensive income (loss) within stockholders' equity. At September 30, 2006, the Company recorded as accumulated other comprehensive loss in its Consolidated Balance Sheet \$2,517,000 of unrealized losses, net of taxes, associated with its investments.

Table of Contents

At September 30, 2006, the Company's portfolio of fixed maturity investments represented 90.9% of invested assets. Management believes that this level of fixed maturity investments is consistent with the Company's liquidity needs because it anticipates that cash receipts from net premiums written, investment income and maturing securities will enable the Company to satisfy its cash obligations. Furthermore, a portion of the Company's fixed maturity investments is invested in mortgage-backed and other asset-backed securities which, in addition to interest income, provide monthly paydowns of bond principal.

At September 30, 2006, \$84,198,000, or 52.7%, of the Company's fixed maturity portfolio was invested in mortgage-backed and other asset-backed securities. The Company invests in a variety of collateralized mortgage obligation (CMO) products but has not invested in the derivative type of CMO products such as interest only, principal only or inverse floating rate securities. All of the Company's CMO investments have a secondary market and their effect on the Company's liquidity does not differ from that of other fixed maturity investments.

At September 30, 2006 \$5,222,000, or 3%, of the Company's investment portfolio was invested in non-investment grade securities compared to \$6,123,000, or 3%, at December 31, 2005.

At September 30, 2006, the Company owed \$1,832,000 of retrospective commissions to Mutual in accordance with the Reinsurance Pooling Agreement. The Reinsurance Pooling Agreement requires the amount of retrospective commissions to be calculated and paid annually, six months after the end of each calendar year. The Company paid \$3,400,000 of retrospective commissions to Mutual during the three months ended September 30, 2006.

The Company has arranged for a \$2,000,000 unsecured credit facility from a bank. Any borrowings under this facility are payable on demand and carry an interest rate which can be fixed or variable and is negotiated at the time of each advance. This facility is available for general working capital purposes and for repurchases of the Company's common stock. At September 30, 2006 no amount was outstanding on this loan.

As a holding company, the Company is dependent on cash dividends from MNH to meet its obligations and to pay any cash dividends. MNH is subject to New Hampshire insurance laws which place certain restrictions on its ability to pay dividends without the prior approval of state regulatory authorities. These restrictions limit dividends to those that, when added to all other dividends paid within the preceding twelve months, would not exceed 10% of the insurer's statutory policyholders' surplus as of the preceding December 31st. The maximum amount of dividends that MNH could pay during any twelve month period ending in 2006 without the prior approval of the New Hampshire Insurance Commissioner is \$6,639,000. MNH paid \$1,200,000, \$800,000, \$600,000 and \$1,000,000 of dividends to the Company in October 2005, November 2005, December 2005 and August 2006, respectively. The Company paid cash dividends to its common stockholders of \$.75 per share during the nine months ended September 30, 2006 amounting to \$1,611,000. On November 8, 2006 the Company declared a quarterly cash dividend of \$.25 per share payable on December 1, 2006 to shareholders of record as of the close of business on November 24, 2006.

Table of Contents

Under the Services Agreement, Mutual has provided services and facilities for MNH to conduct its insurance business. The balance in the payable to or receivable from affiliate account represents the amount owing to or owed by Mutual by or to the Company for the difference between premiums collected and payments made for losses, commissions (including retrospective commissions), services and facilities by Mutual on behalf of MNH.

Regulatory guidelines suggest that the ratio of a property-casualty insurer's annual net premiums written to its statutory surplus should not exceed 3 to 1. MNH has consistently followed a business strategy that would allow it to meet this 3 to 1 regulatory guideline. For the first nine months of 2006, MNH's ratio of net premiums written to statutory surplus, annualized for a full year, was .5 to 1.

Recent Accounting Developments

In February 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments, an amendment to FASB Statements No. 133 and 140. SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation. It also clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133 and establishes a requirement to evaluate interests in securitized financial assets to identify interests that contain an embedded derivative requiring bifurcation. SFAS No. 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. As currently written, under SFAS No. 155 securities involving prepayable assets (e.g. mortgage-backed securities) that are issued from a securitization trust and that are obtained by an entity at a discount would be accounted for in one of two ways. Under the first allowable method, an entity would bifurcate the embedded derivative feature with respect to prepayment risk and record the bifurcated derivative at fair value. Subsequent changes in fair value of the bifurcated derivative would be reported in earnings. As an alternative, an entity could elect not to bifurcate the embedded derivative but instead record the entire security at fair value with subsequent changes in fair value of the security being reported in earnings. In recent redeliberations, the FASB has indicated its intention to issue new guidance to address this topic. The Company is evaluating the potential impact if any, of adopting SFAS No. 155 as of January 1, 2007.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in Generally Accepted Accounting Principles, and expands disclosures about fair value measurements. SFAS No. 157 applies under other accounting pronouncements that require or permit fair value measurements, but does not require any new fair value measurements. The definition of fair value is clarified by SFAS No. 157 to be the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Many of the Company's assets and liabilities are required to either be accounted for using fair value as their relevant measurement attribute. The Company does not believe the adoption of SFAS No. 157 will have a material impact on its financial condition or results of operations.

Table of Contents

In July 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized under SFAS No. 109, *Accounting for Income Taxes*. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of an uncertain tax position taken or expected to be taken in a tax return. FIN 48 is effective for fiscal years beginning after December 15, 2006. The cumulative effect of applying the provisions of FIN 48 shall be reported as an adjustment to the opening balance of retained earnings (or other appropriate components of equity or net assets) for that fiscal year. The Company does not believe the adoption of FIN 48 will have a material impact on its financial position or results of operations.

In September 2006, the Security and Exchange Commission (SEC) issued Staff Accounting Bulletin (SAB) No. 108 to require quantification of financial statement misstatements under both the rollover approach and the iron curtain approach. The rollover approach quantifies a misstatement based on the amount of the error originating in the current year income statement, but ignores the effects of correcting the portion of the current year balance sheet misstatement that originated in prior years. The iron curtain approach quantifies a misstatement based on the effects of correcting the misstatement based on the effects of correcting the misstatement existing in the balance sheet at the end of the current year, irrespective of the misstatement's year(s) of origination. The provisions of SAB No. 108 must be applied to financial statements for fiscal years ending after November 15, 2006. The Company does not anticipate that the quantification of financial statement misstatements pursuant to the provisions of SAB No. 108 will result in any material impact to the Company's financial statement at December 31, 2006.

Relationship with Mutual and Continuation of Operations

The Company and MNH operate and manage their business in conjunction with Mutual under the terms of the Services Agreement and Reinsurance Pooling Agreement described above. Reference is made to the description of the termination provisions of the Services Agreement and the Reinsurance Pooling Agreement that is provided under the sub-caption *Administration* under Part I, Item 1, of the Company's Form 10-K Report for the year ended December 31, 2005, which is incorporated herein by reference.

On June 12, 2006, the Company and MNH entered into an agreement with Mutual to extend the Investment and Cash Management Annex to the Services Agreement. The new agreement provides that the Annex, which would have terminated on June 30, 2006, will continue on a month to month basis and that either party may terminate the Annex on at least thirty days prior written notice.

On September 29, 2006, the Company and MNH delivered a notice to Mutual confirming that the Company and MNH agreed that if Mutual gives them notice at any time prior to January 1, 2007 of the termination of the Administrative Services Annex to the Services Agreement effective March 31, 2007, neither the Company nor MNH will challenge the timeliness of the notice. The Services Agreement otherwise provides for a 180 day notice of termination for the Administrative Services Annex. The Administrative Services Annex to the Services Agreement provides for Mutual to provide the Company and MNH with administrative, accounting, bookkeeping, actuarial services, procurement of legal services related to insurance operations, internal audit services, and other administrative services.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995:

With the exception of historical information, the matters and statements discussed, made or incorporated by reference in this Quarterly Report on Form 10-Q constitute forward-looking statements and are discussed, made or incorporated by reference, as the case may be, pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, statements relating to the Company's plans, strategies, objectives, expectations and intentions. Words such as believes, forecasts, intends, possible, expects, anticipates, estimates, or plans and similar expressions are intended to identify forward looking statements. Such forward-looking statements involve certain assumptions, risks and uncertainties that include, but are not limited to, those associated with factors affecting the property-casualty insurance industry generally, including price competition, the Company's dependence on state insurance departments for approval of rate increases; size and frequency of claims, escalating damage awards, natural disasters, fluctuations in interest rates and general business conditions; the Company's dependence on investment income; the geographic concentration of the Company's business in the northeastern United States and in particular in New York, New Hampshire, New Jersey, Rhode Island, Pennsylvania and Massachusetts; the adequacy of the Company's loss reserves; the Company's dependence on the general reinsurance market; government regulation of the insurance industry; exposure to environmental claims; dependence of the Company on its relationship with Mutual; and the other risks and uncertainties discussed or indicated in all documents filed by the Company with the Securities and Exchange Commission.

There may be other risks and uncertainties that we have not identified that may affect whether our forward-looking statements will prove accurate. New factors may emerge from time to time that cause our business not to develop as we predict, and it is not possible for us to predict all of them. You should not place undue reliance on forward-looking statements. Further, any forward-looking statement speaks only as of the date on which it is made and, except as required by law, the Company undertakes no obligation to update any forward-looking statement to reflect events or other circumstances after the date on which it is made or to reflect the occurrence of anticipated or unanticipated events or circumstances.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk

Market risk represents the potential for loss due to changes in the fair value of financial instruments. The market risk related to the Company's financial instruments primarily relates to its investment portfolio. The fair value of the Company's investment portfolio of \$175,672,000 at September 30, 2006 is subject to changes in interest rates and to a lesser extent on credit quality. Further, certain mortgage-backed and asset-backed securities are exposed to accelerated prepayment risk generally caused by interest rate movements. If interest rates were to decline, mortgage holders would be more likely to refinance existing mortgages at lower rates. Acceleration of future repayments could adversely affect future investment income, if reinvestment of the accelerated receipts was made in lower yielding securities.

The following table provides information related to the Company's fixed maturity investments at September 30, 2006. The table presents cash flows of principal amounts and related weighted average interest rates by expected maturity dates. The cash flows are based upon the maturity date or, in the case of mortgage-backed and asset-backed securities, expected payment patterns. Actual cash flows could differ from those shown in the table.

Table of ContentsFixed Maturities

Expected Cash Flows of Principal Amounts (\$ in 000 s):

	2006	2007	2008	2009	2010	There- after	TOTAL Amor- tized Cost	Esti- mated Market Value
Available for Sale								
U.S. Treasury securities and obligations of U.S. Government corporations and agencies	\$ 0	\$ 0	\$ 3,003	\$ 2,998	\$ 4,244	\$ 0	\$ 10,245	\$ 10,137
Average interest rate	0.0%	0.0%	3.2%	4.9%	4.8%	0.0%		
Obligations of states and political subdivisions	0	5,804	15,795	5,930	7,437	5,252	40,218	39,648
Average interest rate	0.0%	4.6%	3.9%	4.5%	5.0%	4.9%		
Corporate securities	0	0	3,246	7,750	5,154	9,851	26,001	25,728
Average interest rate	0.0%	0.0%	3.7%	4.9%	5.0%	5.9%		
Mortgage & asset backed securities	8,387	20,049	18,135	12,349	7,598	19,915	86,433	84,198
Average interest rate	4.8%	4.8%	4.8%	4.9%	4.9%	5.0%		
Total	\$ 8,387	\$ 25,853	\$ 40,179	\$ 29,027	\$ 24,433	\$ 35,018	\$ 162,897	\$ 159,711

The discussion and the estimated amounts referred to above include forward-looking statements of market risk which involve certain assumptions as to market interest rates and the credit quality of the fixed maturity investments. Actual future market conditions may differ materially from such assumptions. Accordingly, the forward-looking statements should not be considered projections of future events by the Company.

Item 4. Controls and Procedures

The Company's chief operating officer and chief financial officer, after evaluating the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities

Exchange Act of 1934) as of the end of the period covered by this report, concluded that the Company's disclosure controls and procedures were designed to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

There was no change in the Company's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rules 13a-15 or 15d-15 under the Securities Exchange Act of 1934 that occurred during the Company's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
